Other resolutions dealt with the following recommendations: the early presentation of the report of the National Employment Commission; Municipal exemption from sales, excise and stamp taxes; the introduction of an assisted plan of low-cost housing; the re-establishment of Dominion Government grants for technical education; assumption by the Dominion Government of "full responsibility for administration and finance of public assistance, including medical and hospital services, to all ex-service men and their dependents, such assistance to be on at least as high a scale as municipal relief;" endorsement of submission of Canadian Federation of Mayors to the Royal Commission on Dominion-Provincial relations; and urging upon the Dominion Government "the necessity for continuing legislation which would place the administration of unemployment relief on a more stabilized basis than as at present exists;" etc.

WAGES OF EMPLOYEES ON FARMS IN CANADA, 1929, AND 1934 TO 1937

THE Dominion Bureau of Statistics secures each year from its agricultural correspondents throughout Canada information as to the wages of employees on farms in Canada during the year just ended. The figures so secured are published in the *Monthly Bulletin of Agricultural Statistics* for the February of the Following year. Tables of these figures have appeared in the reports on Wages and Hours of Labour in Canada issued as supplements to the Labour Gazette for January, 1925 to 1938, inclusive, the first of these giving figures back to 1914. The accompanying table includes figures taken from the issue of the *Bulletin* for February, 1938, and from previous issues.

WAGES IN AGRICULTURE, 1929, 1934, 1935, 1936 AND 1937

COMPULSORY ARBITRATION IN AUSTRALIA

REFERENCES to arbitration and conciliation activities in Australia have been made from time to time in the Labour Gazette (October, 1927, page 1032; July, 1928, pages 706-8, and previous issues).

Recent phases of compulsory arbitration in Australia have been further reviewed in *The American Economic Review* for March, in an article entitled "Recent Experience With Compulsory Arbitration in Australia" by W. Rupert MacLaurin of the Massachusetts Institute of Technology.

In the introduction the writer refers to the comparatively long experience with compulsory arbitration in Australia, and draws attention to certain similarities between Australia and the United States—size of territory; wide varieties of climatic and occupational conditions and partially similar Constitutions, providing for a federal Supreme Court "which has preserved a somewhat similar division of powers between the federal and state departments."

Mr. MacLaurin then proceeds to deal with the development of the arbitration system in Australia which dates back to 1895 when the Labour Party added compulsory arbitration to its platform. The Commonwealth Court of Conciliation and Arbitration, "which is the most important arbitration tribunal in Australia" was established in 1904 in accordance with the provision of the Federal Constitution empowering the Commonwealth Parliament to make laws with respect to "conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one state." In addition to the commonwealth government each state has its own industrial laws and its own industrial tribunals. The Commonwealth Court has no power to arbitrate in disputes that are entirely confined to one state. Such disputes come under the jurisdiction of the state tribunals. The writer considered that "this dual system of arbitration has rendered the settlement of industrial disputes and the regulation of wages and conditions of work exceedingly complicated."

(The Commonwealth Court of Conciliation and Arbitration consists of a president who is a justice of the High Court and such deputy-presidents as may be appointed by the Governor General from among justices of the High Court or Judges of the Supreme Court of a State. The Court may appoint assessors, one representing each party to a dispute, for advisory purposes. In addition, many of the laws provide for the setting up of conciliation committees or for the calling together of compulsory conferences of employers and employees with a view to securing agreement in cases of dispute. Only in the event of such attempts failing is recourse made to compulsory arbitration. Where the machinery of conciliation results in agreement being reached, provision is generally made for registration of the agreement in which case its provisions have the same force as an award of the Court. Generally persons or organizations subject to awards of a Court are forbidden to undertake a strike or lockout under penalty of a fine—Labour Gazette, July, 1928, page 707.)

In appraising the record of compulsory arbitration in eliminating strikes and lockouts in Australia, Mr. MacLaurin states that it has been "somewhat disappointing." In this respect he observed: "Although a great number of cases reached a peaceful settlement through the arbitration machinery, the number of strikes and lockouts that took place in the same period (1916-1935) was also great. However, it is easy to obtain a distorted picture of the extent of these disputes. More than half of the loss of working days in disputes since 1916 has occurred in mining, an occupation which accounts for only a little over 2 per cent of the total breadwinners in Australia."

In the opinion of Mr. MacLaurin "the major weakness of the Australian arbitration method which is yet to be satisfactorily corrected, is its tendency to encourage litigation and advocacy, which prolongs cases and congests the courts," and the author refers to attempts which have been made in recent years to deal with this situation through the establishment of conciliation boards and committees in most of the States. These, he states, have been used more effectively in some jurisdictions than in others.

In New South Wales conciliation committees appointed by the government for each industry have become valuable adjuncts to the arbitration machinery. Each of these committees, consists of an equal number of representatives of employers and employees together with a special Conciliation Commissioner who is chairman of all committees. If a strike or lockout is threatened, the Commissioner is given power to summon the parties to the dispute before and to investigate the causes of the disagreement.

The Commissioner may elect to sit with or without the members of the committee for the industry in which a dispute has occurred. The function of the Commissioner is to endeavour to bring the members of the committee to agreement with respect to the

matters contained in any application to the Committee; or to bring to agreement the parties to the dispute where he is sitting without the members of the committee. When the Commissioner sits with the committee, a round table discussion ensues between men who are acquainted with the technical details of the industry. If an agreement can be reached on a part or the whole of the question in dispute, the agreement is forwarded to the Industrial Registrar. If the Registrar considers that it does not exceed the committee's powers, he assents to it, and it then has the effect of an award of the New South Wales Industrial Court. Where no agreement has been reached, the Conciliation Commissioner must refer the dispute to the Court.

Wage Determination

Dealing with the subject of wage determination, the writer continues:—

"The various arbitration acts in the Commonwealth and states give the arbitration court or wages boards power to prescribe minimum rates of wages. The court fixes the lowest sum payable to unskilled workers and to the various classes of skilled workers, leaving to free bargaining between the worker and his employer the extra amount to be paid to a worker who possesses special skill or other special qualifications in his class. While any worker in Australia has the right to refuse to work for any employer at the minimum wage, it is a violation of the Commonwealth Arbitration Act for individuals in combination to try to compel employers to pay more than the minimum rate.

"The Commonwealth Court also regulates hours of work for the workers that come under its jurisdiction. The general standard now accepted is 44 hours per week, although awards vary according to the industry. It is not the practice of the Court to reduce wages in an industry on account of a reduction in the weekly hours worked in that industry."

There then follows in the article, an analysis of the manner in which minimum wages have been determined and adjusted by the Commonwealth Court of Conciliation and Arbitration which has the dominant position in the Australian wage economy. The writer refers to the establishment of the first minimum wage in 1907 of 42 shillings per week for unskilled workers which became known as the "basic" wage. Margins above this were provided for skill or for other special reasons. Since 1907 he found that the tendency has been to bring an increasing proportion of employees under wage-fixing tribunals, but the basic wage has not been raised, except for a special increase of about 7 per cent in 1921. He pointed out that in order to maintain real wages from year to year the practice has grown up in the Commonwealth Court of adjusting wages to the cost of living every three or six months, according to the award, on the basis of a food and rent index number compiled by the Commonwealth Statistician for the city or town in which the persons affected were employed.

A special reduction in wages in 1931 was made after a careful inquiry into economic conditions had been made by the Commonwealth Court, the reduction award of the Court being 10 per cent of real wages.

Between 1931 and 1935, the Commonwealth Court reviewed the basic wage reduction on three occasions. This was in response to applications made by trade unions for the restoration of wages. In 1933 some slight concessions were made by changing "the index number on which cost-of-living adjustments were made from an index based on food, groceries and rent which covered only about 60 per cent of workmen's expenditures, to a more inclusive index number." In 1934 the Court adopted a new basis in calculating the basic wage. These two changes "had the effect of raising the basic wage by nearly 6 per cent."

In June, 1937, the Court declared that "the present degree of prosperity in the Commonwealth and the existing circumstances of industry made desirable appreciable increases in the basic wage. As a result, a prosperity "loading" was added which brought the new basic wage to a slightly higher level for Australia as a whole than it had been prior to the depression.

In conclusion Mr. MacLaurin considers that "the record of experience with compulsory arbitration in Australia is not sufficiently satisfactory to lend great encouragement to those who believe that the United States should undertake a similar experiment."

However, he is definite in declaring that "in the regulation of minimum wages we could profit perhaps by Australian experience," and that "so far as the method of adjusting the basic wage is concerned, I am inclined to believe that the Australian system of automatic regional cost-of-living adjustments checked periodically by reference to general economic conditions is the most practical method of administering a national minimum wage. The understanding of general economic conditions shown by the Commonwealth Court in recent years indicates that a properly administered minimum-wage law may add a valuable element of flexibility and control in the business cycle."

LABOUR STATISTICS FOR AUSTRALIA

The annual report of the Commonwealth Bureau of Census and Statistics, dealing chiefly with the year 1936, entitled "Labour Report, 1936, No. 27," was issued in December, 1937. Certain statistics for 1937 are also included. As in previous reports (the first of which was issued in 1912) it covers Prices, Wholesale and Retail, in Australia and in other Countries, Wages, and Hours of Labour, Employment and Unemployment, Industrial Accidents, Labour Organizations, and Employers' Associations.

The current figures as to prices and industrial disputes, which appear in each issue of the Quarterly Summary of Australian Statistics, have been given in the Labour Gazette in the quarterly table on prices and in the annual review of Strikes and Lockouts in Canada and Other Countries (Labour Gazette, March 1938, page 274.)

Adjustment of Basic Wage

A feature of the present report is an account of the use of the retail prices index numbers in connection with the adjustment of wages particularly in the awards by the Commonwealth Court of Conciliation and Arbitration established to deal with disputes in interstate industries in 1904. Beginning with the "Harvester Judgment" in 1907 when a "basic wage" was declared for unskilled labour in the agricultural implement industry, the principle of basing wage rates on such a basic rate with allowance for differences in work performed, skill required and also conditions in each industry has been followed by the court. The "basic rate" is the amount considered to be required by an unskilled labourer to support a household of about five persons on the basis of the normal needs of the average employee regarded as a human being living in a civilized community. From time to time the basic wage, seven shillings per day in 1907, was adjusted according to the official retail prices index. In 1919 as a result of representations by workers' organizations that the standard had not been scientifically determined, a Royal Commission was appointed to determine a fair basis. (Labour Gazette, April, 1921, page 599.) The commission reported about the end of 1920, and it appeared that a basic rate determined according to the information secured, would be so much above rates being paid that it would be impossible for the industries to meet it.

In 1921, however, the existing basic rate was increased by three shillings per week as an allowance for the "lag" in the periodic adjustment of rates in a period of rising prices. Until 1930 the wage rates were, therefore, adjusted on the revised basis according to the changes in the retail prices index number. In 1931 owing to the industrial depression the basic rate was reduced by ten per cent with the usual periodic revisions according to changes in the cost of living.

In accordance with a recommendation of the 1920 Commission, however, the Commonwealth Statistician included figures as to clothing and miscellaneous expenditures in the calculation of the retail prices index number which had covered only food, rent and fuel and light, and this was used from 1933 to 1937. The ten per cent reduction in the basic wage in 1931 had been restored in 1934 as a result of a special inquiry. In 1937 it was arranged that a new index number would be calculated by and under the direct control of the court, based on the index of the Commonwealth Statistician with special provision for adjustment by localities and for the application of "prosperity-loadings" adopted by the Commission. The "prosperity-loadings" were extra amounts of four to six shillings per week, varying according to industry, etc. These and the adjustments made in 1934 put the basic wage on a higher level than that of the "Harvester Judgment" of 1907. An article on the work of the Commonwealth Court, with references to the State Courts, appears elsewhere in this issue.

Child Allowances

In New South Wales child allowances have been paid since 1927 under an act of the state legislation passed in the session ending that year. The Act provided for a basic wage and for the payment of five shillings per week for each child to the extent required to bring the total earnings of a worker and his family up to the basic wage plus five shillings for each child. In 1929 The Act was amended to exclude one child. The amounts were paid from a fund created by a levy on wages paid by all employers. The rate rose from one per cent in 1930 to two per cent in 1931 and in 1932 was five pence in the pound on all wages above £3 per week. In 1932-33 £2,105,659 was paid to 63,072 families. Since January, 1934 the cost has been met from the Special Income and Wages Tax, used also for other social services.

In the Commonwealth Public Service allowances for children have been paid since 1920 following the report of the Basic Wage Commission. The allowance is five shillings per week for each dependent child under fourteen years of age with a limit of £400 per annum

on salary plus allowance. Since 1923 the funds have been raised by a deduction from the salaries of all adult officials. The limit has been raised to £500.

Wholesale and Retail Prices

The wholesale price index is based on prices in Melbourne in July 1914 as 1000 and the index was up to 2,178 in 1920 falling to 1,541 in 1922, recovering thereafter as in other countries but falling from 1,581 in 1929 to 1,235 in 1933. By March, 1937 the index had risen to 1,449.

A new retail prices index number was constructed following a conference of Commonwealth and State Statisticians in April, 1936. The list of articles covered was revised to eliminate and replace articles no longer in demand or found to be unsuitable for the measure of price changes and the "weights" were revised to conform with present day consumption. The methods of collecting price data were also improved. It was decided not to include fresh fish, fruits and vegetables, other than potatoes and onions, as comparable figures from season to season cannot be obtained. The base period was changed from prices in 1911 as 1000 to the use of average prices in 1923-1927. Index numbers are calculated for the capital cities in the six states and for 200 towns throughout the Commonwealth. The revised index numbers cover the period from 1907 to 1936. The figure for all groups and the capital cities of all the states dropped from 873 in 1931 to 804 in 1933, but rose to 876 by the third quarter of 1937. The conference also recommended that the Commonwealth Statistician should investigate the practicability of making a family budget inquiry at an early date.

Wages and Hours

The statistics of wages, collected since 1913, have been compiled primarily from awards, determinations and industrial agreements under Commonwealth and State Acts and from information as to union rates. Average rates of wages per week have been computed by industries and states and for the Commonwealth. The average per week rose from 55s. 3d. in 1914 to 101s. 5d. in 1929, falling to 80s. 6d. in 1933 but rising to 84s. 10d. by 1936. The highest average in 1936 was in printing at 104s. 4d. and the lowest was in agriculture at 75s. 9d. The average for adult females was 46s. 5d. Hours of labour are usually fixed by the Commonwealth and state arbitration courts and in most industries are 44 or 48 per week. In 1936 the average was 45·09 hours per week for adult males and 44·6 hours for adult females.

55192—4½

Industrial Disputes

In 1936 the number of disputes was 235 involving 60,587 workers with time loss of 497,248 man working days (revised figure) with an estimated loss in wages of £468,825. These figures were almost double those for the years 1931 to 1934 but much lower than for the years from 1919 to 1930, when the time loss was nearly up or over one million days in most of the years, while in 1919 it was over six million days and in 1929 was over four million days. In 1936 most of the time loss was in mining and metal manufacturing in New South Wales. In most of the years mining accounted for a large part of the time loss but in 1919 the transportation industry suffered about the same time loss as mining. Most of the disputes were as to wages, employment of non-unionists, employment of particular persons and working conditions. In 1936, workers who were unsuccessful numbered 40,279, while 13,997 were successful. In 174 disputes settlements resulted from direct negotiations; in nine disputes from proceedings under state legislation; and in two under commonwealth legislation, while sixteen were settled by other conciliation.

Employment

Statistics as to unemployment have been collected from trade unions since 1912. In order to supplement this information, since 1933 information has been received from employers in factories and retail stores. Index numbers have been constructed on the base of figures in 1928-29 as 100. The index for factories was 105 in 1926-27 but fell to 71 in 1931-32 rising to 105 by 1936-37. For retail stores July, 1933, was taken as the base and the index rose from 98 in August, 1933, to 121 in June, 1937. The percentage of unemployed union members rose from 7 per cent in 1927 to 29 per cent in 1932 but fell to 9·7 per cent in June, 1937.

Industrial Accidents

Statistics as to industrial accidents are secured from factory inspectors, etc., in the several states. In 1936 there were 145 fatal accidents and 10,825 accidents incapacitating each of the workers involved for over 14 days. Mining and smelting industries accounted for a large percentage in both lists. The figures cover chiefly manufacturing, mining, and building. Agriculture transportation and various other industries are not covered.

Labour Organizations

In 1936 there were 356 unions with 2,157 branches and total membership of 814,809. The

manufacturing industries had 305,058 union members; steam and electric railways 94,944; other land transport 10,287; shipping 27,346; building 56,727; mining 40,184; agriculture 31,869; domestic service, including hotels, 16,091; banking, insurance and clerical work, 35,315; public service 83,484; retail and wholesale trade, 32,178; municipal service, 39,603 and other classes 41,723. It was calculated that 48 per cent of all adult male employees belonged to unions and 34 per cent of all female employees.

Employers Associations

There were 506 employers' associations with 2,141 branches and total membership of 168,424. There were also federations of such associations by industry, state, etc., numbering 38.

Employment and Pensions on Canadian National Railways

The annual report of the Canadian National Railway System for the year ended December 31, 1937, indicated that the average number of employees in service during that period was 79,471 as compared with 78,836 in 1936. The total payroll for 1937 was $117,804,769 as compared with $111,221,129 in 1936—an increase of $6,583,640 or 5·92 per cent.

Pensions: The report summarizes the operation of the System's pension plans during the year as follows:

"Under the various pension plans in effect on the system, 801 employees were pensioned during the year; pensioners numbering 394 died; pensioners numbering 649 who had served on Canadian National United State lines and had been pensioned under Canadian National pension plans were transferred during the year to the United States Railroad Retirement Board, reducing the system pension pay rolls at the time of transfer by approximately $37,000 per month. The number on pension at December 31, 1937, under Canadian National pension plans totalled 6,287."

As regards the effect upon the Canadian National System of the United States Railroad Retirement Plan (Labour Gazette, July, 1937, page 717) and the United States Social Security Act, the report states:

United States Railroad Retirement Plan.—United States carriers and labour organizations reached an agreement with regard to a plan providing for annuities to employees upon retirement, to which effect was given by the enactment of the Railroad Retirement Act and the Carriers' Taxing Act, approved June 24, 1937, and June 29, 1937, respectively.

Under the new legislation, which repealed the former Taxing Act, and effective January 1, 1937, 2¾ per cent was withheld from employees' wages and an equal amount is being paid by the railways. The tax rates are progressive, becoming fixed at 3¾ per cent in 1949. The amount of the tax payable by the National System in 1937 was $515,000.

United States Social Security Act.—The National System in the United States is subject to Federal and State legislation dealing with unemployment insurance, also to Federal legislation dealing with old age pension benefits for employees other than those covered by the Railroad Retirement Plan. The cost to the System in 1937 under such legislation was $459,000.

Youth and Employment

The March, 1938, issue of *Public Affairs* published by The Institute of Public Affairs, Dalhousie University contains an article by H. A. Weir, M.A., entitled "Where Youth May Look for Employment."

Mr. Weir refers to a youth unemployment survey conducted in Halifax in 1937 and to an additional survey made in Halifax for the purpose of ascertaining "not only to what extent local industry might be in a position to absorb the employable youth of the province but also to provide accurate information as to the skill, abilities, and the physical and intellectual qualifications required by the various branches of industry."

The findings of the survey showed "at one and the same time widespread unemployment on the one hand, on the other, available employment in the skilled and semi-skilled trades" Mr. Weir therefore draws three conclusions.

"1. There is a real need for additional facilities in technical and vocational training in order that the non-academically inclined may be able to take advantage of the opportunities offered by the skilled and the semi-skilled trades.

"2. That our young people may be able best to avail themselves of this training, vocational advice and guidance should be made increasingly available,—guidance which has particular reference to Maritime business and industry.

"3. In view of the increasing demands made by employers for a minimum scholastic attainment, it is essential that vocational education be paralleled by at least a rudimentary course of academic instruction."

CONCILIATION AND ARBITRATION IN FRANCE

ON March 4 the French Parliament approved an Act concerning procedure in conciliation and arbitration in industrial disputes between employers and employees in industrial and commercial undertakings. The Bill on which the Act was based was one of six labour Bills presented to Parliament by the Government and the first to be passed The other Bills deal with the recruiting and dismissal of workers, the calling of strikes, collective agreements, public employment offices, and the status of workers' delegates chosen from the workers in an establishment to submit grievances to the management.

The Conciliation and Arbitration Act is in the form of an amendment to the Labour Code and makes more detailed provision for the procedure to be followed in collective disputes than a provisional Act of December 31, 1936. The latter law forbids strikes and lockouts before conciliation and arbitration has been tried and declares the decision of arbitrators or umpire to be final and binding but provides no penalty in case any party refuses to abide by such a decision. It enabled the Government until the close of the Parliamentary session of 1937, to stipulate by decree the measures to be followed wherever the collective agreements between the parties to disputes failed to provide machinery for their settlement. Decrees of January 16 and September 18, 1937, indicated the procedure to be followed. The Government's powers in the matter of regulating conciliation and arbitration proceedings were later extended until December 31, 1937, and collective agreements which would otherwise have lapsed were automatically prolonged for six months.

Since 1919, the law of France has recognized collective agreements between employers and trade unions and in that year such agreements were made enforceable at law but there has been no official machinery for the settlement of industrial disputes except a local and optional system provided by an Act of 1892 which has never been widely applied and the importance of which has steadily diminished.[1] Numerous Bills have been drafted but until 1936 none was enacted. In a report on collective agreements approved by the French National Economic Council in 1934, the close connection between conciliation and arbitration machinery and collective agreements was pointed out. It was the opinion of the reporter that the relative failure of collective bargaining in France up to that time was due, in some measure at least, to the lack of adequate conciliation machinery.

In 1936, the French Parliament passed a Conciliation and Arbitration Act and an Act to facilitate the making and operation of collective agreements in industry and commerce. On October 1, 1936, provision was made in the Currency Act for the organization of conciliation and arbitration proceedings to settle disputes arising out of the increase in the cost of living and relating to the conclusion or revision of agreements as to wage-rates.

The Collective Agreements Act of June 24, 1936, requires every collective agreement to contain provisions concerning certain matters, including freedom of association; the appointment in undertakings employing more than 10 persons of workers' delegates to submit grievances to the management regarding the application of the agreed wage-rates or of legislation for the protection of the workers and their health and safety; minimum wages; dismissal; apprenticeship; and machinery for the settlement of disputes arising out of the agreement and for its revision or amendment. Collective agreements may not lay down conditions contrary to any law or regulations but they may provide for conditions more favourable to the workers. By order of the Minister of Labour, after consultation with the appropriate sections of the National Economic Council, the terms of a collective agreement relating to the subjects indicated above may be made binding for the duration of the agreement on all employers and employed in the occupations and in the area covered by the agreement. Notice of the proposed extension of the agreement must be given by the Minister in the Official Journal and any persons interested are to be invited to make representations concerning the proposed extension, a minimum period of 15 days being allowed for this purpose. The order rendering obligatory certain terms of the agreement becomes inoperative if the parties to the agreement denounce, revise or modify it. The Minister has power to rescind the decree by the same procedure by which it was made binding if it appears no longer properly applicable to the economic conditions in the industry.

It has been estimated that during the first year after the enactment of the Collective Agreements Act, 4,282 collective agreements were made in France covering approximately 2,000,000 persons. In addition, about 300 collective agreements related to 800,000 agricultural workers.

[1] I.L.O. Conciliation and Arbitration in Industrial Disputes, 1933, p. 182.

The new Conciliation and Arbitration Act is closely related to the system of collective agreements and is incorporated in the Labour Code with the Collective Agreements Act which is amended to stipulate that every agreement made under it must contain provision for conciliation and arbitration of all collective disputes between the employers and workers covered by the agreement and must stipulate that the settlement of such a dispute may not take longer than one month or eight days for each stage of the proceedings. Formerly, a collective agreement was only required to provide machinery to adjust any differences that might arise concerning the application of the agreement.

A joint conciliation committee must be provided for in every agreement and any dispute which the parties are unable to settle within the stipulated time must be submitted to the joint committee by one of the parties or by the Prefect who is to preside, or appoint a representative to preside over the committee. If the committee fails to bring about a settlement of the dispute, it must prepare a statement of the matter for the two arbitrators to whom the dispute must be referred.

One arbitrator and substitutes must be named by each party to a collective agreement to act during the life of the agreement. A list of at least five umpires must also be drawn up by agreement between the parties. If they are unable to agree on such a list within one month after the agreement has been made, the Chief President of the Court of Appeal in that district, wtih the advice of the Prefect, is to draw up the list of umpires.

If within the time stipulated in the agreement, a dispute is not settled by the two arbitrators it is referred to an umpire chosen by them or, if they cannot agree, by the Prefect or, if the agreement relates to more than one department or affects more than 1,000 workpeople, to an umpire chosen by the Minister.

The above provisions have to do with disputes between parties who have signed a collective labour agreement. Within one month after the passing of the Act regulations are to be made, after consultation with the employers' and workers' organizations and the National Economic Council, to govern commercial and industrial undertakings where no conciliation and arbitration procedure has been agreed upon, or where the procedure is not determined by a collective agreement or in disputes in undertakings or affecting classes of workers to which more than one agreement apply or in disputes in public services operating under a special franchise on condition that the authority granting the franchise agrees to this procedure.

No appeal may be made against the award of the arbitrators or umpires except that, within three days, on the ground that the dispute was outside their jurisdiction or that the award was illegal for some reason, the parties may state the case for the superior court of arbitration. On the same grounds, within eight days, the Minister of Labour may appeal the award or if, after consulting the National Economic Council, he considers it expedient in the public interest, he may refer an award to the superior court of arbitration which must issue an order within eight days. The members of the court are to be appointed for two years and to include the vice-president of the Council of State, or the president of one of the sections of the Council, two Counsellors of State, two magistrates of the high court and two state officials or retired state officials. When appeal is made by the Minister of Labour, two employers' and two workers' representatives must be added to the court, nominated by the employers' and workers' representatives on the Permanent Committee of the National Economic Council.

An interesting section of the Act has to do with the settlement of disputes involving wages. If the official index of the cost of living for a family of four persons, or any other index agreed on by the parties, shows a variation of five per cent or more since the wage-rates were fixed, the machinery provided by the Act must be set in motion if one party to an agreement requests a change in the rates but unless the index shows an increase of at least ten per cent, wage-rates may not be altered oftener than once in six months. Subject to this condition, arbitrators and umpires are required to make an adjustment in wages and family allowances proportionate to the change in the cost of living unless it can be shown that such adjustment would be incompatible with the economic position of the industry. In the latter case, whatever adjustment is practicable must be made.

It is stipulated, however, in connection with the variation of wages with the cost of living, that if a revision of the rates is likely to affect contracts made by the government or public bodies, the industrial and commercial employers concerned must give notice of the application for revision to the public service affected in order to enable the public authorities to submit to the arbitrator all useful information.

Documents which the parties consider should be put in evidence must be sent to the arbitrator for each side and, if there is an umpire, must be discussed by them before him. These officers and any experts called must treat all proceedings as confidential.

An agreement brought about by a conciliation committee and the awards of arbitrators

or umpires take effect from the date when the application for conciliation proceedings was made and cannot be made retroactive before that date. Awards must be announced to the parties within twenty-four hours and at the same time be sent to the registrar of the district court. They thus acquire the force of ordinary judgments but without prejudice to any action that may be taken by the superior court of arbitration. If an arbitration award deposited with the district has to do with the interpretation of a collective agreement or wages, it acquires the force of a collective agreement. If it is designed to settle a dispute between the most representative employers' and workers' organizations, the Minister of Labour may make an order applying it to the whole industry in the same way as if it were a collective labour agreement.

SOCIAL INSURANCE IN GERMANY

An act was issued in Germany on December 21, 1937, to improve the financial position of the three invalidity, old-age and survivors' insurance schemes, for workers, salaried employees and miners respectively. The Act also provides for a special fund to be used for family allowances and amends the legislation in force in certain minor respects. The following review of this legislation and its background was extracted from *Industrial and Labour* Information, official publication of the I.L.O.:

In order to link up this reform with its predecessors, it may be useful to recall briefly the scope and financial organization of each of the three schemes of insurance in question.

Invalidity, old-age and survivors' insurance for workers (workers' insurance) includes in principle all manual workers; at the end of 1936 the number of persons covered was 19·2 million. The corresponding scheme for salaried employees (salaried employees' insurance) covers only those non-manual workers whose annual salary does not exceed 7,200 marks; at the end of 1936 the number of persons covered was 4·3 million. In addition to these two main systems there exists an occupational scheme for miners (miners' insurance), which is in practice divided into two distinct sections, one for workers (who totalled 586,000 insured persons at the end of 1936), and the other for salaried employees (with a total of 48,000 insured persons at the end of 1936). Finally, there is an unemployment insurance scheme covering both workers and salaried employees, but this includes neither agriculture nor domestic service; about 12·8 million persons were insured under this system at the end of 1936.

Under the insurance schemes for workers and salaried employees, the insured persons are divided into wage groups, and the combined contribution of the insured person and his employer is fixed at a uniform percentage of the upper limit of the appropriate wage group: five per cent in the case of workers' insurance and four per cent in the case of salaried employees' insurance. The combined contribution in the case of unemployment insurance is 6·5 per cent of the wages taken into account when calculating contributions for sickness insurance.

The three invalidity, old-age and survivors' insurance schemes were originally based on collective accumulation with general average contribution. In 1924, however, at the end of the inflation years, the reserves had almost vanished, and the basis of the three schemes was changed to the assessment system. Since 1930 the financial position has become critical, owing to the economic depression, which has led to an increase in unemployment and a reduction in wages, and the restrictions imposed by the Emergency Orders issued to meet the enomomic crisis in 1931 and 1932 did not succeed in restoring financial equilibrium.

Reorganization Plan of 1933.—Under an Act of 7 December, 1933 a general scheme was drawn up for the reorganization of workers', salaried employees' and miners' insurance. Benefits were reduced and resources increased by means of new provisions, among which may be mentioned the substitution of a fixed annual federal subsidy of 200 million marks for the previous variable contribution, and the increase of the subsidies granted to the two forms of miners' insurance (99 million marks for workers and six million for salaried employees). The Act lays down that contributions, both in the case of workers and salaried employees, must be based on the average premium system in such a way as to ensure that, for the future, contributions and income—taking into account the government contribution in the case of workers' insurance—shall cover the total costs of insurance.

Workers Insurance.—The most important financial provisions of the new Act are those which provide for an increase in resources by means of contributions from unemployment insurance, an increased government subsidy and the taking over by the government of supplementary payments, the addition of a

new wage group for higher wages, and a slight extension of the qualifying period necessary for acquiring pension rights.

Use of Surplus Resources of Unemployment Insurance.—Under the unemployment insurance scheme, 6·5 per cent of wages is still levied in contributions, of which about one per cent of wages is paid in annual contributions to the invalidity, old-age and survivors' insurance institutions. Unemployment insurance thus retains 5·5 per cent of the wages total, an amount which is at present considerably in excess of its needs. Under the new Act, the surplus will be used for setting up a special fund for family allowances and for financing measures to combat unemployment.

Special Fund for Family Allowances.—The government considers it indispensable to encourage large families among insured persons and has therefore created a special fund for family allowances. Every year from 1938 to 1941 a sum equal to one per cent of the wages of insured persons will be paid into this fund by the unemployment insurance institution; the annual income from this contribution is estimated at 270 or 280 million marks. Family allowances will be granted to active members of insurance funds who fulfil certain conditions; these conditions, the amount of the allowances, and details of administration will be specified in an Order.

Measures to Combat Unemployment.—After deducting the annual contributions to workers' and salaried employees' insurance and to the special fund for family allowances, the unemployment insurance scheme will still have available a sum equal to about 4·5 per cent of wages. If the labour market continues to maintain its present favourable situation, this revenue will considerably exceed the expenses of the scheme. The new Act places this possible surplus at the disposal of the government, in order to allow the latter to make provision against a fresh outbreak of unemployment.

Survey of Silicosis Compensation

In pursuance of a suggestion that all possible useful information regarding the application of compensation in respect of silicosis, be assembled and disseminated, the International Labour Office has recently published a new study on workmen's compensation for this disease.

According to this study the different systems of providing compensation for silicosis may be classified as follows: compensation by special legislation; compensation by workmen's compensation legislation; (*a*) under a schedule, (*b*) by one or more special schemes; blanket coverage.

In view of the impossibility of analysing all existing legislative measures, it was considered preferable to present in detail three typical systems of legislation in force, namely, those followed, firstly in the Union of South Africa (special legislation), secondly in Great Britain (special schemes), and thirdly in Germany (schedule).

Analysis of these Acts is given in accordance with a plan which has been made as uniform as possible in order that the results may be comparable: legislation, scope of legislation, right to compensation, certification of the disease, benefits, review, procedure for settling disputes, administration of compensation, prevention.

At the end of the first part (Union of South Africa) there is a note on medical examinations. At the end of the third part (Germany) there are two notes dealing respectively with undertakings subject to accident insurance and with silicosis and silicosis complicated by tuberculosis.

The volume also contains seven appendices dealing with the following questions: compensation of occupational diseases by the system of blanket coverage; terminology of radiographic findings in respect of silicosis; radiographic technique in respect of silicosis; stages of silicosis, silicosis statistics; industries and processes involving exposure to silicosis; pneumoconioses legislation.

World Economic Survey

The Economic Intelligence Service of the League of Nations has issued the sixth in its annual series entitled "World Economic Survey" (1936-37). The series was undertaken in consequence of resolutions passed by the Assembly of the League in 1930 and 1931.

The extent of the subjects covered by the survey is reflected in the subject headings of the various sections into which the report is divided. The headings are as follows: An alignment of Currencies; Factors of Expansion; Production Stocks and Trade; Rising Price-Levels; The Improvement of Labour Conditions. (This section is divided into the four following-sub-sections; Increased Employment; The Hard Core of Unemployment; The Movement for Higher Wages and The Widening Scope of Labour Legislation); and Increasing World Trade; The Conflict in Commercial Policy; The Control of Credit and The Economic Situation in July, 1937.

The publication also contains a chronological list of economic events occurring during 1936 and up until July 31, 1937.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Governing Body to Meet in London in October

At the eighty-second session of the Governing Body of the International Labour Office held in Geneva early in February, the representative of the British Government invited the governing body to hold its regular autumn session in London next October and expressed the hope that the meeting would greatly increase the number of human contacts between the organization and Great Britain. He stated that his government took this opportunity of re-affirming its faith in the International Labour Organization, whose object is the co-operation between governments, employers and workers in the improvement of social conditions and in the promotion of peace.

The representative of the government of the United States warmly thanked the British Government for the invitation, which came from a nation which had played a very great role in the formation and work of the organization. He felt that the invitation was a tribute to the vitality of the organization—a quality attested by a steady and unbroken record of substantial achievement—and affirmed his government's faith in the ideals.

The workers' representative from France stated that the invitation was all the more significant at the present time, because it showed that one great industrial democracy remained faithful to the principles and traditions of the International Labour Organization.

The representatives of the Mexican and Chilean governments associated themselves with the expressions of thanks which were given to the British government.

The British representative thanked the governing body for the warm welcome it had given to the invitation and hoped that the session at London would be a fruitful one for world social progress.

Recent Voyage of Director to the East

During the eighty-second session of the Governing Body of the International Labour Office, Mr. Harold Butler, the Director of the International Labour Organization, gave a preliminary account of his recent voyage to Malaya, the Netherlands Indies, Ceylon, Pondicherry and India, at the invitation of all the governments concerned. During his trip Mr. Butler was much impressed by the undoubted prestige which the I.L.O. enjoys in every country which he visited.

In Ceylon and India, both British and French, the workers' organizations look to Geneva for assistance and guidance, and freely acknowledge the help which they have received through the ratification of conventions and the attention paid to the representations of workers' organizations. Employers are for the most part anxious to improve conditions, wherever they believe themselves able to do so without prejudice to their business. The director found little real resentment against recent legislation in India and a general readiness to consider the possibility of further progress, provided that it was applied equally by their competitors in Europe and Asia. He was able to appreciate on the spot the great differences which exist between the social problem as seen from the standpoints of the East and of Europe and America. He announced that he hoped in April to present a more detailed report containing some appreciation of the labour conditions and problems of the countries visited but he wished at once to thank the authorities of those countries for the welcome given him and the facilities afforded.

Composition of the Wage-earning Class in the United States

The last general census of the United States was taken in 1930, but the recent registration under new federal insurance legislation has put into the hands of the Social Security Board, which administers that legislation, new data on a large proportion of the employed persons in the country. A study of the records of the first 11,500,000 applicants for registration reveals that the wage-earning class thus represented is a younger group than the wage-earning class of 1930.

In 1930 only 50·36 per cent of wage-earners were under thirty-five years of age. Of the recent registrants referred to above 54·12 per cent are under that age. There is also a higher percentage of women among employed persons, women having been only twenty-two per cent of the wage-earners in 1930, and being twenty-seven per cent of those registered for insurance.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, FEBRUARY, 1938

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on March 1 was 10,416, the employees on their payrolls numbering 1,027,992 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for February was 1,904, having an aggregate membership of 220,967 persons, 13·7 per cent of whom were without employment on March 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) Employment Situation at the beginning of March, 1938, as Reported by Employers

Industrial employment at the beginning of March showed a contraction, which was in the main due to unusually large seasonal reductions in logging, following a winter of great activity in bush operations. The Dominion Bureau of Statistics tabulated returns from 10,416 employers throughout Canada, whose payrolls were reduced from 1,052,699 persons at February 1 to 1,027,992 at March 1. The crude index, based on the 1926 average as 100, stood at 107·8 at the latest date, compared with 110·4 in the preceding month, and 102·8 at March 1, 1937. The experience of the last seventeen years shows that, on the average, there has been little change in employment between February 1 and March 1, gains in ten of these years just about offsetting losses in the remaining seven. After correction for seasonal trend, the index therefore declined, standing at 112·3 at March 1, compared with 114·7 at the beginning of February. The seasonally-adjusted index, however, was higher than at March 1, 1937; it was also higher than in any month of the period from midsummer of 1930 to May, 1937.

Moderate improvement occurred in manufacturing* at March 1, 1938, but the advance in this division was on a smaller scale than that indicated on the average at the same date in the years, 1921-1937; the additions to staffs in leather, lumber, textile, chemical and iron and steel factories were most noteworthy. Among the non-manufacturing industries, highway and railway construction and maintenance showed heightened activity. On the other hand, logging, as already mentioned, reported exceptionally pronounced seasonal declines, some 22,450 men having been released from the co-operating camps. Mining, communications, transportation, building construction, services and retail trade showed curtailment. The losses in mining and transportation were less than average for March 1, those in communications, services and trade were rather greater than usual, while those in construction approximated the average.

For March 1, 1937, statistics had been received from 9,988 employers with a combined working force of 975,862 persons, compared with 987,879 in the preceding month. The index number then was lower by five points than at the latest date.

The index numbers of employment at March 1 in the years since 1927 are as follows:—1938, 107·8; 1937, 102·8; 1936, 98·9; 1935, 96·4; 1934, 92·7; 1933, 76·9; 1932, 88·7; 1931, 100·2; 1930, 110·2; 1929, 111·4 and 1928, 102·6.

The Census Analysis Branch of the Dominion Bureau of Statistics prepares monthly estimates of the total number of wage-earners in all industries, of those in employment and those unemployed. The latest estimates show that the number of men and women available for employment in Canada in January was greater than in that month in other years, with the exception of January, 1937, when the figure was the same. The number in

* See footnote on page 426.

employment was also at its maximum for January; the number unemployed, though lower than in any January in the period, 1931-1937, was considerably higher than in any preceding year for which estimates have been prepared. As compared with December, 1937, there was a seasonal increase of some 22,000 in the estimated number of unemployed in all industries throughout the Dominion.

Maritime Provinces.—There was a considerable reduction in employment in the Maritime Provinces as a whole, the 719 reporting employers reducing their staffs from 81,192 at February 1, to 78,250 at the beginning of March; the loss occurred mainly in logging, but there were small decreases in manufacturing, mining, trade, highway work, transportation and communications. On the other hand, iron and steel plants and

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Employment by Economic Areas

The trend was moderately upward at the beginning of March in Prince Edward Island, Saskatchewan and Alberta, but employment declined in Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and British Columbia, Quebec showing the most pronounced contraction; this was mainly due to exceptionally large seasonal losses in logging operations. Activity in all five economic areas continued above the level indicated at the same date of last year.

railway construction and maintenance afforded rather more employment. Curtailment had also been indicated at March 1, 1937, when the index was slightly lower than that of 108·3 at the date under review. Reports for the beginning of March of last year had been tabulated from 688 firms, whose payrolls aggregated 76,826 persons, compared with 77,468 in the preceding month.

Quebec.—Employment in Quebec showed a large decrease, which exceeded that recorded at the beginning of March, 1937, and was also larger than the small loss which has been the average change between February 1

and March 1 in the last seventeen years. There was improvement in manufacturing at the date under review, notably in leather, lumber, textile and chemical plants; transportation and highway and railway construction and maintenance also afforded greater employment. On the other hand, logging recorded a very substantial contraction as the active season drew to a close, and there was also curtailment in building, services and trade. Statements were tabulated from 2,509 firms, whose payrolls aggregated 306,764 employees, as against 319,242 at the beginning of February. The index, at 110·1, was several points higher than at March 1, 1937, when it stood at 102·5; the latter was computed from information furnished by 2,380 establishments, with 284,523 persons on their payrolls, a decrease of 11,434 from their staffs at February 1, 1937.

Ontario.—Further contractions were noted in Ontario, where the 4,615 co-operating employers released 9,677 persons from their forces, bringing them to 443,444 at March 1. The trend of employment at that date in the years for which statistics are available has not invariably been upward, although the average change in the years since 1920 has been a small increase. The index, at 113·7, was nearly five points higher than at the beginning of March in 1937, when it stood at 108·9; the 4,449 firms, whose returns were then tabulated had employed 422,980 workers.

There was a falling-off in factory employment in Ontario at the date under review, the co-operating manufacturers having released 1,638 workers from their staffs. The reduction occurred mainly in pulp and paper, beverage and tobacco works. Among the non-manufacturing classes, trade, transportation and construction were slacker, while logging showed a considerable decline as the season's operations neared completion.

Prairie Provinces.—As a result of improvement in Saskatchewan and Alberta, there was a moderate increase in employment in the Prairie Provinces as a unit at March 1; the trend there has been downward at that date in fifteen of the seventeen preceding years for which statistics are available, so that the advance at the beginning of March is contra-seasonal in character. The index number, at 92·2, was slightly higher than that of 91·3 at the same date in 1937, when a small

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

Relative Weight of Employment by Economic Areas as at March 1, 1938	100·0	7·6	29·8	43·1	11·5	8·0

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas, to the total number of all employees reported in Canada by the firms making returns at the date under review.

decrease from the preceding month had been shown. Data were tabulated from 1,498 establishments with 117,703 employees at March 1, 1938, compared with 117,076 in their last report. Within the manufacturing industry there was a reduction in the animal food and pulp and paper divisions, but improvement was indicated in lumber, textile and iron and steel plants, resulting in a fair-sized gain in manufacturing as a whole. Railway and highway construction and maintenance and transportation also showed heightened activity, while curtailment was noted in logging. The 1,440 employers making returns for March 1 of last year had reported 116,066 men and women on their payrolls, compared with 116,251 at the first of February, 1937.

British Columbia.—The manufacture of lumber and iron and steel products showed an increase, while food and pulp and paper plants were rather slacker; factory employment as a whole advanced, but the tendency in most other groups was moderately downward, the largest losses being in logging, shipping and trade. The working forces of the 1,075 co-operating employers aggregated 81,831 persons, as compared with 82,057 in the preceding month. The reduction, though small, was contra-seasonal, employment at March 1 in many years of the record having advanced; however, declines on a larger scale had been recorded at that date in both 1937 and 1936. The index, at 96·2, was higher than at March 1 of last year, when it had stood at 89·2; the 1,031 firms then furnishing statistics had employed 75,467 workers.

Index numbers of employment by economic areas are given in Table 1.

Employment by Cities

Employment decreased in five of the eight cities for which separate tabulations are made, Toronto, Ottawa, Hamilton, Windsor and Vancouver showing curtailment, while the tendency in Montreal, Quebec City and Winnipeg was upward. The situation in most of these centres was similar to or slightly better than that indicated by the employers

Relative Weight of Employment by Cities as at March 1, 1938	14·4	1·3	12·8	1·3	3·3	2·0	3·8	3·3

Note.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

furnishing information for March 1, 1937; in Winnipeg, however, the index was lower by about one point.

Montreal.—Additions to staffs were reported, on the whole, in Montreal; there was improvement in manufacturing (chiefly in leather, textile, chemical and iron and steel factories), and transportation was also brisker. On the other hand, building, services and trade showed moderate curtailment. Statements were tabulated from 1,434 firms employing 148,149 workers, as compared with 146,718 in the preceding month. For March 1 of last year, 1,377 employers had reported 139,271 men and women on their staffs; the index then had been lower, standing at 92·6, as compared with 98·5 at the latest date.

Quebec.—Manufacturing afforded more employment, mainly in the leather group, and transportation was also rather busier; construction, however, showed a falling off. The working forces of the 178 co-operating establishments totalled 13,320 persons, compared with 13,087 at February 1, 1938. The index was several points higher than at the same date in 1937, when a smaller advance had been indicated; statements were then tabulated from 176 firms with 12,371 workers.

Toronto.—Activity increased moderately in manufacturing, the largest gains being in the textile, leather and iron and steel groups, while there was a decline in food and printing and paper factories. Transportation, construction and trade also released employees. Returns were received from 1,576 firms, employing 131,464 men and women at the beginning of March, as compared with 131,990 at February 1. The index, standing at 105·6, was higher than at March 1, 1937, although improvement had then been indicated by the 1,521 employers making returns, whose staffs aggregated 128,213.

Ottawa.—Employment in Ottawa showed moderate curtailment; manufacturing, construction and trade were rather slacker, while little general change was recorded in other industries. The 202 co-operating establishments reported a total payroll of 13,222 persons at the date under review, as compared with 13,454 at February 1. The index

Relative Weight of Employment by Industries as at March 1, 1938	100·0	54·7	6·0	6·9	2·1	9·2	8·3	2·7	10·1

Note.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

was practically the same as at the beginning of March, 1937, when an upward tendency had been indicated by the 201 firms whose data were tabulated, and who then employed 13,240 men and women.

Hamilton.—A further decline occurred in Hamilton, mainly in manufacturing, the greatest losses being in the iron and steel industries. Construction and trade, on the other hand, were rather brisker. An aggregate staff of 34,216 was reported by the 296 concerns whose returns were tabulated, and who employed 34,807 persons in their last report. An advance had been recorded at the same date of last year, but the level of employment then was slightly lower, the index standing at 103·7, as compared with 106·1 at March 1, 1938. For the beginning of March, 1937, 291 employers had reported 33,436 workers on their paylists.

Windsor.—The trend was downward in Windsor, where manufacturing was not quite so active, there being a falling-off in the iron and steel division. There were only slight changes in the other groups. Data were received from 183 establishments, with 20,912 employees, or 152 fewer than at February 1. Employment was brisker than at the same date in 1937, when an increase had been recorded; the 175 firms whose statistics were received for March 1, 1937, had a staff of 20,041.

Winnipeg.—Heightened activity was noted in Winnipeg, where 486 concerns reported 38,642 employees, as against 38,524 in the preceding month. There was an increase in manufacturing (principally of iron and steel and textile products) and in construction, but trade was quieter. Employment was in slightly smaller volume than at March 1 of last year, when a larger gain had been registered; 481 employers then reported 38,885 men and women on their staffs, compared with 38,263 at February 1, 1937.

Vancouver.—Manufacturing recorded a moderate increase in Vancouver, mainly in

[1] For explanation of "Relative Weight", see footnote to Table 3. [2] Revised. See footnote on page 426.

lumber mills; transportation, construction and trade, however, showed curtailment. On the whole, there was a decrease of 348 persons on the payrolls of the 460 co-operating firms, who had 33,780 employees. A smaller contraction had been indicated at the same date of a year ago, when 436 employers had reported 33,467 workers; the index was then fractionally lower than that of 104·2 at the latest date.

Index numbers of employment by cities are given in Table 2.

Employment by Industries

Manufacturing.[1]—The trend in this group was again favourable, although the increase was unusually small for the time of year; nevertheless, employment was at a higher level than at March 1 in 1937, or any earlier year since 1930. Statistics were furnished by 6,019 manufacturers having 561,906 operatives, as compared with 560,949 at the beginning of February. The most pronounced recovery at the date under review took place in leather, lumber, textile, chemical and iron and steel plants. On the other hand, activity declined in food, pulp and paper, rubber, tobacco, beverage, clay, glass and stone, electric light and power, electrical apparatus and non-ferrous metal factories.

The crude index in manufacturing rose from 110·3 at February 1, 1938, to 110·5 at the date under review, as compared with 107·6 at March 1, 1937, and 99·5 at March 1, 1936. As already mentioned, the gain at the latest date was not so large as usual in the experience of past years; the seasonally-adjusted index therefore declined, falling from 114·5 in the preceding month to 112·9 at the beginning of March, however, it was then higher than in any month from March, 1930, to April, 1937.

The following are the unadjusted index numbers as at March 1 in the years since 1926:—1938, 110·5; 1937, 107·6; 1936, 99·5; 1935, 92·7; 1934, 86·5; 1933, 75·8; 1932, 87·0; 1931, 97·6; 1930, 110·9; 1929, 115·7; 1928, 104·7 and 1927, 99·8.

A review of the data for March 1, 1937, shows that returns had then been received from 5,810 manufacturers, whose staffs had aggregated 545,168, compared with 533,739 in the preceding month. The index then was nearly three points lower than at the beginning of March of the present year.

Animal Products, Edible.—Employment in these industries showed a further decrease, mainly in meat-packing plants. The index number stood at 119·6, as compared with 117·8 at March 1, 1937; the curtailment then noted had been on a smaller scale. The working forces of the 291 reporting establishments aggregated 23,121 persons, as compared with 23,652 at February 1, 1938.

Leather and Products.—There was a considerable advance in employment in this division at the beginning of March, according to statistics from 299 manufacturers, whose payrolls included 22,149 persons, compared with 21,220 in the preceding month. The gains occurred mainly in footwear factories in Quebec. A larger increase had been noted at the corresponding date a year ago, and the index number then was higher than at March 1, 1938.

Lumber and Products.—The trend continued favourable in the lumber group; statements were tabulated from 877 employers, whose staffs totalled 39,690 workers, compared with 38,341 at February 1. Improvement was indicated in all five economic areas, that in Quebec and British Columbia being most pronounced. Employment was in greater volume than at March 1, 1937, when there had been a much smaller advance.

Plant Products, Edible.—A decline was recorded in the edible plant product group, chiefly in fruit and vegetable preserving and bread and bakery product factories. The firms making returns to the Dominion Bureau of Statistics, 502 in number, had 31,166 workers in their employ, or 456 fewer than at the beginning of February. The tendency was downward in all provinces except Alberta. Curtailment had also been indicated at the beginning of March last year, but the index number then stood at 100·4, compared with 103·1 at the date under review.

Pulp and Paper Products.—Employment in this division showed considerable contraction, chiefly in pulp and paper mills and in the printing and publishing division; the largest losses were in Quebec and Ontario. A combined working force of 63,227 persons was recorded by 616 co-operating manufacturers, who had 65,172 employees at February 1. The index was practically the same as at March 1, 1937, when improvement, on the whole, had been reported.

Rubber Products.—There was a decrease in employment in rubber factories, 50 of which employed 12,315 workers, as compared with

[1] In order to bring about greater comparability with the statistics of the Census of Industry, certain changes have been made in the industrial classification of some of the industries included under the heading manufacturing, which, as a group, is not altered. The industries principally affected are the chemical, non-metallic mineral product and miscellaneous schedules, while there are also slight changes in the lumber, vegetable food, pulp and paper, rubber, textile, beverage, electrical apparatus and iron and steel goups.

12,506 in their last report. The index number, at 98·5, was rather lower than at March 1, 1937, when an advance had been indicated.

Textile Products.—Heightened activity was registered in this group, chiefly in garment and personal furnishings, headwear and hosiery and knitting factories, while cotton mills released some employees. The level of employment was practically the same as at March 1, 1937; the gains then occurring had been on a much larger scale. The payrolls of the 1,125 co-operating establishments aggregated 107,599 persons, as compared with 106,092 at February 1, 1938. Most of the improvement was in Quebec.

Tobacco.—Losses in personnel were noted at March 1 in tobacco factories, 46 of which reported 12,380 workers, compared with 12,659 at February 1. The index, standing at 150·1, was higher by some 26 points than at the same date of a year ago; a larger decline had then been noted.

Beverages.—The trend of employment in the production of beverages was downward at March 1, when 120 persons were released from the staffs of the 138 co-operating plants, whose employees numbered 8,137. The index was slightly higher than at the same date last year.

Chemical Products.—Statistics tabulated from 278 chemical plants showed that they employed 17,228 persons, compared with 16,744 in the preceding month. Employment in this industry was brisker than at March 1 of a year ago, when the movement had also been favourable.

Clay, Glass and Stone Products.—There was a contraction in building material plants, in which employment was at practically the same level as at the corresponding date in 1937. Statements were compiled from 207 manufacturers with 8,452 employees, as against 8,850 in the preceding month.

Electric Light and Power.—Activity in plants producing electric power showed a moderate recession, according to the 97 co-operating firms, who employed 14,653 workers. Most of the falling-off took place in Quebec. The Dominion index number, at 116·0, was higher than that of 112·3 at March 1, 1937, when no general change had been noted.

Electrical Apparatus.—Employment in electrical appliances was somewhat slower than in the preceding month; 124 factories reported 19,232 persons on their payrolls, or 113 fewer than at February 1. Improvement had been indicated at the beginning of March of last year, but the index number then was some fourteen points lower.

Iron and Steel Products.—Continued, but smaller advances were made in the iron and steel industry, in which employment was in greater volume than in the late winter of any other year since 1930. The largest gains were in the agricultural implement, automobile and other vehicle, heating appliance and iron pipe divisions. Returns were tabulated from 882 establishments having 137,012 persons in their employ, or 904 more than in the preceding month.

Non-Ferrous Metal Products.—Smelters and refineries released employees, and the lead, tin, zinc and copper industries also showed moderately lowered activity; 177 firms had 24,475 workers on their payrolls, as against 24,699 at the beginning of February. There were small reductions in staffs in Quebec, Ontario and British Columbia. The level of employment was considerably higher than at March 1, 1937, although a slight advance had then been indicated.

Mineral Products, n.e.s.—Statistics tabulated from 102 employers in this group showed no general change in their forces, which aggregated 12,506. A minor loss had been recorded at the corresponding date a year ago, when the index number was over ten points lower.

Logging

There were very marked seasonal contractions in logging camps, in many of which the season's operations were approaching completion; 406 firms had 61,190 men in their employ, or 22,440 fewer than in their last report. The decline involved a substantially larger number of workers than that recorded at the beginning of March a year ago. However, the index was many points higher than at March 1, 1937, when it stood at 193·3, compared with 212·7 at the date under review.

Mining

Coal.—Employment in the mining of coal showed a reduction, there being moderate declines in both Eastern and Western coal-fields. One hundred and four operators lowered their labour forces from 25,781 persons at February 1 to 25,528 at the beginning of March, 1938. A larger loss in personnel had been indicated at March 1, 1937, and the index number was then fractionally lower.

Metallic Ores.—There was a slightly downward trend in employment in this group at the date under review. Data were received from 208 mines employing 37,553 workers, as against 37,584 at the beginning of February. The index stood at 307·4, as compared with 280·6 at March 1, 1937, when a decrease had been noted.

Non-Metallic Minerals (Other than Coal.)—Moderate improvement took place in these industries, according to statistics from 92 employers having 8,110 persons on their payrolls, 120 more than in the preceding month. Employment had shown no general change at March 1 of a year ago; the index then was over five points lower.

Communications

Losses in staff were indicated on telephones and telegraphs; returns were received from 85 companies and branches with 21,958 employees, compared with 22,153 in the preceding month. An increase had occurred at March 1, 1937, but employment was then at a slightly lower level.

Transportation

Street Railways and Cartage.—Statistics were tabulated from 254 employers in this division, whose personnel included 24,949 persons, as compared with 25,000 at the beginning of February. The situation at the same date in 1937 had also shown little change, but employment was then more active.

Steam Railways.—A decrease was registered in steam railway operation, in which 399 fewer workers were employed than in the preceding month; 99 co-operating companies and divisional superintendents reported 58,706 persons on their payrolls. A larger falling-off had been indicated at March 1 of last year, when the index number was slightly lower. Curtailment was noted at the date under review in Ontario, while the trend in the Western Provinces was upward.

Shipping and Stevedoring.—There was a decrease in the shipping and stevedoring group, in which employment was not quite so brisk as at the corresponding date in 1937. For March 1, 1938, 115 employers reported a staff of 11,424 men and women, or 284 fewer than in the preceding month.

Construction and Maintenance

Building.—A contraction was reported in building activity at the beginning of March, there being losses in all five economic areas, of which the largest were in Ontario. The 758 contractors furnishing data throughout the Dominion had 18,437 employees, as against 20,219 at February 1. The level of employment was much higher than in the late winter of 1937, although a smaller decline had then taken place.

Highway.—Highway construction showed improvement at March 1, 1938, when 366 employers reported 41,233 workers, as compared with 40,467 at the beginning of February. Gains were indicated in Quebec and Manitoba, but there were reductions in the other provinces. Employment in this group at March 1, 1937, was in smaller volume than at the date under review, a large decrease from the preceding month having then been noted.

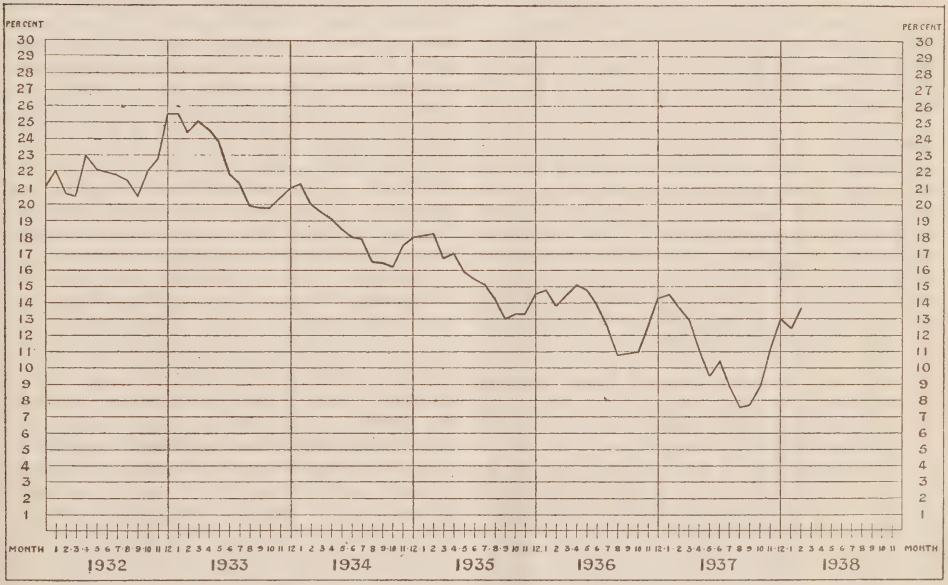
Railways.—Employment on steam railway construction and maintenance increased on the whole, according to data received from 39 companies and divisional superintendents employing 25,283 persons, or 673 more than in their last report. Heightened activity was recorded in the Maritime and Prairie Provinces and Quebec. A greater advance had been noted at the beginning of March of last winter, but the index then was four points lower.

Services

In the service group, 487 establishments reported a staff of 27,974, as compared with 28,240 at February 1. Most of the falling-off in employment was in hotels and restaurants. Activity was generally greater than in the same month of 1937, although the decrease then indicated had involved fewer workers.

Trade

Retail trade showed a substantial decline, while there was no general change in wholesale establishments; the curtailment in the former was seasonal. On the whole, there was a reduction of 1,522 in the personnel of the 1,384 firms furnishing data in the trade group, who had 103,741 employees. The index stood at 126·0 at March 1, 1938, compared with 126·1 at the beginning of March, 1937, when a larger contraction had been recorded in the group as a whole.



Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of February, 1938

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle owing to illness are not considered as unemployed while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

The situation for local trade union members showed a slight decline at the close of February from the preceding month according to the returns compiled from 1,904 labour organizations involving a membership of 220,967 persons. Of these, 30,282 or 13·7 per cent were out of work, contrasted with a percentage of 12·4 in January. The level of activity, however, remained identical with that of February last year when unemployment also stood at 13·7 per cent. Quebec unions showed a falling off in available work over 2 per cent from January, the majority of trades and industries participating slightly in this less favourable movement. In Ontario, Alberta, Nova Scotia and New Brunswick also, the trend of employment was downward though the variations from January were rather small. Manitoba, Saskatchewan and British Columbia members, however, were afforded a somewhat better volume of work than in January. In making a comparison with the returns for February, 1937, Nova Scotia, Quebec and Saskatchewan unions showed moderate improvement in conditions during the month reviewed, and nominal gains were evident among Alberta members. Of the counteracting recessions in employment, that of over 3 per cent in British Columbia was the most important, minor contractions in activity being recorded by Ontario, Manitoba and New Brunswick unions.

A separate tabulation is made each month of unemployment affecting local trade union members in the largest city in each province with the exception of Prince Edward Island. Of these, Halifax, Saint John and Toronto unions showed no variation in the unemployment volume reflected during February from the preceding month. In Winnipeg, Regina and Vancouver the tendency was but slightly more favourable than in January while Edmonton and Montreal unions indicated retarded activity on a small scale. Contrasted with the returns for February, 1937, Montreal members were moderately better

engaged during the month reviewed, and the situation in Halifax and Regina improved slightly. Vancouver unions, however, reflected rather noteworthy employment curtailment, and lesser declines were evident in Toronto, Saint John, Winnipeg and Edmonton.

The chart which accompanies this article shows the curve of unemployment by months from January, 1932, to date. During the month surveyed the curve pursued a slightly upward course from the preceding month, a manifestation of increasing unemployment. At the close of the month, however, the same level was maintained by the curve as at the end of February a year ago.

TABLE 1.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919	3·1	2·0	3·4	2·7	2·1	3·2	2·0	7·9	**3·4**
Average 1920	1·8	2·0	7·2	3·4	3·1	3·2	2·8	11·2	**4·9**

Nov., 1937	2·9	5·0	14·9	9·9	11·2	10·5	6·5	15·4	**11·2**
Dec., 1937	3·3	4·6	16·5	12·9	16·8	10·6	6·7	15·8	**13·0**
Jan., 1938	3·5	5·3	16·5	11·5	11·3	10·8	7·3	17·9	**12·4**
Feb., 1938	4·6	5·9	19·0	12·8	10·6	9·4	8·8	17·3	**13·7**

From unions in the manufacturing industries 537 reports were received during February, combining a membership of 83,164 persons, 11,674 or 14·0 per cent of whom were idle on the last day of the month contrasted with percentages of 13·1 in January and 13·6 in February, 1937. Decidedly better conditions prevailed for fur workers during February than in the preceding month and moderate improvement was evident among wood and jewellery workers, and meat cutters and butchers. A more favourable employment tendency was apparent also, among brewery, textile and carpet, garment, leather, and cigar and tobacco workers, and bakers and confectioners. Gas workers reported all their members busy in comparison with a rather noteworthy unemployment percentage in January. On the contrary, considerable slowing up in activity was recorded among general labourers, and pulp and paper makers from the preceding month, and among metal polishers recessions of somewhat lesser degree were indicated. Employment for iron and steel, and hat, cap and glove workers, and printing tradesmen subsided slightly. Glass workers maintained the same percentage of idleness as in January. When a comparison is made with the returns for February, 1937, fur and glass workers showed large percentage gains in activity during the period surveyed. Among garment workers also noteworthy expansion was evident. Jewellery and cigar and tobacco workers reported more moderate gains, and a slightly greater volume of work was afforded brewery workers, general labourers and printing tradesmen. Extensive employment losses, however, were manifest by wood, hat, cap and glove, and leather workers from February last year, and among papermakers and meat cutters and butchers pronounced curtailment was apparent. The situation also declined for metal polishers, textile and carpet, and iron and steel workers, and bakers and confectioners. Gas workers were all actively employed during both months compared.

Minor contractions in activity were registered in the coal mining industry during February from the preceding month, the 54 unions making returns with an aggregate of 20,402 persons showing that 1,099 or 5·4 per cent were out of work as compared with a percentage of 3·6 in January. Some improvement in conditions, however, was manifest from February, 1937, when unemployment stood at 8·0 per cent. Alberta miners showed

a drop in activity of over 5 per cent from January and in Nova Scotia and British Columbia employment eased off slightly. In contrast with the returns for February last year British Columbia miners were considerably better engaged during the month under survey, and in Nova Scotia moderate advances were noted. In Alberta the situation remained almost identical with that of February a year ago though tending in a favourable direction. Short time work, however, continued rather prevalent throughout February.

The building and construction trades with 216 unions reporting for February a total of 23,006 members showed further curtailment in operations, chiefly seasonal in character, the percentage of unemployment standing at 42·5 as compared with a percentage of 37·0 in January. Granite and stonecutters reflected decided betterment in conditions from January and notable gains were indicated by hod carriers and building labourers. Among steam shovelmen the trend of employment was upward though the change from January was practically negligible. Carpenters and joiners, on the other hand, were much slacker than in January as were also tile layers, lathers and roofers. Recessions in activity, of more moderate proportions, were evident among bridge and structural iron workers, and plumbers and steamfitters, and a less favourable situation obtained for bricklayers, masons and plasterers, painters, decorators and paperhangers, and electrical workers. Little variation in the volume of work accorded in the building and construction trades, as a whole, was apparent from February of last year when 43·0 per cent of idleness was reported. A substantially greater volume of employment was available to steam shovelmen, bridge and structural iron workers, granite and stonecutters, plumbers and steamfitters, and tile layers, lathers and roofers during the month reviewed, and small gains were registered by electrical workers and bricklayers, masons and plasterers. Curtailment in activity of rather noteworthy degree, however, was manifest by painters, decorators and paperhangers, and hod carriers and building labourers, while carpenters and joiners showed more moderate recessions.

The trend in the transportation industries during February was toward lessened employment, both when compared with the returns for the preceding month and February a year ago, though the changes were slight, the percentage of idleness standing at 9·0 as compared with 8·1 per cent in January and 8·0 per cent in February, 1937. The percentage for the month under review was based on the reports compiled from 841 associations including a membership of 64,628 persons, 5,835 of whom were idle on the last day of the month. Steam railway employees, whose returns involved over 78 per cent of the entire group membership reported, navigation workers and teamsters and chauffeurs all shared in the less favourable employment movement noted from January, while among street and electric railway employees the situation was unchanged. As in the previous comparison, steam railway employees, and teamsters and chauffeurs showed losses in activity on a small scale from February, 1937. In navigation considerably improved conditions were indicated, street and electric railway employees reflecting but minor gains.

Retail shop clerks reported adequate work for all their members during the three months used for comparative purposes. Reporting for February were 3 associations of these workers, combining a membership of 1,240 persons.

Among civic employees there was a slight tendency toward increased activity at the close of February from the previous month, the 82 labour organizations making returns with 10,176 members showing that 172 or 1·7 per cent were out of work, as compared with a percentage of 2·2 in January. Gains on a small scale were apparent also, from February last year when 3·2 per cent of idleness was recorded.

The 137 unions in the miscellaneous group of trades forwarding reports for February and embracing a membership of 10,106 persons showed that 785 were unemployed on the last day of the month, a percentage of 7·8 as contrasted with 8·3 per cent in January. The level of activity was also above that of February, 1937, when 10·0 per cent of the members reported were out of work. Conditions for theatre and stage employees were somewhat better than in January and employment advances on a small scale were recorded by unclassified workers, barbers and stationary enginers and firemen. Hotel and restaurant employees alone showed some lessening in work afforded from January, though the change was quite slight. A moderately improved situation from February of last year was reflected by stationary enginers and firemen, hotel and restaurant, and theatre and stage employees, though minor contractions in work available were evident among barbers and unclassified workers.

Unemployment in the fishing industry during February showed little change from either the previous month or February of last year according to the reports tabulated from 3 associations with 594 members. Of these, 228 were without work on the last day of the month, a percentage of 38·4 in contrast with percentages of 37·0 in January and 39·2 in February, 1937.

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Month	Fishing	Lumbering and Logging	Mining	Manufacturing industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing, publishing and lithographing	Electric current	Wood products	Fibres, textiles and textile products	Textile and carpet workers	Garment workers	Hat, cap and glove workers	Animal products	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Mineral products	Miscellaneous manufacturing industries	Building and construction	Transportation	Shipping and stevedoring	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail shop-clerks)	Services	Governmental	Miscellaneous	All occupations

Of the 577 members reported in the lumbering and logging industry at the close of February, 27 were unemployed, a percentage of 4·7 as compared with 4·9 per cent in January. Activity, however, was slightly curtailed from February last year when 2·4 per cent of the members reported were idle.

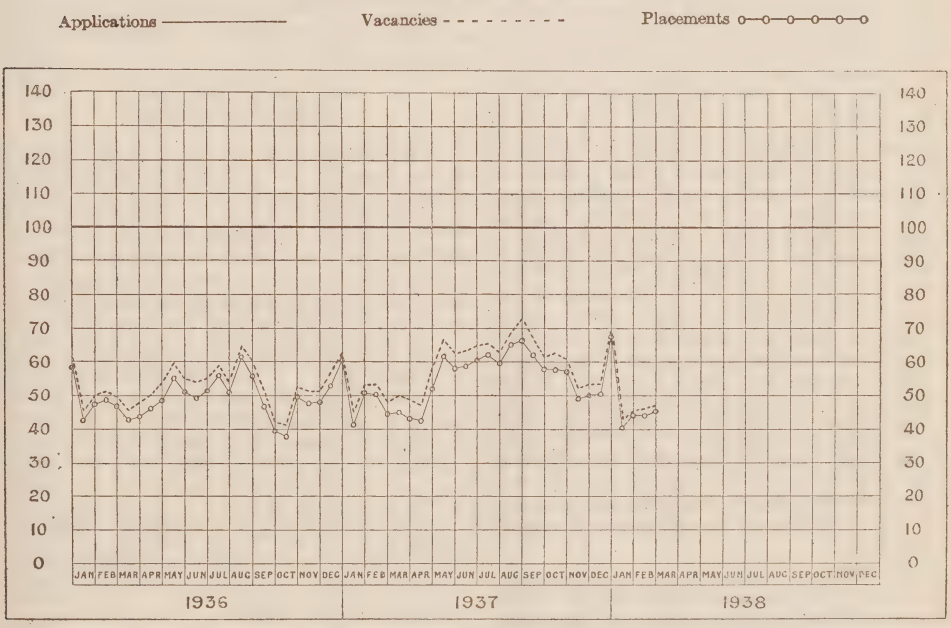

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1937 inclusive, and also the percentages of unemployment by provinces for February of each year from 1919 to 1935 inclusive, and for each month from February, 1936, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for February, 1938

The volume of business transacted by the offices of the Employment Service of Canada during the month of February, 1938, as indicated by the average daily placements effected, showed losses of nearly 15 per cent from that of the previous month and of 2 per cent from February, 1937. Declines from January were reported in farming, construction and maintenance, services, mining and transportation, of which the first three named were by far the most important. Gains were registered in logging, manufacturing and trade, the latter being nominal only, but slightly greater than the small decline shown in transportation. In comparison with February a year ago, all groups recorded fewer placements except logging, manufacturing and farming, where moderate gains were in evidence. Of the losses shown, the greatest was in construction and maintenance, due to a reduction in the amount of relief work offered.

The accompanying chart shows the trend of employment since January, 1936, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for work registered at the offices of the Employment Service of Canada, computations being made semi-monthly. It will be noticed that the curve of vacancies in relation to applications rose slightly throughout February and that of placements, in relation to applications, remained practically stationary during the first half, but showed a rise of about one point during the latter half of the month. At the close of the period, however, the level of vacancies was slightly under and that of placements slightly above the levels attained at the end of the corresponding month a year ago. The ratios of vacancies to each 100 applications were 46·2 and 47·2

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

during the first and the second half of February, 1938, in contrast with ratios of 53·4 and 48·1 during the corresponding periods of 1937. The ratios of placements to each 100 applications during the periods under review were 44·2 and 45·3, as compared with 50·4 and 44·5 during the corresponding month of 1937.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during February, 1938, was 991, as compared with 1,171 during the preceding month and with 1,035 in February a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,121, as compared with 2,628 in January, 1938, and with 2,033 during February, 1937.

The average number of placements made daily by the offices of the Service during February, 1938, was 949, of which 636 were in regular employment and 313 in work of one week's duration or less, as compared with a total daily average of 1,113 during the preceding month. Placements in February last year averaged 968 daily, consisting of 632 placements in regular and 336 in casual employment.

During the month of February, 1938, the offices of the Service referred 23,947 persons to vacancies and effected a total of 22,776 placements. Of these, the placements in regular employment were 15,257, of which 11,232 were of men and 4,025 of women, while placements in casual work totalled 7,519. The number of vacancies reported by employers was 15,885 for men and 7,882 for women, a total of 23,767, with applications for work numbering 50,894, of which 37,036 were from men and 13,858 from women. Reports for January, 1938, showed 29,253 positions available, 65,683 applications made and 27,818 placements effected, while in February, 1937, there were recorded 24,840 vacancies, 48,787 applications for work and 23,230 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1928, to date:—

Year	Placements		
	Regular	Casual	Totals
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938 (2 months)	35,344	15,250	50,594

Nova Scotia

During February, orders received at Employment Offices in Nova Scotia called for nearly 13 per cent fewer workers than in the preceding month and over 3 per cent less than during the corresponding month of last year. There was a decrease in placements of over 8 per cent when compared with January, but a gain of over 3 per cent in comparison with February, 1937. The only increase of importance in placements over February of last year was in services, but there were also small gains in trade, farming and mining. These advances were largely offset by reductions in construction and maintenance, logging and manufacturing. Industrial divisions in which most of the placements were effected during the month were logging, 44; construction and maintenance, 197 and services, 377, of which 302 were household workers. During the month, 73 men and 100 women were placed in regular employment.

New Brunswick

There was a decrease of over 4 per cent in the number of positions offered through Employment Offices in New Brunswick during February when compared with the preceding month, but a gain of nearly 21 per cent in comparison with the corresponding month of last year. Placements were on practically the same level as in January, but were nearly 24 per cent in excess of February, 1937. The increase over the corresponding month of last year was made up largely of casual placements in the highway division of construction and maintenance, as small gains in trade and manufacturing were offset by a decline in logging. Of the 769 placements made during the month, 182 were in construction and maintenance and 504 in services. Of the latter, 385 were household workers. Placements in regular employment numbered 27 of men and 85 of women.

Quebec

Opportunities for employment, as indicated by the orders received at Employment Offices in the Province of Quebec during February, were over 13 per cent less favourable than in the preceding month and nearly 1 per cent below the corresponding month of last year. There was a decrease in placements of nearly 12 per cent when compared with January, but an increase of nearly 5 per cent in comparison with February, 1937. The most important changes in placements

*63 Placements effected by offices since closed.

from February a year ago were gains in construction and maintenance and manufacturing, and a decline in logging. Small increases were also reported in trade and farming. Placements by industrial divisions included manufacturing, 178; logging, 335; construction and maintenance, 2,923; trade, 104 and services 2,238, of which 2,058 were of household workers. Placements in regular employment numbered 3,196 of men and 1,434 of women.

Ontario

Orders received at Employment Offices in Ontario during February called for nearly 19 per cent fewer workers than in the preceding month and over 10 per cent less than during the corresponding month of last year. There was a decrease also in placements of nearly 18 per cent when compared with January and of over 7 per cent in comparison with February, 1937. There was a large decrease in bush placements when compared with February of last year, which accounted for the decline under this comparison. The most important changes in other groups were increases in manufacturing and farming and losses in services and trade. Placements by industrial divisions included manufacturing, 685; logging, 785; farming, 569; transportation, 67; construction and maintenance, 1,040; trade, 188 and services, 2,704, of which 1,891 were of household workers. During the month, 2,835 men and 1,223 women were placed in regular employment.

Manitoba

There was a decline of over 57 per cent in the number of positions offered through Employment Offices in Manitoba during February when compared with the preceding month, but a gain of nearly 11 per cent in comparison with the corresponding month of last year. Placements were over 57 per cent fewer than in January, but nearly 9 per cent more than in February, 1937. Placements in farming and services were considerably higher than during February a year ago and accounted for the increase under this comparison. These gains, however, were partly offset by a decline in construction and maintenance. A small loss was also reported in logging. Industrial divisions in which most of the placements were effected during the month were logging, 298; farming, 1,410; construction and maintenance, 185 and services, 730, of which 647 were of household workers. There were 1,903 men and 495 women placed in regular employment during the month.

Saskatchewan

Employment opportunities, as indicated by orders received at Employment Offices in Saskatchewen during February, were nearly 10 per cent less favourable than in the preceding month and nearly 34 per cent below the corresponding month of last year. There was a decrease also in placements of nearly 22 per cent when compared with January and of nearly 40 per cent in comparison with February, 1937. Except for nominal gains in transportation, trade and finance, all industrial divisions showed declines in placements from February of last year, the most important being in farming, services, construction and maintenance and logging. Industrial divisions in which most of the placements were effected during the month were farming, 177; construction and maintenance, 55 and services, 480, of which 329 were of household workers. Placements in regular employment numbered 206 of men and 233 of women.

Alberta

There was a decline of nearly 33 per cent in the number of positions offered through Employment Offices in Alberta during February when compared with the preceding month and of nearly 30 per cent in comparison with the corresponding month of last year. Placements also showed a decrease of over 27 per cent when compared with January and of over 24 per cent in comparison with February, 1937. The large decrease in placements from February of last year was due to substantial declines in construction and maintenance and logging, as with the exception of a small gain in services, nominal changes only were reported in all other groups. Placements by industrial divisions included manufacturing, 63; logging, 160; farming, 556; construction and maintenance, 171 and services, 372, of which 292 were of household workers. There were 842 men and 253 women placed in regular employment during the month.

British Columbia

The demand for workers, as indicated by orders received at Employment Offices in British Columbia during February, was 43 per cent higher than in the preceding month and nearly 8 per cent above the corresponding month of last year. Similar percentages of gain were reported in placements under both comparisons. The increase in placements over February, 1937, was entirely due to a substantial gain in logging, as all other groups showed declines, the most noteworthy being in construction and maintenance and services. Industrial divisions in which most of the placements were effected during the month were logging, 1,567; farming, 64; construction and maintenance, 2,391 and services, 507, of which 374 were of household workers. During

the month, 2,150 men and 202 women were placed in regular employment.

Movement of Labour

During the month of February, 1938, the offices of the Employment Service of Canada made 15,257 placements in regular employment, 8,067 of which were of persons for whom the employment found was outside the immediate district of the offices at which they were registered. Of the latter, 650 were granted the Employment Service reduced transportation rate, 607 going to centres within the same province as the despatching office, and 43 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4.00, is granted by the Railway Companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

In Quebec during February, the Hull office granted a certificate to a bushman bound for employment in the Pembroke zone. Workers profiting by the Employment Service reduced transportation rate in Ontario during February numbered 517, of whom 516 were conveyed to provincial centres and one outside the province. The latter, a mine labourer, was shipped from Toronto to Rouyn. Provincially, the Port Arthur office despatched 185 bushmen, 5 mine workers, 5 labourers, 2 linemen, and one mechanic; the Sudbury office, 106 bushmen, and the Fort William office, 14 bushmen, and one labourer, within their respective zones. To Sault Ste. Marie, 5 bushmen were transported from North Bay, while the North Bay zone was the destination of one hoisting engineer travelling from Toronto. The movement within the province under the Dominion-Provincial Youth Training Plan involved 191 reduced rate certificates, 129 of which were issued to farm trainees. The Winnipeg office was responsible for the 58 transfers at the reduced rate effected in Manitoba during February, 17 of which were provincial and 41 inter-provincial. Provincially, the movement was entirely within the Winnipeg zone, 11 bushmen, 3 farm hands, 2 farm domestics and one shoe maker going to employment at various centres. Of the persons proceeding outside the province, 40 were destined to the Port Arthur zone including 38 bushmen and 2 mine workers. The one remaining transfer was of a hotel cook bound for Regina. Taking advantage of the reduced rate in Alberta during February, 66 persons travelled to situations within the province. For employment within its own zone, the Edmonton office despatched 39 bushmen, 11 mine workers, 4 transportation employees, 4 labourers, 2 farm hands, one farm housekeeper, one hotel employee, one housemaid and one mill sawyer. At the Medicine Hat office one farm hand and one farm cook secured certificates for transportation to Lethbridge. British Columbia offices issued 8 reduced rate certificates during February to provincial centres. At Vancouver, one mine cook and one watchman received certificates for transportation to Kamloops, and 3 mine workers, one hotel kitchen worker, and one housekeeper to points in the Vancouver zone. For employment within its own zone, the Prince George office transferred one sawyer.

Of the 650 persons who travelled at the Employment Service reduced transportation rate during February, 251 proceeded over the Canadian National Railways, 204 over the Canadian Pacific Railway, 192 over the Temiskaming and Northern Ontario Railway and 3 over the Pacific Great Eastern Railway.

(4) Building Permits Issued in Canada During February, 1938

The value of the building represented by the permits issued by 58 cities stood at $2,361,957 in February, 1938; this was an increase of $515,856 or 27·9 per cent over the total of $1,846,101 for the preceding month, and of $223,071 or 10·4 per cent in the more significant comparison with February of last year, when the authorized building in these cities was valued at $2,138,886.

Some 50 cities furnished detailed statistics, showing that they had granted about 125 permits for dwellings valued at over $700,000, and more than 1,000 permits for other buildings, estimated to cost in excess of $1,600,000. In January, authority was given for the erection of some 175 dwellings and 700 other buildings, whose value was estimated at approximately $530,000 and $1,171,000, respectively.

Nova Scotia, Quebec, Ontario, Manitoba, Alberta and British Columbia reported increases in the value of the building represented by the permits issued as compared with January, 1938; the greatest gain, of $259,970 or 31·4 per cent, took place in Ontario, Prince Edward Island, New Brunswick and Saskatchewan showed small declines in this comparison.

As compared with February, 1937, Ontario, Manitoba, Alberta and British Columbia recorded increases, that of $394,625 or 156·2 per cent in British Columbia being most noteworthy. The largest decrease in this comparison was that of $141,363 or 25·8 per cent in Quebec.

Of the four largest cities, Winnipeg and Vancouver reported increases in the value of the building authorized as compared with either January, 1938, or February, 1937, while Montreal and Toronto each showed a gain over the preceding month, but a loss as compared with the same month of last year.

Of the other centres, Sydney, Quebec, Shawinigan Falls, Sherbrooke, Belleville, Chatham, Hamilton, Ottawa, Owen Sound, Woodstock, Edmonton, Lethbridge, Kamloops, Nanaimo, New Westminster, North Vancouver and Victoria reported improvement over January, 1938, and also as compared with February, 1937.

The following table gives the value of the building authorized by 58 cities during February, and in the first two months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in January and February of the same years are also given (1926=100).

Year	Value of permits issued in February	Value of permits issued in first two months	Indexes of value of permits issued in first two months (1926=100)	Average indexes of wholesale prices of building materials in first two months (1926=100)
	$	$		
1938	2,361,957	4,208,058	35·5	91·5
1937	2,138,886	3,860,753	32·6	90·1
1936	1,921,176	3,223,934	27·2	83·9
1935	3,601,637	4,484,515	37·8	81·8
1934	894,102	1,601,914	13·5	82·2
1933	925,894	2,111,856	17·8	75·2
1932	2,845,271	6,056,283	51·1	79·4
1931	6,395,659	14,797,115	124·8	83·8
1930	8,919,078	16,136,475	136·1	96·8
1929	10,465,330	18,882,210	159·2	99·6
1928	10,318,338	18,034,925	152·1	96·4
1927	7,638,176	13,314,713	112·3	97·1
1926	7,139,549	11,859,083	100·0	102·4
1925	5,902,118	11,349,388	95·7	103·2
1924	4,093,800	8,554,379	72·1	112·3
1923	5,679,671	9,819,169	82·8	110·1
1922	4,738,105	8,064,642	68·0	108·3
1921	3,683,359	6,278,923	52·9	140·5
1920	6,156,287	10,173,311	85·8	137·5

The aggregate for the first two months of 1938, was 10.9 per cent higher than in 1937, being also greater than in January-February in 1936, 1934 or 1933; it was, however, rather lower than in 1935. The total for these months in each of the last seven years has been lower than in other years for which statistics for the 58 cities are available. The index numbers of wholesale prices of building materials have recently shown a moderately upward movement, but continue lower than in the years prior to 1931.

The accompanying table gives the value of the bulding permits issued by 58 cities in January and February, 1938, and February, 1937. The 35 cities for which statistics are available since 1910 are marked thus "*."

EMPLOYMENT CONDITIONS IN CANADA AT END OF MARCH, 1938

Reports of the Superintendents of the Employment Service

THE employment situation at the end of March, 1938, was reported by the Superintendents of the Employment Service of Canada to be as follows:—

Farmers in the Maritime Provinces are preparing for spring work and as soon as weather permits will commence ploughing. Maple products made their first appearance of the season and candy, sugar and syrup were available. Little activity was noted in logging; some camps were closed, while in others employment was almost entirely confined to pulpwood cutting. River driving was not yet under way, but sawmills at Kentville and Chatham were busy with the winter's cut of logs. Fishing was fair and preparations for the lobster season were progressing favourably. Fish plants were curing and smoking fish for export. Coal mines in the New Glasgow area operated two to six days per week, while those in Cape Breton and vicinity worked two and three days per week. Manufacturing, which had been rather slack, showed marked improvement as spring advanced, sugar refineries, pulp mills, and fertilizer plants being particularly busy. No idleness was reported in the iron and steel industry. Building construction was quiet and little road work was under way. Transportation by rail and water was heavy, but the movement of freight by motor truck was somewhat retarded, owing to the roads having been closed to heavy traffic. Trade continued to increase with the advance of Easter. Requests were received for housemaids and charworkers and in some localities the demand for experienced help exceeded the supply.

Improvement was noted in farming in the Province of Quebec and some few additional workers were placed during sugaring. With the exception of Hull, quietness prevailed in logging, as many of the lumber camps had closed. Mining also was only fair. Manufacturing centres reported as follows:—Montreal—increased activity in metals, boots, shoes, rubber and clothing, with textiles normal; Quebec—boots and shoes, clothing, and leather, active; Sherbrooke—a serious curtailment was reported in metals and textiles, especially cottons, silks and woollens, where staff reduction of 15 to 35 per cent had taken place; Hull—factories working at full capacity, with a few additions to staffs; Chicoutimi—paper mills still operating on a reduced production basis; Bagotville—quiet; Three Rivers—boots, shoes, cottons and clothing temporarily slack; La Tuque—pulp mills had sufficient orders to provide work for some little time and sash and door factories were very busy. Conditions in building construction appeared better with the advent of spring, several public works projects having been started, as well as the erection of private dwellings. Road construction and repairs also afforded employment to a number of men. Transportation at Quebec was active, but elsewhere in the Province, travel was curtailed owing to poor roads. Trade was better. The call for household workers in the Women's Division had increased and in some localities the demand exceeded the supply. At Sherbrooke, however, applications exceeded vacancies as a result of staff reductions in the textile industry.

In Ontario, there was an increased call for experienced farm hands with good wages being offered. Many logging camps were closed for the season, working conditions having become impossible, due to the sudden breakup of roads ,and dullness in this industry would likely continue until the spring drives. Mining remained steady at Timmins, but elsewhere little activity was reported. Conditions in manufacturing were only fair, some factories were operating on short time and very few new employees were being added to the pay rolls. Production in automobile plants had been curtailed to a considerable extent; this resulted in a reduction both in staff and working hours; however, manufacturers of road machinery, sporting goods, textiles, foodstuffs and shoes reported some improvement. Building trades generally were fairly busy and prospects favourable. Highway construction also was being carried on. Transportation and storage were quiet, apart from repair work and the fitting out of boats for summer service. Trade was somewhat below the average. In the Women's Department the call remained steady for all classes of household, hotel and restaurant workers, as well as charwomen, experienced domestic help being particularly in demand. Some female applicants also had been placed with industrial concerns.

A few orders were listed for farm help for spring work in the Prairie Provinces, but little seeding had been started as yet. Moisture conditions appeared better than for a number of years and farmers were optimistic. Many employers, however, were not in a position to engage help, owing to their inability to pay wages and applicants did not care for the idea of crop payments. In some districts, where there was curtailment of the acreage to be

seeded, the call for men was expected to be below that of other years. Logging placements were much fewer, due to seasonal activity having reached its close. Mining was quiet and manufacturing unchanged. Building construction, for the most part, was slack, although permits at Winnipeg were well in advance of last year's. Trade was dull. In the Women's division vacancies were listed both for city and country help, but in some instances lack of experience handicapped the applicants in filling positions.

There was little demand for farm help in British Columbia. Apple sales were still good, with some large orders for shipment. Logging showed practically no change. Sawmills at New Westminster were running on short time and shingle mills at about half their capacity. Mining recorded a slight improvement, as arrangements were made in various districts for further outside development. With the opening of the fishing season, in April, a number of boats were clearing for the banks. Cannery crews also were being assembled. Building construction was somewhat improved. Dry docks and shipyards were active at Prince Rupert and Victoria, but quiet at Vancouver. Longshoring was slack at Prince Rupert and Vancouver, but active at Victoria. Trade was fair. There were numerous vacancies for experienced domestics in the Women's division, consequently a general shortage of this type of applicant was noticeable, although, at Vancouver, all orders were easily filled, as so many women there were seeking employment.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, March, 1938 summarized the employment situation as follows:—

Employment showed a slight improvement between January 17 and February 14. It improved in building and public works contracting, in the clothing, boot and shoe, wool textile, pottery and furniture industries, in shipping service, and in agriculture. On the other hand, employment declined in the cotton industry, the silk and artificial silk industries, tinplate, metal goods and electrical apparatus manufacture, the motor vehicle and cycle industry, general engineering, the distributive trades, and dock and harbour service.

It is estimated that at February 14, 1938, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,324,000. This was 15,000 more than at January 17, 1938. On a comparable basis there was an increase of about 20,000 as compared with February 22, 1937.

Among persons, aged 16-64, insured under the general scheme of unemployment insurance (including the special schemes for the banking and insurance industries), the percentage unemployed in Great Britain and Northern Ireland at February 14, 1938, was 13·2 as compared with 13·3 at January 17, 1938. For persons aged 16-64 insured under the agricultural scheme the percentages were 8·4 at February 14, 1938 and 9·0 at January 17, 1938. For both schemes combined the percentage unemployed at February 14, 1938, was 13·0 as compared with 13·1 at January 17, 1938. On a comparable basis there was an increase at February 14, 1938, as compared with February 22, 1937, of about 1·6 in the percentage unemployed among persons within the general scheme, and of about 3·6 among persons within the agricultural scheme. For the two schemes combined there was an increase of about 1·7 between these dates.

At February 14, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,404,912 wholly unemployed, 335,084 temporarily stopped, and 70,425 normally in casual employment, making a total of 1,810,421, this was 17,186 less than at January 17, 1938. On a comparable basis there was an increase of about 238,000 as compared with February 22, 1937.

The total of 1,810,421 persons on the registers at February 14, 1938, included 1,034,324 persons with claims admitted for insurance benefit, 557,708 with applications authorized for unemployment allowances, 52,459 persons with applications for insurance benefit or unemployment allowances under consideration, and 165,930 other persons, of whom 42,319 were juveniles under sixteen years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at February 14, 1938, was 1,907,795, as compared with 1,927,005 at January 17, 1938. On a comparable basis there was an increase at February 14, 1938, of about 261,000 as compared with February 22, 1937.

United States

According to a press release issued on March 23, 1938, by the United States Secretary of Labour, Miss Frances Perkins, there was a

further decline in total non-agricultural employment of about 100,000 workers in February, the total reduction in the working forces being much smaller than in any of the preceding months. As compared with February of last year it was estimated that there were about 1,800,000 fewer workers engaged in non-agricultural jobs, exclusive of those employed on W.P.A. or other emergency projects.

Factories took on about 25,000 wage earners, a gain of 0·4 per cent in comparison with a typical increase of about 2·0 per cent from January to February in preceding years. Weekly pay rolls were 2·7 per cent larger, a weekly expansion amounting to about $3,800,000, or about half of the gain ordinarily reported.

Employment increased in over half of the manufacturing industries reporting to the Bureau of Labour Statistics. Among them were the clothing, textile, shoe, cigarette, food, and other nondurable goods industries. The heavy industries, in particular steel, machinery and foundries continued to lay off employees, but the declines were much smaller than in earlier months.

An increase in working time for factory employees already on the pay roll is indicated by larger increases in pay rolls than in employment in February. Fifty-six industries of the eighty-nine reporting to the Bureau had larger weekly pay rolls than in January.

A small number of manufacturing plants reported wage rate reductions. These reductions affected about 40,000 employees, chiefly in cotton textile mills, and in factories making silk and rayon goods, woollens, knit goods, rubber goods, and shoes.

Anthracite mines, and insurance companies also increased their working forces in February. The gains, however, were smaller than usual at this time of year. In private building construction, employment was better maintained than in past years, the reported decrease of 4·1 per cent being less than is ordinarily expected in February.

The principal reductions in employment during the month were seasonal declines in retail and wholesale trade amounting to 1·4 per cent for retail trade and 0·7 per cent for wholesale trade. Greater than seasonal declines were reported by Class 1 railroads, which laid off 20,000 men. Metal mines laid off 6·1 per cent of their workers and telephone and telegraph and light and power companies continued to reduce their staffs. In the service industries there were comparatively small changes in employment.

Public employment.—With a net increase of approximately 179,000 workers on projects of The Works Program in February, employment under this program amounted to 2,686,000. Of this number 147,000 were at work on Federal projects under The Works Program and 2,539,000 on projects operated by Works Progress Administration, the National Youth Administration, and Student Aid. Pay rolls for the entire program totalled $110,248,000 and were $4,772,000 greater than in January.

Approximately 93,000 employees were working on P.W.A. construction projects, a decline of 4,000 from the preceding month.

During the period ending in mid-February 147,000 employees were working on construction projects financed from regular federal appropriations, the lowest employment level on these projects since April 1937. When compared with January, this was a decrease of slightly more than 7,000. Pay-roll disbursements amounted to $14,591,000 and were $1,115,000 less than in the preceding period. The value of orders placed for materials during February exceeded $19,015,000.

Continued seasonal reductions in employment on State road construction work reduced the total number of men engaged during the month ending February 15 to 128,000 a decline of 14,000 compared with January. Pay-roll disbursements totalled $8,789,000. The number of workers employed in the Civilian Conservation Corps was 328,000, a decrease of 7,000 as compared with January.

Home Improvement Loans

Home Improvement Plan loans numbering 36,183 and amounting to $14,186,996.53 were reported to March 31, 1938, by Hon. Charles A. Dunning, Minister of Finance. These show an increase of 1,378 loans amounting to $560,298.28 over the figures quoted to February 15, 1938.

An increase of 666 loans amounting to $295,015.80 in Ontario brought the grand total for that province alone to 15,963 loans for $6,300,791.86. Quebec with an increase of 182 loans totalling $99,664.53 reports a total of 5,339 loans for $2,686,731.87. British Columbia holds third position with an increase of 244 loans for $70,274.42 bringing the grand total for the province to 4,010 loans amounting to $1,286,412.24.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor the full text of which appeared in the Labour Gazette for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages

clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

Works of Construction, Remodelling, Repair or Demolition

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

DEPARTMENT OF FISHERIES

Supply and installation of a new diesel engine in the patrol boat *Gilbert* at Lunenburg, N.S. Name of contractors, the Lunenburg Foundry Garage Co., Ltd., Lunenburg, N.S. Date of contract, March 3, 1938. Amount of contract $4,089. A fair wages schedule was included in the contract for the installation work as follows:—

	Per hour
Shipwrights and joiners	$0 58
Wood caulkers	0 58
Machinists	0 58
Machinists' helpers	0 40
Fitters (machine)	0 58
Blacksmiths	0 58
Machinists' helpers	0 40
Painters	0 48
Riggers	0 48
Sheet metal workers	0 58
Sheet metal workers' helpers	0 40
Welders, electric	0 58
Welders and burners (acetylene)	0 58
Plumbers and pipefitters	0 58
Plumbers' and pipefitters' helpers	0 40
Coppersmiths	0 58
Coppersmiths' helpers	0 40
Labourers	0 35

DEPARTMENT OF NATIONAL DEFENCE

Surfacing of the floor of the Drill Hall, Bessborough Armoury, Vancouver, B.C. Name of contractor, Mr. David I. Curr, Vancouver, B.C. Date of contract, March 17, 1938. Amount of contract, $2,059. A fair wages schedule was included in the contract as follows:—

	Per hour
Driver	$0 45
Driver, horse and cart	0 60
Driver, team and wagon	1 00
Motor truck driver	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
4 tons	2 50
5 tons	3 00
Mastic floor rubbers and finishers	0 60

	Per hour
Mastic floor layers	0 85
Mastic floor kettlemen	0 60
Labourers	0 45

Construction of alterations and additions to Building for the R.C.A.F. (N.P.) No. 118 B Spuadron, Montreal, P.Q. Name of contractors, Sutherland Construction Co., Montreal, P.Q. Date of contract, March 2, 1938. Amount of contract, $13,855. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters	0 70
Cement finishers	0 60
Compressor operators—Gasoline or electric	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Electricians (inside wiremen)	0 75
Engineers on steel erection	0 75
Labourers	0 40
Lathers' metal	0 75
Lathers, wood	0 65
Machinists	0 65
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Ornamental iron workers	0 66
Painters and glaziers	0 66
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 75
Roofers, felt and gravel	0 45
Sheet metal workers	0 70
Structural steel workers	0 75
Welders on steel erection	0 75
Watchman	0 35

Construction of alterations to the south block of St. Johns Barracks, St. Johns, P.Q. Name of contractor, Mr. Jean Paul Trahan, St. Johns, P.Q. Date of contract, March 8, 1938. Amount of contract, $8,200. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Carpenters	$0 55
Cement finishers	0 50
Electricians ((inside wiremen)	0 60
Labourers	0 35
Lathers, metal	0 55
Painters	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 60
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 40
Tile setters	0 70
Tile setters' helpers (all men assigned to help tradesmen)	0 40
Watchman	0 30

Construction of shelving and fixtures for Nos. 1, 2, and 3 Buildings, R.C.O.C., Signal Hill, Esquimalt, B.C. Name of contractors, Messrs. Parfitt Bros. Victoria, B.C. Date of contract March 21, 1938. Amount of contract, $3,910. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Carpenter	$0 70
Carpenter's helper	0 50
Labourer	0 45
Painter and glazier	0 65

Installation of an electric power distribution system at the Joint Service Magazine, Esquimalt ,B.C. Name of contractors, Murphy Electric Co., Ltd., Victoria, B.C. Date of contract, March 23, 1938. Amount of contract, $7,875. A fair wages schedule was included in the contract as folows:—

	Per hour
Labourers	$0 45
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
Driver, team and wagon	0 85
Drivers	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operator—Gasoline or electric	0 55
Cable splicers	1 09⅜
Linemen	0 97
Linemen, helpers	0 70
Electricians (inside wiremen)	0 75
Watchman	0 45

Construction of three D.E.L. emplacements and Power House at York Island, B.C. Name of contractors, Northern Construction Co. and J. W. Stewart Ltd., and E. J. Ryan Contracting Co., Ltd., Vancouver, B.C. Date of contract, March 23, 1938. Amount of contract, $14,500. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 75
Blacksmiths	0 65
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Cement and concrete mixer operator:	
Steam	0 65
Gasoline or electric	0 50
Cement finisher	0 60
Compressor operators—gasoline or electric	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 45
Electricians (inside wiremen)	0 75
Engineers on steel erection	1 12½
Engineers, operating steam—Single or double drum	0 65
Firemen, stationary	0 45
Hoist operators—gasoline or electric	0 55
Labourers	0 45
Machinists	0 70
Motor truck driver	0 45

	Per hour
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Ornamental iron workers	0 75
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 80
Rodmen, reinforced steel	0 50
Sheet metal workers	0 65
Shovel operators—Gasoline	1 12½
Steam shovel cranemen	0 90
Steam shovel engineers	1 12½
Steam shovel firemen	0 74½
Structural steel workers	1 12½
Watchmen	0 40

DEPARTMENT OF PUBLIC WORKS

Reconstruction of portion of the north wharf at Pelee Island, Essex Co., Ont. Name of contractors, Detroit River Construction Co., Ltd., Windsor, Ont. Date of contract, March 21 1938. Amount of contract, approximately $61,769.32. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Blacksmiths' helpers	$0 40
Blacksmiths	0 55
Carpenters	0 60
Cement finishers	0 55
Cement and concrete mixer operators—Gasoline or electric	0 45
Compressor operators—Gasoline or electric	0 45
Drivers	0 35
Driver, team and wagon	0 65
Pile driver engineer	0 65
Pile driver fireman	0 40
Motor truck driver	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
Machinist	0 60
Hoist operator:	
Gasoline	0 45
Steam	0 65
Labourers	0 35
Watchman	0 30

Construction of a wharf at Skidegate, Queen Charlotte, Island, B.C. Name of contractors, Victoria Pile Driving Co., Ltd., Victoria, B.C. Date of contract, February 17, 1938. Amount of contract, approximately, $14,983.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Boomman	$1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45
Piledriver engineer	1 12½
Piledriver foreman	1 25

55192—6½

Construction of a public building at Meadow Lake, Sask. Name of contractor, Mr. William C. Wells, Wilkie, Sask. Date of contract, February 14, 1938. Amount of contract, $23,250 and unit prices for any additional work. A fair wages schedule was included in the contract as follows:—

	Per hour
Cement and concrete mixer operator, gasoline or electric	$0 45
Cement finishers	0 55

Structural steel workers	0 80
Timbermen and cribmen*	0 55
Welders on steel erection	0 80
Watchmen	0 40
Engineers on steel erection	0 80

*(Using interchangeably such tools as axe, adze, auger, hammer, cross-cut saw.)

GROUP "B" CONTRACTS

Manufacture and Repair of Equipment Supplies, Interior Fittings, etc.

NOTE: Each of the contracts noted under this heading contain the "B" Labour Conditions referred to in the introduction to this article.

DEPARTMENT OF NATIONAL DEFENCE

Nature of Contract	Contractor
One transmitter, 400 watt	Northern Electric Co., Ottawa, Ont.
Metal door frames and doors	A. B. Ormsby Co., Ltd., Toronto, Ont.
Float repairs	Wells Air Harbour, Lulu Island, B.C.
Raft target with mast, less superstructure	Waterous Ltd., Brantford, Ont.
Raft bombing target, with superstructure and two sets mooring and sinker arrangements for bombing targets	H. N. Cummings, Westboro, Ontario.
One launch—38 ft.	Peterborough Canoe Co., Ltd., Peterborough, Ont.
Fencing	Lundy Fence Co., Ltd., Vancouver, B.C.
Steel lattice masts, 100 ft.	Vulcan Iron Works Ltd., Winnipeg, Man.
Steel lattice masts, 150 ft.	Vulcan Iron Works Ltd., Winnipeg, Man.
Hydraulic press, 300 tons	Dominion Engineering Co., Ltd., Montreal, P.Q.
Oilskin coats	J. F. Creaser Co., Ltd., LaHave, N.S.
Blue frieze	Horn Bros. Woollen Co., Ltd., Lindsay, Ont.
Plan cabinets, steel	The Pedlar People Ltd., Oshawa, Ont.
Plan cabinets, steel	Dennisteel Corp., Ltd., London, Ont.
Drill trousers	S. S. Holden Ltd., Ottawa, Ont.
Steel shelving	Eberhard & Walker Ltd., London, Ont.
Blue cloth for caps	Paton Mfg. Co., Ltd., Montreal, P.Q.
White drill	Montreal Cottons Ltd., Montreal, P.Q.
Aviation suits, winter	S. S. Holden Ltd., Ottawa, Ont.
Stockings	Mercury Mills Ltd., Hamilton, Ont.
Blue serge	Dominion Woollens & Worsteds Ltd., Toronto, Ont.
Overshoes and rubbers	British Rubber Co. of Canada Ltd., Toronto, Ont.

Department of Fisheries

Nature of Contract	Contractor
One propeller, 4 blade	Vancouver Engineering Works Ltd., Vancouver, B.C.

Post Office Department

Nature of Contract	Contractor
Metal dating stamps & type, cancellers, etc.	Pritchard-Andrews Ltd., Ottawa, Ont.
Rubber stamps, daters, etc.	Pritchard-Andrews Ltd., Ottawa, Ont.
Letter carriers' uniforms	Pollack & Dorfman, Quebec, P.Q.
Letter carriers' uniforms	Horn Bros. Woollen Co., Lindsay, Ont.
Letter carriers' uniforms	Tayside Textiles Ltd., Perth, Ont.
Letter carriers' uniforms	Uniform Cap Co., Ottawa, Ont.
Scales and weights	Pritchard-Andrews Ltd., Ottawa, Ont.
Mail bag fittings, etc.	Bell Thread Co., Ltd., Hamilton, Ont.
Mail bag fittings, etc.	J. Spencer Turner Co. Ltd., Hamilton, Ont.
Mail bag fittings, etc.	Walter H. Wickware, Ottawa, Ont.
Mail bag fittings, etc.	Dominion Textile Co., Ltd., Montreal, P.Q.
Mail bag fittings, etc.	Cubok Mfg. & Supply Co., Ltd., Ottawa, Ont.
Mail bag fittings, etc.	Hugh Carson Co., Ltd., Ottawa, Ont.
Mail bag fittings, etc.	Interprovincial Equipment Co., Ottawa, Ont.
Stamping machine parts	Machine Works Ltd., Montreal, P.Q.
Letter boxes and locks	Canadian Repaid Shop Reg'd, Montreal, P.Q.
Letter boxes and locks	Martin Kiely Co., Ltd., Montreal, P.Q.
Letter boxes and locks	Pritchard-Andrews Co., Ltd., Ottawa, Ont.

Royal Canadian Mounted Police

Nature of Contract	Contractor
Bed blankets	Bates & Innes, Ltd. Carleton Place, Ont.
Fur coats	J. B. Laliberte Ltd., Quebec, P.Q.
Brown leather gloves	The St. Lawrence Glove Works Ltd., Quebec, P.Q.
Brown drill field jackets and trousers	S. S. Holden, Ottawa, Ont.

Department of Public Works

Interior fittings in the public building at Berwick, N.S. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, February 23, 1938. Amount of contract, $894.

Interior fittings in public buildings at Arthur, Ont. Name of contractors, The Valley City Manufacturing Co., Ltd., Dundas, Ont. Date of contract, February 23, 1938. Amount of contract, $799.

Interior fittings in the public building at Vankleek Hill, Ont. Name of contractors, Lachute Lumber & Mfg. Co. Ltd., Lachute Mills, P.Q. Date of contract, March 18, 1938. Amount of contract, $675.

Interior fittings for the public building at Cobourg, Ont. Name of contractors, Canadian Office and School Furniture Ltd., Preston, Ont. Date of contract, March 23, 1938. Amount of contract, $1,098.

Interior fittings for the public building at Cardston, Alberta. Name of contractors, R. L. Cusing Millwork Co., Ltd., Moose Jaw, Sask. Date of contract, February 26, 1938. Amount of contract, $937.

Interior fittings for the Customs offices in the Examining Warehouse, Vancouver, B.C. Name of contractors, Dennisteel Corporation Ltd., London, Ont. Date of contract, February 22, 1938. Amount of contract, $3,390.

Interior fittings for the customs offices in the Winch building, Vancouver, B.C. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, February 21, 1938. Amount of contract, $1,630.

SPECIAL CONTRACTS

It is provided in these contracts that working hours shall not exceed 48 per week.

Department of National Defence

The major reconditioning of Bellanca Pacemaker Landplane 609. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, March 2, 1938. Amount of contract, $4,935. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Engine Assembly—	
Fitter (A.E.)	$0 60
Fitters' helper (A.E.)	0 40
Machinist	0 65
Machinist's helper	0 40
Machine operators	0 50
Sandblasters	0 55
Labourers	0 35
Air frame construction and Assembly—	
Fitter (A.F.)	0 60
Fitter's helper (A.F.)	0 40
Machinist	0 65

Machinist's helper	0 40
Machine operator	0 50
Woodworker (joiner)	0 60
Woodworker's helper	0 40
Welder	0 60
Welder's helper	0 40
Electrician	0 65
Electrician's helper	0 40
Painter and doper	0 55
Painter and doper's helper	0 40
Fabric worker—female	0 40
Fabric worker's helper	0 30
Upholsterer	0 55
Upholsterer's helper	0 40
Sandblaster	0 55
Labourer	0 35
Erector	0 60
Erector's helper	0 40
Sheet metal worker	0 60
Sheet metal worker's helper	0 40
Riveters	0 50
Riveter's helpers	0 40
Apprentices to fitters, machinists, and sheet metal workers only—(16 to 21 years of age)—	
1st year	0 20
2nd year	0 25
3rd year	0 35

Note.—Only one helper to be employed to each journeyman.

No more than one apprentice to be employed to each five journeymen.

Complete overhaul of Jaguar Mark IV Engine 768/804. Name of contractors, Armstrong Siddeley Motors Ltd., Ottawa, Ont. Date of contract, March 8, 1938. Amount of contract, $1,314.40. The preceding fair wages schedule was also included in this contract.

Major reconditioning and repair of the Vedette Mark VI flying boat 817. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, March 2, 1938. Amount of contract, $4,930. The preceding fair wages scedule was also inserted in this contract.

Manufacture of 12 Lysander Mark II, convertible land or ski-planes. Name of contractors, National Steel Car Corporation, Ltd., Hamilton, Ont. Date of contract, February 28, 1938. Work to be done on a cost plus basis. The preceding fair wages schedule was also included in this contract.

Complete overhaul of Jaguar Mark VIB Aircraft engine. Name of contractors, Armstrong Siddeley Motors Ltd., Ottawa, Ont. Date of contract, March 29, 1938. Amount of contract, $1,622.91. The preceding fair wages schedule was also included in this contract.

Major reconditioning and modification of two pairs of Delta floats, including float undercarriages. Name of contractors, Canadian Vickers Ltd., Montreal, P.Q. Date of contract, March 30, 1938. Amount of contract, $1,705. The preceding fair wages schedule was also included in this contract.

Erector	0 70
Erector's helper	0 45
Sheet metal worker, leading hand	0 80
Sheet metal worker	0 70
Sheet metal worker's helper	0 45
Riveter	0 60
Riveter's helper	0 45
Heat treat operator	0 70
Heat treat operator's helper	0 45
Plater, Cadmium	0 65
Plater, Anodic	0 70
Plater, Anodic helper	0 45
Rivet packer	0 45
Modeler (patternmaker)	0 70
Foundry man (moulder)	0 70
Cable splicer	0 70
Tool and die maker	0 80
Hammer operator	0 70
Apprentices to fitters, machinists and sheet metal workers only; 16 to 21 years of age:	
1st year	0 25
2nd year	0 30
3rd year	0 40

Note.—Only one helper to be employed to journeymen. Not more than one apprentice to be employed to each five journeymen.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated. It may be stated that this has been the practice in the past.

(Note: It has been drawn to the attention of the Department that the precise meaning of this introductory statement has been somewhat obscure in past issues and that in some cases it was not clear whether the agreements were signed or verbally accepted.)

Manufacturing: Tobacco and Liquors

Regina, Saskatchewan.—A Certain Brewery and the International Union of United Brewery, Flour, Cereal and Soft Drink Workers of America, Local No. 318.

Agreement to be in effect from September 1, 1937, to March 31, 1939, and thereafter from year to year, subject to notice.

Only union members to be employed, if available. No discrimination against employees on account of union activity. Union made materials and machinery to be given preference. The union label supplied by the union may be used.

Hours: 8 per day, 4 on Saturdays, a 44-hour week except for operating engineers who work an 8-hour shift each day.

Overtime: Time and one-half; work on Sundays and eight specified holidays, double time.

Vacation with pay: First and second cellarmen and operating engineers to receive two weeks' vacation each year with pay.

Minimum wage rates: First and second cellarmen $120 per month, operating engineers $125 per month; men employed less than one year, 45 cents per hour; men employed more than one year, 50 cents; men employed more than two years, 55 cents. Men employed more than one year to receive a minimum weekly wage of $10 when employable.

If necessary at any time to reduce the number of men employed they will be laid off impartially and in rotation in their respective departments.

Preference for promotion to be based on seniority.

Any disputes which cannot be settled between the employer and the union will be referred to a board of arbitration.

Manufacturing: Textiles and Clothing

Montreal, P.Q.—Certain Men's Cloth Hat and Cap Manufacturers and the United Hatters, Cap and Millinery Workers' International Union, Local No. 36.

Agreement to be in effect from October 29, 1937, to January 1, 1939.

Only union members to be employed and new employees must be secured through the union. Union representatives to have access to the establishments.

Provision is made for arbitration of disputes and no strikes or lockouts to occur.

Other provisions of this agreement relating to hours, wages and other labour conditions were made obligatory under the Workmen's Wages Act and were summarized in the Labour Gazette, January, page 102.

Manufacturing: Printing and Publishing

Toronto, Ontario.—Three Daily Newspapers and the International Printing Pressmen and Assistants' Union, Local No. 1.

Agreement to be in effect from June 1, 1937, to May 31, 1938, and thereafter from year to year, subject to notice.

Only union members to be employed, if available.

Hours: For day work, 8 per day, 6 days per week, a 48-hour week; for night work, 7 per night, 6 nights per week, a 42-hour week.

Overtime: Time and one-half; all work on Sundays and on eight specified holidays except for regular issues of the paper, to be paid at double time.

Minimum wage rates for journeymen pressmen: $48.50 per week for both day and night work.

One apprentice allowed to every ten journeymen, but not more than three to one office. Apprentices to serve six years.

Wages for apprentices: From $14 per week during first year to $34 during second half of sixth year.

A joint standing committee to be chosen, and any disputes are to be referred to it. Disputes which cannot be so settled, to be referred to arbitration.

Construction: Building and Structures

Edmonton, Alberta.—Edmonton General Contractors' Association and the Bricklayers, Masons and Plasterers' International Union, Local No. 1 (Bricklayers and Masons).

Agreement to be in effect from May 1, 1938, to April 30, 1939. Notice of any desired change to be given and the agreement for the next year negotiated in February, 1939.

Disputes are to be referred to an abritration committee whose decision will be binding. No strike or lockout to occur before such dispute is referred to this committee for settlement.

Hours: 8 per day from Monday to Friday, a 40-hour week, but if considered necessary by the contractor, 4 hours may be worked on Saturday morning, making a 44-hour week.

Other conditions relating to minimum wage rates, overtime pay, apprentices, contracting by union members, etc., are similar to those contained in the schedule under the Industrial Standards Act and summarized on page 454 of this issue.

EDMONTON.—EDMONTON GENERAL CONTRACTORS' ASSOCIATION AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL NO. 1325 AND THE AMALGAMATED BUILDING WORKERS OF CANADA, EDMONTON LOCAL (Carpenters).

Each of the above two unions has a separate agreement, identical in terms with the above contractors' association.

Agreements to be in effect from April 1, 1938, to March 31, 1939. Either party wishing to change the agreement is to give notice not later than January 15, 1939 and negotiations for a new agreement will take place in that month.

Union carpenters to be given preference of employment, if available.

Other terms of this agreement are the same as those summarized below on page 454 which are in effect under the Industrial Standards Act.

Construction: Shipbuilding

NORTH VANCOUVER, B.C.:—A SHIPBUILDING AND REPAIR COMPANY AND THE AMALGAMATED BUILDING WORKERS OF CANADA, SHIPYARD SECTION, OF VANCOUVER (SHIPBUILDERS, ETC.)

Agreement to be in effect from January 6, 1938, to January 6, 1939.

Only union members to be employed.

Hours 8 per day, 4 on Saturdays, a 44-hour week. In case of shift work, half an hour to be allowed second and third shift for meals.

Overtime: Time and one-half from 5 p.m. to 9 p.m. and when required to work through meal hours. All other overtime and work on Saturdays and statutory holidays, double time. For shift work, if three consecutive shifts are worked, straight time may be paid, but if less than three shifts, or if shifts are broken, overtime rates to be paid.

Wages for shipwrights, joiners and boatbuilders, $6.64 per day; for caulkers, $6.89 per day.

Workmen's Wages Act, Quebec

The following agreements and amendment to an agreement have recently been made obligatory by Orders in Council and are summarized in the next article:

Lithographic Industry, Province of Quebec.
Job Printing Industry, Montreal District.
Baking Industry, Montreal (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are noted in the article beginning on page 453:—

SASKATCHEWAN

Plumbers, Regina.

ALBERTA

Bricklayers, Edmonton.
Carpenters, Edmonton.
Bowling Alley Employees, Edmonton.

WORKMEN'S WAGES ACT, QUEBEC

Agreements Recently Made Obligatory and Other Proceedings

AN Act respecting Workmen's Wages which was summarized in the July, 1937 issue of the LABOUR GAZETTE, page 745, replaces the Collective Labour Agreements Extension Act but stipulates that the agreements and regulations made under the former Act continue in effect for the period for which they were made. Under the Workmen's Wages Act any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreement which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published, and 30 days is then allowed for filing of objections and the Minister may hold an inquiry. After this period if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette*. The agreement may be amended through the same procedure. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette*,

the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in towns of 5,000 or more, and such by-law must be approved by Order in council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act are noted in the issues beginning July, 1937.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting the lithographic industry throughout the province and printing trades at Montreal, with a correction to the latter agreement and the amendment to the Order in Council affecting the baking industry at Quebec, which agreements and amendment are summarized below. Requests for the extension of new agreements were published in the *Quebec Official Gazette* as follows: barbers and hairdressers at Valleyfield in the issue of March 5; building trades at Quebec and shoe repairers at Montreal in the issue of March 12; building trades at Joliette and tavern employees at Quebec in the issue of March 19; building trades in the Eastern Townships, fur workers at Montreal, workers engaged in the manufacture of railway and tramway cars, busses, mine and industrial cars and parts and accessories thereof, throughout the province, and truck drivers at Three Rivers, in the issue of March 26; coal handlers (ship and dock) at Montreal, building trades at Montreal and Three Rivers in the issue of April 2. Requests for amendments to agreements were published in the following issues: baking industry, Quebec, in the issue of March 19, plumbers and tinsmith roofers at Three Rivers and barbers and hairdressers at Three Rivers in the issue of March 26. Notices of the approval by Orders in Council of the constitution and by-laws of certain joint committees and of the requiring of competency cards in certain trades are also noted below.

Manufacturing: Vegetable Foods

Baking Industry, Quebec.—An Order in Council, approved March 12 ,and published in the *Quebec Official Gazette,* March 19, amends the previous Order in Council for this industry (Labour Gazette, December, 1937, page 1385).

Hours: the maximum of 65 hours per week in bakeries in the city of Quebec and Levis and of 72 hours outside these districts now also applies to delivery workers.

In bakeries where cakes, biscuits or any pastry is made, both male and female employees are included. For those employees engaged in the production of these products, the foreman must be paid a minimum of $23 per week, 40 per cent of the employees a minimum of $17, a further 40 per cent a minimum of $12 and the remaining 20 per cent at least $7 per week; where there are five or more of such bakery employees, the assistant foreman must be paid at least $21. Of the other employees of such bakeries, including packers, wrappers, order or sample clerks and employees of retail or wholesale stores of the industry, 40 per cent must be paid a minimum of $11 per week, a further 40 per cent at least $9 and the remaining 20 per cent, $7.50.

Manufacturing: Printing and Publishing

Lithographers, Province of Quebec.—An Order in Council, approved February 9, and published in the *Quebec Official Gazette,* February 12, makes obligatory the terms of an agreement between the Canadian Lithographers' Association, Province of Quebec Branch, and the Amalgamated Lithographers of America, local No. 27, from February 12, 1938, to November 30, 1939, and thereafter from year to year, subject to notice.

The agreement covers all who are engaged in the production of lithography but excludes those in the industry employed: as office executives or clerks, maintenance employees; as cutters, binders and finishers in the finishing departments; those engaged on lithographing on metal, wood, bags, wallpaper, cotton, silk, rubber and leather, shipping containers, tissue paper products, etc.; as operators on multicopying machines used for the reproduction of facsimile typewritten matter; as operators on lithographing equipment in private plants which equipment is used for printing over for the sole use of such private plant material already printed or lithographed by a commercial printing or lithographing establishment.

Hours: Forty-five per week, either nine per day from Monday to Friday or the forty-five hours may be divided into five and one half days, ending at noon on Saturday. For night work, nine hours per night for five nights, a forty-five hour week.

Overtime: All time worked before or after the regularly established hours in each shop to be paid at time and one-half for the first three hours of overtime from Monday to Friday. All other overtime and work on Sundays and holidays, double time. There are seven specified holidays in English plants and eight in French plants.

Minimum hourly wage rates for pressmen and feeders, for day work: On presses up to and including 14 x 19 inches, journeymen pressmen fifty-eight cents until end of 1938 and sixty-two cents from January 1, 1939, feeders thirty-five cents in 1938 and thirty-seven cents in 1939; on presses over the above size, journeymen pressmen from seventy-five cents to $1.35, varying with the size of the presses and whether one, two or three colours are used; direct and offset rotary presses—journeymen pressmen ninety-three cents; flat bed presses (direct process)—journeymen pressmen seventy cents; press feeders—varying from thirty-two cents during first year, thirty-five cents second year and thirty-eight cents thereafter, to forty cents during first year, fifty cents during second year and sixty cents thereafter, according to

the size and type of press and colours used; press helpers thirty cents per hour.

Minimum hourly wage rates for other employees on day work: Artists—eighty-five cents for poster letterers, $1 for letterers and engravers (reproducers only), $1.10 for poster crayons, $1.20 for process (colour correctors); camera operators—process $1, commercial fifty-six cents; other operators fifty-two and ninety cents; transferrers eghty-five cents and $1, provers $1, stone and plate preparers fifty-three and sixty-five cents.

Minimum wages for night shifts for all employees is fifteen per cent above the day scale.

One apprentice allowed to each four journeymen pressmen or fraction thereof, but apprentices employed in any shop as at October 22, 1937, may continue their apprenticeship even if the number of such apprentices exceeds the above proportion.

Minimum wages for apprentices for day work: Pressroom, from thirty-eight cents per hour during first six months to seventy-five cents during second half of fourth year; all other apprentices, from twenty cents during first six months to fifty-five cents during second half of fifth year and from sixty-one cents during first six months as improvers to seventy-nine cents during second half of second year as improvers.

Handicapped employees may be granted permission to work for lower wages, the terms and conditions to be decided by the joint committee.

A joint committee consisting of an equal number of employers and employees to be formed to supervise the carrying out of this agreement.

Printing Trades, Montreal District.—An Order in Council, approved February 9, and published in the *Quebec Official Gazette*, February 12, with correction in the issue of March 12, makes obligatory the terms of an agreement between L'Association des Maîtres-Imprimeurs de Montréal Incorporée (The Association of Master Printers of Montreal, Incorporated), the Employing Printers Association of Montreal, Incorporated, and Le Syndicat Catholique et National des Typographes, Incorporé (The National Catholic Union of Typo Printers, Incorporated), Le Syndicat Catholique et National des Pressiers, No. 1, Incorporé (The National Catholic Union of Pressmen, No. 1, Incorporated), Le Syndicat Catholique et National des Reli-

eurs, Incorporé (The National Catholic Union of Bookbinders, Incorporated), Le Conseil Syndicat Catholique des Métiers Alliés de l'Imprimerie, Incorporé (The Catholic Union Council of Allied Printing Trades, Incorporated), L'Union Typographique Jacques Cartier, No. 145 (The Jacques Cartier Typographical Union (International Typographical Union), No. 145), The Montreal Typographical Union (International Typographical Union), No. 176, the Montreal Printing Pressmen and Assistants' Union (International), No. 52, and l'Union Internationale des Relieurs, Local 91 (The International Union of Bookbinders, Local 91).

The agreement is in effect from February 12, 1938, to December 31, 1940, and thereafter from year to year, subject to notice.

The agreement is similar to the one previously in effect and summarized in the Labour Gazette, June, 1936, page 546 and December, 1936, page 1181, with certain exceptions:

The city of Hull is now included in Zone II. Zone III now comprises all territory outside of zones I and II and also establishments printing a weekly or bi-weekly newspaper in any part of the district outside the Island of Montreal.

Hours in zone I are reduced from forty-eight to forty-five per week for day work.

Lithographers formerly in this agreement are now excluded as they have a separate agreement covering the whole province, as noted above.

Wages were increased from three to five cents per hour with further increases provided for in 1939 and 1940. Wages rates for some of the principal classes are noted in the accompanying table.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council, as noted in the *Quebec Official Gazette,* March 19:

Barbers and hairdressers, St. Hyacinthe.

Building trades, Montreal.

Baking industry, Hull.

Fine glove operators and blockers, Province of Quebec.

Certificates of Competency

Certificates of competency were made obligatory under the following agreement, as noted in the *Quebec Official Gazette,* March 19:

Building trades, Sorel.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Saskatchewan and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers or employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410 and May, 1937, page 505; Alberta in June, 1935, page 504, June, 1936, page 501 and June, 1937, page 640; Nova Scotia in June, 1936, page 604; Saskatchewan in the issue of June, 1937, page 635.

Industrial Standards Act of Saskatchewan

Construction: Buildings and Structures

Plumbers, Regina.—An Order in Council dated March 2, 1938, and published in *The Saskatchewan Gazette,* March 15, makes binding the terms of an agreement between the Regina master plumbing, heating and sanitary engineers and the journeymen plumbers and steamfitters, from March 25, 1938, to March 27, 1939.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. In case of shift work, night shifts not to exceed 7 hours.

Overtime: time and one-half. Work on Sundays and eight specified holidays, double time.

Minimum wage rate for plumbers and steamfitters: 90 cents per hour. Journeymen employed on night shifts to be paid one and one-seventh times the regular rate.

Not more than one apprentice in any branch of the industry allowed for every three journeymen.

Men sent to employment outside the zone to be provided with transportation, board and lodging and must be paid for travelling time in the day time.

Industrial Standards Act of Alberta

Construction: Buildings and Structures

Bricklayers and Stonemasons, Edmonton.—An Order in Council dated March 25 and published in *The Alberta Gazette,* March 31, makes binding a schedule of wages and hours in the bricklaying and stonemasonry industry in the city of Edmonton and within ten miles of the city post office, from May 1, 1938, to April 30, 1939.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. In case of shift work, shifts not to exceed 8 hours. For work outside the ten mile radius, 9 hours per shift may be worked.

Overtime: time and one-half. Work on Sundays and six specified holidays, double time.

Minimum wage rate for bricklayers and stonemasons: $1.10 per hour. Foremen to be paid at least 10 cents per hour extra if less than ten men employed or 15 cents extra if ten or more men employed.

One apprentice allowed for each five bricklayers. Wages for apprentices to be 25 per cent of journeymen's wage during first year to 70 per cent during fourth year.

No journeyman or group of journeymen may contract to do work in excess of $200 except through a contractor.

Carpenters, Edmonton.—An Order in Council, dated February 22, and published in *The Alberta Gazette,* February 28, makes binding a schedule of wages and hours in the carpentry industry in the city of Edmonton and within ten miles of the city post office, from April 1, 1938, to March 31, 1939.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: Time and one-half. Work on Sundays and four specific holidays, double time.

Minimum hourly wages for carpenters: 85 cents from April 1, 1938, to June 30, 1938; 90 cents from July 1, 1938, to March 31, 1939. For work on night shifts, 8 hours' pay for 7½ hours' work.

Service: Business and Personal

Employees of Bowling Alleys, Edmonton.—An Order in Council, dated February 22, and published in *The Alberta Gazette,* February 28, makes binding a schedule of wages and hours in bowling alleys in Edmonton, from March 10, 1938, to August 31, 1938.

Duties of a pin setter restricted to setting of pins and keeping clean his alley or alleys and pit or pits.

Hours: The total hours for all shifts in one week not to exceed 54 hours.

Wages to be computed as follows: 2½ cents per line for five pins or duck pins; 3½ cents per line for ten pins.

PRICES, RETAIL AND WHOLESALE IN CANADA, MARCH, 1938

Cost of Living, Prices of Staple Articles and Index Numbers

IN retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent, was somewhat higher due to an advance in the cost of foods while the Dominion Bureau of Statistics weekly index number of wholesale prices was slightly lower at the end of the month than at the end of February.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.69 at the beginning of March as compared with $8.59 for February; $8.49 for March, 1937; $6.67 for March, 1933 (the low point in recent years); and $11.67 for March, 1930. Changes during the month were slight except for a substantial advance in the price of butter. There were minor increases in the prices of mutton, pork, flour and granulated sugar and declines in beef, lard, beans and potatoes. Including the cost of fuel and rent with that of foods the total budget cost $17.48 at the beginning of March as compared with $17.39 for February; $17.13 for March, 1937; $15.41 for June, 1933 (the low point in recent years); $21.96 for March, 1930; $20.96 for March, 1922; $26.92 for July, 1920 (the post war peak); and $14.35 for March, 1914. Fuel and rent were practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of 1926 as 100 declined for four consecutive weeks ended March 25. Part of the loss was recovered during the week ended April 1. Comparative figures are 83·3 for the last week of the month; 83·0 for that ended March 25; 83·8 for that ended February 25 and 83·6 at the end of January. The latest figures available on a monthly basis are for February when the index number was 83·6 as compared with 85·5 for March, 1937; 72·4 for March, 1936; 63·5 for February, 1933 (the low point in recent years); 95·6 for March, 1929; 98·3 for March, 1922; 164·3 for May, 1920 (the post war peak); and 64·7 for March 1914. The slight advance in the index number at the end of March was due almost entirely to recovery in the prices of grains and flour which had declined appreciably during previous weeks following reports of favourable moisture conditions in the United States. The animal products group and the chemical products group moved contrary to the general downward trend during most of the month but both were unchanged during the last week. The increase in the former was due in large part to higher prices for live stock, meats and butter. Prices of raw textiles and of non-ferrous metals declined during the month.

As compared with a year ago the general index number has declined more than four per cent there being decreases of nearly ten per cent in the vegetable products group and more than twenty-five per cent in non-ferrous metals. Canadian farm products have declined in this period more than eleven per cent. The animal products group is about seven per cent higher than a year ago.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of March of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rate for rent is secured by the correspondents of the Labour Gazette, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the Labour Gazette for February, 1910. The quantities of

each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

* The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent 18½%; Clothing, 18½%; Sundries, 20%

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

Beef prices changed little during the month, sirloin steak was however, slightly lower averaging 25·2 cents per pound as ompared with 25·6 cents in February. Mutton and fresh pork were higher, the former being up from an average price of 22·4 cents per pound in February to 23·4 cents in March and the latter from 22·1 cents per pound to 22·6 cents. The price of lard again averaged lower. Butter prices were again substantially higher in all localities, creamery averaging 39·1 cents per pound as compared with 36 cents the previous month and 29·9 cents in March, 1937. Increased consumption and

(Continued on page 464)

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Prices Indexes (Canada); quarterly. Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended April 1, 1938, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 456)

somewhat smaller production were factors in this advance. Stocks in cold storage during recent months have been considerably lower than in corresponding months one year earlier. Onions advanced in price in most cities the Dominion average being up from 5·8 cents per pound to 6·4 cents. Potatoes have changed little in price during recent months but were much lower than one year ago the Dominion average price being 95 cents for 90 pounds at March 1 as compared with $1.98 at the beginning of March, 1937, United States anthracite coal averaged $14.46 per ton in March as compared with $14.78 in March last year.

Following are the prices reported for Welsh coal, "cobbles" and "French nut"; Halifax, $15.50; Charlottetown, $13.40; Moncton, $16; Saint John, $15 and $14; Quebec, $13.50; Three Rivers, $15 and $14; Sherbrooke, $14.75; St. Hyacinthe, $14.50; Montreal, $14.25 to $14.75; Ottawa, $16; Kingston, $15; Belleville, $15.50; Peterborough, $16.75; Oshawa, $15; Toronto, $14.50 and $14; St. Catharines, $15; Hamilton, $14.50 and $14; Brantford, $16.25; Galt, $16; St. Thomas, $16; Cobalt, $19; Timmins, $18.50; Port Arthur, $17.25; Fort William, $17.25; Winnipeg, $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

The accompanying tables, which appear quarterly, give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices according to groups of commodities in several of these countries.

Great Britain

Wholesale Prices.—The Board of Trade index number, on the base 1930=100, was 105·8 for February as compared with 107·7 for January a decrease of 1·8 per cent for the month. Food prices declined 1·5 per cent while prices of industrial materials and manufactures declined 1·9 per cent. The fall in prices was partly seasonal. Compared with the same month in 1937, the February 1938 figures showed an increase of nearly two per cent in the general index due mainly to an increase of nearly five per cent in food prices; for industrial materials and maufactures there was a rise of less than one-half of one per cent.

The *Statist* index number on the base 1867-1877=100, was 96·4 for February as compared with 96·5 for January. The "all foodstuffs" index declined from 91·7 to 90·9 during the period, due to declines in vegetable foods and sugar, coffee and tea. The "all materials" index increased from 100·0 to 100·5; minerals and sundries showed small increases while textiles decreased slightly.

Cost of Living.—The Ministry of Labour's index number on the base, July 1914=100, was 156 at the first of March as compared with 157 at the beginning of February. The index for food prices was 140 as compared with 142 at the beginning of February. The decline in the food index was due mainly to decreases in the prices of eggs and fish; milk and butter were also cheaper in some districts.

France

Wholesale Prices.—The General Statistical Office index number, on the base 1914=100, was 613 for February as compared wih 612 for January. The index for food prices increased from 620 to 624, decreases in the prices of vegetable foods and sugar, coffee and cocoa being offset by an increase of 3·4 per cent in the prices of animal foods. The index for industrial materials was unchanged at 605, a small increase in the price of metals being offset by decreases in the prices of textiles and sundries. The index based on gold currency, 1914=100, showed no change from the January index which stood at 61.

Germany

Wholesale Prices.—The index number of the Federal Statistical Office on the base 1913=100, was 105·7 for February as compared with 105·6 for January. The index for agricultural products increased 0·3 per cent during the month, that for manufactured goods increased 0·1 per cent and that for industrial and semi-finished goods was unchanged.

Cost of Living.—The official index number on the base 1913-1914=100, was 125·2 for February as compared with 124·9 for January, an increase of 0·2 per cent for the month. The indexes of prices for food and for clothing increased 0·2 per cent each, while that for sundries increased 0·1 per cent. The indexes for rent and for heating and lighting materials were unchanged.

United States

Wholesale Prices.—The Bureau of Labour Statistics index number, o nthe base 1926=100, was 80·9 for January, a decrease of 1·0 per cent from the December figure. This is the lowest level reached since July, 1936, and when compared with January, 1937, represents a decrease of 5·8 per cent. During January wholesale food prices declined 4·4 per cent; both farm products and housefurnishing goods declined 1·6 per cent; hides and leather products 1·0 per cent; building materials 0·8 per cent; textile products 0·6 per cent; and fuel and lighting materials 0·1 per cent. The metals and metal products group and the sundries group each advanced 0·3 per cent and drugs and chemicals rose 0·1 per cent.

Cost of Living.—The index number of the National Industrial Conference Board, on the base 1923=100, was 86·7 for February, a decrease of 0·9 per cent from the January figure which was 87·5. With the exception of the fuel and light group, which was unchanged, all the groups which make up the index showed decreases. Food prices declined 2·3 per cent, clothing 0·9 per cent, housing 0·5 per cent and sundries 0·1 per cent. The general index was 0·6 per cent lower than in the same month last year and 13·4 per cent lower than in 1929.

(a) Average for year. (b) First of month. (c) 15th of month. (d) End of month. (e) New series. (f) Sums total of the prices per pound of 96 articles of common consumption.
(g) Until end of 1927, "Dr. Lorenz." (h) Prior to 1929, the number of commodities was 236, from January 1926 to December 1933, 502, and since January, 1934, the number is 567.
(i) As the publication of this index was discontinued at the end of 1937, it will not be included in the next quarterly table.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Action for Wages under Quebec Collective Labour Agreements Extension Act

On February 1, 1938, Mr. Justice White of the Superior Court of the District of Sherbrooke dismissed an action for $371.96 by the Joint Committee of the Building Trades for the counties of Sherbrooke, etc., on behalf of two electricians. The plaintiff Joint Committee was set up under the authority of the Act to enforce the collective agreement. The amount of the claim was made up by adding the difference between the wages they received and the legal rate of fifty cents an hour fixed by an agreement made obligatory under the Collective Labour Agreements Extension Act for the building industry in Sherbrooke, and the amount due as liquidated damages for violation of the agreement, being twenty per cent of the wage claim, together with the statutory levy of one-half of one per cent on the defendant's payroll for the enforcement of the agreement.

In the case of one employee, the defendant deposited the amount due, together with the costs. With respect to the other, he claimed that he owed nothing because the man was not a journeyman electrician within the meaning of the agreement since he had no licence as required by the Quebec Public Fire Protection Act. The evidence showed that the man did not have the required licence and the court therefore held that he was not entitled to the journeyman's rate. *Joint Committee relating to the Building Trades for the Counties of Sherbrooke, etc.,* v. *Ross-Biron Electric Ltd.* (1938) 76 Rapports Judiciares de Québec, Cour Supérieure 14.

Restaurant Operator Required to Pay Minimum Wages

In the Superior Court of the District of Quebec on January 12, 1938, Mr. Justice Langlais gave judgment in favour of the plaintiff a waitress, for $100.05 being the difference between the minimum wage fixed for female employees in hotels and that in restaurants in Quebec City plus the cost of two uniforms and laundry and pay and living allowance in lieu of two weeks' notice less a sum admitted by the defendant to be owing and which had been paid into court.

The defence that the dismissal without notice had been for cause was not substantiated.

Under the former Women's Minimum Wage Act, the minimum rate of pay for waitresses in hotels in Quebec City was $15 a month with board and room; in restaurants, 15 cents an hour with meals. In both cases, uniforms were required to be furnished and laundered at the employer's expense. By regulation of the Fair Wage Board, the orders of the former Minimum Wage Commission are to remain in force until repealed or replaced by other orders.

The defendant in the case pleaded that his establishment was a licensed tavern but the evidence showed that the licence must have been secured by misrepresentation as it was in fact a restaurant. The court spoke with approval of a recent decision of a magistrate in a case against the same employer that if in fact the defendant operates a restaurant he must pay the minimum established for restaurant workers regardless of any licence he may have obtained in order to evade the minimum wage regulation. *Dame Charland alias D'Ars v. Tom* (1938) 76 Rapports Judiciares de Québec, Cour Supérieure, 29.

Penalties Fixed by Dominion Parliament not Applicable to Quebec Minimum Wage Law

On March 25, 1938, in the Montreal Police Court, Judge Marin dismissed a charge of evading the Quebec minimum wage regulations which had been brought against the Ideal Dress Company. The Crown sought to apply Section 415A of the Criminal Code of Canada which declares it to be an indictable offence punishable by two years' imprisonment or a maximum fine of $5,000 or by both fine and imprisonment for anyone to employ a person at less than the minimum rate fixed by any law of Canada.

This section of the Code was based on a government bill introduced in the House of Commons in 1935 with a view to carrying out a recommendation of the Royal Commission on Price Spreads which reported on April 9, 1935. The commission stated: "Certain industrial relations policies and practices are so obviously undesirable and so clearly 'fraudulent' that some remedial action might be directed against them through the amendment of the Criminal Code." It was recommended that the practices indicated in the report which were all connected with evasions of labour statutes of the provinces and regulations made by the authorities administering them should be made "indictable offences punishable by very heavy fines and/or imprisonment."

The bill as introduced in the House was designed to carry out this recommendation and related to employment at less than the minimum wage rate fixed "by law or any

competent public authority," permitting an employee to work more than the maximum legal hours, falsifying any employment record required by law to be kept, punching a time clock with intent to deceive, putting the wages of more than one employee in the same envelope with intent to evade the provisions of any minimum wage law, making any deduction from an employee's wages not warranted by law unless such deduction has been approved first by a competent public authority, employing any child or minor person contrary to law or doing any similar act contrary to law or the rules or regulations of any competent authority.

On March 9, 1935, a Dominion Government bill was introduced and later enacted to implement a convention of the International Labour Conference for the creation of minimum-wage fixing machinery. This Act was declared constitutionally invalid in January, 1937.

When the bill to amend the Criminal Code reached the Senate, it was amended in several respects. The clauses applying to hours of labour and deductions from wages as well as the general clause at the end were struck out and the wording changed to make it apply to a minimum wage rate "fixed by any law of Canada."

The case in Montreal appears to be the first prosecution under this section.

The charge against the Ideal Dress Company comprised two offences under Section 415A, that of putting the wages of two employees in one envelope and of paying employees wages lower than the minimum fixed by the Quebec Women's Minimum Wage Commission and continued in effect by the Quebec Fair Wage Board. These charges were proved to the satisfaction of the court.

The defence, however, claimed that there was no ground for a charge under Section 415A. The decision turned on whether the words "any law of Canada" in the section included provincial legislation. He pointed out that in section 2 of the Criminal Code, the words "any Act" or "any other Act" are defined to include any Act passed or to be passed by the Parliament of Canada or, by the legislature of any province of Canada but he was of the opinion that in section 415A the words, "of Canada," have a limiting effect and restrict the application of the section to Dominion legislation.

He found confirmation of this opinion in the fact that the B.N.A. Act gives to the provinces the right to impose penalties for violation of provincial laws and in the debate in the Senate when the bill was amended, the government leader indicated that the purpose of the amendment was to confine the bill to the Dominion Minimum Wage Act.

The judgment concludes with the observation that since the latter Act has been declared ultra vires of the Dominion Parliament, section 415A is inoperative and should be repealed. *R.* v. *Lupovitch et al,* March 25, 1938.

Damages Awarded under Part II of Ontario Workmen's Compensation Act

An appeal by the defendant employer against a judgment awarding the plaintiff workman $2,500 and costs for an injury to his arm was dismissed by the Ontario Court of Appeal on March 11, 1938. The plaintiff had been refused compensation by the Ontario Workmen's Compensation Board on the ground that the bakery where he was working was a small one employing less than five persons and that, under the authority conferred on it by the Workmen's Compensation Act, the Board had excluded such establishments from the provisions of Part I of the Act. Part I provides that compensation at a certain rate shall be paid by the Board from the provincial Accident Fund without the workman having to bring an action. All "industries" within the scope of the Act, but excluded from Part I, are covered by Part II which gives a workman right of action against his employer under certain conditions.

It was pointed out by Mr. Justice Middleton that the appeal rested on two points, the application of the Workmen's Compensation Act to the case and the question of contributory negligence on the part of the plaintiff.

With regard to the application of the Workmen's Compensation Act, the defence claimed that a bakery was not an industry within the provisions of Part II of the Act, because Part II applied only to those industries not included under Part I. Bakeries are among the industries listed in the Act as falling within Part I and although small establishments in this industry had been excluded by regulation of the Board, this exclusion does not transfer them to Part II. Therefore, it was argued, the plaintiff could not claim damages under Part II.

Mr. Justice Middleton was of the opinion that this argument was fallacious since "industry" as defined by the Act includes an "establishment, undertaking, trade and business" and that in an industry which was within the scope of the Act establishments which were excluded from Part I because of the small number of those employed automatically came under Part II of the Act. It was not intended that employees in small factories should be outside both parts of the Act.

As regards the question of contributory negligence, Part II of the Workmen's Compensation Act declares that "negligence on the part of a workman shall not hereafter be a bar to recovery by him or by any person entitled to damages for an injury sustained by or causing the death of the workman while in the service of his employer for which the employer would otherwise have been liable" but contributory negligence on the workman's part is to be taken into account in fixing the amount of damages.

It was pointed out by Mr. Justice Masten that, even apart from Part II of the Workmen's Compensation Act, the defendant was liable to the plaintiff since he was guilty of a wrong towards him in directing him to remove dough from a mixing machine while it was in operation. An employer was bound to indemnify a workman from the consequences of obedience to his orders. Mr. Justice Masten agreed with Mr. Justice Middleton as to the application of Part II of the Workmen's Compensation Act to the case and, since the trial judge had considered the question of contributory negligence, he was of the opinion that the latter's finding of fact should stand and that the appeal should be dismissed. Chief Justice Latchford concurred. *Wiznoski v. Peteroff et al* (1938) Ontario Weekly Notes, 97.

Action for Wrongful Dismissal Rejected in Manitoba

The Manitoba Court of Appeal in a unanimous judgment on December 30, 1937, disallowed the appeal of the plaintiff and affirmed the judgment of Mr. Justice Adamson of the Court of King's Bench, dismissing an action for damages for wrongful dismissal.

The plaintiff was employed as a salesman under a written agreement providing that the hiring "will be on a weekly salary basis and if my services are not satisfactory they can be terminated by either one week's notice or by the payment of one week's salary." He claimed that over the long period during which he was employed by the defendant the terms of employment had been changed and that he was entitled to two weeks' notice or salary.

On October 1, 1936, the defendant company sent a circular letter to its employees notifying them that in future salaries would be paid fortnightly instead of weekly, but stated that the "salary rate will continue to be on a per weekly basis, the only change being in regard to the date of payment." A written statement by the company as to commissions to be paid to salesmen stated that "Commission to be paid will be subject to the weekly salary rate of the salesman."

The trial judge considered that the original terms of hiring had not been abrogated and that the plaintiff had been dismissed on the ground that his services were not satisfactory. In 1924, the Court of Appeal had held that "a contract of hiring at weekly wages, will be deemed to be a weekly hiring and terminable on a week's notice in the absence of any circumstances from which a different duration of the contract can be inferred." In the instant case the court was of the opinion that there were no such circumstances but that the letter and statement of commissions referred to, by implication at least, preserved the weekly basis. *Gyles* v. *Canadian Oil Companies Ltd.,* (1938) I Dominion Law Reports, 587.

THE LABOUR GAZETTE

PREPARED AND EDITED BY
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 38] MAY, 1938 [NUMBER 5

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

ACCORDING to data tabulated in the Dominion Bureau of Statistics from 10,450 establishments, employment at the beginning of April showed a large, seasonal contraction, the reported staffs aggregating 1,001,970 persons, compared with 1,029,001 in the preceding month. The statistics furnished by leading firms since 1920 show that in fifteen of the seventeen preceding years, employment at April 1 has suffered a between-seasons' recession, ordinarily resulting from the completion of the winter's work in logging camps, before any considerable numbers of persons have been absorbed into the outdoor industries opening up in the spring and summer. The general decline at the date under review has been exceeded on two or three occasions in the years since 1920, but was greater than the average loss at April 1 in that period; that this was so, was due in the main to unusually pronounced curtailment in bush work following a season of marked activity. Coal mining and steam railway transportation and construction and maintenance also recorded important reductions of a seasonal character. On the other hand, manufacturing showed some improvement and additions to staffs were noted in shipping, highway construction, services and trade.

The index (based on the 1926 average as 100) declined from 107·8 at March 1 to 105·0 at the beginning of April; at the same date in the more recent years of the record, it was as follows: 1937, 103·0; 1936, 97·4; 1935, 93·4; 1934, 91·3; 1933, 76·0; 1932, 87·5; 1931, 99·7; 1930, 107·8; 1929, 110·4 and 1928, 102·3.

Unemployment in Trade Unions.—Reports were furnished to the Department of Labour at the beginning of April by 1,891 local trade unions with an aggregate of 220,340 members, 28,141 or 12·8 per cent of whom were unemployed as compared with percentages of 13·7 at the beginning of March, and 12·9 at the beginning of April, 1937.

Employment Office Reports.—The reports for the Department of Labour from the offices of the Employment Service of Canada showed that the volume of business transacted during March, 1938, as indicated by the average daily placements, was below that of the preceding month and also that of the corresponding month last year, logging being the group in each instance in which the major decline was recorded. Vacancies in March, 1938, numbered 24,243, applications 70,150, and placements in regular and casual employment 22,595.

Prices.—In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was $17.50 at the beginning of April as compared with $17.48 for March; $17.18 for April, 1937; $16.33 for April, 1936; $15.41 for June, 1933 (the low point in recent years); and $21.53 for April, 1930. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 declined week by week during the month being 81·5 for the week ended April 29 as compared with 83·3 for that ended April 1. The decline was due mainly to lower prices for grains, butter and hides. On a monthly basis the index number was 83·1 for March; 86·1 for April, 1937; 72·2 for April, 1936; 63·5 for February, 1933 (the low point in recent years) and 94·5 for April, 1929.

Business Statistics.—The table on page 472 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business in March recovered part of the loss of the previous three months the index being 2 per cent higher than in the previous month but still about 15 per cent lower than in November, 1937, which was the highest level recorded by the index since 1929. The advance was due in large part to the increased production of electric power and to the increased activity indicated for the mineral production industry and for the construction industry. In the case of the latter both contracts awarded and building permits were higher. In mineral production exports of copper and asbestos, also shipments of gold and silver were substantially higher while exports of nickel and zinc were lower. Manufacturing was little changed from the level of the previous month as were also the indexes of trade employment, car loadings, imports and exports. Information available for April shows the value of contracts awarded and

*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended April 29, 1938.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending April 30, 1938, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending April 23, March 26 and February 26, 1938; April 24, March 27 and February 27, 1937. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

sugar manufactured greater than in the previous month but lower than in April, 1937. Car loadings were fewer in number in both these comparisons while the employment index was lower than in March but higher than in April, 1937.

Strikes and Lock-outs.—The number of strikes and lock-outs during April was 15, involving 2,874 workers with time loss of 17,548 man-working days as compared with 16 disputes during March involving 2,406 employees with a time loss of 10,134 days. Eighty per cent of the time loss in April was due to three strikes, namely those of taxicab drivers at Toronto, Ont., steamship deckhands, etc., on the Great Lakes and St. Lawrence River and saw-mill workers at Fort Frances, Ont. In March the most important dispute involved cotton factory workers at Cornwall, Ont. In April, 1937, there were 37 disputes involving 12,771 workers with a time loss of 124,039 days, these being the highest figures for any month since 1920. Most of the time loss was due to strikes of automobile plant workers at Oshawa, Ont., and of dress factory workers at Montreal, P.Q. Of the fifteen disputes recorded in April, 1938, nine were recorded as terminated during the month, four resulting in favour of the employers affected, four in favour of the workers involved and one being partially successful. Six disputes, involving approximately 664 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lock-outs in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the month the Department received the majority and minority report of the Board of Conciliation and Investigation established to deal with a dispute involving wages between the Royal View Mine at Lethbridge and its employees.

Three applications for the establishing of Boards were also received.

Particulars with respect to proceedings under the Act will be found on pages 479-483.

Canadian Delegation to International Labour Conference

The Honourable Norman Rogers, Minister of Labour, announced recently the appointment of a delegation which will attend the Twenty-fourth Session of the International Labour Conference (League of Nations), to be held in Geneva opening on June 2nd. The delegation which comprises delegates and advisers on behalf of the Dominion Government and on behalf of the Canadian employers and workpeople respectively, is composed of the following:—

Government Delegates:

Mr. H. H. Wrong, Geneva, Switzerland, Permanent Delegate of Canada to the League of Nations.

Mr. Gerald H. Brown, Ottawa, Assistant Deputy Minister of Labour.

Advisers to Government Delegates:

Mr. H. B. Chase, Montreal, Assistant Grand Chief Engineer and Dominion Legislative Representative, Brotherhood of Locomotive Engineers.

Mr. Charles Beattie, Toronto, Vice President of the All-Canadian Congress of Labour.

Mr. Emile Tellier, Three Rivers, Second Vice President, La Confédération des Travailleurs Catholiques du Canada, Inc.

Mr. W. T. Burford, Ottawa, Secretary Treasurer of the Canadian Federation of Labour.

Employers' Delegate:

Mr. A. R. Goldie, Galt, President of Goldie and McCulloch Company, Limited, and Past Chairman of the Industrial Relations Committee of the Canadian Manufacturers' Association.

Adviser to Employers' Delegate:

Mr. J. M. McIntosh, Toronto, Secretary of the Ontario Division, Canadian Manufacturers' Association.

Workers' Delegate:

Mr. Percy R. Bengough, Vancouver, Vice President of the Trades and Labour Congress of Canada and Secretary of the Vancouver, New Westminster and District Trades and Labour Council.

Adviser to Workers' Delegate:

Mr. Raoul Trepanier, Vice President of the Trades and Labour Congress of Canada and President of the Montreal Trades and Labour Council.

In accordance with procedure followed in recent years, the nominations for employers' delegate and adviser were made by the Canadian Manufacturers' Association, and the nominations for the workers' delegate and adviser by the Trades and Labour Congress of Canada.

The International Labour Organization in Geneva, which forms part of the machinery of the League of Nations, was established, under the authority of the Treaties of Peace adopted at the close of the Great War, with the object of securing the improvement of industrial conditions by legislative action and

international agreement. The International Labour Conference is the annual gathering which brings together representatives of governments, employers and of workers from the sixty-one member states of the Organization, including all the important industrial countries of the world, excepting Germany, which gave up her membership in the International Labour Organization when she retired from the League of Nations in 1935. The resignation of Italy in December 1937 will not go into effect until December 1939. The United States and Japan, although not members of the League of Nations, are members of the International Labour body.

The agenda of the forthcoming Conference in Geneva comprises preliminary consideration of the following subjects, which will come up for final attention next year. The sixth item on the agenda may, however, be dealt with either by way of preliminary or final determination.

I. Technical and vocational education and apprenticeship.
II. Regulation of contracts of employment of indigenous workers.
III. Recruiting, placing and conditions of labour (equality of treatment) of migrant workers.
IV. Regulation of hours of work and rest periods of professional drivers (and their assistants) of vehicles engaged in road transport.
V. Generalization of the reduction of hours of work.
VI. Statistics of hours and wages in the principal mining and manufacturing industries, including building and construction, and in agriculture.

An invitation has been extended to the provincial governments to be represented at this Conference but it is not known as yet what appointments, if any, may be made by the provincial authorities.

Report of Dominion Commissioner of Unemployment Relief

The Unemployment and Agricultural Assistance Act 1937, provided that a report "shall be laid before Parliament within thirty days after the expiration of the Act".... containing a complete account of expenditure, loans, and obligations, etc., made in respect of unemployment relief in the Dominion.

In accordance with such provision there was recently tabled in the House of Commons the report on the administration of this measure. (As in the case of preceding and similar enactments, the administration of this Act is under the authority of the Minister of Labour; Mr. Harry Hereford being the Dominion Commissioner of Unemployment Relief).

In addition to constituting a record of disbursements under the Act, the report gives particulars respecting grants in aid, works in co-operation with the provinces, aid in the drought areas, re-establisment of settlers, agreements under the Farm Employment and Improvement Plan (single unemployed persons), relief settlement, and youth training.

It was indicated that since 1930, there has been expended a total of $308,742,859 on relief in varied forms. Of this amount, Ontario has received $84,755,773, and Quebec $52,307,404, while Saskatchewan comes third with $47,581,902. Other provinces have been assisted to the following amounts: British Columbia, $22,265,975; Manitoba, $21,912,526; Alberta, $15,031,992; Nova Scotia, $7,316,070; New Brunswick, $4,929,890 and Prince Edward Island, $1,190,739.

In addition to the above amounts the Dominion itself engaged on relief projects, administered by various governmental departments, and these brought the disbursement figure up to the total mark.

The loans advanced to the provinces for relief purposes and outstanding at March, 1938, totalled $129,801,198. To this are added nonactive loans advanced to the Canadian Pacific Railway, amounding to $2,447,222.

During the fiscal year ended March 31, 1938, relief cost $44,339,190 of which $17,241,326 was distributed by the Dominion Department of Agriculture.

At the end of March, 1938, according to preliminary figures in the report, the total number receiving material aid was 1,069,272. Of this number, Saskatchewan alone had a total of 429,400 persons in receipt of material aid, of whom 200,000 were in the drought area.

Tabulations going back to May, 1932, presented a picture of the fluctuations of Canada's relief problem over a period of years. They indicated April, 1933, as the trough of the depression when, inclusive of the drought areas, 1,589,682 persons in Canada were on relief. Of that number, 1,517,531 were recipients of material aid in the way of food, fuel, clothing and shelter.

Statistics of material aid recipients

Early approximations of unemployed persons receiving non-agricultural material aid throughout Canada in March, 1938, revealed continued substantial reduction in unemployed aid figures as compared with the corresponding month of 1937.

Registration figures showed that approximately 176,000 fully employable persons were receiving non-agricultural material aid in

March, 1938. This was a decrease of nearly 32.2 per cent from March, 1937, when the number was 259,480. In comparison with the total for February, 1938, an increase of only three-fifths of one per cent was indicated. Approximately 70 per cent of the total of fully employable persons on aid was reported from the fifty-two aid distributing cities.

When totals of all those in receipt of non-agricultural material aid in March were compared with the corresponding month of 1937, a decrease of 25.2 per cent was shown. The total number, including totally unemployable, partially employable and fully employable, together with all dependents of family heads, was approximated to be 657,000 in March last. This was an increase of 0.4 per cent over February, 1938.

Saskatchewan drought conditions continued to reflect themselves as the major factor in increasing totals of persons in receipt of agricultural aid. The early March figures from the registration showed 90,000 farmers (resident farm operators) as receiving agricultural material aid for subsistence. These, together with their dependents, accounted for a farm population of 405,000. Of this total 351,000 or approximately eighty-seven per cent, were located in Saskatchewan. The number of all classes dependent upon agricultural aid in Saskatchewan showed an increase of 93.6 per cent over March, 1937.

Youth Training programs of Dominion and Provincial Governments

On the basis of a survey made recently by the Dominion Supervisor of Youth Training, the Minister of Labour, Hon. Norman McL. Rogers issued the following statement on April 26.

"The Youth Training Program of the Dominion and Provincial Governments promises to be even more successful this year than last. The Dominion Supervisor of Youth Training has just returned from a trip through Western Canada. He reports that all western provinces are enthusiastic about the plan and look forward to another year of activity in training and rehabilitating the young unemployed. The Maritime Provinces and Quebec are also eager to continue the work begun and carried on last year. Ontario, it is understood, desires to continue household training courses, but no final word has yet been received by the Dominion in regard to the balance of the program in that Province. The Dominion Government has indicated its readiness to contribute its share of the cost of approved youth training projects submitted by all the Provinces, as it did last year.

"After representations by associations interested in forest preservation on the menace of white pine blister rust to Canadian forests, proposals have been made by the Department of Labour to Ontario and Quebec offering to assume the cost incurred by the Dominion Forest Service in training twenty young men from each province in methods of fighting this scourge. Ontario and Quebec are the provinces chiefly affected by white pine blister rust. The young men selected for training would be nominated by the Province and approved by the Dominion Supervisor of Youth Training. Their services would be available to the Provinces after completion of training, to act as crew leaders in 1939. The Provinces would undertake to utilize their services as crew leaders in carrying on next year a work campaign to combat blister rust.

"The proposal, which offers great advantages both from the viewpoint of youth training and forest preservation against a most destructive pest, is still under consideration by the Provinces.

"Administration of the Youth Training program rests with the Provinces. Last year training given to approximately 30,000 needy young Canadians covered a wide field and embraced a number of activities designed to improve the skill, health and morale of both men and women. The Provinces have been invited to submit projects for the present year. It is hoped to get many of these under way much earlier this year than last and thus provide a more extended period of training than was possible in the first year of the plan's operation.

Industrial Conciliation Legislation in New Brunswick

The New Brunswick Legislature has enacted a Labour and Industrial Relations Act providing increased facilities for conciliation in industrial disputes, while retaining the provisions made in the Fair Wage Act (which is repealed) for a fair wage officer and a fair wage board to inquire into complaints and fix minimum wages and the maximum hours to which such rates apply. The new sections of the Act, like those of the Alberta and British Columbia Industrial Conciliation and Arbitration Acts of 1938 and 1937 respectively, enable the Minister to appoint a conciliation commissioner to whom a dispute may be referred and, failing a settlement, to appoint a tripartite board of conciliation which, if unable to settle a dispute, is to make recommendations for a settlement. In New Brunswick, the Minister is not required to appoint a board unless the dispute affects 30 or more employees. A report of a board is not binding on the parties to a dispute but both employers and employees must take a vote on the question of accepting or rejecting the recommendations.

The Act prohibits any strike or lock-out until a dispute has been reported upon by a board

of conciliation or has been dealt with by the Fair Wage Board but, where there is a collective agreement between an employer and an organization of employees providing for the arbitration of disputes and the procedure laid down in the agreement has been followed, this prohibition does not apply.

In addition to the direct provisions for the settlement of disputes, the Act contains sections declaring the right of employers and employees to organize in associations or trade unions and the right of employees to bargain collectively through representatives elected by a majority vote or through the officers of the organization to which the majority of the employees belong. Any condition in a contract of employment tending to restrain an employer or employee from exercising his rights under the Act is unlawful and a penalty is provided for any employer who, by threat of dismissal or by dismissal or loss of employment, or for any person who, by any threat of intimidation, attempts to induce any person to join or refrain from joining or belonging to any organization or to work or abstain from work.

Organizations of employers and employees may be required by the Minister to file in his office a copy of their constitutions, by-laws or other documents, the names of their officers and a statement of their receipts and expenditures.

Youth Training and Employment in New South Wales

The action of the Government of New South Wales in establishing youths in occupations was outlined in the *New South Wales Industrial Gazette*, December, 1937, by the Minister for Labour and Industry, Hon. J. M. Dunningham.

Dealing with the examination of youths by the Vocational Guidance Bureau, the Minister referred to the establishment of a Committee comprising several psychologists and vocational guidance experts for the purpose of examining a number of unemployed youths and young men between the ages of 18 and 25. The total number, in this category registered for employment in the Metropolitan area, was over 4,000. Of this number 2,000 submitted themselves for examination after personal letters had been written to them all. As a result of the examination, these youths were classified and placed in employment. Schemes were investigated for the placing in various Government departments of young men who were above the age at which it is usual to enter into apprenticeship. The Minister also stated that an appeal would be made to those in charge of all industries in the state to take "what number of trainees they can under the proportion clauses of the appropriate award."

Referring to information supplied him in a report by the Apprenticeship Commissioner and chairman of the Employment Council, the Minister said that "there were 110 trades or branches of trades in which apprenticeship obtains and that if the employers in those industries engaged the full number of apprentices under the proportion clauses in the various awards, approximately 3,000 additional youths could be given employment as apprentices."

As a result of a questionnaire sent to employers concerned in the employment of apprentices it was revealed that under existing award proportions the number of apprentices that could be employed, in addition to those already engaged, was as follows: building trades, 1,438; metal trades, 995; furniture trades, 66; boot manufacturing, 63; and other trades, 2,665.

These figures, it was pointed out, do not include the number of apprentices who could be employed in the printing industry as the employers in that industry are mainly governed by awards of the Commonwealth Arbitration Court.

Reference was also made to the employment of youths with the Railway Commissioners and other Government departments. It was also pointed out that during the nine months ending September 30, 1937, 2,500 youths were engaged in industries as indentured and trainee apprentices in skilled trades, and for the twelve months ended June 30, 1937, 8,209 youths were placed in employment through the activities of the Department of Labour and Industry.

It was also indicated that the Metal Trade Employees' Association of New South Wales had informed the chairman of the Employment Council that it would co-operate in the provision of employment for apprentices. With a view to selecting young men in the age group 18 to 25 years, for these positions arrangements were made for an examination of those already registered as unemployed at the State Labour Exchanges, but the number who attended the examination was approximately 50 per cent of the number registered. The report of the Vocational Guidance Officers who made these examinations indicated that only 15 per cent of those who attended were suitable for employment in skilled trades, and that the balance, 85 per cent, were suitable for employment in semi-skilled and unskilled occupations.

It was also reported that the Chairman of the Employment Council convened a number of conferences with representatives of em-

ployers' and employees' organizations to provide for the training of 1,000 young men as apprentices with financial assistance from the Government.

In the *N.S.W. Industrial Gazette* of January, 1938, reference was made to the selection and apprentice training methods of the Broken Hill Proprietary Co., Ltd., in which it was stated the varied range of activities necessary for the production of iron and steel calls for a large number of skilled tradesmen. At present, 820 apprentices are indentured to the various trades throughout the company's works where 20,000 workers are directly employed. The number of apprentices is regulated by industrial court awards which prescribe a certain number of apprentices per journeyman employed.

Statutory wages and hours recommended for retail clerks and shop-workers in Great Britain

As a result of a joint conference of representatives of employers and trade unions, convened by the British Ministry of Labour, proposals for the statutory enforcement of minimum wages and maximum hours of work in all branches of retail distribution in Great Britain have been incorporated in a recent report.

From that conference a joint committee (of seven from each side) was appointed, and the committee's report, which was unanimous, has been presented to special meetings of the employers' organizations and the trade unions, and approved in principle by both sides.

Nearly two million shop workers and many thousands of shopkeepers would be affected if the government adopts the proposals.

According to a press summary of the proposals, the report recommended action along the following lines:—

The Minister of Labour should seek legislative power giving him authority to establish some form of national body for England and Wales, which should be as fully representative as possible of all the interests of the distributive trades. Its name might be the National Retail Distributive Trades Council.

The Minister should appoint to the National Council an equal number of representatives of employers and employees, the number not to exceed forty on each side. Not more than one-third of each side should be nominated by the Minister after consultation with the organizations of employers and employees, and not less than two-thirds of each side by the respective sides of the National Trade Committees.

The Minister should also appoint as members of the National Council three independent and impartial persons having no personal or professional connection with the industry, one to be chairman. Although these independent members should have power to vote, it should be their primary function to assist by advice, conciliation or otherwise the two sides to arrive at agreed proposals or decisions.

The scheme should cover all persons employed in any capacity in connection with the retail sale and distribution of goods, whether carried on in a shop or elsewhere, so as to include all persons employed in connection with the service of customers, the receipt of orders, the handling, dispatch, collection, or delivery of goods, in the clerical work of the business, in carrying messages or running errands, or engaged in any other occupations associated therewith.

The National Council should consider and fix minimum wages, hours of work, and conditions of employment for those employed in retail distribution, subject to confirmation by the Minister.

There should be statutory enforcement of the minimum wages, hours of work, and conditions of employment fixed by the National Council and confirmed by the Minister.

There should also be established National Trade Committees to formulate minimum wages, hours and conditions of employment in any special retail trade or appropriate group of trades and to make recommendations to the National Council.

Other recommendations dealt with the structure and functions of the trade committees.

Survey of World Unemployment situation

In most countries for which figures are available employment has increased and unemployment has diminished as compared with the corresponding month a year ago according to *Industrial and Labour Information* for April 4, published by the International Labour Office.

Of the 22 countries for which statistics of employment are published, 20 show an increase, one (Belgium) shows a very slight decrease and another (United States) shows a considerable decrease. With regard to unemployment, apart from Belgium and the United States where unemployment has naturally increased, five other countries also have registered an increase in unemployment (Bulgaria, France, Great Britain, Ireland and Norway), though in some cases the increase is very slight. It may be noted that in Great Britain employment has increased very slightly and unemployment has increased appreciably, these seemingly inconsistent trends are due to the growth in the working population.

The number of workers recorded as being in employment is below what it was in 1929,

the last year before the depression, in Belgium, Canada, Czechoslovakia, France, Luxemburg, the Netherlands, Poland, Switzerland and the United States.

Previous quarterly statistics issued by the International Labour Office dealing with the world employment and unemployment situation have been reviewed in the LABOUR GAZETTE (February, 1938, page 128; November, 1937, page 1181; etc.)

In presenting these statistics of employment and unemployment, the International Labour Office emphasizes the limitations of such figures, and states they do not afford any comparison of levels of unemployment or employment in the various countries as methods applied in compiling such statistics differ from one country to another, and the figures only serve as an indication of the trend of employment and unemployment in the countries concerned.

Statistics based on unemployment insurance schemes, indicate declines in unemployment over the corresponding period of 1937 ranging from 4.5 per cent in the Netherlands, to 0.5 per cent in Czechoslovakia and Switzerland. Other decreases were recorded for Denmark, 2.9, and Austria 1.3 per cent; while increases in unemployment were registered in Belgium 0.5 per cent, and the United Kingdom, 1.6 per cent.

Statistics obtained from returns made by trade unions show declines in unemployment as follows: Australia, 2.5 per cent; Canada 2.1 per cent and Sweden 1.0 per cent. The returns from trade unions in the United States recorded a 3.7 per cent increase in unemployment as compared with the corresponding period in 1937.

Indices of employment computed from statistics obtained from the operation of social insurance schemes register improvement in employment conditions as follows: Czechoslovakia, 4.4; Great Britain, 0.1; Hungary, 3.8; Latvia, 10.6; Netherlands, 3.1; and Yugoslavia, 8.7.

Returns from selected establishments for the quarterly period reflected a general improvement in the world employment situation, the index numbers of employment advancing in all countries reporting with the exception of the United States where a decline of 13.4 was recorded. The index of employment based on returns from selected establishments in Canada showed an improvement of 5.3 over the corresponding period of 1937. The continued improvement in other countries was indicated by increases as follows: Estonia, 3.8; Finland, 7.0; France, 6.1; Italy, 9.7; Japan, 16.1; Luxemburg, 5.6; Norway, 5.0; Poland, 9.3; South Africa, 5.1; Sweden, 7.5; and Switzerland, 6.0.

NOTE.—*More recent and detailed statistics dealing with the employment situation in Canada are given in the article (four sections) "Employment and Unemployment in Canada in March, 1938," to be found elsewhere in this issue.*

Resignation of Director of International Labour Office

Announcement was made in recent press reports from Geneva of the impending retirement of Mr. H. B. Butler, Director of the International Labour Office, who has held that post since the death of Mr. Albert Thomas, the first Director, in 1932.

It is understood that Mr. Butler has indicated his willingness to continue in office during the sittings of the International Labour Office which is to open on June 2, and to remain throughout the present calendar year if it is so desired. The press dispatches indicate that Mr. Butler may accept an important appointment in England in the field of social science.

The retiring Director was present at the Peace conferences in Paris in 1919 with the British delegation and assisted in the drafting of the Labour section of the Peace Treaties which provided for the establishment of the International Labour Organization to deal with social and labour matters. On the formation of the International Labour Office during the same year, he became Assistant Director and continued in this office until his appointment as Director.

Annual Report of National Mediation Board, U.S.A.

The third annual report of the National Mediation Board (United States) for the fiscal year ending June 30, 1937, has just been received. The report also includes the report of the National Railroad Adjustment Board.

During the year 222 new cases were filed in addition to 185 pending and unsettled cases which were on the Board's docket on July 1, 1936, making a total for the fiscal year 1936-37 of 407 cases in which the services of the Board were required. By the end of the fiscal year, the Board had finally disposed of 259 cases leaving 148 cases open and pending on June 30, 1937.

Of the 259 cases disposed of by the Board during the year, 101 were representation disputes among the employees, and 158 were disputes between carriers and employees requiring mediation of changes in rates of pay, rules, or working conditions.

Copies of this report may be obtained from the Superintendent of Documents, Washington, D.C., the price being 15 cents per copy.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

During the month of April three applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour as follows:—

(1) From coal operators in the Drumheller district, namely, the Alberta Block Coal Co. Ltd., Atlas Coal Co. Ltd., Brilliant Coal Co. Ltd., Elgin Coal Co. Ltd., Empire Collieries Ltd., Hy-Grade Coal Co. Ltd., Maple Leaf Minerals Ltd., Midland Coal Mining Co. Ltd., Monarch Coal Mining Co. Ltd., Murray Collieries Ltd., Newcastle Coal Co. Ltd., Red Deer Valley Coal Co. Ltd., Rosedale Collieries Ltd., Star Mines Ltd. and Western Gem and Jewel Collieries Ltd. Approximately 2,500 employees, members of District 18, United Mine Workers of America, are affected or likely to be affected by this dispute, which relates to wages and certain working conditions. A Board of Conciliation and Investigation was established by the Minister of Labour during April and members thereof were appointed as follows: Mr. H. A. Dyde, of Edmonton, Alberta, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members, Messrs. W. H. McLaws, K.C., and Patrick Conroy, both of Calgary, Alberta, nominees of the employers and employees, respectively.

(2) From various coal operating companies being members of the Western Canada Bituminous Coal Operators' Association and their mine employees, represented by District 18, United Mine Workers of America. The dispute, which relates to wages and certain working conditions, directly affects approximately 2,600 coal miners. A Board of Conciliation and Investigation was established by the Minister of Labour during April, the personnel of which is as follows: Honourable Mr. Justice A. A. McGillivray, of Edmonton, chairman, appointed on the joint recommendation of the other Board members; Mr. R. M. Young, of Canmore, nominated by the employers; and Mr. Robert Livett, of Calgary, nominated by the employees.

(3) From certain employees of Motorways, Limited, at Ottawa and Toronto, being drivers, warehousemen, checkers, loaders, mechanics and helpers. Forty employees are stated to be directly affected by the dispute, which relates to their demand for an agreement respecting wages, hours and working conditions.

It was reported in the March, 1938, issue of the Labour Gazette, page 279, that an application had been received from 85 workers engaged in the telegraph service of the Canadian Press, being mechanics and automatic printer telegraph operators, members of the Canadian Press System Division No. 52, Commercial Telegraphers' Union. In its statement in reply to the application the Canadian Press contended that it had not recognized the applicants or their committee as being authorized to carry on negotiations in disputes, and, consequently, as the statutory declaration attached to the application did not indicate that the necessary authority to declare a strike had been obtained, the application in its existing form did not meet the requirements of the Act. On May 2nd, following a strike vote, the employees submitted a revised application containing a statutory declaration to the effect that to the best of the knowledge and belief of the applicants a strike would be declared failing an adjustment of the dispute with the Canadian Press, and that the necessary authority to declare a strike had been obtained. As the application appeared to comply in all respects with the provisions of the Act, a Board of Conciliation and Investigation was established by the Minister and Board members were appointed as follows: on the employees' recommendation, Mr. Leonard James Ryan, of Toronto, Ontario; on the recommendation of the Canadian Press, Mr. W. Rupert Davies, of Kingston, Ontario.

A Board of Conciliation and Investigation was also established by the Minister of Labour early in May to deal with two applications received from stevedores, checkers, coopers, etc., in the employ of the Western Stevedore Company at Fort William and the Canadian National Railways at Port Arthur, respectively. Eight hundred and two employees, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, were affected by the dispute, which related to their request for increased wages and changed working conditions. Messrs. Alfred J. Wickens, K.C., of Moose Jaw, Sask., and W. C. Hamilton, K.C., of Winnipeg, Man., were appointed members of the Board on the recommendation of the employers and employees, respectively. In the meantime, however, conferences had been resumed at the head of the Lakes between the parties concerned and an amicable agreement was reached on May 11. It was not necessary therefore to complete the personnel of the Board.

The application for a Board of Conciliation and Investigation received in February last from employees of the Sterling Collieries Company, Ltd., and the Coal Valley Mining Company, Ltd., being members of Locals 46 and 46A, International Brotherhood of Electrical Workers, was withdrawn by the representative of the union on April 18th in the expectation that a settlement would be effected through the steam shovel men and dinkey locomotive engineers negotiating an agreement with the International Union of Operating Engineers and the so-called "auxiliary" employees (Local 46A) concluding a contract with the Western Association of Mechanical and Electrical Engineers.

Report of Board in Dispute Between the Royal View Mine and its Employees, Members of United Mine Workers of America

The findings of the Board of Conciliation and Investigation established by the Minister of Labour in December last to deal with a wages dispute between the Royal View Mine, at Lethbridge, Alberta, and its employees being members of District 18, United Mine Workers of America, were received in the Department of Labour on April 23. The Board's report was signed by the chairman, Mr. A. Macleod Sinclair, and the member nominated by the employees, Mr. A. J. Morrison. The company's representative on the Board, Mr. M. E. Moscovich, submitted a minority report. The texts of the two reports follow:

Report of Board

In the matter of a dispute between The Royal View Mine, hereinafter called the (Employer) and its Employees, being members of the United Mine Workers of America, hereinafter called the (Employees).

The Board held meetings in Calgary and in Lethbridge. The first meeting was held in Calgary, and dealt with organization. The meetings in Lethbridge were devoted to the hearing of evidence, and in an effort to procure an agreement between the parties to the dispute.

Evidence was adduced on behalf of both parties. The case for the Employer was presented by Mr. Theodore Hagblad, one of the partners operating the Mine, while the case for the Employees was presented by Mr. Patrick Conroy, Vice-President of the United Mine Workers of America, District No. 18.

The dispute referred to the Board was as to wages only, involving day wages and contract wages, but, in order to arrive at a proper conclusion on the point referred to the Board, it was necessary to go into other matters, such as the working and marketing conditions.

Evidence was submitted dealing with wages and conditions in Mines operating under similar conditions in the Lethbridge District. The principal objection advanced on behalf of the Employer was that it is economically impossible for it to pay any wages in excess of those being paid prior to the dispute.

I requested Mr. Hagblad to submit in confidence some evidence as to the capital invested in the Mine. His first answer was that it was impossible to give an accurate statement, whereupon the Board informed him that an approximate statement would be accepted by the Board. This he refused to do, although I pressed him to do so on more than one occasion. I regret to say that, throughout the proceedings, Mr. Hagblad did not display the candour that one would expect from an Employer who had applied for a Board to settle the matters in question. His attitude made it very difficult to have an amicable agreement between the parties arrived at, although the Board made every effort to arrive at some agreement that would be satisfactory to both parties.

The result, therefore, is that the Board, in arriving at a conclusion, must do its best on the evidence before it.

The case for the Employees was supported by evidence, and, having had the advantage of observing the demeanour of the witnesses in giving evidence, I have come to the conclusion that they were truthful witnesses.

It seems to me that if the Employer is unable to pay reasonable wages, the cause is that he does not operate the Mine in a proper and efficient manner. There are many grounds that I might cite in support of this conclusion, but I need only refer to one or two. For example, much time is wasted by miners in securing timbers and other supplies which, if the provisions of The Coal Mines Regulation Act were complied with, would not be necessary. It is a well established practice that miners shall be supplied with an adequate number of cars at the coal face, or at a reasonable distance from the face. The evidence shows that the Employer in this instance did not conform to this practice, thereby causing a lot of unnecessary delay, and consequent reduction in the earning power of the miners at the coal face, who, according to the Laws in force in this Province, are restricted to an eight-hour day.

Another instance might be cited—the manner in which the track is laid results in cars being left at an inconvenient point from where miners have to shovel their coal. This necessitates, in many instances, double shovelling of the product, thereby entailing double work on

the part of the miner, and, in the process of shovelling, causing smaller coal to be put in the car by the miner, and, due to the extra handling, causing unnecessary breakage of coal, thereby reducing its value at the pit head.

The Employer urged that he could not pay the scale of wages paid by Mines of a similar kind in the district, because his Mine is situate 4½ or 5 miles from the City of Lethbridge. The evidence discloses, however, that the customers of the Mine are not from the City of Lethbridge, but that the greater part of the business is done with farmers who bring their own vehicles to the Mine and cart the coal away.

There is another unsatisfactory part of the evidence of Mr. Hagblad. He gave evidence as to the price at which he sold his coal, which was different from the price at which he advertises his coal for sale. He could give no satisfactory explanation of the difference between his evidence and his advertising.

In my opinion, a reasonable scale of wages for this Mine should be as follows:

Similar to that paid in the Federal Mine, which is operating under a similar set of conditions. It is true that the Federal Mine is closer to the City of Lethbridge, but inasmuch as both Mines cater largely to the country trade, and as this country trade radiates in all directions, there would appear to be little difference in the haulage of coal from either of the two mines. A statement by the owner of the Federal Mine indicates that a lesser wage scale than what is now being paid at that property, and which is in effect at the Royal View Mine, is not necessary, since there is a sufficient demand for coal during the busy periods when the seller can command a fair price without one operator cutting the price of another.

From the statement of the operator of the Federal Mine, it would appear that the Royal View Mine operators are inclined to indulge in a "cut-throat" practice in relation to selling prices, with the result that a chaotic condition in the matter of selling prices now prevails in the Lethbridge area, and it would appear from the reasons submitted by the operators of the Royal View Mine, who have been making a practice of selling coal at lower prices than their competitors, that they are stimulating a non-economic condition, both in the matter of prices of coal and the wages resulting therefrom.

After taking all the facts into consideration I, therefore, find that both day wages and contract wages at the Royal View Mine should be paid on the same basis as presently exists at the Federal Mine, operated by the J. J. Hamilton Coal Company, and I would recommend that both parties to this dispute convene in conference at an early date, to be mutually agreed upon, to endeavour to arrive at an agreement on that basis.

(Signed) A. Macleod Sinclair,
Chairman.

Approved and concurred in by
(Signed) A. J. Morrison,
Employees' Representative.

Minority Report

In the matter of a dispute between The Royal View Mine (Employer) and its Employees, being members of the United Mine Workers of America (Employees).

To: The Honourable Minister of Labour,
Norman McL. Rogers.

A Conciliation Board, under the provisions of the Industrial Disputes Investigation Act of Canada, consisting of Chairman A. MacLeod Sinclair, Esq., K.C., Chairman; A. J. Morrison, Esq., selected on behalf of the U.M.W.A., and M. E. Moscovich, Esq., selected on behalf of the Employer, held its sittings at Lethbridge and Calgary to hear evidence and to attempt, if possible, to come to a common understanding regarding the matter in dispute—"WAGES".

It is clear from the Act that if a settlement of the dispute is not arrived at, a full report thereon shall be made to the Minister, setting forth the facts and circumstances, and the findings therefrom.

At the outset I suggest it is absurd to entertain an economic or political viewpoint and to use such as the basis or structure upon which one founds one's decision.

The matter, as I see it, ought to be decided solely in accordance with the evidence as submitted, the logical inferences therefrom, and not omitting to take into account those facts of life well known to us all.

Facts

The case for the miners was conducted by the Vice-President of the U.M.W.A., Mr. Patrick Conroy, and the case for the Mine Operators by Theodore Hagblad, one of the Employers.

The miners presented their case in support of a claim for increased wages and the evidence consisted of the testimony of three employees, William Parke, Alex Perseley, and Mike Bordeniuk. In addition they presented several exhibits:

(*a*) A brief setting forth a union theory.
(*b*) A copy of an agreement with the Hamilton or Federal Coal Company.
(*c*) A copy of a tentative agreement with the Royal View Mine.

The Employers' Case was supported by three other employees, working in common with and in the same mine as the first three mentioned,

and whose names are: Harry Kutny, George Ference, and Elbert Wilkie.

In addition, Mr. Hagblad gave evidence orally and by brief, submitting in confidence his pay rolls for many months back.

Mr. Hagblad stated in his brief that:

The Royal View Mine is operated by three persons—Eli Nelson, Fred Lund and himself, all coal miners, and with the exception of Lund, who was permanently crippled in this mine in 1936, work together with their employees in this coal mine.

They purchased part of the land in 1925, and moved to their present site in 1931. The area consists of 90 acres, being 70 acres under lease from the Provincial Government, 20 acres purchased outright. In addition they have 10 acres of surface rights.

There are the following Coal Mines in the Lethbridge District:

1. The Lethbridge No. 8.
2. The Standard Mine.
3. The Federal Mine.
4. The Rollingson Mine.
5. The Riverview Mine.
6. The Chester Mine.
7. The New Barnes Mine.
8. The Pot Hole Coulee Mine.
9. The Royal View Mine.

I gathered that the Royal View, Chester and New Barnes mines were similar in size.

However, of all these 9 mines the Royal View and New Barnes are most unfortunately situated.

The situs of the mine in question is on Legal Subdivision 2, Sec. 31, Tp. 9, Range 21, West of the 4th. It is on a river bottom, 6½ miles from the subway in Lethbridge. It is necessary to climb a steep hill over a mile in length before reaching the level ground and there are about 4½-5 miles of dirt roads to pass over before reaching a gravel highway.

These roads are maintained by the Employer and needless to say, where so many coal mines are situated in the same vicinity, one situated as the Royal View Mine is located is at a decided disadvantage in doing business in competition with the others.

Mr. Hagblad pointed out very logically that in the face of such competition and the difficulty in reaching the Royal View Mine, this mine was obliged, in order to attract any business, to sell its coal at a lower price than the other coal companies.

Since the commencement of the mine operations, first on a raw piece of land the men employed, in this mine, have regularly received their wages with seeming satisfaction, and those working diligently have earned fairly good returns. At all times material to this dispute the number of employees involved were 26. They went on strike November 15, 1937, immediately after joining with the U.M.W.A. Following three weeks of picketing an arrangement was reached whereby the difference pertaining to wages would be placed before a Conciliation Board and until such difference was eliminated a tentative agreement arrived at was to be the basis of the contractual relations between the men and the operators.

It is now important to consider: (*a*) the old scale, (*b*) the tentative scale, and by way of comparison (*c*) the scale of the Hamilton or Federal Mine, the latter scale being the one desired by the men, although the circumstances and conditions under which the Federal and Royal View Mines operate are dissimilar.

SCHEDULE OF WAGES

	Old Schedule	*Tentative Schedule*	*Federal Schedule*
Drivers..	4 00	4 20	4 85
Timbermen..	4 00	4 50	5 00
Machine men.. ..	*	4 50	5 00
Bone coal..	0 52	0 52	0 56
Loading in rooms..	0 68	0 70	0 70
Entry..	0 87	0 94	1 03
Pick mining..	0 86	0 88	*
Narrow places.. ..	*	0 92	*
Room timbers.. ..	0 22	0 22	0 24½
Round timbers.. ..	0 47	0 48	0 52

* No provision

I said at the outset that 3 miners gave evidence for the case for an increase to the Federal Scale but did not show a single sensible reason for this step. Of the three men Parke and Bordeniuk satisfied me that they were poor miners and did not work diligently. Perseley was a good witness and satisfied me as being a good miner. In a nutshell these men did not contend seriously that the wages they were receiving under the Tentative Scale or even under the Old Scale were unsatisfactory. Parke and Bordeniuk seemed to quarrel with their employers' decision as to what was an abnormal place, and complained about other matters totally foreign to this investigation.

The Commissioners examined the pay rolls and roughly speaking I deduced that some months the average pay per shift was $4.50 per man, and sometimes $4.25 per man.

If Parke had received the sum of $4.50 he too may not have complained. He only produced two pay slips. I am satisfied that he is an extremely shiftless type of miner, who neglected his work and depended upon a clause in the tentative agreement in order to receive the minimum wage of $4.50 by trying to convince his employer that the place he worked at was abnormal.

The real argument upon which the miners hoped to get an increase was that suggested by my fellow Commissioner, A. J. Morrison,

that it was against union principles to have a mine in one place paying a wage different than another located in the same district, and that if a miner works 8 hours in a mine belonging to X he should receive precisely the same remuneration as that of a miner working 8 hours in a mine belonging to Y. Such a proposition to me sounds preposterous and untenable and if you, Mr. Minister, will refer to the Book of Evidence at p. 253 you will find that I asked Mr. Conroy his view at the conclusion of the evidence and he frankly modified or disagreed with Mr. Morrison by stating that conditions and circumstances governed the case.

This being the true conception I hold that each dispute must be decided on its own merits and facts.

Mr. Hagblad tells us that even under the tentative scale the operators are losing money and there is no reason to doubt this statement.

The Royal View Mine sells its coal at $3.00 per ton, whereas the Federal Mine sells coal at $3.25 per ton. The Royal View Mine is situate 6½ miles from the centre of the City, whereas the Federal Mine is situate about one mile from the same place.

The Royal View Mine is obliged at its own cost to maintain about 4½ to 5 miles of highway—often impassable.

The cost of repairs and fuel amounts to a considerable sum.

The nearest competitor of the Royal View Mine is the Chester Mine, situate on the level ground. It sells its coal at $3.25 per ton and pays its employees precisely what the Royal View Mine paid prior to the tentative increase, with the following variations $4.34 for day work and $2.50 for machine cutting.

I am satisfied that the Federal Mine is not the proper mine with which the Royal View Mine is to be compared. The former can produce and sell its coal at a less cost than the Royal View Mine and if the Royal View Mine is to operate at all a difference in wage scale, small as it is, must necessarily exist.

In addition to Hagblad the three witnesses named in the early part of this report gave evidence. Their testimony was fair, reasonable and satisfactory.

Take for example the evidence of Ference, who at page 196 of the evidence stated that he had worked at the Royal View Mine, quit his position and went to the highly mechanized and larger mine at Shaughnessy, in the Lethbridge District, but stated under oath that he earned much more at Royal View than at Shaughnessy and consequently returned to his former job.

He also stated that at the Royal View Mine he would earn $4.00, $5.00, and $6.00 per shift, net.

Mr. Wilkie was called as a witness and you may find his evidence beginning at p. 221. At p. 224 he said that he worked perhaps in the hardest place found in the Royal View Mine but always earned good wages. He was quite satisfied with the old scale, although he was naturally pleased with the tentative scale.

I watched these witnesses and concluded that the faithful and energetic employees earned good wages, whereas the lazy and indifferent type did not.

I am convinced that there are few fields of employment more difficult and hazardous than that of mining and, although no compensation may truthfully be said to be sufficient for this heavy toil, one must not lose track of reason. Let the operator close his mine is the cry of the agitator. However, the Employer is entitled to make an equitable return on his investment.

I feel that the employees of the Royal View Mine are on the whole satisfied with the tentative scale. Irrespective of this feeling, after giving careful consideration to the evidence submitted by both sides, I am of the opinion that the Royal View operators should increase their old scale to that of the tentative scale and that this tentative contract should govern the relations between these parties up to the 31st of March, A.D. 1938.

Mr. Morrison and I have been unable to agree on this point. To increase this scale any further, means the closing of the Royal View Mine and the placing on relief of many men, who, while they work, under the tentative scale in particular, earn reasonable wages.

Respectfully submitted,

(Signed) M. E. Moscovich.

January, 25/38.

In the March issue of *Manufacturing and Industrial Engineering* a detailed outline is given of the policy and efforts being carried out by the factory management and personnel division of the Goodyear Tire and Rubber Company of Canada Limited to create safe working conditions within its organization.

The threefold program of the Company is summarized as follows:

"First—By following a definite safety policy laid down by the Management.

"Second—By placing a direct responsibility for reduction and elimination of accidents on the departmental foreman and supervisor, and

"Third—By the promotion of employees' interest in the safety program."

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1938

THE following table shows the number of disputes, workers involved and time loss for April, 1938, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*April, 1938	15	2,874	17,548
*Mar., 1938	16	2,406	10,134
April, 1937	37	12,771	124,039

*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While there was a slight reduction in the number of strikes and lockouts in April there was an increase in the number of workers involved with a considerable increase in time loss due to the occurrence of three strikes, that of taxicab drivers at Toronto, Ont., which involved over seven hundred men and lasted nearly three weeks, the steamship strike on the Great Lakes and St. Lawrence River involving over one thousand men for more than two days and the strike of sawmill workers at Fort Frances which began on April 15 and was unterminated, involving nearly four hundred men. In March the most important dispute involved cotton factory workers at Cornwall, Ont. In April, 1937, strikes of automobile plant workers at Oshawa, Ont., and dress factory workers at Montreal, P.Q., caused most of the time loss, but there were seven other disputes causing time loss of between 1,500 and 4,000 days as well as many disputes involving small numbers of workers or lasting only a short time.

Four disputes, involving 79 workers, were carried over from March, and eleven disputes commenced during April. Of these fifteen disputes, nine were terminated during the month, four resulting in favour of the employers affected, four in favour of the workers involved and one being partially successful. At the end of April, therefore, there were six disputes recorded as strikes or lockouts, namely: herring fishermen, North Sydney district, N.S., two strikes of fur factory workers, Toronto, Ont., cap factory workers, Toronto, Ont., commercial artists, Toronto, Ont., and sawmill workers, Fort Frances, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to ten such disputes, namely: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; meat packing employees, Vancouver, B.C., December 29, 1936, one employer; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; cotton dress factory workers, Montreal, P.Q., November 25, 1937, one employer; cleaners and dyers, Toronto, Ont., December 9, 1937, one employer; cleaners and dyers, Toronto, Ont., January 3, 1938, one employer; dress factory workers (cutters), Toronto, Ont., January 21, 1938, three employers; and dress factory workers (cutters), Toronto, Ont., January 26, 1938, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A cessation of work for five hours by 14 employees in two garages operated by the same firm in Port Arthur and Fort William, Ont., occurred on April 25. The strikers were members of the Auto Mechanics' local of the International Association of Machinists and claimed the firm was not complying with the terms of an open shop agreement reached in August, 1937, with this firm and twenty-six other garages. The proprietor stated that union rates and hours were observed and that the dispute was regarding union recognition. A settlement was reached when the firm signed a closed shop agreement. All the employees were stated to be members of the union.

A dispute between the British Columbia Projectionists' Society, a section of the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada, and one

motion picture theatre at Port Alberni, B.C., led to the establishment being picketed for ten days in March and early in April. One union operator ceased work in February when the management took on an apprentice contrary to the union rules, instead of having two men in the projection room. He was replaced by a man claimed to be a member of another union. A clash with the pickets was reported on March 30. Early in April the management installed union operators and signed a union agreement.

A strike of printing compositors and pressmen in four news and three job offices in Quebec, P.Q., on March 18 was reported in the Labour Gazette for April. The settlement provided for a reduction in hours but the wage scale and certain points were to be arbitrated. The report of the Arbitration Board has been transmitted to the Quebec Minister of Labour and agreements have been signed with the International Typographical Union and the International Printing Pressmen and Assistants' Union. The minimum wage rate for compositors is to remain at $30.50 for day work, 45 hours per week, until March 1, 1939, and to be $32.50 until March 1, 1940, 44 hours per week, overtime at time and one-half rate. Night work is to be $2 per week higher, 42 hours per week. For pressmen and stereotypers employed in news offices for day work the minimum is to be $28.50, 48 hours per week, until March 1, 1939, and $30.50 until March 1, 1940, 46 hours per week, time and one-half rates for overtime. For pressmen in job offices the minimum rate is to be $26.50, 45 hours per week.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to April

Fur Factory Workers, Toronto, Ont.—As stated in the April issue of the Labour Gazette, this dispute occurred as the result of the formation of a dual union. One worker was reported to have been attacked at his home on April 26. On April 12 the Court of Appeal reduced to one month the sentences of three men who had been convicted by a magistrate of having offensive weapons and sentenced to six months' imprisonment. This had occurred before the strike was called. In addition four other men had been sentenced to three months' imprisonment on charges of unlawful assembly.

Disputes Commencing During February

Herring Fishermen, North Sydney, N.S.—Fishermen, members of a local of the Nova Scotia Fishermen's Union, ceased work on April 27 to secure an increase in the price of fish for bait from $1 per 250-pound barrel to $1.50. At the end of the month a settlement had not been reached but on May 4 the fishermen resumed work to catch bait for the bank fishermen and for local trade but not for the storage dealers.

Coal Miners, New Waterford, N.S.—A number of long-wall miners ceased work for one-half day on April 12 in protest against extra work. The management agreed to investigate and adjust the matter and work was resumed on the next regular working day. Extra pay for the work was arranged.

Commercial Artists, Toronto, Ont.—Employees in one establishment ceased work on April 4, when the employer refused to recognize the union, increase the minimum of wages and reduce hours from forty-four per week to forty. At the end of the month the strike was called off by the union without securing their demands.

Wood Factory Workers, Mattawa, Ont.—Employees in one establishment ceased work from April 2 to April 7 to secure increases in wages. As a result of conciliation by the Ontario Department of Labour and the Mayor of Mattawa the wages for boys were increased from 15 cents to 18 cents per hour and the pay of the men was increased from 25 cents and 27½ cents to 27½ cents and 30 cents per hour. Two days' work was lost.

Planing Mill Workers, Rimouski, P.Q.—A dispute as to a wage reduction involved employees in one establishment in a cessation of work from noon April 8 until the next day. It was reported that the mill had been closed since April 1 for lack of orders and that when the plant was reopened on April 7 a wage reduction from 20 cents per hour to 18 cents was announced. The men refused to accept this but on the next day accepted the wage reduction, the management stating that it was temporary.

Sawmill Workers, Fort Frances, Ont.—Employees in one establishment ceased work from April 15 against a reduction in wages of seven per cent when negotiations did not result in a renewal of the agreement with the Sawmill Workers' Union, a section of the United Brotherhood of Carpenters and Joiners of America. The union proposed an increase of twenty-one per cent but the employer proposed a reduction of ten per cent, owing to a decline in business. The union then desired to renew the agreement without change but the employer insisted on a decrease of seven per cent, reducing the minimum wage from 43 cents per hour to 40 cents. At the end of the month a settlement had not been reached.

STEEL MILL WORKERS, TRENTON, N.S.—Employees in the bolt and nut department of one establishment ceased work on April 5, refusing to work with one employee who refused to join the union, the Amalgamated Association of Iron, Steel and Tin Workers of North America. Although recognizing the union the management considered that the Labour Act of Nova Scotia precluded interference with the choice of workers in regard to union membership. The employee affected consented to join the union and work was resumed on the next day.

STONEMASONS, KINGSTON, ONT.—The local branch of the Bricklayers', Masons' and Plasterers' International Union notified the contractors that the rate for bricklayers and masons would go up from 95 cents per hour to $1 on April 1. This is understood not to have been accepted by the contractors and on that day the stonemasons employed by one contractor ceased work. The contractor considered that it had been agreed that the existing rate was to be paid until the job was finished. Later in the day the men agreed to resume work at the previous rate. Later this contractor and others signed an agreement with the union providing for a rate of $1 per hour, effective from April 1.

STONECUTTERS, KINGSTON, ONT.—Members of the Journeymen Stonecutters' Association of North America employed on one job ceased work on April 1 demanding an increase in wages from 95 cents per hour to $1. The contractor was also involved in the strike of stonemasons for the same increase. Work was resumed at the 95-cent rate on April 4, and the contractor was reported to have agreed to pay $1 per hour after June 15.

TAXICAB DRIVERS, TORONTO, ONT.—The Taxi Drivers local of the International Union of Teamsters, Chauffeurs, Stablemen and Helpers proposed to the employers that an agreement as to wages and working conditions should be signed, providing for $12.50 per week plus ten per cent commission with a guaranteed minimum of $17.50 per week, a ten-hour day with overtime at 45 cents per hour and improvements in working conditions. The employers and the union asked the Ontario Industry and Labour Board to assist in bringing about an agreement under the Industrial Standards Act. The strike was postponed from time to time and the employees agreed to meet with the Board on April 9 or April 11, but the union had called the strike at 5 p.m. on April 7 and the members voted not to cancel the notice. A number of cab owners had reached agreements with the union and on the first day of the strike a number of others agreed to do so also and their employees resumed work. Union drivers owning their cars were permitted to operate so that a considerable number of cabs were in service. It was stated by the union that service would be given for hospitals and other emergency calls. On April 9 the provincial authorities proposed that work should be resumed pending negotiations but this was refused by the strikers. From time to time several employers accepted the union terms. By April

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1938*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to April, 1938.				
MANUFACTURING—				
Fur, Leather, etc.—				
Fur factory workers, Toronto, Ont.	1	23	575	Commenced Mar. 4, 1938; against employment of members of another union; unterminated.
Fur factory workers, Toronto, Ont.	1	25	625	Commenced Mar. 17, 1938; against sending work to a shop employing members of another union; unterminated.
Textiles, Clothing, etc.—				
Cap factory workers, Toronto, Ont.	1	8	200	Commenced Mar. 2, 1938; against lay-off of union workers and for union agreement; unterminated.
Printing and Publishing—				
Commercial artists, Toronto, Ont.	1	23	575	Commenced Mar. 29, 1938; for renewal of union agreement; unterminated.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1938*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during April, 1938.				
FISHING AND TRAPPING—				
Herring fishermen, North Sydney District, N.S.	.....	200	800	Commenced April 27; for increase in price of fish; unterminated.
MINING, ETC.—				
Coal miners, New Waterford, N.S.	1	35	18	Commenced April 12; against extra work; terminated April 12; negotiations; in favour of workers.
MANUFACTURING—				
Printing, and Publishing—				
Commercial artists, Toronto, Ont.	1	17	425	Commenced April 4; for union recognition, increased wages and reduced hours; terminated April 30; return of workers; in favour of employer.
Miscellaneous Wood Products—				
Wood factory workers, Mattawa, Ont.	1	63	126	Commenced April 2; for increased wages terminated April 4; conciliation (provincial and municipal); in favour of workers.
Planing mill workers, Rimouski, P.Q.	1	30	45	Commenced April 8; against reduction in wages; terminated April 9; negotiations; in favour of employer.
Sawmill workers, Fort Frances, Ont.	1	385	5,390	Commenced April 15; against reduction in wages and for renewal of agreement; unterminated.
Metal Products—				
Steel mill workers, Trenton, N.S.	1	210	210	Commenced April 5; refusal to work with non-union employee; terminated April 5; negotiations; in favour of workers.
CONSTRUCTION—				
Buildings, etc.—				
Stonemasons, Kingston, Ont.	1	11	11	Commenced April 1; for increased wages; terminated April 1; return of workers; in favour of employer.
Stonecutters, Kingston, Ont.	1	24	48	Commenced April 1; for increased wages; terminated April 2; return of workers; in favour of employer.
TRANSPORTATION—				
Local—				
Taxicab drivers, Toronto, Ont.	63	720	6,000	Commenced April 7; for increased wages; reduced hours and union recognition; terminated April 25; conciliation (provincial); partially successful.
Water—				
Steamship employees. (deckhands, firemen, etc.), Great Lakes and St. Lawrence River.	16	1,100	2,500	Commenced April 15; against compulsory membership in certain unions; terminated April 17; negotiations; in favour of workers.

14 it was reported that half of the strikers had resumed work, their employers having signed a union agreement, in some cases with modified terms. On April 14 the union asked assistance from the Dominion Department of Labour but were informed that it was understood the matter was being dealt with by the provincial authorities. On April 20 it was reported by the provincial authorities that a basis of settlement had been reached except as to union recognition. On April 25 the members of the Toronto Livery Owners' Asso-

57200—2½

ciation signed an agreement with the union and work was resumed. The agreement provides for minimum pay of $12.50 per week of sixty-six hours, with twenty-five per cent commission, and 35 cents per hour overtime. The original agreement proposed by the union had been altered to similar terms when signed by the other employers. The agreement is outlined elsewhere in this issue.

STEAMSHIP EMPLOYEES (DECKHANDS, FIREMEN, ETC.), GREAT LAKES AND ST. LAWRENCE RIVER.—A number of employees on various ships at lake and river ports, members of the Canadian Seamen's Union, ceased work on April 15 in protest against being required to join certain unions in order to secure employment. A number of the companies operating ships had signed agreements with the National Seamen's Association, the Canadian Brotherhood of Marine Engineers, and the Mercantile Marine Officers' Guild of Canada, each being affiliated with the Canadian Brotherhood of Ships' Employees affiliated with the Canadian Federation of Labour. The agreements provided that officers and crews should be engaged through the union representatives, giving members of these unions preference in employment. The Canadian Seamen's Union consists of unlicensed ship employees, that is those other than masters, mates, marine engineers, etc., is affiliated with the Trades and Labour Congress of Canada and has co-operative relations with the International Seamen's Union, affiliated with the American Federation of Labour. The Canadian Seamen's Union had negotiated wage increases with the principal lake and river shipping companies in September, 1937, and was still recognized by several of these companies. Some of the ships affected by the strike were in United States ports at the time of the strike or en route and the union stated that cargoes for these ships would not be handled by the members of the International Longshoremen's Association and other international unions. When members of the Canadian Seamen's Union were to sign on for the 1938 season they were told it was necessary for them to join the National Seamen's Union which some of them did, thus belonging for the time being to two unions. As a result of negotiations between the representatives of the shipping companies and the Canadian Seamen's Union a settlement was reached on April 17 and the strikers resumed work. These shipping companies agreed that employees were free to join any union desired, also to negotiate with any union on behalf of its members, and that no one union would be recognized by any company as representing all its employees. The restrictive clauses in the agreements above mentioned, therefore, became non-operative.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. The annual review containing a table summarizing the principal statistics as to strikes and lockouts in Great Britain and other countries appeared on pages 272-278 of the March issue.

Great Britain and Northern Ireland

The number of disputes beginning in March, 1938, was 79, and 19 were still in progress from the previous month, making a total of 98 in progress during the period involving 29,900 workers, with a resultant time loss of 113,000 man working days.

Of the 79 disputes beginning in March, 16 arose out of demands for increased wages, 8 out of proposed wage reductions, 6 were over questions of working hours, 15 were over questions respecting the employment of particular classes or persons, 16 were over other questions respecting working arrangements, and 7 were over questions of trade union principle. One dispute was due to sympathetic action.

Final settlements were reached in 70 disputes during March. Of these 15 were settled in favour of the workers, 33 were settled in favour of the employers and 22 resulted in compromises. In the case of 8 other disputes work was resumed pending negotiations.

On or about April 8, workers reported to number about 1,700 ceased work at a plant of the Imperial Chemical Industries at Bellingham alleging dilution of labour, that is the employment of unskilled labourers on craftsmen's jobs, and unskilled supervision of craftsmen. Work was resumed on April 16 on the advice of officers of the Amalgamated Engineering Union to which most of the strikers belonged and negotiations were to begin as soon as work was resumed.

At Birmingham, 1,500 aircraft factory workers went on strike about April 7, in protest against the introduction of time study methods which they claimed were being made with a view to decreasing piecework rates. A week later, after negotiations between their union, the Amalgamated Engineering Union, and the Engineering Employers' Federation,

the men were assured that the proposed system would not be to their disadvantage, and they returned to work. An agreement as to new rates was to be negotiated after resumption of work.

About the middle of the month members of the Electrical Trades Union employed as motion picture projectionists in London, Manchester and a few other centres went on strike for increased wages and a forty-eight-hour week. Many men employed as motion picture projectionists in England are members of the National Association of Theatrical and Kinematograph Employees, and this union did not go out on strike. According to press reports the strike, accompanied by orderly picketing, is still in progress, but very few theatres have been forced to close.

Australia

The number of disputes reported as being in progress during the third quarter of 1937 was 110. The number of workers directly and indirectly involved was 35,457 with a resultant time loss of 139,102 man working days. The number of establishments which were involved was 136 and the estimated loss in wages was £134,070.

Eire

The Department of Industry and Commerce of Eire has recently published statistics dealing with industrial disputes in 1937 and the three preceding years.

There were 145 disputes beginning during 1937, involving 26,734 workers and resulting in a time loss of 1,754,949 man working days. These figures were the largest for any year since the compilations were begun in 1923.

Classified by industrial groups, general building, and construction and repair work had by far the greatest number of disputes with 47 beginning during the year involving 14,691 workers and resulting in a time loss of 1,492,107 man working days. There was only one strike in the clothing industry but it involved 4,000 workers and resulted in a time loss of 138,000 man working days. In the transport and communications industry, there were 8 strikes involving 2,319 workers and resulting in a time loss of 24,332 man working days. The boot and shoe industry had 8 strikes beginning during 1937, involving 1,068 workers with a resultant time loss of 4,381 man working days. In none of the other industrial groups did the number of workers involved reach 1,000.

Demands concerning wages were the cause of 68 of the disputes which began during the year, 33 arose out of the engagement or dismissal of workers, 19 out of other matters concerning conditions of employment, 16 were over questions connected with unionism or collective agreements, 5 were sympathetic strikes and 4 arose out of disputes regarding hours of labour.

There were 147 strikes terminated during 1937. The workers claims were wholly admitted in 43 cases, admitted in part in 40 cases and rejected in 43 cases. The employers' claims were wholly successful in one case, successful in part in one case and rejected in one case. In 18 strikes the result was indefinite.

Direct negotiations resulted in the settlement of 111 strikes, 20 settlements were the result of voluntary conciliation and 16 ended without successful negotiations.

The Trade and Industries Branch of the Department of Industry and Commerce intervened in 25 disputes in which a cessation of work had occurred and in 39 controversies in which a stoppage of work was averted.

United States

Preliminary estimates of strikes in February, 1938, which as the Bureau fo Labour Statistics points out, are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 150 strikes as beginning during the month, which with 100 unterminated at the end of January, made a total of 250 in progress during the month. The number of workers involved in these disputes was 70,000 and the resulting time loss was 590,000 man working days.

The number of strikes in January and February were somewhat greater than in December but considerably smaller than in any other month of 1937. As compared with the same month in 1937, February shows decreases of 29 per cent in the number of strikes, 60 per cent in the number of workers involved and 61 per cent in time loss.

During April the automobile manufacturing industry was involved in several labour disputes. The most serious occurred at Detroit and Flint, Michigan, April 19 when members of the United Automobile Workers of America picketed a Fisher body plant and refused to allow non-union members or union members whose dues were not fully paid up to enter the plant. The employees who were able to enter the plant were not sufficiently numerous to operate the factory and as a result this plant and an automobile manufacturing plant were forced to close, and about 5,000 men were out of work. The union claimed this constituted a lockout but withdrew their pickets after two days and work was resumed.

On April 1 members of the International Fur Workers' Union in New York, reported to number about 15,000, ceased work demanding

increases in wages of about 25 per cent and a thirty hour week. A press report stated that some employers had agreed to start negotiations on April 18 but no report of a settlement has been noted.

An April 7, 2,700 street railway employees in Detroit ceased work demanding that their union, the Amalgamated Association of Street, Electric Railway and Motor Coach Operators of America, be given seniority rights in connection with the operation of buses as well as of street cars. A settlement in which certain concessions were made to the workers was reached the same day and operation of the street railway was resumed on April 8. The settlement did not touch on the seniority question which is the subject of an action before Supreme Court of Michigan.

Differences in the Earnings of Women and Men in U.S.A.

"Differences in the Earnings of Women and Men" is the title of a bulletin (No. 152, price 10 cents) issued by the Women's Bureau of the United States Department of Labor.

The pamphlet gives the results of an inquiry made by the Women's Bureau into the differences on the wages of women and men. In the "Letter of transmittal," the Director of the Bureau, Mary Anderson, states that the findings of the inquiry "show a striking uniformity in the extent to which women's wages are below men's, in spite of changes in the general wage level, in business conditions, or in source of labour supply, and regardless of locality, type of industry, period of time, method of pay or other qualifying factor".

The inquiry showed that in three industrial states that have reported, men's and women's average wages in manufacturing have never gone as high as 65 per cent of men's wages. "Certain recent reports" the bulletin states "show that the average wages of women office workers ordinarily are at least one-fifth below those of men, though the discrepancies are less in the more skilled types of work). In states that have reported wages of men and women clerical workers over a series of years, women in office work have received only about 50 to 60 per cent as much as men."

In only 3 of 18 manufacturing occupations compared in the inquiry were men and women receiving the same hourly pay. Most of the women were paid only 35 cents or less an hour, "though some of their jobs required a considerable degree of dexterity or expertness, and though in almost no case did any man reported in the plant, no matter in how unskilled a job, receive less than 40 cents an hour."

Having outlined in detail the various possible causes for the low standards of women's wages in the United States, the report states:

It has been found to be true even when women's output is not less than men's and even though women are performing skilled jobs and are known to be especially proficient in certain types of work necessary to industry. Further, low pay to women cannot be justified by their lack of responsibility for the support of others, since very many employed women have dependents.

The extent to which women's wages fall below men's cannot be explained fully by the purely economic causes, such as oversupply of labour, for their pay remains low even for jobs in which they are much in demand. While women's lack of organization undoubtedly forms a large factor in keeping their wages at low levels, the whole situation scarcely can be referred to this cause.

The conclusion must be that in many instances the payment of a low wage to women is a hangover from the traditional attitude that assigns a low money value to work thought of as "Women's work." Certain jobs so designated are paid at a low rate regardless of their importance or the skill required; others are classified as "light repetitive" work, and considered worth only a low wage, regardless of their importance to the industry or of the tremendous nervous attention they require or physical toll they exact.

Home Improvement Loans

According to a statement made by Honourable Charles A. Dunning, Minister of Finance, Home Improvement Plan loans numbered 37,985 amounting to $14,849,134,80 as at April 30, 1938. This report shows an increase of 1,792 in number of loans and of $662,138.27 in amount over the figures reported at March 31, 1938.

An increase in April of 826 loans amounting to $333,105.64 in Ontario brought the grand total for that province to 16,789 loans for $6,633,897.50. Quebec with an increase of 275 loans totalling $129,034.84 shows a total of 5,614 loans for $2,815,766.71. British Columbia holds third position with an increase of 231 loans for $71,640.31 bringing the grand total for the province to 4,241 loans amounting to $1,358,052.55.

CANADIAN RAILWAY BOARD OF ADJUSTMENT NO. 1 SUMMARY OF RECENT DECISIONS

REPORTS have been received of three cases settled recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the LABOUR GAZETTE, October, 1937, page 1069, and in previous issues; and the sixth report of the proceedings of the Board, covering the period from October 1, 1933 to September 30, 1936, was issued as a supplement to the February, 1937, issue of the LABOUR GAZETTE.

The Board was established under a voluntary agreement concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following Railway Brotherhoods: The Brotherhod of Locomotive Engineers; the Brotherhood of Railway Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 464—The Canadian National Railways (Western Region) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

This case was to ascertain the proper basis of payment of a train crew between Pine Falls and Winnipeg in accordance with articles in the Conductors' Schedule and the Train men's Schedule.

Joint Statement:

A conductor and crew were assigned to a mixed train run operating Pine Falls to Winnipeg and return to Pine Falls, daily except Sunday, under the provisions of a bulletin dated at Winnipeg October 26, 1937, designating Pine Falls as the home terminal for the assignment.

This crew has been paid on the basis of actual miles between Pine Falls and Winnipeg Terminal, with terminal time consumed at Pine Falls in either direction, and actual time working in Winnipeg Terminal.

Contention of Employees:

Article 5, Rule 6, Conductors' Schedule, and Article 5, Rule 1, Trainmen's Schedule, provide that:—

> 100 miles or less, eight hours or less, constitute a day in through and irregular freight, local freight and mixed train service.

Article 5, Rule 9, Clause A, Conductors' Schedule, and Article 5, Rule 12, Clause A, Trainmen's schedule provide that:—

> Conductors and/or trainmen switching or delayed at terminals or turn around points will be paid for actual time so occupied at through freight rates. This time will be in addition to mileage or hours made on trip.

The Company is conceded the right to make an assignment in assigned mixed train service, designating the terminal or terminals for such an assignment.

The Employeees contend that the crew on this assignment should be paid the minimum day of 100 miles between Pine Falls and Winnipeg plus time working or delayed at each terminal, under the provisions of Article 5, Rule 6, Conductors' Schedule, and Article 5, Rule 1, Trainsmen's Schedule; or on the basis of actual miles between Pine Falls and the Winnipeg Terminal in each direction, plus terminal time at Pine Falls and all time at the turn around point, which in this instance would be Winnipeg, in accordance with Article 5, Rule 9, Clause A, Conductors' Schedule, and Article 5, Rule 12, Clause A, Trainmen's Schedule.

Contention of the Company:

The Company contended that this conductor and crew were assigned to a mixed train run operating Pine Falls to Winnipeg and return, daily except Sunday, in accordance with a bulletin dated at Winnipeg, October 26, 1937. The crew are laid up each night at Pine Falls.

On the assignment in question the train was scheduled to leave Pine Falls at 8.00K, arriving Winnipeg at 11.20K. Leave Winnipeg 17.00K, arriving Pine Falls at 20.20K, daily except Sunday.

Article 5, Rule 6, of Conductors' Schedule, and Article 5, Rule 1, of Trainmen's Schedule, reads as follows:—

"One hundred (100) miles, or less, eight (8) hours or less, to constitute a day, in through and irregular freight, local freight, and mixed train service."

This is assigned service, and no duties are required of the crew in Winnipeg from the time they book in until they report for the

return portion of the trip. On the trip in question, which is typical of the assignment, the crew were paid 204½ miles and as the payment made is in excess of the minimum set forth in Article 5, Rule 6, and Article 5, Rule 1, of the Conductors' and Trainmen's Schedules, respectively, the railway contends that the conductor and crew have been correctly paid.

The Company cannot agree that Article 5, Rule 9, Clause A, of the Conductors' Schedule, and Article 5, Rule 12, Clause A, of the Trainmen's Schedule applies to the time in Winnipeg during which no service is required of the crew (approximately three hours and twenty minutes).

Neither can the Company agree that under the conditions of assigned service the agreement with the employees contemplates the payment of two minimum days allowances for the round trip between Pine Falls and Winnipeg.

General Statement and Decision

Representatives of the Employees and representatives of the Company appeared before the Board and submitted additional oral information. The claim of the Employees was sustained.

Case No. 465—The Canadian National Railways (Central Region) and Order of Railroad Telegraphers.

This case relates to the extent to which the Railway is responsible for furnishing heat, fuel and light for a station agent at Sebringville. On June 30, 1937, the agency at Sebringville became vacant, and a bulletin, reading as follows, was issued under date of July 9, 1937:—

"Applications will be received up until noon July 18, for the position of Agent at Sebringville, salary $135 per month. House, fuel and light will not be furnished by the Railway."

Claim by the Agent for an allowance of $7.50 per month in lieu of house, fuel and light was declined.

Contention of Employees:

Article 18 of the Telegraphers' schedule agreement, in part, reads as follows:—

"Clause (A):—

"At stations where dwelling, fuel and light are provided, the Agent's dwelling will be reserved for the use of the Agent and his family, unless he elects to reside elsewhere, in which event the permanently appointed telegrapher having a family will have first choice in order of seniority.

"Clause (c):—

"Railways will keep such dwellings in good repair. Occupants must keep such dwellings and surroundings clean and must pay for repairs other than those due to ordinary wear and tear. Where necessary repairs are requested, such repairs will, when practicable, be made within thirty (30) days."

Article 22 of the Telegraphers' schedule agreement, in part reads as follows:—

"Station	Position	Rate
"Sebringville..	Agent	$135 H.F.L."

The employees contend that when the present schedule agreement was negotiated with the Railways, and the basic rate at Sebringville, Ontario, was agreed to, it was done with the understanding that dwelling, fuel and light was provided at this point, and would continue to be provided, as agreed by the Railway; and, therefore, the dwelling, fuel and light should have been included in the bulletin issued.

In the exchange of correspondence in connection with this matter, it has developed that on account of the cost of repairs to this dwelling, the railways consider they should not be put to the expense, and obviously, in order to avoid the responsibility agreed to in 1927, Clause (c) Article 18, all that is considered necessary is to omit the dwelling, fuel and light from the bulletins. The employees contend that this cannot be done during the lifetime of this agreement, and respectfully ask that the repairs be made and this agency be rebulletined with dwelling, fuel and light.

Contention of Company:

This claim is apparently submitted on account of an allowance of $7.50 per month having been made to the previous occupant of the position, particulars of whose case are as follows:—

On May 7, 1935, the previous occupant of this position who had been filling the position of agent at Centralia at a rate of $139 per month, succeeded as agent at Sebringville (being the successful applicant on bulletin advertising that agency at the rate of $135 per month with H.F. & L.). Shortly after his appointment he advised that the condition of the dwelling was such that he had decided not to occupy same.

A claim was submitted for an allowance in lieu of H.F. & L. as he had bid in the position with the understanding that H.F. & L. would be furnished by the Railway, and had he been aware that the house was practically uninhabitable, it was questionable if he would have left the agency at Centralia where the rate was $139 per month, to take the agency at Sebringville where the rate was $135 per month. Under the circumstances, it was felt that special consideration should be extended to him and an allowance of $7.50 per month was made to him.

The schedules that were in effect on the former Grand Trunk lines, which included the Stratford Division, prior to the current schedule, show a differential of $5 per month in the minimum rates for agencies where

H.F. & L. were furnished by the Railway, as compared with agencies where H.F. & L. were not furnished by the Railway, and nominal deductions of five or ten cents per month were made for rent, the deduction for Sebringville being five cents per month. When the current Telegraphers schedule was negotiated $5 per month was added to the rates for agencies on former Grand Trunk lines where H.F. & L. were furnished by the Railway, and the following rule was incorporated in the schedule:—

Article 18, Rule (B):—

"Where Railway's dwelling is occupied by the Telegrapher, deductions will be made on the payroll at the rate of $5 per month.

The agreed Memorandum of Understanding in connection with the above-mentioned rule reads as follows:—

"Where a Telegrapher vacates the dwelling provided by the Railways, the deduction of $5 per month will not thereafter be made from his wages on the payrolls, and he will no longer be entitled to free fuel and light."

The condition of the dwelling at Sebringville is not the result of neglect, but is due to the age of the building, it having been constructed in 1874 on a post foundation with no basement. The building would have to be practically rebuilt to put it in habitable condition. The current schedule contains no provision requiring the Railway to replace buildings that have worn out or been destroyed, nor does it specify that any allowance shall be made where the railway discontinues furnishing H.F. & L. The Railway has discontinued furnishing H.F. & L. at a number of stations as the result of fires or the age of the building, and it has not been the practice to make special allowances for adjustments in rates of pay, unless the rate of the agencies involved was less than that of agencies of similar classes in which cases an upward adjustment was made. The rate of $135 per month at Sebringville is in excess of the rates for positions of similar classes on the Stratford Division, where H.F. & L. is not furnished by the Railway.

The present occupant of the position was aware of the rate of pay at the time he bid in the position, and was also aware that the Railway had discontinued furnishing H.F. & L. at Sebringville. The present agent at Sebringville, for family reasons, is boarding at Sebringville and does not require a house at that point.

The claim for a special allowance or an upward adjustment in the rate of pay is not justified in this case, and it is respectfully requested that the claim be denied.

General Statement and Decision:

Representatives of the Company and the Employees appeared before the Board and presented additional oral evidence.

Under all the circumstances which developed at the hearing, the Board decides that some adjustment should be made in the rate of pay for the position of Agent at Sebringville.

Case No. 466—Canadian Pacific Railway (Western Lines) and the Brotherhood of Locomotive Engineers.

This is a question of the right of Engineers to promptly reduce the number of Engineers on their working lists, following regular mileage checks and "setbacks" from Engineers' assignments.

Joint Statement of Facts:

For a number of years when necessary to make a reduction in the number of spare engineers at Winnipeg, it has been customary to advertise by bulletin such reduction and allow a period of about 64 hours to elapse in which the men who are being cut off the spare board can indicate their preference under their seniority rules and before they are placed on the job selected. This practice became unsatisfactory to the engineers, and beginning in May, 1936, request was made of the Company that the practice be discontinued, and that in the future when reductions from the engineers' spare list are necessary the engineers thus demoted be permitted to immediately exercise their seniority as firemen, in accordance with Clause (*a*) Article 31.

The Company has declined to grant the request.

Contention of the Engineers:

Clause (*a*) Article 31 reads as follows:—

(*a*) When, from any cause, it becomes necessary to reduce the number of engineers from the engineers' working lists, on any seniority district, those taken off may, if they so elect, displace any Fireman their junior on that seniority district under the following conditions:—

First:—That no reductions will be made so long as those in assigned or extra pasenger service are earning the equivalent of 4,000 miles per month, in assigned, pooled or chain gang freight, or other service paying freight rates, are averaging the equivalent of 3,200 miles per month; on the road extra list are averaging the equivalent of 3,200 miles per month.

"Second:—That when reductions are made they shall be in reverse order of seniority."

There are in reality two features in the complaint, which refer to as First, complaint that when assignments are discontinued the men off such discontinued assignments, or their equivalent, are added to the engineers' spare list until complaint made and advertised for 64 hours, and Second, that when reductions are determined upon, they are not made effective for 64 hours.

First:—When a check of mileage made by engineers has indicated there should be, say 10 engineers on the list, and subsequently there are a number of assignments discontinued, the engineers who have thus lost such assignments, are, under the practice complained of, added to the spare list, and the spare list is consequently required to carry the additional load until 64 hours after complaint is made by local chairman of engineers.

We contend that when a check of the mileage has been made, and the number of spare engineers has been determined upon, such number should not be increased by reason of assignments being discontinued, but that when assignments are discontinued, the men thus affected should exercise their seniority, and that for every man demoted to the engineers' spare list there should be one engineer demoted at once to position of firing.

Second:—When a check of mileage made by the engineers on the spare list has indicated that a reduction in their number is warranted, we contend that those cut off should be permitted to exercise their seniority as firemen at once. When this is not permitted such men must either be out of employment entirely during the waiting period, or if they are continued on the Engineers' spare list during the waiting period, such spare list is carrying, during that period more men than is warranted by a check of the mileage, as provided in Article 31. We, therefore, contend our request is in keeping with the language, interpretation and understanding of Article 31.

Contention of the Company:

The Article in the Schedule of the Brotherhood of Locomotive Firemen and Enginemen corresponding to Article 31 (*a*) is worded identically with that of the Engineers' Schedule. The article does not place any obligation on the Company to make changes immediately, and the Company believes that reasonable time should be allowed in making adjustments to avoid unnecessary confusion.

When complaint was made by the Engineers relative to this matter, the Company made a survey of the situation to ascertain if any changes could be made which would be more satisfactory to all concerned.

The men at Winnipeg have a large promotion territory, which includes fourteen subdivisions outside of the terminal and yard assignments in the terminal varying from 45 to 70 depending on the volume of business. Because of delay on the part of some of the men in indicating their preference, and because of the fact that many of them might at the time be out of the terminal, resulting in some uncertainty as to their desires, the Company is reluctant to put into effect any arrangement which would curtail the time which it has to make these readjustments.

The Firemen's Organization, learning of the proposal, took a very definite position in opposition to any change being made in the long standing practice. The men reduced obviously must take positions as firemen and in so doing they would be brought within the classes of service in which the Firemen's Organization is concerned.

The Company has made a careful check to determine whether the engineers have been subjected to low mileage or losses by reason of the present arrangement, and the investigation has developed the fact that in all instances the spare engineers have been making well over the minimum mileage called for by the mileage limitation arrangement.

In the circumstances, the Company feels that the Engineers have not shown that any sound or reasonable cause prevails for adopting the change they request; because of this, coupled with the fact that as the long standing existing practice is acceptable to the Company and to the Firemen, it is the opinion that no change should be made.

General Statement:

It developed at the hearing held on April 12 that the question, at issue, as explained by the representative of the Employees, was not entirely as contained in the joint statement of facts and the original submission by the Employees, but is simply a question of the right of Engineers to promptly reduce the number of Engineers on their working lists, following regular mileage checks and "setbacks" from Engineers' assignments.

Decision

The claim of the Engineers to promptly reduce the working lists of Engineers, following regular mileage checks and "setbacks" from Engineers' assignments, is sustained.

CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

Summary of Recent Decisions

REPORTS have been received of five cases recently settled by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the Labour Gazette, January, 1938, page 16, and in previous issues.

The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925 (the date of the inception of the Board), to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "Clerks and other Classes of Employees as herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to reappointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made, in the agreement constituting the Board, for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award. The ruling of the arbitrator becomes the decision of the Board.

Case No. 152—Operating Department (Central Region)

This dispute concerns the assignment of a junior employee to the amalgamated position of Stores Clerk and Locomotive Foreman's Clerk, South Parry, Ontario.

Employees' Contention:

Effective March 1, 1933, the position of stores clerk, rated at $130 per month, and the position of Locomotive Foreman's Clerk, rated at $120 per month, South Parry, were amalgamated. Prior to that date the position of Locomotive Foreman's Clerk was filled by an employee with seniority date of August 17, 1917, while the position of Stores Clerk was filled by an employee with seniority date of January 3, 1922. When the management first decided to amalgamate these two positions the employee who held the seniority date of August 17, 1917, was decided upon as the employee to be retained, presumably on account of him being the senior employee, but subsequent negotiations between the Stores and Mechanical Departments resulted in the employee with the seniority date of January 3, 1922, being retained. The senior employee was then obliged to exercise his seniority to a position at Capreol, held by an employee who also had more service than January 3, 1922.

Article 3, Rule (*k*) of the Schedule for "Clerks and Other Classes of Employees" reads in part "When reducing forces, senior employees with sufficient ability to perform the work will be retained." The intent of that rule was unquestionably to protect the senior employee in the event of the Management deciding to reduce staff.

The employees contended that when the two positions were amalgamated, the employee with seniority date of August 17, 1917, should have been retained on the amalgamated position in compliance with Article 3, Rule (*k*) of the schedule.

Railway's Contention:

Due to the decrease in the volume of work at South Parry the position of Locomotive Foreman's Clerk, rated at $120 per month, was abolished, effective March 1, 1933, and a portion of the work formerly performed by the occupant of this position, amounting to approximately 2½ hours per day, is being taken care of by the Stores Clerk at South Parry, rated at $130 per month. The position of Locomotive Foreman's Clerk was filled by an employee holding a seniority date of August 17, 1917, in the seniority group of clerical forces in the Mechanical Department on the Northern Ontario District; the position of stores clerk is held by an employee with a seniority standing of January 3, 1922, in the Stores Department seniority group under the District Storekeeper at Toronto. The former Locomotive Foreman's clerk exercised his seniority in a position belonging to the seniority group of clerical forces in the Mechanical Department on the Northern Ontario District, in accordance with Article 3, Rule (*k*) of the Schedule for Clerks and Other Classes of Employees, which reads, in part, "In reducing forces, senior employees with sufficient

ability to perform the work will be retained." The intent of this rule is to protect the senior employees to positions belonging to their seniority group. The position at South Parry is primarily that of Stores Clerk, the work performed for the Mechanical Department being only incidental to that performed for the Stores Department and the position must be considered as one belonging to the Stores Department group. To permit the Mechanical Department employee to displace the Stores Department employee would be tantamount to transferring from the Stores Department group to the Mechanical Department's Clerical group a position which properly belongs to the Stores Department group. To accede to the request of the employees would in effect be establishing a new rule. Accordingly, the Railways maintained that the contention of the employees was not justified and should be denied.

General Statement:

This case was heard on September 18, 1934, when it was recommended that the three General Chairmen and the Railway's Representative meet for the purpose of establishing a basis for a mutual settlement of this case and similar cases which may come up in future. As no report is before the Board at this date it is decided to delete the case from the agenda.

Case No. 185—Operating Department (Atlantic Region)

This case involves the right of the Railway to retain in service an employee qualified to perform the various duties of an amalgamated position occasioned by a reduction in staff.

Employees' Contention:

Article 1, Item 3, of the Schedule for Clerks and Other Classes of Employees, embraces the position of freight checker. Article 1, Rule (*b*) of the schedule defines the word "Employee" which is used throughout the various rules of the agreement. A telegrapher is not an employee within the meaning of the aforesaid schedule. Article 3, Rule (*a*) of the schedule defines the seniority and promotion groups of employees. The position of freight checker is included in Seniority Group No. 3 on each Superintendent's Division.

The employees referred to in this rule are employees holding seniority rights under the schedule for Clerks and Other Classes of Employees, and as one of these employees is a telegrapher and does not hold any seniority rights under that schedule, we contend that he is not entitled to the position of freight checker at Chatham, and that he should be removed from the position forthwith and the senior qualified employee under the schedule for Clerks and Other Classes assigned to the position.

Railways' Contention:

Prior to reduction at Chatham the staff consisted of agent, operator, clerk and freight checker. When the reduction was made it was necessary to retain the operator for the handling of train orders. The staff now consists of agent, operator and clerk.

The Railway contends that an agent or operator can be used to assist in all the station duties. The freight checker is not qualified to handle train orders and, even if so qualified, could not, under the agreement between the Railway and the Telegraphers, be used to handle train orders.

It is therefore requested that the claim of the employees be denied.

General Statement:

This case was heard on June 15, 1937, at which time both parties to the dispute appeared before the Board and gave oral evidence. The case was referred back to the disputants for additional information. The evidence submitted showed that an operator must be retained for the handling of train orders.

Decision:

The claim of the employees was denied.

Case No. 191—Operating Department (Central Region)

This dispute related to an employee classified as Assistant Foreman at Tiffin Elevator No. 2 whose rate was $170 per month, up to June, 1930, when the position was abolished due to the material decrease in the volume of grain being handled through the elevator. When his position was abolished he exercised his seniority to the position of Chief Weighman, in which capacity he was intermittently employed until December 9, 1936. Prior to December 9, 1936, the supervisory staff at Tiffin Elevator consisted of an Elevator Foreman and a Chief Engineer. The Elevator Foreman was retired on pension December 8, 1936, and the entire operation of the elevator was placed under the supervision of the Chief Engineer. Effective December 9, 1936, the employee who had occupied the position of Assistant Foreman at $170 per month and who was later intermittently employed as Chief Weighman at a rate of 55 cents per hour, was placed on a salary of $135 per month to cover all services rendered, and classified as Assistant Foreman. The claim is for pay at the rate of $170 per month, plus overtime, for the period December 9, 1936, to May 31, 1937.

Employees' Contention:

The schedule rate applicable to the position of Assistant Foreman, Elevator No. 2, Tiffin, which this employee filled up to June, 1930, when it was abolished, is $170 per month.

The employee, it was stated, was reappointed to the Assistant Foreman's position on December 9, 1936, and continued to fill the position until it was abolished on May 31, 1937, but instead of being paid the schedule rate of $170 per month, plus overtime, he was paid a rate of $135 per month to cover all services performed. On one day in particular his earnings were less than those of the men under his supervision on account of their being paid overtime.

The employees further contended that in view of the fact that the schedule rate applicable to the position is $170 per month, the employee in question should be paid that rate for the period December 9, 1936, to May 31, 1937.

Railway's Contention:

The wage scale of the schedule for clerks, etc., effective May 1, 1927, showed a position of Assistant Foreman, rate $170 per month, at Elevator No. 2, Tiffin, Ont. This position was not included in the wage scale of the current schedule as the position had been abolished prior to the date on which the wage scale was compiled.

Prior to 1930 a large volume of grain was handled through the elevator and we had a considerable staff employed there. The volume of grain handled gradually decreased, and in 1936 only some two million bushels of grain were handled, and only a skeleton staff, working reduced hours, was maintained. The employment of an Assistant Foreman is only necessary when there is a considerable volume of grain being handled, and the employee in question might very well have been left with his former classification of Chief Weighman at a rate of 55 cents per hour, and treated the same as the shipper, legman and chief grain distributor. It was anticipated that with the opening of navigation in 1937 grain would again commence to move through the elevator, and to provide some regularity of employment for the experienced men in the interim, arrangements were made to place this employee on a salary of $135 per month to cover all services rendered, and to allow one shipper, one legman and one chief grain distributor, all rated at 55 cents per hour, a minimum of four hours per day, exclusive of Sundays and holidays, until the opening of the navigation season in 1937. Due to lack of any grain movements these four employees were laid off May 31, 1937.

The position of Assistant Foreman between December 9, 1936, and May 31, 1937, is not comparable with the position of Assistant Foreman previous to June, 1930, rated at $170 per month, and there is no justification for the claim.

General Statement

This case was heard on November 16, 1937, at which time both parties presented additional oral evidence. As no decision could be reached it was agreed that the case would be referred to arbitration. The Board is now advised that a satisfactory settlement has been reached by the parties to the dispute and the General Chairman's request to withdraw this case from the Board is acceded to.

Case No. 192—Operating Department (Central Region)

This claim is for a change in the seniority date of a clerk on the Levis Division Superintendent's seniority list for clerical forces.

Employees' Contention:

The employees contend that all time recorded on the employee's service record as labourer was devoted to clerical work in the Roadmaster's Office at Levis from May 25, 1919, to February 25, 1924. The clerical work he performed is covered by the schedule for "Clerks and Other Classes of Employees" and under Article 3, Rule (*b*) of that schedule, he is entitled to seniority from May 25, 1919. He performed the duties of a Roadmaster's Clerk from November 6, 1923, to November 15, 1923, inclusive, but this period of service does not appear on his service record for the reason that he was not paid for that period of service until January, 1924. He kept a record of the time he worked for the railway in 1923, and a note which appears in his personal notebook shows that he worked as a relieving clerk from November 5, 1923, to November 15, 1923, and that he would be paid for this period as a labourer when extra men were employed. After thoroughly investigating the claim and reviewing the conclusive evidence submitted in corroboration thereof, the Superintendent recommended that this employee be accorded seniority from May 25, 1919. The General Superintendent conceded that the employee did clerical work during the periods he is recorded as a labourer, but on account of him not being recorded as having worked as either a labourer or as a clerk in 1923, he declined to alter his present seniority date of May 3, 1924.

The employees contend that as this employee performed clerical work covered by the aforementioned schedule each year from May 25, 1919, to date, under Article 3, Rule (*b*), and the understandings which have been negotiated since that schedule became effective, he is entitled to seniority from May 25, 1919.

Railway's Contention:

It has been contended that during the time that this employee's service record shows that he was employed as a labourer he was actually performing clerical work. Even if this contention were conceded, his claim would not be justified inasmuch as payrolls indicate that he performed no work as a clerk or labourer between November 23, 1922, and January 1, 1924—a period of thirteen (13) months—and consequently, even if he had accumulated any prior clerical seniority he could not be given credit for same, as to do so would be contrary to Article 3, Rule (*l*) of the schedule. Furthermore, Article 3, Rule (*b*), provides that seniority lists shall be open for protests for sixty days from date of posting. The lists were posted regularly, as required by Article 3, Rule (*b*), and no protest was entered by this employee until January, 1935.

General Statement

Both parties appeared before the Board and gave additional oral evidence in support of their respective contentions.

Decision

The claim of the employees is sustained.

Case No. 193—Sleeping and Dining Car Services (Central Region)

This case was to determine the proper seniority date to be given a certain Sleeping Car Porter now resident at Montreal, P.Q.

Employees' Contention:

The Montreal District was not established until three years after this Porter came to Montreal, therefore he was not transferred under any agreement. The position of Linen Porter filled by this employee from March 11, 1920, to June 5, 1927, is covered by the schedule for "Clerks and Other Classes of Employees," under which this Porter held seniority rights for all of his service as a Linen Porter. The Road Employees' Schedule (Sleeping and Dining Car Service) does not contain any provision under which an employee can be allowed seniority for service under another wage agreement. On the other hand Article 2, Rule (*d*) of the Sleeping and Dining Car Employees' Schedule provides that an employee's seniority shall count from the date of last entry into the service in a position covered by this schedule. The details of the Porter's service were not known to the Committee until receipt of a certified copy of his service record on November 23, 1937, consequently action could not be taken until the correct information was received.

The employees contend that under Article 2, Rules (*d*) and (*f*) of the Sleeping and Dining Car Employees' Schedule, the Porter in question is entitled to seniority as a Sleeping and Parlor Car Porter from June 5, 1927, only, and that the seniority list should be corrected to read accordingly.

Railway's Contention:

From July 5, 1919, the date this Porter was first employed, until May 1, 1923, he came directly under the jurisdiction of the Superintendent of this department on the Atlantic Region at Halifax, as there was at that time no Superintendent of the department located at Montreal. When the Quebec District of the Sleeping and Dining Car Department was formed, with headquarters at Montreal, on April 1, 1923, all employees of the Atlantic Region stationed at Montreal or running into Montreal who wished to do so were transferred to the Quebec District under the jurisdiction of the Superintendent at Montreal with full seniority rights, under a properly constituted agreement. This Porter transferred to the Quebec District under this arrangement, effective May 1, 1923. On June 5, 1927, he resumed duty as a sleeping car porter. When the seniority list for the year 1928 was being compiled his present seniority date was agreed to by the Local Chairman of the Porters' Grievance Committee. In 1929 the General Chairman, Local Chairman and Superintendent set a seniority date of July 5, 1919, for this Porter.

The Railway further contended that the seniority date of this Porter is correctly shown on the seniority list as mutually agreed between the employees' representatives and the Superintendent at Montreal, and that it would not be fair to now deprive him of this standing which at the request of the employees' representatives was granted him ten years ago, and consequently the employees' claim to have the seniority date changed is not justified.

General Statement and Decision

Both parties appeared before the Board and gave additional oral evidence in support of their respective contentions. The claim of the employees is sustained.

LABOUR LEGISLATION IN MANITOBA, ONTARIO, QUEBEC AND SASKATCHEWAN

At the recent sessions of the Legislatures of Manitoba, Ontario, Quebec and Saskatchewan there were enacted a considerable number of measures and amendments of importance to labour and industry. This new provincial legislation is outlined herewith. Labour legislation enacted recently in Alberta will be reviewed in the June issue of the LABOUR GAZETTE.

Manitoba

The Manitoba Legislature, sitting from December 9 to March 23, passed new statutes to regulate trade schools and to consolidate the Acts concerning old age pensions and pensions for the blind. Amendments were made in Acts concerning wages, conciliation in teachers' disputes, child welfare, education, unemployment relief and working conditions of railway employees.

Minimum Wages

Several amendments were made in The Fair Wage Act, enacted first in 1916. Until 1934, the statute applied only to workmen employed in the construction of public works. The Act enabled the Minister, on the recommendation of the Fair Wage Board, to fix minimum wages and maximum hours for persons employed on such works, the rates and hours not to be less favourable to the employees than the terms fixed in collective agreements. In 1934, private construction of more than $100 value in towns of more than 2,000 population was brought within the Act and the Government was given power to apply it to such works in any part of the province.

As amended in 1938 to add Part II to the Act, it applies also to barbering, hairdressing, printing, engraving, and dry cleaning and any branch or combination of these. Further, the Lieutenant-Governor in Council is given power to declare, on the recommendation of the Minister, any industry not covered by Part I to be within Part II. The Bill as presented to the Legislature, would have applied directly to any industry except mining and agriculture.

Where any industry has been brought under Part II by Order in Council, the Minister may authorize the Fair Wage Board or a special board to recommend in writing a schedule of wages and hours, and for this purpose to inquire into the conditions of employment and convene a conference of employers and employees to negotiate a schedule satisfactory to both parties.

The procedure for fixing wages and hours is similar to that laid down in the Industrial Standards Acts of Alberta, Nova Scotia, Ontario, and Saskatchewan. A schedule may establish the maximum hours in a day or week, the minimum rates of wages, the particular days or hours of the day for performance of work and the rates of wages and conditions governing overtime work, and classify employees for these purposes. It may fix the time during which the schedule is to remain in force and define any terms used in it.

When a schedule has been agreed upon and submitted to the Minister, if he approves it, the Lieutenant-Governor in Council on his recommendation may declare it in force and binding on all employers and employees in the industry and area designated, until repealed or for the period stipulated in the schedule, and thereafter until a new schedule has come into operation or until ten days after notice has been published by the Minister declaring it no longer in effect. In providing for the continuous operation of a schedule until repealed, the Manitoba Act is unlike the Industrial Standards Acts.

Schedules are effective ten days after publication in the *Manitoba Gazette*. Wages for anyone to whom the Minimum Wage Act applies are not to be less, or hours more than under the orders under that Act. The Act does not apply to employees of the Manitoba Government or of any commission appointed by the Government or to municipal employees.

When a schedule has been in force 12 months or less, if the Minister believes there is reason to do so, the Fair Wage Board or other person designated by the Minister may convene a new conference of employers and employees to consider conditions in the industry and such conference may agree upon a new or amended schedule.

Employers are required to keep posted any schedule affecting their employees and the Minister may require an employer to keep a register with the names, addresses and ages of his employees as well as information concerning wages, hours and working conditions and to produce any records or documents considered necessary.

A fine of $25 to $100 for the first offence is provided for an employer who contravenes Part II of the Act or any regulation or schedule. For a second or further offence, the fine is from $50 to $500. In default of payment the employer may be imprisoned for not more

than six months as well as being required to pay the employee wages and costs. On the other hand, an employee who does not observe the schedule is liable to a fine of $5 to $25 or imprisonment for not more than 10 days. No prosecution may be instituted without the written consent of the chairman of the Fair Wage Board. The provincial Bureau of Labour is to enforce Part II and the schedules under it.

The Minister may establish an advisory board of five members for every zone or group of zones to which any schedule applies. Two members are to be nominated by employers and two by employees, with a chairman appointed by the Minister. The board may hear complaints, give general assistance in carrying out the provisions and may fix special minimum rates for handicapped employees. An appeal lies from an advisory board to the Deputy Minister of Labour whose decision is final.

The Lieutenant-Governor in Council may make regulations for carrying out the Act.

Wages

An amendment in the Wages Recovery Act makes its provisions for enforcement of the payment of wages apply to a warrant of distress issued in respect of a claim for payment of wages under any Act of the Legislature. Another change allows any justice who is satisfied as to the facts to issue a certificate of judgment in case of death, illness, absence or resignation of the one who has made the order. It is further provided that unless more than $20 is involved, or a special loss or damage, no appeal is allowed. These amendments are retroactive and affect pending litigation.

Under the Public Schools Act, a minimum salary for teachers of $50 for a 20-day month is to be paid unless an agreement to the contrary is approved by the Minister.

An amendment in the Income Taxation Act reduced the special tax on wages and income other than wages which was imposed in 1933, from two per cent to one.

Hours of Work

A new section in the Highway Traffic Act prohibits a driver being on duty more than nine consecutive hours or more than a total of 12 in 24 consecutive hours or more than six days in a week, except in emergencies. These provisions were formerly incorporated in an order of the Municipal and Public Utility Board of June 24, 1936.

Vocational Education

The Trade-Schools Regulation Act, which is to come into force on proclamation, is similar to the Acts of the same name in Alberta and British Columbia and in its main provisions it is like the Ontario Trade Schools Regulation Act which is summarized below.

Unemployment Relief

An amendment in the Winnipeg Charter gives the city power to appoint a Commissioner and set up a Department of Public Welfare under the control of a committee of council or of council and citizens, of which a majority are to be members of council. The new department may undertake the work of giving relief and general assistance now under the jurisdiction of various bodies.

The committee may have liens created and registered against the property of recipients of relief, and the city can realize on the lien the total amount of the advances made with interest at 6 per cent. Advances fraudulently obtained may be treated as debts to the city.

The Unemployment Relief Loan Act, 1933, now authorizes the payment of relief expenditures out of the Consolidated Revenue Fund as well as by loans. The provisions of this Act which are to be in effect until April 30, 1939, give the Lieutenant-Governor in Council power to borrow money to assist municipalities and to provide for a sinking fund as well as enabling municipalities to borrow for relief purposes.

The Health and Public Welfare Act is amended to give the Minister power to register a lien against the property of a person for whom the Government has provided maintenance, medical or other services, hospitalization or burial. Not only is the person who received the service liable for the debt but suit may be brought against his family or executors.

Old Age Pensions

The Old Age and Blind Persons' Pensions Act consolidates the Old Age Pensions Act, 1928, and the Pensions for the Blind Act, 1935. Pensions under the new Act are to be administered by the Workmen's Compensation Board.

Disputes Between Teachers and School Boards

The Education Department Act was amended to provide for a board of conciliation instead of a board of reference for disputes between teachers and school boards as first provided in 1920. A board of conciliation is made up in the same way as a board of reference, one member representing the school trustees and one the school teachers with an independent chairman. The board of reference could be constituted a board of arbitration at the request of either party with appeal lying to the County Court.

The Act as amended lays down more detailed provisions for the procedure to be followed by the parties and the Minister before referring the dispute to the board of conciliation. When the Minister has received a statement from either party, he may stay any proceedings by either side except those provided for in the Act. The board is to report its findings to the Minister and make recommendations as to the payment of costs by the parties. If the Minister confirms the findings, they are binding on the parties subject to appeal to the County Court.

If, however, the Minister considers the dispute a proper subject for arbitration, he may notify the parties of his decision and each party must within 10 days appoint an arbitrator and the Arbitration Act is to apply. The reference to arbitrators is subject to appeal.

Co-operative Associations

An amendment in the Milk Control Act stipulates that the prohibition of rebates to buyers of milk does not apply to a co-operative association to which the Companies Act applies.

Freedom of Association Bill

A Bill dealing with freedom of association failed to pass. It would have been administered by the Minister of Labour who was to have power to investigate any complaint from an employee or his representative and to determine the labour union which had the right to represent any group of employees.

The Bill declared the right of employees to organize in labour unions and to bargain collectively through their union and its officers. The collective bargain was to enure for the benefit of any employee affected by it, whether he was a member of the labour union at the time the bargain was entered into or not. A penalty was provided for any employer who interfered with, restrained, or coerced employees in the exercise of their rights under the Act or who dominated or interfered with a union, discriminated against union men or refused or wilfully delayed to bargain collectively with employees' representatives as provided in the Act.

Resolutions

A resolution that the Dominion Government be urged to take full responsibility for provision of funds to meet payment for unemployment relief in all municipalities in Manitoba was agreed to.

Another resolution to the effect that the minimum wage fixed by the Minimum Wage Board is inadequate was negatived on a vote of 35 to 11.

Ontario

The Ontario Legislature which opened on February 23 and closed on April 8, 1938, enacted statutes dealing with trade schools and vocational education, the Labour and Industry Board, industrial standards, steam boilers, licensing of workmen, workmen's compensation, unemployment relief, disputes between teachers and school boards, and civil service pensions.

Labour and Industry Board

The Department of Labour Act was amended to reduce the membership of the Labour and Industry Board from five to three all of whom are to be officers of the Department of Labour.

Safety Measures

The powers of the Lieutenant-Governor in Council to make regulations for the safety of workers were extended by another change in the same Act to include persons employed in the construction of coffer dams and crib work in water or other places where pressure of sand, water or soil is likely to endanger human life.

By an amendment to the Steam Boilers Act regulations made under it need no longer be published in the *Ontario Gazette* but notice that they have been made must be gazetted and the regulations will come into force from the tenth day after publication of the notice. In future, the fee for certificates of inspection to be paid by the owner or manufacturer are to be fixed by regulation. Formerly, the Act fixed a fee of $5 for inspection and the certificate.

An amendment in the Municipal Act provides that by-laws may be made by municipal councils for licensing and regulating persons engaged in the installation of hot air, hot water and steam heating equipment of any kind.

Workmen's Compensation

By a change in the Workmen's Compensation Act, an additional sum of $125 may be paid for expenses in case of death, where it is necessary to transfer the body from the place of death to the place of interment in Ontario.

Industrial Standards Act

An amendment in this Act restricts the provision exempting farming and mining operations from the Act to include only such operations as form part of the agricultural or mining industry.

Unemployment Relief

The Unemployment Relief Act, 1935, was amended to give to the relief administrator in a local municipality and any person appointed as his assistant by a city or a township bordering on a city with a population of not less than 100,000 and to every relief inspector appointed by the Department of Public Welfare power to take affidavits from relief applicants.

Vocational Education

The Trade-school Regulation Act, 1938, which is to come into force on proclamation requires schools, including places giving courses by correspondence, for the teaching of any designated trade, to be licensed by the Department of Education.

The Act defines a trade as the skill and knowledge requisite for or intended for use in the construction, building, repair or operation of aeroplanes, steam engines, boilers, internal combustion engines or machinery of any kind, and any other occupation, calling or vocation designated as a trade by the regulations. A trade-school means any school or place where any trade is taught or purported to be taught or where any course of study of a trade by correspondence is organized, taught or purported to be taught other than a university recognized by the Department of Education or a school or course of instruction maintained under any Act of the Province. Neither does the Act apply to any trade which is within the scope of the Apprenticeship Act.

The Act stipulates that no person shall keep or operate any trade-school unless it is registered under it and trade-schools now in operation must make application for registration to the Minister of Education within 30 days after the coming into force of the Act. Registration must be renewed annually and the Minister may issue certificates of registration, which he may revoke at any time if he is not satisfied that the trade-school is provided with competent instructors and sufficient equipment to teach any specified trade or trades at a reasonable rate. The Minister has power to authorize inspection of any trade-school and a penalty is provided for any person obstructing such inspection.

A penalty of not less than $100 and, in default of payment, six months' imprisonment is provided for persons keeping a trade-school not registered under the Act or teaching any trade not specified in his certificate of registration or making a contract to instruct in any trade other than the contract set out in the application for registration or a contract which has been approved by the Minister. No person not registered under the Act may maintain an action or proceeding in an Ontario Court in respect of a contract made in Ontario or against any person domiciled in Ontario in connection with the business of any trade-school.

The Lieutenant-Governor in Council may appoint the necessary officers for carrying out the Act and may make regulations prescribing the security to be provided by the trade-school for performance of its contracts, the accommodation and equipment required, minimum hours of instruction, maximum fees, terms of payments, controlling advertising; regulating the sale of courses of instruction and fixing the price of articles produced by the students and limiting such sale so as not to compete unfairly with goods produced in any factory or shop, fixing the time during which the public may obtain service in any trade-school, designating any occupation as a trade within the Act or exempting any trade, fixing registration fees, governing the issue of certificates, etc., by the school, providing for annual returns to the Minister and generally as to the operation and management of trade-schools.

Under the Continuation Schools Act, where agricultural training is provided in accordance with the regulations the county council has had power to give financial assistance for this purpose. By an amendment, to be deemed to have been in effect since January 7, 1937, when an agricultural department is established by the Minister of Education in a continuation school, the council is required to pay the school board $500 annually for this department.

Training schools for nurses also come under stricter government supervision with an amendment to the Nurses Registration Act prohibiting any person establishing, or conducting a training school for nurses without the written consent of the Minister of Health under a penalty of from $50 to $100 for the first offence and from $100 to $500 for the second offence.

Disputes Between Teachers and School Boards

The Teachers' Boards of Reference Act provides that, where a teacher employed by a school board is dismissed or his engagement terminated in a manner not mutually agreeable, such teacher or board may, within ten days, apply in writing to the Minister of Education for a board of reference, setting forth in the application the nature of the dispute. The Minister may then and upon receipt of any security required by him direct a judge of a county or district court to act as chairman of a board of reference and direct each party to the dispute to appoint a representative and if such are not named within ten days the judge is to make the appointments.

The board is to inquire into the matters in dispute and for this purpose, the judge has all the powers of a commissioner under the Inquiries Act. A report is to be made to the Minister and the cost of the board is to be awarded by the judge at his discretion.

It is stipulated that until the time provided for applying for a board has elapsed or until ten days after the Minister has received the report of a board, no permanent appointment by the board of school trustees may be made to replace the teacher in question.

The Lieutenant-Governor in Council may fix the remuneration of the reference board's members and other items of cost and make regulations generally for the carrying out of the Act.

Civil Service Superannuation

The amount paid to the personal representatives or to a member of the family of an employee of the public service, who would have been entitled upon retirement to a superannuation allowance but who dies after not less than 10 years service, has been changed from a lump sum equal to one year's salary based on his average earnings for three years to a sum not exceeding his total contributions to the Superannuation Fund with interest at five per cent. Where the widow dies before she has received this amount and there are no children under 18 years of age or where the employee himself has been superannuated but dies before he has received an amount equal to his contributions with interest and leaves no widow or children under 18, the remainder of the amount is to be paid to his personal representatives or to a member of his family.

Resolutions

A resolution regretting that no plan for unemployment insurance was laid before the Legislature was defeated by a vote of 57 to 22.

Quebec

The Quebec Legislature, in session from January 26 to April 12, enacted new statutes concerning trade unions, youth training, workmen's compensation and relief for farmers. Amendments were made in existing statutes dealing with collective agreements, minimum wages, pensions, housing of workmen and workmen's compensation.

Trade Unions and Collective Agreements

Important changes relating to trade unions and collective bargaining were made in the Workmen's Wages Act, 1937, and the Fair Wage Act, 1937. The title of the former Act, which was a revision of the Collective Labour Agreements Extension Act, 1934, was changed again to Collective Labour Agreements Act. The Fair Wage Act was designed as a complementary measure and provides for the fixing of wages and hours for workers not covered by a collective agreement under the other statute, but it does not apply to farm labourers or domestic servants.

In 1937, sections were inserted in both these Acts providing a penalty for any person who, directly or indirectly, prevented an employee from becoming a member of an association. In the Fair Wage Act, the section applied also to any person who tried to prevent, by threats of dismissal or other threats, any person from joining an association and, in default of payment of the fine that might be imposed on conviction, the Act provided for imprisonment. These sections are now repealed and the same provision is made in each Act. The new section declares it to be an unlawful act for any person, to prevent or attempt to prevent, directly or indirectly, by threats or otherwise, an employee from becoming a member of an association or to make "an attempt upon the freedom of labour of an employee," by dismissing him, causing him to be dismissed, trying to prevent him from obtaining work because he is or is not a member of an association, or because he is not a member of a particular association. For violation of this section, the offender is liable to a maximum fine of $25 and costs for a first offence and, in default of payment, to imprisonment for 15 days in respect of the fine and eight days in respect of the costs. For a second offence, the penalty may be a fine of from $25 to $75 and costs or imprisonment for one month and 15 days on failure to pay the fine and costs respectively. Any subsequent offence is punishable by a fine of $100 and costs or imprisonment for two months for failure to pay the fine and one month for not paying the costs. Under both Acts, interested parties other than the Minister or the Fair Wage Board, in the case of the Fair Wage Act, or the joint committee enforcing a collective agreement under the Collective Labour Agreements Act, can bring action only with the written authorization of the Attorney-General.

More power than before is vested in the Lieutenant-Governor in Council in respect to both the Collective Labour Agreements Act and the Fair Wage Act. He may now at any time amend or revoke a decree making an agreement binding under the Collective Labour Agreements Act or an ordinance under the Fair Wage Act. Formerly, he could take such action under the Workmen's Wages Act only at the request of the parties to the agreement. As regards the Fair Wage Act, a wage order could be cancelled or altered by the Fair Wage Board if, in its opinion, conditions had changed and if such action was approved by the Lieu-

57200—3½

tenant-Governor in Council. As before, in the case of both Acts, the amendment or revocation takes effect on the date of publication of the notice in the *Quebec Official Gazette*, but an amendment in both Acts adds: "or on any other date fixed by the Lieutenant-Governor in Council."

A new provision in both Acts empowers the Lieutenant-Governor in Council to make a decree respecting a collective agreement or a wage order, as the case may be, retroactive for a period not exceeding four months from the date of the agreement or the order.

Another stipulation which has been made in both the Collective Labour Agreements Act and the Fair Wage Act relates to work done by the provincial Government or by a contractor for the Government. The Workmen's Wages Act provided that a decree should entail a matter of public order and apply to "any hire of work of the same nature or kind as that contemplated by the agreement." The Fair Wage Act made similar provision: an order was to constitute a matter of public order and be obligatory for all employers and employees in the industry or trade concerned. To these sections is added the provision that no decree under the Collective Agreements Act and no ordinance under the Fair Wage Act shall apply, or has applied to the Government of Quebec or its departments or services unless such decree or ordinance contain an express stipulation to the contrary. Neither do they apply or have they applied to work done by a third party for the Government under a contract providing for a scale of minimum wages.

By a re-wording of a section of the Collective Labour Agreements Act, it is provided that "upon receipt of the petition" for the extension of an agreement, the Minister shall give notice thereof in the *Quebec Official Gazette* and in both an English and a French newspaper. The old section merely stated that the Minister was to give notice of the receipt of the petition in the three publications.

The decrees and regulations made under the Collective Labour Agreements Extension Act, 1934, and the joint committees constituted under that Act, which were not to be affected by the repeal of that Act in 1937, are now further declared not to be affected or to have been affected by that repeal but are to have the effect of decrees, regulations and proceedings under the Act of 1937 and the committees, the rights and powers of joint committees under the Act of 1937. These decrees, regulations and proceedings are, however, subject to the new provisions concerning amendments and revocation by the Lieutenant-Governor in Council and application to Government works.

The amending Acts are not to affect pending cases as regards costs.

An Act to Facilitate the Exercise of Certain Rights enables a trade union to be sued by summoning one of its officers or by summoning the "group collectively under the name by which is designates itself or is commonly designated or known."

The Act applies to "every group of persons associated for the carrying out in common of any purpose or advantage of an industrial, commercial or professional nature" in the Province which does not possess a collective civil personality recognized by law and is not a partnership within the meaning of the Civil Code of Quebec. The judgments rendered in any action may be executed against all the movable or immovable property of such group. The Act gives no power to trade unions to bring an action.

The Bill as introduced in the Legislative Assembly would have permitted any member, instead of any officer, of a trade union to be summoned as representing the union and the members would have been individually liable to pay any damages awarded in addition to their collective liability with respect to the funds of the union.

It may be noted that in Quebec the Professional Syndicates Act, enacted in 1924, provides that a professional syndicate registered in accordance with the Act shall be constituted a corporation enjoying civil rights and can sue and be sued in the courts. Two-thirds of the members of a professional syndicate must be British subjects and only British subjects may be officers. Trade unions which do not comply with the conditions laid down remain, as in the other provinces, voluntary associations. There is a further difference, however, in that under the Quebec Civil Code no person may represent another before the Courts whereas in the other provinces, the law provides that where there are numerous persons having a common interest in one matter, one or more of such persons may sue or be sued or may be authorized by a judge to defend in such action on behalf of, or for the benefit of, all persons interested. Under this rule trade unions may be sued by means of a "representative action." Such an action is unknown to Quebec law.

Workmen's Compensation

Three Bills to amend the Workmen's Compensation Act were introduced. One which would have done away with the state system of collective liability for workmen's compensation and required workmen to bring action in the courts was not enacted. A Bill providing for the establishment of a medical board of three physicians to review the medical evidence before the Workmen's Compensation Commission and to appoint an officer to ad-

minister the accident fund was approved as was also an Act to protect workmen suffering from silicosis. The first Act is to come into force on proclamation but that concerning silicosis became effective when enacted.

The Lieutenant-Governor in Council is empowered to appoint the medical board, fix the salaries of the members, determine their duties and lay down the rules of procedure for the examination and revision of the medical evidence. The salaries and expenses of the board are to be borne by the accident fund. The findings of the majority of the medical board are to bind the Workmen's Compensation Commission with respect to medical evidence. The Lieutenant-Governor in Council may also appoint an officer who is to take over the duties of the Commission in fixing and collecting assessments and administering the accident fund. This officer is not, however, to have power to sue for unpaid assessments. His remuneration and expenses are also to be paid from the accident fund.

The amendment bringing "infectious silicosis" under the Workmen's Compensation Act defines the term as silicosis accompanied by intercurrent tuberculosis. In order to qualify for compensation, a workman must have been exposed to siliceous dust while employed in the province for three years in the aggregate. "Silicosis" includes the similar condition resulting from the inhalation of other dust from asbestos.

Any employer, who, directly or indirectly, compels any workman who was employed in his establishment for at least a year prior to March 29, 1938, the date when the Bill was introduced, to undergo a medical examination in order to ascertain whether he is suffering from infectious silicosis, or who dismisses such a workman who refuses to have a medical examination, is liable to a fine of from $100 to $500 and costs and, in default of payment, imprisonment for from one to six months.

In 1931, the Quebec Legislature made silicosis, as defined in the Act of that year, a compensatable disease when it was incurred in the mining industry after exposure to silica dust in the province for an aggregate of five years but the section was repealed in 1933.

Youth Training and Vocational Education

Several Acts were passed dealing with unemployment among young persons and providing for training in various lines.

The Youth Aid Act provides that the Lieutenant-Governor in Council may authorize the Minister of Municipal Affairs, Trade and Commerce to enter into agreements with any person, firm, corporation, institution or government for the purpose of assisting young persons to establish themselves in suitable employment. He may also authorize the Provincial Treasurer to pay, out of the consolidated revenue fund, up to one million dollars for this purpose, and to meet this expenditure he may authorize loans for not more than thirty years at rates of interest not exceeding 4 per cent. The Act ratifies the agreement entered into on September 17, 1937, between the Federal and Provincial Governments respecting the establishing of unemployed youth.

Acts were passed providing for the establishment of agricultural schools at Nicolet, Chicoutimi, Ville-Marie and in the Gaspesian area, for mine-schools, wherever determined by the Lieutenant-Governor in Council, for a school of mining, geology and metallurgy in connection with Laval University, "a school of higher studies in fishery" to be maintained by agreement with an existing educational establishment in affiliation with a university and a school of spinning to train textile workers.

Early Closing for Barber Shops, Beauty Parlours and Shoe-Repair Shops

An amendment to the Montreal City Charter gives the City Council power to order the closing on each or any day of the week of barber shops, beauty parlours and shoe-repair shops during the hours determined by by-law. Formerly, the two first named establishments could not be ordered to close earlier than 8 p.m.

Old Age Pensions

An amendment in the Old Age Pensions Act makes it clear that the appeal which is allowed to a Superior Court Judge from a decision of the Quebec Old Age Pensions Commission refusing an application for pension, deals only with the right to the pension and not with the amount.

The Montreal City Charter was amended to authorise the City to make good, wholly or in part, the decrease in pensions made by the 1935 amendment to the Act incorporating the Montreal Police Benevolent and Pension Society with respect to policemen who had been pensioned before the amending Act.

Changes made in the charter of the Montreal Firemen's Benefit Association fix the length of service before a pension is payable except in the case of disability at 20 years for members admitted before December 31, 1937, and at 30 years for others. The annual pension is raised to two-thirds of the average salary for the last 10 years' of service, with this amount increased by 2 per cent of the average earnings for each year's service over 25 for all members admitted before December 31, 1937, and with 2 per cent increase for each year after 30 years' service for members ad-

mitted after that date. The maximum pension is not, however, to exceed 80 per cent of the average salary with a maximum of $5,000. New provisions apply also to disability pensions.

Commercial Travellers

An Act to incorporate "L'Association professionnelle catholique des voyageurs de commerce du Canada" creates a general corporation with regional and professional sections, each having civil personality, to succeed L'Association catholique des voyageurs de commerce du Canada which was incorporated by Dominion letters patent in 1921. The new corporation is to have perpetual succession and the powers, rights and privileges pertaining to ordinary civil corporations. In addition to working towards better living conditions for commercial travellers, insurance agents and those following a similar occupation, the corporation is to try to secure moral and cultural training for its members.

Members of the general corporation who follow the same occupation may form, with the consent of the corporation, "professional syndicates" of that occupation and, with the approval of the Lieutenant-Governor in Council, be constituted corporations. Such a syndicate may, by a majority vote of its members, discontinue its affiliation with the general corporation and, after certain formalities, be deemed to be a professional syndicate within the meaning of, and subject to, the Professional Syndicates Act.

Unemployment Relief

An amendment in the Montreal City Charter authorizes the Electrical Commission to execute, without calling for tenders, works which are carried out with funds provided for unemployment relief and which have been approved by the Minister of Labour.

Housing

By an amendment in the Workmen's Dwelling Act, which is to be deemed to have been in effect since December 1, 1935, the municipal corporations, which were to reimburse in advance the Government for the loans contracted under the Act, may contract loans for not more than 30 years for that purpose. The by-laws concerning such loans are subject to the approval of the Quebec Municipal Commission and of the Minister of Municipal Affairs, Trade and Commerce.

Resolutions

A resolution was adopted asking the provincial Department of Health to take steps to amend the Public Assistance Act so that people in municipalities unable to contribute under the present system would receive medical care.

In a motion authorizing the Government to pay a subsidy to the Compagnie de Navigation Charlevoix-Saguenay, Limitée, it was stipulated that the company must "establish and maintain fair labour conditions and pay wages in conformity with those established by the competent provincial organizations, under the supervision of the Minister of Colonization."

A resolution censuring the Government for not putting in effect the Act providing for mothers' allowances was defeated by a vote of 61 to 14.

Saskatchewan

Of special interest to labour were two Acts of the Saskatchewan Legislature which opened on January 20 and closed on March 23, 1938. In addition to these new statutes, the Freedom of Trade Union Association Act and the Mutual Medical and Hospital Benefit Associations Act, amendments were made in the laws regarding industrial standards, the payment of wages, steam boilers, vocational education and unemployment relief.

Freedom of Association

The Freedom of Trade Union Association Act, like the Nova Scotia Trade Union Act, 1937, and the Alberta Freedom of Association Act, 1937, was based on the draft Bill of the Trades and Labour Congress. As indicated above, the Alberta Act has been revised and incorporated in the Industrial Conciliation and Arbitration Act, 1938

The Saskatchewan statute, like the 1937 Act in Alberta, defines a trade union as any association or organization of employees, whether employed by one employer or more than one employer, which is formed for the purpose of advancing in a lawful manner the interests of such employees in respect of the terms and conditions of their employment and which is free from undue influence, domination, restraint or interference by employers or association of employers. It is declared lawful for employees to form themselves into a trade uniion, to bargain collectively with their employer or employers and for members of a trade union to conduct such bargaining through the duly chosen officers of their union. As introduced in the Legislature, the Bill stipulated that such officers must be "resident in Canada." These three words were struck out by the Legislature.

The Act also declares it unlawful for an employer to insert any clause in any written contract of employment or to impose any condition in any verbal contract, or to continue any clause or condition in effect, which seeks to restrain any employee from exercising his rights under the Act. Such a clause or condition is to be of no effect.

The Act further provides that any person who by intimidation, by threat of loss of position or employment, by causing actual loss of position or employment or by any other threat, seeks to compel any person to join or refrain from joining a trade union, shall be guilty of an offence and liable, in the case of a natural person, to a fine of not less than $25 or more than $100 and, in default of payment, to imprisonment for a term not exceeding 30 days, and in the case of a corporation, to a fine of not less than $100 or more than $1,000. This section is not to prevent a trade union from maintaining an existing agreement or entering into a new agreement with an employer or organization of employers whereby all employees concerned are required to be members of a specified trade union. Neither does the Act interfere with the right of an employer to suspend or discharge employees for proper and sufficient cause.

Trade unions are required to file with the Minister of Municipal Affairs a copy of their constitution, rules and by-laws or other instruments or documents containing a full and complete statement of their objects and purposes with any amendments and before January 31 of each year furnish a list of the names and addresses of their officers and the number of their members.

Industrial Standards Act

The Industrial Standards Act was amended to require that before a schedule of wages and hours could be made binding by the Lieutenant-Governor in Council, it must be agreed to by "a majority of the employees affected and by employers representing a major part of the volume of business in the industry affected." Formerly, as under the Industrial Standards Acts of Alberta, Ontario and Nova Scotia, a schedule could be legalized if it was agreed to by "a proper and sufficient representation of employers and employees."

A new section authorizes a conference of representatives of employers and employees to fix the minimum charge which may be paid, accepted or contracted for with respect to the labour content of any service, work, operation or art and, with the approval of the Commissioner of Labour, fix the minimum charge which an employer or employee may contract for or accept for any service, work, operation or art.

The section providing that no schedule should be effective until 10 days after publication of the Order in Council approving it in the Saskatchewan *Gazette* has been replaced by one stipulating that the Order in Council and schedule must be published in the *Gazette* and unless otherwise provided in the order they shall become effective on the tenth day after the date of publication. This is similar to a change made in the Ontario Act in 1937.

The wording was changed in the section providing for the payment of wages due under the Act so that it is now expressly provided that if on a prosecution for contravention of any provision of a schedule, the magistrate finds any wages unpaid, he must order the full amount due to be paid to the employees.

Payment of Wages

The Workmen's Wage Act which requires employers in the construction industry or in factories or shops to pay wages in cash or by cheque and which prohibits payment in goods was amended to declare that the Act shall not apply to municipal corporations.

Steam Boilers

Amendments in the Steam Boilers Act, which came into force on May 1, require candidates for engineers' certificates to have had longer experience and, in some cases, experience with steam plants of higher capacity. Provision is made for recognizing a university degree in engineering as equivalent to some practical experience.

A candidate for a first-class certificate must be the holder of a second-class certificate and have had, since its receipt, three years' experience, instead of 12 months' as before, in charge of a high pressure steam plant of not less than 300 h.p., or have acted as assistant in the operation of a steam plant of 500 h.p. or, for at least five years, have been in charge of a steam plant of not less than 300 h.p. or have served three years in a boiler shop and, for another two years, either been in charge of a 300 h.p. plant or acted as assistant in a 500 h.p. plant, or he must be a university graduate in engineering, the holder of a second-class certificate, and have had, since its receipt, two years' experience in charge of a 300 h.p. plant or acted as assistant in the operation of a 500 h.p. plant.

A candidate for a second-class certificate must have a third-class certificate and have had, since its receipt, eighteen months' experience in charge of a 200 h.p. plant or acted as an assistant in a 300 h.p. plant or he must have been in charge of a steam plant of not less than 100 h.p. for at least four years or have worked for three years in a workshop at the manufacture or repair of high pressure steam plants and have had a further twelve

months' experience in charge of a 200 h.p. plant or acted as assistant in operating a 300 h.p. plant. A university graduate with a third-class certificate is also required to have twelve months' experience in charge of a 200 h.p. plant or as assistant in operating a plant of 300 h.p. before he can qualify as a candidate for a second-class certificate.

For a third-class certificate, a candidate must hold one for the fourth-class and have had one year's experience in charge of a plant of 75 h.p. or as assistant in operating a 100 h.p. plant, or he must have had charge of a 50 h.p. plant for two years or have served for that length of time in a workshop and for a further year been either in charge of a 50 h.p. plant or assisted in the operation of a plant of 100 h.p. or he must be a graduate in engineering and the holder of a fourth-class certificate with six months' subsequent experience in charge of a 75 h.p. plant or as assistant with a plant of 100 h.p.

A fourth-class certificate may be granted after examination to a candidate who has, for a year, fired a boiler of not less than 25 h.p. or who holds a final traction certificate and has fired a boiler of 25 h.p. for at least six months or has worked in a workshop for two years and for six months has fired a boiler of 25 h.p. or who holds a fireman's permanent certificate and, since its receipt, has fired a low pressure heating boiler exceeding 40 h.p. or who is a graduate in engineering and has acted for three months as assistant in operating a steam plant of not less than 100 h.p.

The Minister is empowered to adopt, with or without changes, the Canadian Interprovincial Regulations for the Construction and Inspection of Boilers and Machinery as regulations under the Steam Boilers Act.

Vocational Education

The School Grants and Secondary Education Acts were both amended to provide, subject to regulations of the Department of Education, for a grant to cover 40 per cent of the cost of equipment installed after July 1, 1938, for the instruction of pupils above Grade VIII in agriculture, home economics, commercial work, shop work or motor mechanics or any other subject of a practical nature approved by the Minister. The grant must not, however, exceed $300 a year or $500 in districts where six or more teachers are employed exclusively in the instruction of pupils above Grade VIII.

Unemployment Relief

The Relief Continuance Act, 1938, continues in force until March 31, 1939, the Relief Act, 1935, which enabled the Lieutenant-Governor in Council to make agreements with the Dominion Government and with municipalities for the purpose of providing relief within the province.

Under an amendment in the Direct Relief Act, 1936, where moneys are expended by a municipality in connection with the relief of an indigent resident of another municipality and the amount is paid by the last-named municipality, it may be recovered from the resident in the same manner as municipal taxes under the appropriate Act, provided that, where the payment is made after the registration of a mortgage and the mortgaged land is foreclosed or sold under the mortgage, the municipality shall not have power to seize and sell goods or chattels found on such land, unless they are the property of the person on whose behalf the payment was made. This amendment clarifies the former provision and adds the stipulation as to mortgaged property.

Theatres and Cinematographs

The section of the Theatres and Cinematographs Act, 1931, enabling the Lieutenant-Governor in Council to make regulations was re-worded to provide that for the purpose of carrying out the Act and supplying any deficiency in it, the Lieutenant-Governor in Council may make regulations not inconsistent with the spirit of the Act which shall have the same force as if part of the Act.

Medical and Hospital Benefit Associations

The Mutual Medical and Hospital Benefit Association Act, which is to come into effect on May 1, 1938, provides that any ten or more adults may present a petition to the Chairman of the provincial Health Services Board, who is to be the registrar under this Act, for the incorporation of a Mutual Benefit Association to promote a scheme of medical or hospital service or both for its members and their dependants. If a petition contains the information stipulated in the Act and if the registrar finds it in order, he may issue a certificate making the association under its registered name a body corporate.

Such an association may make agreements, subject to the approval of the Health Services Board, with one or more duly qualified medical practitioners, dentists, nurses and hospitals, providing that in return for a specified consideration, certain services will be rendered to the members of the association and any of their dependants provided for in the agreements. The cost is to be met by assessments on the members.

The Act provides for the government of the associations by boards of directors whose election, powers and duties are set out in the Act but annual returns of assets, liabilities, receipts and expenditures are to be made to the registrar who has the right to order inspection of the affairs of any association formed under the Act and to call for documents and any information deemed necessary. The Lieutenant-Governor has power to make regulations governing associations and to prescribe the

fees to be paid to the registrar for services rendered.

Resolutions

The Legislature approved unanimously two resolutions recommending that the Dominion Government establish a system of unemployment insurance and accept full responsibility for all unemployed and unemployable ex-service men. A motion opposing any form of assisted agricultural immigration into Saskatchewan until such time as resident agriculturists enjoy reasonable economic security was defeated by a vote of 39 to seven.

Industrial Home-Work Law Administration in U.S.A.

Reference was made in the Labour Gazette for November, 1937, (page 1205) to the situation as regards industrial home-work regulation in the United States and Canada. In the first number of *Labour Standard,* a recent publication of the United States Department of Labour, there is given a summary of a meeting in Washington of State industrial home-work law administrators. Progress in the enforcement of state laws was reported at this meeting. The scope of the measures taken in various states is indicated in the following extracted paragraphs:

In an effort to offset some of the abuses of the home-work system, Massachusetts has adopted regulations which require the home worker to be paid at the same rate as the factory worker and the home-work materials to be transported without cost to the home worker. A further limitation is placed on the employment of children at industrial home work by providing that no certificate will be granted to anyone under 18 years of age without hearing or special permission from the department of labour and industries. Home-workers who also are employed in the factory may work for not more than a total of 9 hours a day or 48 hours a week in both places. So far, 38 employers have secured licences to distribute industrial home-work, and certificates have been issued to 325 home-workers.

Experience under the new Massachusetts law, which, like the Illinois and Pennsylvania statutes, has gone into effect during the past year, has served to emphasize the fact that industrial home-work is a highly irregular and seasonal practice—many of the home-workers having employment for only about 2 months out of the year.

The enforcement of the Pennsylvania law to date seems to have resulted in an appreciable reduction of the home-work practice. A special inspection drive is being made to find out whether the employers and home-workers who have not secured the necessary licences and certificates required by the new statute are continuing the practice in violation of the law.

Both Massachusetts and Pennsylvania, whose laws are similar, report that one effect of the new legislation may be to reduce the number of contractors in the home-work system—an indirect method of distributing home-work materials that has served to complicate an already complex problem and to add materially to the difficulties of enforcement.

The Illinois law, while prohibiting industrial home work in certain specified industries, depends for its effectiveness upon a graduated employer's fee and upon certain regulatory features that apply to the premises in which home-work is carried on. In this State the law, which has been enforced for a brief time only, is operating to uncover an abundance of home-work heretofore unknown. In Chicago alone 75 companies have been found giving out work to approximately 2,000 individuals. Some of this work has come to Illinois from States having more rigid control of the home-work practice. There the operations—artificial flower making, baseball sewing, carding bobby pins, hand embroidery on silk and cotton dresses, monograming shirts, linens and lingerie, needle-point, quilting, clocking hosiery, knitting, and tag stringing—and the industries represented—neckwear, punch boards, and greeting cards—include many of those long familiar in the annals of industrial home-work.

During the past year, Connecticut has changed its law to provide a $25 licence fee for employers giving out industrial home-work, and the State now reports only 123 home-workers who hold certificates to engage in the practice. It is estimated that prior to the enactment of the home-work law, there were 7,000 industrial home-workers in the State. The influx of industrial home-work from other States now constitutes the State's outstanding difficulty in the enforcement of its law.

A Bill looking toward the control of industrial home-work is pending in the New Jersey Legislature, and in the meantime the department of labour reports that it is proceeding to exercise its full authority under the old home-work law in an effort to control the practice. Much of New Jersey's home-work comes from New York and Pennsylvania.

REGULATIONS UNDER PROVINCIAL LEGISLATION

Apprenticeship in British Columbia—Limitation of Hours under Nova Scotia Motor Carrier Act—Amended Compensation Regulations in Nova Scotia and Ontario—Revised Quebec Minimum Wage Order, etc.

RECENT regulations in British Columbia extend the operation of the Apprenticeship Act to moulders, and make a change in the minimum wage order for women in the hotel and catering industries. In Manitoba, general regulations give authority to the Workmen's Compensation Board in connection with pensions for aged and blind persons. In Nova Scotia, hours of labour for drivers of public vehicles are limited and general rules are laid down for the operation of motor carriers. Workmen's compensation regulations in Nova Scotia have been revised and in Ontario changes have been made more particularly in relation to first-aid equipment. In Quebec, a revised minimum wage order has been made under the Fair Wage Act, 1937, applying to most workers to whom the Act applies with the exception of those in the silk textile industry who are covered by a previous order.

British Columbia Apprenticeship Act

On April 13, the trade of moulder was brought within the scope of this statute which applies to carpentry and joinery, painting and decorating, plastering, sheet-metal working, plumbing and steam-fitting, electrical work, automobile maintenance, sign and pictorial painting, ship- and boat-building, servicing and repair of current-consuming electrical appliances, jewellery manufacture and repair, machinists' work, lithographing, pattern making, boiler making, automobile painting, trimming and radiator work and the construction, maintenance and repair of aircraft.

British Columbia Female Minimum Wage Act

Order 52A of April 6, 1938, varies Order 52 applying to the hotel and catering industry (LABOUR GAZETTE, March, 1938, p. 291) in respect to hours of work of females employed in hotels at summer resorts from June 15 to September 15.

The maximum 48-hour week and 8-hour day, provided by Order 52 with exceptions only in case of emergency, is increased to 54 hours a week and 10 a day. As before, if more than 48 hours are worked in a week the rate of pay for overtime must be one and one-half times the regular rate, but the overtime rate is not to apply where the employee works more than eight hours in one day but less than 48 in the week. The provision that the working period must fall within the 12 hours immediately following commencement of work is suspended. Although there is still the stipulation for 24 consecutive hours of rest in a week, in exceptional cases another arrangement may be made if approved by the Board of Industrial Relations.

Manitoba Old Age and Blind Persons Pensions Act

Regulations under the above Act were made on April 9 authorizing the Workmen's Compensation Board, which administers the Act, to pay pensions monthly by cheque, to keep the necessary records of the receipts and expenditures under the Provincial or Dominion statute providing pensions for old or blind persons. All applications for pensions are to be investigated in accordance with the direction of the Board by the agency employed by the Board as approved by the Dominion Minister of Finance. The Board is entitled to obtain from any Department of the Government any available information which it may deem necessary, the cost of such inquiry to be borne by the Department making it.

Nova Scotia Motor Carrier Act

Regulations under this Act, approved by Order in Council on April 20, limit for the first time in Nova Scotia the hours of labour of drivers of public vehicles carrying passengers or passengers and freight for gain. Taxis carrying seven passengers or less and regularly operating in a city, town or village and making a trip outside such boundaries are exempt.

No driver may be allowed or required to drive or to ride on a public vehicle as a helper or relief driver for more than ten hours in any 24-hour period. No person after having been employed in any other capacity may drive a public service vehicle when the total number of hours of his employment as a driver or otherwise exceeds ten in 24.

Overtime may be worked on written permission from the Registrar of Motor Vehicles when a written application has been made in advance and the Registrar is satisfied that such overtime is justifiable. Employers are required to keep a record of the hours of

employment of all drivers and the vehicle or vehicles driven by each during such hours.

Other regulations relate to the medical examination of drivers, insurance and safety measures.

Nova Scotia Workmen's Compensation Act

Revised regulations have been issued by the Nova Scotia Workmen's Compensation Board. Regulation 8 fixing penalties for contravention of various sections of the Act or regulations, was approved by Order in Council and became effective on April 6. Other regulations, as revised, went into force on December 23.

The regulations provide, as before, for classification of the industries within the scope of Part I of the Act in nine classes and exclude from Part I every establishment in industries within the scope of the Act which employs less than five workmen except when two or more establishments are carried on by the same employer or partly by the employer and partly by one or more contractors.

The following industries are among those excluded from Part I: business of a florist or seed man; horticulture; keeping of livestock, poultry, or bees; fruit growing and the packing and storage of fruits or vegetables; barber shops and shoe-shine establishments; undertaking; education, hospital, medical and veterinary work and dentistry; hotels and restaurant-keeping; taxidermy; the business of an architect and of a photographer; trimming of hats; operation of elevators in an industry not otherwise within Part I; hand laundries; work upon golf courses, tennis grounds or grounds used for other sports; manufacture of ice-cream, of other foods or beverages for picnics, fairs or any other special occasion, by a person not otherwise engaged in or carrying on such operations as a business or by a person carrying on a retail or wholesale business; the operation of portable threshing or sawing machines and the cutting and selling of Christmas trees; automobile service stations and agencies which are operated for the purpose of selling gas, oil, motor vehicles and repair parts and for washing and polishing cars and which are not carried on by an employer who is assessed for the operation of a garage, aerial transportation and all work incidental thereto; marine wrecking, salvaging and all work incidental to these operations unless carried on by an employer who is assessed with respect to other operations; public entertainment in theatres, etc., when provided by transient companies, and incidental work and industries carried on in immediate connection with and for the purpose of a wholesale or retail business. Any industry which, if conducted by an employer carrying on no other industry, would not be within the scope of Part I is excluded when carried on by any other employer. Work in a warehouse or in the preparation or blending of coffee, molasses or other substances and like operations when carried on by an employer exclusively for the purpose of a wholesale or retail business is outside Part I.

Any establishment which is not included within the scope of Part I merely because less than five workmen are employed may, on the application in writing of an employer or of a workman, be brought within its scope by a notice to the employer of an assessment with respect to such industry. Salaries of officers of companies in excess of $250 a month are excluded for the purpose of computing the amount of the payroll of any industry. The minimum assessment of any employer resident in Nova Scotia is $2, of any non-resident employer, $5. A copy of the Act, regulations and any notices furnished by the Board must be posted up in a conspicuous place.

Regulations as to first-aid equipment are similar to those laid down under the Ontario Workmen's Compensation Act, as indicated below.

Ontario Workmen's Compensation Act

Regulation 103, effective March 26, 1938, amends regulation 51 to make the penalty, to which an employer is liable for failure to pay the required assessment, 5 per cent of the amount in default one month after notice has been mailed to him and an additional 8 per cent per annum for any subsequent period. Formerly, 5 per cent was added to the assessment at the end of the first month after notice and 1 per cent for each additional month or fraction of a month.

Regulation 104 rescinds Regulation 88 and raises the minimum standards of first-aid equipment for employers in small establishments. Formerly, those who employed not more than 15 workmen were required to provide "a first-aid kit suitable to the employment carried on," but where more than 15 and less than 300 were employed, the first-aid equipment required was specified in the regulation. The new order stipulates the minimum equipment for employers of less than 15 workers. The first-aid box must be large enough to allow the contents to be in plain view and easily accessible. Where the number usually employed is less than 50, a suitable person must be in charge of the equipment; if 50 or more are employed, it is to be in charge of "a clerk, workman, nurse or other person who has taken a recognized course in First Aid to the Injured." Formerly,

this was only required where 300 or more workmen were employed. The same minimum kit is required for railway trains in transit and for vessels.

As before, where more than 15 are usually employed, a notice must be posted warning of any danger. Where non-English speaking workmen are employed, the notice must be printed in their different languages.

Quebec Fair Wage Act

A revised Order No. 4 of the Quebec Fair Wage Board was approved by the Lieutenant-Governor in Council on April 27 and gazetted on April 30. It is to be in effect from May 15 to March 31, 1939, unless revoked. In the LABOUR GAZETTE, January, 1938, a summary was published of Wage Order No. 4, gazetted on December 31, 1937. This Order was later withdrawn and the revised Order takes its place and also the place of Orders 1 to 3 which were noted in the LABOUR GAZETTE, November, 1937, in so far as the latter conflict with Order No. 4. Orders 1 to 3, therefore, which continued in effect the orders of the former Women's Minimum Wage Commission, apply now to women employed in industrial establishments and in retail and wholesale stores in rural districts and to men when performing the same duties in such places.

Revised Order No. 4 does not apply to rural districts but in cities and towns applies to wage-earners who are not within the scope of a collective agreement, registered under the Professional Syndicates Act or made binding under the Collective Labour Agreements Act with certain exceptions. It does not apply to farm workers and domestic servants, men who are covered by the Forest Operations Act, wage-earners under Order No. 5 applying to the silk textile industry (LABOUR GAZETTE, March, 1938), members of the clergy or religious orders, teachers or others in religious or charitable institutions, or workers in hospitals (except domestics), young persons working in industrial or commercial establishments in order to learn a trade or profession and who receive financial assistance under a federal or provincial law, casual workers in forest fire prevention work or in municipal work such as the removal of snow, employees of municipalities other than cities or towns and, finally, those employed in co-operative savings banks, commonly called Desjardins savings banks. Neither are the minimum wages fixed by the Order compulsory in the case of students working in the office of lawyers or notaries as clerks while they are pursuing their studies or for any other students or apprentices for whom the Board by by-law may specify other conditions of work, or in the case of students in accounting, providing that the latter are paid at least $30 a month. Future orders of the Board may apply to workers now within the scope of Order No. 4.

The Order limits hours of labour per week to 55, the same number established by the Industrial and Commercial Establishments Act, for women and young persons under 18 years of age, and to 72 a week for men. The minimum wage rates are however, based on a week of 48 hours, 54 hours and 60 hours as the case may be, and special rates are required to be paid for overtime. Wage-rates in effect on January 1, 1938, in any kind of work, if higher than the minima established by the Order, may not be reduced nor may the wages of persons employed to replace such persons be lower than that paid on January 1 except in the case of persons engaged after that date who receive at least $200 a month. Overtime rates for persons who received such higher rates on January 1 are to be an additional amount equal not to one-half the actual wage but one-half the highest rates fixed by the Order for that class of work. After the Order has been in effect for two months, the Board may, by by-law, make exceptions to the rule as to actual wages higher than the legal minima for certain occupations and, by resolution, approved by the Minister of Labour, it may authorize reasonable reductions in such exceptional cases as sickness, accident to the property or special conditions affecting industry but in no case may they be lower than the rates fixed by the Order.

For the purpose of the Order, the Province is divided into four zones: Zone 1, the Island of Montreal and cities or towns within a radius of five miles from the Island; Zone 2, Quebec City and municipalities with a population of 10,000 or more; Zone 3, cities or towns with a population from 2,000 to 10,000, and Zone 4, all other cities and towns. The Order does not apply to rural districts.

Wage-earners are grouped in six categories, employees in (1) industrial and commercial establishments, (2) offices, (3) transportation, delivery and express service, (4) hotels, (5) miscellaneous occupations, and (6) persons whose salaries or wages are higher than the minimum fixed by the Order. In the first category, workers are divided into three classes: Class A, which must include not less than 60 per cent; B, which may include not more than 25 per cent, and C, which may include not more than 15 per cent of the total number of employees of the same employer.

In Category I, the term "industrial establishment" means any undertaking of produc-

tion, construction, transforming or repairing "requiring to a certain degree, with or without machinery, manual work, and includes any workshop, factory, mill, lumber camp, blacksmith shop, quarry, mining or forestry operation, unless expressly excepted." The term "commercial establishment" means any sales undertaking, exchange or rental of effects or public services for remuneration and includes any store, show-room, warehouse, yard, market, hotel, boarding-house, tavern, bar, cabaret, garage, gasoline station, peddling, delivery, public hall, theatre, amusement hall, playgrounds, transportation by land and water, electrical works, telegraph, telephone, radio installation and broadcasting, and any place used for commercial transactions or any business undertaking.

Hours of Work

The maximum hours that may be worked in a week by females and boys under 18 is 55, except with a permit under the Industrial and Commercial Establishments Act or in case of *force majeure,* and 72 by men.

The Order states that every employee is entitled to a 24-hour rest each week, but where work is not prohibited on Sunday, two rest periods of 18 hours each may be agreed upon or not more than four days may be taken at a time to make up for four weeks of seven days' work each.

The minimum rates are based on a 48-hour week except where otherwise specified where they apply to 54 hours or 60 hours as indicated. They apply to a working week of 54 hours where specified below and to retail commercial establishments and meat-shops. They apply to a 60-hour week where specified and in sawmills and foundries in Zones III and IV, bakeries, undertaking establishments and in some seasonal industries unless indicated otherwise.

Any time spent at the disposal of the employer must be paid for. No employee may be paid for less than three hours in a day and work for less than 30 hours a week or for not more than three hours in a day must be paid for at 15 per cent above the normal minimum. Where there are classes of workers to whom different rates apply, the minimum of Class A must be taken for the purpose of calculating the extra amount payable for part-time work. Exceptions to the punitive rate for less than 30 hours are made in the case of special regulations that may be issued by the Board, in the case of *force majeure,* in the miscellaneous occupations in Category V and in cases where the salary actually received by an employee on January 1, 1938, is made the minimum by the Order and is at least 15 per cent higher than the minimum rates specified in the Order.

Overtime after the specified 48, 54 or 60 hours in a week, as the case may be, or after 10 hours in one day where the weekly hours do not exceed the specified number, or after 12 hours' work in a day in any case, must be paid for at the rate of one and one-half times the fixed minimum hourly rate except when otherwise provided. The overtime rate, however, is not required to be paid to maintenance men until one extra hour has been worked, or when the employee receives a weekly wage of at least $30 in Zone I, $25 in Zones II and III, and $20 in Zone IV. Neither is overtime payable when the employee is paid by the week or month and receives at least the rates specified in the Order increased by 15 per cent and is given two weeks' holidays with pay in a year and sick leave with pay up to four weeks in a year or other advantages considered by the Board to compensate for lack of overtime rates. In such cases, however, hours may not be longer by more than 10 per cent of the hours fixed in the Order and the Board retains power to cancel this exemption as to overtime. The overtime rule does not apply when sufficient holidays are granted so that overtime hours are replaced by one and a half the time in holidays or if overtime has been necessary through the employee's fault or in commercial establishments where there are not more than two employees and hours per week do not exceed 60. Persons whose attendance at a job is required but whose work is intermittent are not required to be paid overtime rates if the monthly wage is $75 or more, nor are cooks, etc., in mining or construction camps or telephone operators in small places.

Rates per hour in cents

Zone I: Class	A 26	B 22	C 17
Zone II: Class	A 24	B 20	C 15
Zone III: Class	A 22	B 18	C 13
Zone IV: Class	A 20	B 16	C 12

Rates per week, month or year

Class B	9 60	42 00	500 00
Class C	7 25	31 00	375 00

MINIMUM RATES

For Category I, the minimum rates are set out in the accompanying table.

For certain seasonal industries in this category, special minimum rates are fixed: in the fruit and vegetable canning industry in all zones from June 15 to October 15, 14c. an hour; in the maple sugar industry in all zones from April 1 to June 15, 15c. and in the handling and stemming of Canadian tobacco in Zones III and IV from June 15 to October 15, 14c. to one-half the workers and 15c. to the other half.

In telephone service, operators in charge of standard switchboards under the control of the employer must be paid the regular rates for Category I as set out above. Operators not working under the direct control of an employer and who are on duty night and day but work intermittently must be paid, for a switchboard of 500 or more lines, $10 a week in Zones I and II and $8 in the other zones; for a switchboard of 100 or more lines, $6 a week in all zones and for a switchboard with fewer lines, not less than 30 per cent of the total subscriptions on the lines and the price of the calls made. Other employees in telephone service fall within the regular rates of Category I or Category II for office employees or Category III for delivery work or Category IV for messengers according to the nature of their work.

Category II, Office Employees, includes all persons in office work in industrial and commercial establishments as well as in other financial establishments such as banks and trust, brokerage and insurance companies, garages, collection agencies or offices of any professional practitioner. Managers, accountants, cashiers, secretaries, telephone operators, newswriters, editors, stenographers and typists are within this group, but office-boys, messengers, etc., not requiring more than primary school education, may be paid as messengers in Category III.

The minimum hourly rates for Category II are: Zone I, 25, Zone II, 22½, Zone III, 20 and Zone IV, 15 cents. The minimum rates per week, month and year for those of this group who are employed in establishments with a normal 48-hour week, are: Zone I, $12, $52, $625 respectively; Zone II, $10.80, $47, $560; Zone III, $9.60, $42, $500; Zone IV, $7.25, $31 and $375.

Where the hours per week are usually 54, the minimum rates per week, month and year, respectively, are: Zone I, $13.50, $58.50, $700; Zone II, $12.25, $53, $635; Zone III, $10.80, $47, $560; Zone IV, $8, $35, and $420.

Where normal hours are 60 in a week, the following are the rates per week, month and year, respectively: Zone I, $15, $65, $780; Zone II, $13.50, $58.50, $700; Zone III, $12, $52, $625; and Zone IV, $9, $39, $470.

There is to be a 48-hour week for most workers in Category II but in industrial and commercial establishments where most of the workers are not office employees, the 48, 54 or 60-hour week may apply to the latter as to the other workers. In hotels, hospitals and transport services where a 24-hour service has to be given to the public, a 60-hour week may be agreed on but the Fair Wage Board reserves the right to declare such an agreement of no effect. If an office employee works for more than one employer in the same building, the employers are, jointly and severally, responsible for the wage to be paid unless each employer makes an agreement for certain hours of the day.

In Category III, Transportation, Delivery and Express Service, workers are grouped as chauffeurs and drivers, messengers, and garage employees. If drivers are employed by industrial and commercial establishments, they are considered as employees of such places and must be paid accordingly.

Drivers of taxis, trucks and other light vehicles for employers engaged chiefly in

transportation must be paid the following rates based on a 60-hour week: in Zone I, 25 cents an hour or $15, $65, or $780, for a week, month or year, respectively; Zone II, 20 cents an hour or $12, $52, $625; Zone III, 18 cents an hour, or $10.80, $47 or $560; Zone IV, 15 cents an hour, or $9, $39, or $470 when paid by the week, month or year, respectively.

Drivers of trucks with a capacity of 5,500 pounds or over and of buses, vehicles carrying building materials, pianos, fuel, etc., or employed by common carriers or public carriers for long distance hauling, must be paid not less than 30 cents an hour in all zones, or $18, $78 or $935 when payment is made by the week, month or year. Helpers of drivers in this group are to be paid at least 20 cents an hour or $12 a week, $52 a month or $625 a year.

No driver of a motor vehicle may be required to be at the wheel for more than 12 consecutive hours without a rest period, not including time taken for meals, except in case of "unusually serious circumstances" such as giving aid to some one, or sickness, accident, fire or *force majeure*. Additional hours must be paid for at the rate of $2 an hour or fraction of an hour and the payment of this rate does not exempt the employer from liability for violating the Order.

Messengers, boys delivering goods, circulars, or messages of any kind, on foot or bicycle, and helpers on vehicles delivering light articles must be paid at least 10 cents an hour in any zone. The following are the minimum weekly, monthly and yearly rates in all zones for a 48, 54 and 60-hour week according to the establishment in which they are employed: for a 48-hour week in any zone, $4.80, $21 and $250; for a 54-hour week, $5.40, $24 and $280, and for a 60-hour week $6, $26 and $310. If a worker in this group is required to spend more than half his time at any other occupation in the establishment, he is to be paid as if in Category I.

"Garage employees" are divided into mechanics or repair men and men parking vehicles, selling cars, gas, oil or washing cars. The second group are to have the same rates and conditions as persons employed in retail establishments in Category I or, if they are office workers, the same as in Category II. The first group, on the basis of a 54-hour week, which may be extended to 60 hours from February 15 to June 15, must be paid: 40, 35, 30 or 25 cents an hour according to the zone. For a 54-hour week, they must be paid not less than $21.60 a week, $94 a month or $1,125 a year; in Zone II, $18.90 a week, $82 a month or $985 a year; in Zone III, $16.20 a week, $70 a month or $840 a year; in Zone IV, $13.50 a week, $58.50 a month or $700 a year. For a 60-hour week, the weekly, monthly and yearly minimum rates are: in Zone I, $24, $104 and $1,250, respectively; in Zone II, $21, $91 and $1,095; in Zone III, $18, $78 and $935; in Zone IV, $15, $65 and $780.

Category IV includes "domestic service on land or water, in any establishment" for which board and lodging is furnished in part payment, such as work in hotels, hospitals, boarding-houses, restaurants, cafés, curb services, clubs, etc. Minimum rates apply to a 54-hour week in this class. For waiters, valets or chambermaids, bar-tenders, elevator operators, the rates per hour, week, month and year are: in Zone I, 20 cents, $10.80, $47, $560; in Zone II, 16 cents, $8.75, $38, $455; in Zone III, 13 cents, $7, $30.50, $365; in Zone IV, 10 cents, $5.40, $24 and $280. Cooks must be paid at higher rates: in Zone I, 30 cents, $16.20, $70, $840; in Zone II, 25 cents, $13.50, $58.50, $700; in Zone III, 15 cents, $8, $35, $420; in Zone IV, 12 cents, $6.50, $28 and $340. For kitchen help and assistants, the minimum hourly rates in the four zones are 25, 20, 14 and 12 cents; weekly rates $13.50, $10.80, $7.50 and $6.50; monthly rates $58.50, $47, $32.50 and $28 and annual rates $700, $560, $390 and $340.

There are certain exceptions to these rates. Hotels and boarding-houses in Zones III and IV which have from 50 to 100 rooms to rent must pay the rates for Zone II. In Zone IV, where there are less than five rooms to rent and where meals are served, an agreement may be made for a minimum wage of $10 a month with room and board, or $15 a month with board only. In industrial and commercial establishments which serve meals or drinks, the persons employed in this work are to have the same wages and hours as workers in Category I. Bell-hops, porters and messengers in this category have a minimum rate of 10 cents, $5.40 a week, $24 a month or $280 a year in all zones. In taverns, under the Quebec Liquor Act, whether operated in connection with any other establishment or not, waiters must be paid at least 25 cents an hour, $13.50 a week, $58.50 a month or $700 a year.

Category V covering Miscellaneous Occupations, deals with teachers, public corporations, watchmen and wage-earners in occupations not otherwise classified. The minimum salary for teachers employed by a school commission in any zone is $400 a year; if free lodging is provided, $300. Professors, teachers or tutors employed by other corporations or employers to teach one or more groups of at least five pupils must be paid at least $12 a week in Zones I and II and $10 a week in the other zones.

Persons employed by municipal corporations or school boards regularly in office-work and whose time is controlled by the employer fall in Category II. Persons employed by such

bodies but working generally at home, not under the control of the employer, are to be paid according to the size of the municipality. The minimum weekly, monthly and yearly rates for employees of municipal corporations vary from $2, $8.50 and $100 respectively in municipalities of less than 1,500 persons to $11.50, $50 and $600 in cities of 10,000 or more. For persons working under the same conditions for school boards, the minimum rates are one-half the rates for the latter.

Workers in churches employed usually for eight hours a day have a minimum of $75, $60 or $50 a month in Zones I and II, Zone III and Zone IV respectively. If such persons can spend half the day at other occupations, they may be paid not less than $40, $35, or $30.

The Order does not affect, for the current fiscal year of the employers, persons employed by public corporations or commissions in this Category under contracts in force at the date of the publication of the Order.

Watchmen in industrial or commercial establishments or in other buildings must be paid, for a 60-hour week, 25 cents an hour in Zones I and II, 20 cents in Zone III and 15 cents in Zone IV. The minimum weekly, monthly and yearly rates for watchmen are: in Zones I and II, $15, $65 and $780; in Zone III, $12, $52, and $625 and in Zone IV, $9, $39, and $470 respectively.

Janitors living in free, heated quarters in an apartment house and entrusted with some general supervision, rental and collection of rent must be paid $50 a month in the first two zones and $40 in the other two zones. Without living quarters, the rates are $65 and $55 a month.

Any wage-earner or labourer in any kind of work, whose wages or working conditions are not otherwise determined by an Order of the Fair Wage Board must be paid, for a 54-hour week in Zones I and II and a 60-hour week in Zones III and IV, an hourly rate of 25 cents in the first two zones, 18 cents in Zone III and 13 cents in Zone IV. The minimum weekly, monthly and yearly rates for such workers in Zones I and II are $13.50, $58.50 and $700; in Zone III, $10.80, $47 and $560 and in Zone IV, $7.80, $35 and $405, respectively. Shoe-shiners must be paid a minimum hourly rate of 10 cents in any zone. The rates per week, month and year in Zones I and II are $5.40, $24, $280 and in Zones III and IV, $6, $26 and $310.

Temporary Employees.—Temporary employees taken on for not more than two days in a week by any industrial or commercial establishment must be paid not less than 25 cents, 20 cents, 18 cents or 15 cents according to the zone. Temporary employees employed from November 1 to December 31 in commercial establishments have a minimum rate of 20 cents in Zone I, 15 cents in Zones II and III, and 12 cents in Zone IV. The latter class of employees may be paid at these rates only if they are employed for at least 30 hours in any one week and if the employers furnish the Fair Wage Board with a list of all their regular employees on November 1 and another list on January 5 indicating the extra employees who have worked at these rates. The number of working hours must also be indicated.

General Conditions.—The Order stipulates that where, according to any Order of the Board, the employees of certain establishments may be divided into classes for the purpose of determining the minimum rates that must be paid, every employer must keep a list of his employees who form respectively Classes A, B and C and a list of those who are not classified. Separate percentages must be established for men and women and the wages of each employee must be calculated over a period of four weeks if he is paid by the hour or by the week for the purpose of ensuring that the proper percentage is receiving the appropriate rate. Certain employees may not be included in those classified. These are temporary employees, members of the employer's family, workers covered by another Order of the Board, persons employed in seasonal industries, apprentices, and those in Categories II, III, IV and V.

If an employer operates two or more establishments in one zone, they are to be treated as a unit for the purpose of fixing the percentages unless the Board permits otherwise. If an employer has only one employee, the latter may be paid the minimum rate of Class C for the first six months, of Class B for the next six months and then the rate of Class A. Where there are only two employees, one must be placed in Class A, the other may be placed in Class C for the first six months and then in Class B. It is stipulated that whenever a workman is hired to replace an employee in Class B or C who was dismissed for no other valid reason in the opinion of the Board than that he had a right, or that he would soon have the right to be promoted to a higher wage-class, the new employee must be paid at the rate of the class which should have applied to the dismissed employee. Wherever there is a dispute as to the right of an employee in Category I to be promoted to a higher class or to be retained in his class, the Fair Wage Board may, at the request of the employee, act as arbitrator in the matter.

When an employee spends part of his working time at an occupation in one category and the rest of his time at work in another category, his wage is to be that of

the category having the higher rate, unless he works much longer hours in the category with the lower rate.

Wages of all employees must be paid in currency in a sealed envelope on which is written the name, date, number of hours for which payment is made, the hourly rate, the amount in the envelope and the initials of the person who makes the payment, but establishments which are not required by a previous Order to make payment in currency and which are accustomed to make payments by cheques or bank deposits to the credit of the workers, may continue this policy unless the Board orders otherwise.

When any employer furnishes lodging and board or meals only to an employee, the maximum amounts that may be deducted from the wages are fixed as follows: for one meal in Zone I, 20 cents, in Zone II and III, 15 cents, Zone IV, 12 cents; for meals per week in the zones as indicated, $4, $3 and $2.50; for a room per day, 25 cents, 20 cents and 15 cents; for a room per week, $1.50, $1.25 and $1.00; for room and meals per week, $5, $4, $3.50 and for board and room per month $20, $17 and $14, but for persons employed in mining and construction camps, the maximum deductions that may be made for meals, subject to revision by the Board in exceptional circumstances, are 30 cents per meal or $6 a week for meals, 25 cents for room a day or $1 a week; $7 for board and lodging a week or $28 a month. In seasonal industries as defined in the Order, the amounts that may be deducted are those fixed for Zone IV.

Work may be paid for by the time, piece, job or a fixed rate plus a commission, bonus or share in profits or prices but in every case, the employees must receive for each weekly, monthly or yearly period at least the minimum fixed by the Order, but the Order does not apply to salesmen, agents or employees paid by commission or shares who do not work in the establishment and whose hours of work cannot be controlled by the employer.

As regards home work, when the employer in an industrial or commercial establishment gives out work to be done by the hour in the employee's home, the minimum rate fixed by the Order must apply with a reduction of not more than 10 per cent. If work at home is done by the piece, job or in any other manner, it must be paid for at the same rate as in the factory less 10 per cent. The same rules apply to work done at home by office employees whose work falls in Category II.

Drivers of automobiles or horse-drawn vehicles in Category III on trips obliging them to eat and sleep away from home must have board paid by the employer. This rule does not apply on a trip of not more than 12 hours when only the mid-day meal has to be taken away from home. The amount to be paid by the employer for this purpose is to be the actual amount spent but is not to exceed $1.50 a day.

The Order stipulates that tips of any sort are the exclusive property of the employee and are not to be considered part of the wage. When uniforms are required by the employer they must be furnished and laundered at his expense. In the case of uniforms made to measure, the employer may sell them to his employees at cost not exceeding $3.50 for women and $6 for men. If laundering or cleaning is left to the employee, the wage must be increased by one cent an hour.

All agreements between the employer and employee for permitting easier working conditions, such as providing a chair, etc., and the consequent reduction of the wage fixed by the Board are illegal and void. No deduction may be made by the employer for wages except when the Board authorizes certain specified deductions, when the wages are garnisheed, when the employer has made part payment in advance or made advances in case of sickness and pressing needs or in case of insurance premiums, contributions to a pension fund, the employee's share for the price of fuel or food bought by the employer for the purpose of giving to his employees the benefit of lower prices; fees of associations of which the employee is a member and contributions to mutual benefit associations. In none of these cases, however, may a deduction be made even with the written authority of the Fair Wage Board without the written or tacit consent of the employee and the Board may at any time in the interest of the employee cancel any authority given or forbid a deduction allowed by this Order. Where, in the same establishment, there are workers governed by this Order and also workers governed by one or more collective agreements, the provisions in the collective agreement providing for the distribution of regular or extra hours of work, the observance of holidays and payment of increased wages shall be observed by the employees covered by the Fair Wage Order to the extent and on the conditions specified in any regulation which the Board may deem it advisable to make in the circumstances.

Duties of Employer.—Every employer is required to give an employee, on request, a letter stating in what capacity and for what period he was employed by him. Employers are required to keep registers giving the names and addresses of workers, the wages paid, method of payment and any

other information that the Board may require. Members of the Fair Wage Board, or any person authorized by the Board, must be allowed to inspect such registers or books and make enquiries among the workers of an establishment. Employers are required to post in a conspicuous place in the establishment copies of all resolutions and orders furnished by the Board as well as a copy of any permit or exemption granted.

Apprentices.—Unless otherwise decided by the Board, by by-law or resolution sent to the employer concerned, the latter may make an agreement with apprentices in industrial and commercial establishments or working as office employees or in hotels, hospitals, restaurants, etc., to pay a wage lower than the minimum fixed by the Order but the difference must not exceed 10 per cent of the rate fixed for the zone and, if the employees are classified, for Class C in the zone. Not more than 10 per cent of the total number of employees of any one employer in the same zone may be classed as apprentices. Employers are required to keep records of the date upon which each apprentice began work. No employee is to be considered as an apprentice if he is hired to replace an apprentice who has been dismissed, in the opinion of the Board, merely because of his status as an apprentice.

Employment Assurance Plans in U.S.A.

The National Industrial Conference Board, Inc., New York, has issued No. 7, in its series of studies in Personnel policy, under the title "Assuring Employment or Income to Wage Earners."

Twelve plans which have for their main purpose the assurance of employment or income for wage earners are covered in the study. Seven of these plans are guaranteed-employment schemes; four are annual wage plans; and one places the wage-earning group on a monthly salary basis. Four of the seven guaranteed-employment plans have been discontinued because of the enactment of state unemployment compensation legislation.

Under the employment-assurance plan, eligible workers are promised a certain number of weeks work throughout the year. If the Company cannot furnish sufficient work to complete the contract, it gives the employees their wages for the balance of the time guaranteed, regardless of the hours actually worked. Under the income-assurance plan a company promises to give the eligible worker a specified number of hours of work throughout the year. These hours, multiplied by the employee's hourly rate, represent his minimum annual wage, which is paid out in uniform weekly installments, regardless of the hours worked in any particular week.

The Conference Board study reviews the operations of certain active plans where the worker is assured an income or employment over an extended period.

The report states that plans under which employees are assured an annual income may impose added costs upon employers in periods of business depression. However, companies reported in March, 1938, that "employees' drawing accounts under the income-assurance plans were not seriously out of balance and that no changes in these plans were contemplated."

Operation of Credit Unions in United States

The quarterly statement on the operation of federal credit unions in the United States for the period ending December 31, 1937, has been issued recently. (These credit unions are operating under the Federal Credit Union Act of 1934 and provide for the chartering of Federal credit unions among persons having a common bond of occupation, or association, or to groups within a well-defined neighbourhood, community, or rural district. Federal credit unions are co-operative associations organized in accordance with the Federal Credit Union Act for the purpose of promoting thrift among its members and creating a source of credit for provident or productive purposes.)

By the end of 1937, charters had been granted to 2,500 Federal credit unions, this number representing an increase of 638, or 34 per cent over the 1,862 which had been chartered at the beginning of that year. Data on 2,103 of these credit unions are included in this report. Of the 397 chartered credit unions not covered in this report, 73 had not begun operations by the end of 1937, 99 had been, or were being, liquidated, 29 submitted incomplete reports, and reports have not been received from 196.

An analysis of the Federal credit unions chartered as of the end of December, 1937, from the standpoint of type of membership indicates that the largest number (268) had been chartered by employees of the Federal Government. On the same date, Federal credit unions organized among employees of petroleum organizations numbered 197; those among school and college teachers and employees, 178; and those among store employees, 168; These four types represented slightly less than one-third of the total number chartered through December 31, 1937.

ALL-CANADIAN CONGRESS OF LABOUR

Summary of Proceedings of Eighth Convention

THE eighth regular convention of the All-Canadian Congress of Labour, held in London, Ontario, on April 11-13, was attended by approximately 70 delegates representing twenty national and chartered local unions and five national labour councils. In the course of his address of welcome the chairman of the local National Labour Council mentioned the fact that although that body was formed only in July, 1936, there were now 23 local unions in affiliation.

Addressing the convention, Mr. A. R. Mosher, president, informed the delegates that "the labour movement as represented by the Congress is in a sounder and healthier condition now than ever before in its history, and the outlook for its future is most encouraging." However the president warned that "unemployment is again on the increase, and unless some definite action is taken by our public authorities without delay we shall find ourselves in another major depression, with all its attendant hardships and suffering for hundreds of thousands of our people." In referring to unity among the workers the president stated that all attempts to end the conflits between craft, industrial, national and foreign-controlled unions have been abortive. He urged that the membership should refrain from making provocative statements with respect to opposing labour organizations, unless attacked by them, and to concentrate their efforts upon constructive work for their own movement. Appreciation was expressed for the action of the Dominion and Provincial Governments in facilitating, by legislation and sympathetic consideration, the efforts of the workers to organize and bargain collectively with employers. President Mosher stated that the Labour Departments of all Governments are becoming increasingly important, and the conciliation services of these departments are helping greatly to maintain industrial peace. It was the president's opinion that the cause of the failure of our present system to distribute goods and services was not receiving the consideration which it would seem to justify. In referring to the subject of "National Unity" President Mosher stated that "every true Canadian must deplore the emphasis which is being placed upon sectional interests and divisive factors."

Executive Report

In the executive board report the organizing activities of the Congress were reviewed, and it was indicated that over forty new charters had been issued to local unions during the past year. The first step to ascertain the general economic situation in Canada, as suggested in the report of the board, was to have a thorough survey of the natural resources of Canada, its physical equipment, in factories, railways, etc., and its manpower, (in order to find out what standard of living the Canadian people have a right to expect, and what means ought to be adopted to make available to every Canadian the goods and services which are required to maintain the highest possible standard of living. Political action by the workers was foreshadowed "if existing political parties cannot be induced to bring about such changes in the economic system as will meet the needs of the people."

Amendment to B.N.A. Act.—The report called upon the affiliated membership of the Congress to endeavour to arouse public opinion and in other ways impress upon the provincial governments the desirability of co-operating with the Federal parliament in having adopted the necessary amendments to the British North America Act, so that social legislation may be enacted. An amendment to Section 501 of the Criminal Code was requested which would provide penalties for picketing of any establishment except where a strike was in progress.

Opposition to Railway Amalgamation.—The report called for confirmation of the policy of opposition to all railway amalgamation and allied schemes, and urged the Dominion Government to take whatever action is necessary to defend the publicly-owned system against unfair criticism, and to expose the sources of the propaganda which is now being spread among the public.

It was pointed out that the organization by the Canadian Brotherhood of Railway Employees of the motor transport employees and the securing of agreements covering wages and conditions in the province of Ontario has helped the railway situation to some extent. Attention was drawn to the lack of uniformity in the legislation passed in five provinces of the Dominion with respect to the right to organize and the desirability of giving the Federal Government authority to pass a uniform measure and accept the responsibility for its enforcement.

The executive were in favour of shorter hours and holidays with pay, lowering of the age to 65 for recipients of old age pensions and the removal of any constitutional barriers which stand in the way of the Federal Government enacting legislation establishing a system of state medicine and health insurance.

57200—4½

The report called for a national housing program to be associated with a widespread program of public works. That the best interest of Canada and the world would be served by giving the strongest possible support to the activities of the League of Nations was the opinion expressed by the executive.

Other Reports, Etc.

The report of the secretary-treasurer showed total receipts, including balance brought forward, of $7,678.55, expenditures amounted to $7,286.17, leaving a balance on hand of $392.38.

The report of the editor and manager of the *Canadian Unionist*, official organ of the Congress, showed that the publication had a very successful year.

Mr. Fred Knowles, general secretary of the Amalgamated Civil Servants of Canada, and fraternal delegate to the convention, in addressing the delegates spoke on organization within the civil service of Canada and the problems with which they had to deal. He expressed the opinion that all civil service organizations should be united and that this united body should be affiliated with some labour organization, preferably the All-Canadian Congress of Labour.

Constitutional Changes

Certain articles of the constitution were amended so as to provide for (1) the chartering by the Congress of local units of unaffiliated national unions; (2) the payment of two cents per month by each member of such local units; (3) a representation from these units at Congress conventions of one delegate each; and (4) local unions having 200 or more members to be entitled to two delegates each.

Resolutions

The recommendations contained in some of the adopted resolutions were as follows:

Administration of relief under Federal jurisdiction.

Exploring the possibilities of placing an experienced organizer in Western Canada.

Urging "unequivocal opposition" to any form of amalgamation of Canadian Railways or their ancillary services which would place them under private control.

Inauguration of a Federal building program for the erection of comfortable low-cost houses for the workers.

Seeking amendments to the B. N. A. Act whereby the Dominion Parliament may enact legislation giving the workers legal protection to organize and bargain collectively.

Holidays with pay for all workers.

Protesting against the imposition upon municipal and provincial governments of the cost of unemployment relief, the Congress taking the view that it is the responsability of industry to provide for the industrially unfit (unemployables), and the fit and able workers unemployed.

Favouring the presentation of a brief to the Rowell Commission.

Extending the jurisdiction of the Board of Transport Commissioners over railway and highway carriers.

Asking that the employers' reports to the Workmen's Compensation Board, covering an industrial accident, be furnished to the injured workmen concerned.

Disapproving of the practice of those permanently employed accepting outside employment to the detriment of other members.

Seeking changes in the method of issuing certificates of qualification in the motor vehicle repair trade.

Favouring an upward revision in the scale of wages of apprentices in garage service.

Urging co-operation between the Federal and Provincial Governments in order to make the necessary changes in the present economic system so as to give all ablebodied citizens the opportunity to earn a decent livelihood.

Calling upon shippers of Canada to join with railway and other workers in fighting railway amalgamation or other similar schemes.

Recommending that the qualifying age of old age pensions be reduced from seventy years to sixty years.

Urging the government to extend its system of vocational training to provide work at wages sustaining the workers' self-respect.

Favouring an investigation of the financial history of the Canadian railways under private enterprise, so that the younger generation may intelligently weigh the proposals to return the national system to the control of private enterprise.

Seeking to replace by democratic methods the present capitalist system by a planned economy, with the social purpose of production for use.

Requesting the Dominion Government to give effect to the recommendations of the Turgeon Royal Commission, and that the Congress endeavour to organize the workers in the textile industry, particularly in the province of Quebec.

Seeking legislation whereby the employment of female workers in manufacturing concerns will be confined between the hours of 7 a.m. and 6 p.m.

Reiterating that the maintenance of freedom of speech, association and organization is essential to progress in a democratic state.

Pledging support to the members of the Perth local of the Canadian Shoe Workers and Allied Crafts.

Favouring the organizing of musicians' locals in every city in Canada.

Instructing the executive board to bring to the attention of the Ontario Department of Labour the non-compliance with the provisions of the Factory Inspection Act.

Election of Officers

The officers elected were: President, A.R. Mosher, Ottawa; vice-president, Charles Beattie, Toronto; secretary-treasurer, N. S. Dowd, 230 Laurier Ave., W., Ottawa.

Executive board members: G. D. Taylor, Sault Ste. Marie; J. Lea, London; L. Guay, London, and A. L. Hepworth, Montreal.

INDUSTRIAL RELATIONSHIPS REVIEWED BY DEPUTY MINISTERS OF LABOUR

FEATURING the convention proceedings of the All-Canadian Congress of Labour (reviewed elsewhere in this issue) were addresses by Mr. W. M. Dickson, Deputy Minister of the Dominion Department of Labour, and Mr. J. F. Marsh, Deputy Minister of the Ontario Department of Labour.

Both addresses, which survey the field of industrial relationships, are summarized below:

Address of Federal Deputy Minister of Labour

After felicitating the organization and extending greetings on behalf of the Minister and the Department, Mr. W. M. Dickson, Federal Deputy Minister of Labour, expressed his appreciation of the services rendered by Mr. Norman S. Dowd, secretary of the All-Canadian Congress, as one of the technical advisers to the Government delegation at the International Labour Conference at Geneva, when he served on the committee dealing with minimum age of employment.

Referring to the functions of the International Labour Organization, Mr. Dickson stated:

"On the edge of that picturesque and historic city (Geneva), the birthplace of the Red Cross and the home of the League of Nations, stands a large building set back a little way from the main road to Lausanne. The approach to the building is through a huge iron gate. That gate is peculiar. It has a triple lock which can only be opened by the use of three keys. The keys are of gold and have been used only once, on the 6th of June, 1926. Since then the gate has remained unlocked year in and year out. The building itself is grey and quite ordinary. Yet it too has its own peculiar feature. It has not one foundation stone, but three.

"What is the significance of these triplicate keys and these triplicate foundation stones? The answer is simple.

"They symbolize the three elements which compose the body to which the building belongs for the building is the headquarters of the International Labour Organization and that organization is based on the co-operation between governments, the organized employers and the organized workers of the whole world. Each of the foundation stones was laid by a representative of these three groups when the construction of the building was commenced and each of the keys was used by a representative of one of the three groups when the premises were opened.

"Why this tripartite set up at Geneva? It was an entirely new departure in the machinery for the regulation of relations between nations. For the first time it gave to the two main factors in industry—"capital" and "labour,"—a direct voice in the framing of official international compacts and in the control of their observance. Why this innovation? For the reasons of *good faith* and *common sense*. *Good faith* because promises were made to organized workers during the World War that they should have a hand in shaping the new world "fit for heroes" which was to be created after the war: *Common sense* because, if regulation of working conditions is to be successful, it must be based on the co-operation and expert knowledge of the workers and employers who are the most directly concerned. On the other hand governments, not only as representatives of consumers but as the authorities ultimately responsible for making laws and treaties and administering them, must necessarily be a component part of the machine."

Quoting from the labour clauses in the preamble to the Treaty of Versailles (1919-20), the Federal Deputy Minister of Labour summarized their significance in the following five postulates:

1. Bad conditions of labour exist.
2. They cause misery and discontent.
3. Misery and discontent are a danger to world peace.
4. Bad conditions must be remedied.
5. It is hard for any one country to remedy them single handed.

In an analysis of each of the above, Mr. Dickson continued:

"Let us pause just for a moment to examine these postulates which, while applying to the world generally, apply with varying force to the individual countries of the world.

"The first postulate: 'Bad conditions of labour exist.' Nobody who has eyes and ears open will deny this. I admit that we always see the 'mote' which is in the other fellow's eye and fail to recognize the 'beam' which is in our own eye. It is invariably the other country in which conditions are bad. Is there a country in the world in which all its industries can claim that none of their members have employees who are not either underpaid or insufficiently safeguarded against illness or injury arising out of their occupation?

"Postulate No. 2: 'These bad conditions cause misery and discontent.' Possibly far back in history there was a time when people bore hardship with resignation as something dictated by an unkindly but unalterable Fate, but nowadays man has discarded that form of fatalism and adopted the more self-reliant doctrine that 'Fates help those who help themselves.' Ill treatment in these modern times creates resentment and resentment in the mass, as in the individual, is apt to be explosive. Wretchedness, especially when it is coupled with a sense of unfairness, inevitably breeds unrest and a desire to seek redress by violence. Thank heaven that in Canada, as in other English speaking and democratic countries, the advance in social conditions has been steady and sustained with a minimum of disruption in industry as one of the results. Our record in this regard during the past third of a century has been outstanding and it is to the everlasting credit of labour that they have chosen as their leaders men of sane, sober judgment and that they have recognized the wisdom of that leadership and been willing to be guided by it. If there is only one thought which I succeed in getting across this afternoon I shall not have spoken in vain and that thought is epitomized in the latin quotation 'Festina lente,' 'Hasten slowly.' Do not make your decisions hastily but only after deliberate consideration and do not act precipitately. Strikes and overt actions are in the main the result of impulsive and insufficiently considered action. I recognize thoroughly that it is the most powerful weapon both offensively and defensively of labour but the gravity of this form of industrial conflict needs little emphasis by me at this time. I will simply say that as in the case of war it is the most costly method of settlement of disputes even if it is successful in attaining a settlement and it is very often a matter of doubt who really does win—as a matter of fact are not all parties actually losers? Canada, however, has a most enviable record in this regard and while comparisons are odious still I think I am quite justified in making one at this juncture as it establishes the point more clearly than possibly any other method could.

"The National Labour Relations Board has informed Congress that the United States during the first ten months of 1937 had more than 4,000 strikes with 1,750,000 workers involved, and loss of over 26,000,000 work days, resulting in—at a conservative estimate—more than $100,000,000 loss in wages.

"Canada, during the same period, on a ratio of population with similar conditions and similar action by labour might have had approximately 400 strikes with 175,000 workers involved and a loss of 2,600,000 work days with a comparable loss of $10,000,000 in wages.

"What are the actual facts however? In the first ten months of 1937 Canada actually had only 249 strikes with 65,000 workers involved, a loss of 465,000 work days, and approximately $1,860,000 loss in the pay envelopes. This is nothing like as bad a picture but still it is a sufficiently serious picture to give us all reason to pause and consider carefully all its implications.

"Postulate No. 3: 'Misery and discontent are a danger to world peace.' Is it a fact that 'labour unrest' imperils the peace of the world and that 'universal peace' can be established only if it is based upon social justice? Or are these simply vague phrases put into the Peace Treaties because they sound well?

"For the average man with ordinary feelings, to keep the peace is necessary and desirable only so long as peace is worth keeping. The lust of conquest for conquest's sake has seldom led people into war save only where they were under the complete domination of a dictator. Rather in recent times as in primitive tribal days, the urge to fight comes from material causes. 'Imperial' expansion is at root 'economic' expansion, in other words a movement to secure the means of satisfying the material needs of the expanding nation. It is not without meaning therefore that the Peace Treaties in their original draft form prescribed as an essential condition of permanent peace 'the prosperity and contentment of all classes and of all nations.' We can therefore also accept this postulate that misery and discontent are a danger to world peace.

"Peace—That is a word which is very much in everyone's mind at the present time. Are we to continue to have it and enjoy its benefits or are we to be precipitated into another world cataclysm with its attendant destruction and misery. Some maintain that peace depends more upon a state of mind and spirit than upon elaborate arrangements for conciliation and arbitration or even force. These things of course have their due importance but we have seen how futile and disappointing

they can be, particularly in the past year. The only real insurance for peace is removal of the causes of disturbance and irritation. And here again I refer to the three golden keys and the three corner stones—worker, employer and government. Can any one of these three important factors of society alone accomplish the maintenance of peace and harmony in the State or does it require the united efforts of all three working in close co-operation and harmony? Rightly or wrongly we hold to the latter principle in the Federal Department of Labour and have from the inception of the Department based our policy thereon. I need only refer to the terms of the Industrial Disputes Investigation Act and to our activities under the Act. We hold that a clear understanding on the part of each of these three important factors of our social set-up, of its obligations to the other two, and a clear realization of the mutual advantages to all of a frank recognition of those obligations and a willingness to live up to them, is the surest means of maintaining harmonious and proper relations as between all three.

"It is incumbent on the employer to recognize his responsibility of seeing that his employees work under safe, wholesome and reasonably comfortable conditions and that they receive fair and adequate return for the services they render. Likewise the employee is under equal obligation to render faithful, willing and loyal service but should he consider that either the conditions under which he is obliged to work or the wages he receives in return for his labour are not fair or reasonable, it is his right to endeavour by lawful and legitimate means to correct or improve any deficiencies which he deems may exist either in management, method of production or service in the establishment. It is the responsibility of both employer and employee to so co-operate, if possible, that the wheels of industry shall run smoothly. It is the function of the Department of Labour to render such assistance as lies within our jurisdiction to foster and assist that co-operation to the fullest possible extent and it is the function of government to place on our statute books such legislation as will work for social advancement and industrial peace.

"The great problem to-day is employment—steady employment. The great nightmare of the worker to-day in insecurity of his job. Time was not so many years ago when a worker, so long as he rendered faithful service, could look for reasonable continuity of employment. That condition has definitely changed. Big business in recent years has been concerned to crowd its twelve month production into the shortest space of time possible with a view to reduction of overhead and with the result that the employee who formerly looked confidently to twelve months' employment, to-day may find only eight, six or even fewer months are available. Those who direct capital and those who direct labour must be prepared to accept their share of the responsibility for the insecurity of employment and be ready to co-operate in measures designed to spread work and correct the present uneven and irregular tempo of production. Employers are realizing this necessity and in some industries considerable progress has been made. Labour leaders on their part must, I feel, lay the emphasis in their efforts on behalf of their membership more on achieving continuity of employment. I do not mean that the importance of the hourly or daily wage is to be overlooked but there is often a tendency to over emphasize the importance of this whereas it is the aggregate yearly earning which is the all important factor. You answer, however, that the employer is in business for gain, not for the good of his employees. Admitted, but is it not in the employer's best interest to have a stable body of skilled and contented workers and is it reasonable for him to expect such if he can offer nothing better than intermittent and insecure employment? No, the answer in my opinion is in properly and intelligently organized employment. And while this is primarily the task and responsibility of the employer still I suggest it is also a responsibility of the leaders of labour to do all in their power to induce employers to undertake the task and to assist them in solving the same.

"Government, however, has its obligation in the matter and can do much. On it devolves the responsibility even to a greater extent than on the labour leaders of presiding over and even commanding the doing of this task by industry, but government cannot accomplish what society is unprepared or indisposed to do. Public opinion is, after all, the really potent factor in all reform and social progress. An educated public therefore is first necessary.

"The task is a great one, greater possibly to-day than ever in the world's history. Yes, the task is a great one, great enough to challenge the brains and determination of our greatest leaders in Industry, Labour and Government, but with the three golden keys operated in co-operation, the Iron Gates leading to better social conditions and a fuller, more abundant life, is possible."

Address of Ontario Deputy Minister of Labour

After twenty-three years of active service in the Labour movement, Mr. Marsh, Ontario Deputy Minister of Labour, stated he was convinced that the only possible way in which

the workers could be sure of getting a fair share of what they earned was by collective effort. It was the constant endeavour of the Department of Labour to do something that would better the conditions for the workers, principally by means of conferences with employers, and in the promotion of industrial relations.

In speaking of the employment service which is maintained by the department, Mr. Marsh informed the delegates that approximately 15,000 men and women per month were being placed in jobs, as a result of the activities of 28 employment offices established throughout the province. It was Mr. Marsh's opinion that 90 per cent of those unemployed wanted work rather than relief, and of the remaining 10 per cent, most are unemployable and cannot work or should not be expected to work. It was necessary to point out to employers that when workers had been unemployed for a considerable period some consideration should be given to that fact, and they should not be expected to maintain the pace of men who had been continuously employed.

With a view of eliminating conditions which were unfair not only to the workers but to employers who wished to treat their employees decently, the Industrial Standards Act had been applied to industries all over the province. The Deputy Minister stated that it was necessary to have the co-operation of the employees to make the Act workable. In some cases the workers were getting very low wages but did not complain because they were afraid of discrimination. Mr. Marsh cited a number of cases of low wages that had been brought to his attention, and as a result of such conditions the Minimum Wage Act had been revised and amended. Where the Industrial Standards Act failed to bring employer and employee together to remedy conditions by collective bargaining the Minimum Wage Act would do so. The Government did not wish to set wage rates, but it was certain that the Minimum Wage Act would increase wages in some industries.

Another important phase of the work of the Department, stated Mr. Marsh, was the maintaining of arrangements for sanitation and safety. An inspection staff was constantly engaged in checking factories and other establishments to see that safety appliances were being used and that other conditions were satisfactory.

ANNUAL CENSUS OF MANUFACTURING AND CERTAIN OTHER INDUSTRIES IN CANADA, 1936

Statistics Respecting Employees, Wages, Etc.

THE Dominion Bureau of Statistics, under the Statistics Act of 1918, takes annually by mail an industrial census covering statistics of fisheries, mines, railways, etc., and general manufacturing in Canada. Preliminary figures for all manufacturing industries for the year 1936 have been issued, and the accompanying tables give the figures in some detail.

The first table contains summary figures for all manufacturing industries for 1930 and from 1933 to 1936, numbers of establishments, capital invested, employees on salaries and wages and value of production. The figures show increases from 1935 to 1936 in all the items. The figures show a continuation of the improvement which began in most cases in 1934 following declines from 1930. The upward movement in the cost of materials which began in 1933 continued in 1936, there having been substantial increases in the prices of raw materials as well as in the amounts of raw materials used by manufacturing industries. The decrease in total wages paid each year from 1929 to 1933 would be due in part to short time operations, prevailing in nearly all industries during this period, followed by increases since 1934.

The second table shows the number of employees on salaries and on wages with salaries and wages paid as well as the number of establishments, for 1936, by provinces and by groups of industries and for each of the important industries in each group.

Statistics for 1935 appeared in the issue of the LABOUR GAZETTE for May, 1937, pp. 514-516. The issue for September, 1935, pp. 823-825, contained figures as to the numbers of wage-earners classified according to the regular hours of work per week, 40 or less, 44, etc., up to 60 and over 60. Similar information for 1934, 1935 and 1936 will be available for publication in a future issue.

The third table gives the figures as to numbers of employees and salaries and wages paid in other industries for which figures are collected annually. It will be noted that the number of employees has increased in 1936 in all industries except electric railways. The aggregate amount of salaries and wages in each industry for which this information is available has increased.

Figures from the Decennial Census of 1931, Bulletin XXXI, showing numbers of gainfully employed persons in all industries were given in the LABOUR GAZETTE, for August, 1933, pp. 819-821, also figures from Bulletin XXXIII, as to numbers of wage earners, weeks employed and average earnings, were given in the LABOUR GAZETTE, for November, 1933, pp. 1094-1095.

TABLE I.—MANUFACTURING INDUSTRIES IN CANADA, PRINCIPAL STATISTICS, 1930 AND 1933 TO 1936

Items	1930	1933	1934	1935	1936	Change per cent in 1936 over 1935

(a) Excluding Electric Light and Power, which is given separately below.
(b) Including about half of the express employees which are also shown under Express, below.
(c) Not including operators paid on commission.
(d) Full time employees only.
*The figures for mining, etc., include non-ferrous smelting and refining, clay products, cement, lime and stone (monumental and ornamental) which are shown as sub-groups under manufacturing.

WORKMEN'S COMPENSATION IN ALBERTA IN 1937

Annual Report of Provincial Board

The twentieth annual report of the Workmen's Compensation Board of Alberta indicates that during 1937 there were 13,177 accidents compared with 12,381 in the preceding year. Of the accidents reported to the Board, 43 were fatal and 103 claims involved major or minor degrees of permanent disablement.

During the year reviewed by the report, assessments collected amounted to $1,055,770.88; compensation paid totalled $446,716.29 and payments from pension fund amounted to $458,589.37.

The report shows that during 1937 the sum of $1,055,770.88 was contributed by employers through assessments levied upon the wages paid to their workmen. Contributions to the Medical Aid Fund amounted to $307,830.70 while payments out of this fund totalled $314,265.69 resulting in an excess of payments of $6,434.99 over receipts.

The financial statement regarding the Pension Fund shows that receipts on account of this fund amounted to $517,042.00; pensions paid $458,589.37 leaving a favourable balance of $58,452.63 on the year's operations. The Disaster Reserve showed a balance of $258,762.37 as at December 31, 1937. The total amount to the credit of the Pensions Reserve Fund at the end of 1937 was $3,334,347.74.

The cost of administration, including the cost of maintaining the mine rescue cars and stations, and administration of The Electrical Protection Act was $122,310.03.

Statistics for the year under review are summarized in the report as follows:

Number of employers within the scope of the Act as at December 31, 1937, 5,438; num-

ber of accidents reported during 1937, 13,177; number of accident claims not finally disposed of as at December 31, 1937, 1,856; number of claims disposed of by award of pension or payments of compensation 5,096; number of claims disposed of by payment only of account for Medical Aid, 6,174; number of accidents disposed of, for which no application for compensation was received, 197; number of accidents disposed of on which no compensation was due, 1,989; number of claims on which further payments have to be made, 684; number of accidents awaiting further reports and on which no payments have been made, 893.

Of the 13,177 accidents occurring in 1937, 43 were fatal, 103 involved permanent disability, while 13,031 were of a temporary nature. "Handling objects" was the most frequent cause of accidents followed by "Falling objects or bodies."

The time loss in non-fatal claims totalled 204,739 days. The average time loss in permanent disability cases was, 126·87 days and in temporary disability cases 28·34 days. The average age of injured workmen was 35·76 years.

The report also contains references to the work carried on by the Mine Rescue and First Aid Department at various centres including the number of men given training and the extent and condition of equipment in use at the stations.

The annual review of the administration of the Electrical Protection Act is also included in the report, continued improvement in the electrical industry during the year being recorded. Under the Accident Prevention Regulations of the Act, 148 inspections and 16 investigations were made.

IMMIGRATION TO CANADA DURING THE FISCAL YEAR ENDED MARCH 31, 1938

According to a statement issued by the Department of Mines and Resources, immigration to Canada during the fiscal year ended March 31, 1938, totalled 15,645 an increase of 30.1 per cent over the number arriving in the preceding fiscal year. Of this number, 5,643 migrants came from the United States; 2,972 from British ports; 1,182 from Northern European ports; and 5,848 from other ports. These figures indicate an increase of 31.3 per cent in the numbers coming from the British Isles, compared with the preceding fiscal year; an increase of 10.4 per cent in those coming from the United States; a 39.7 per cent increase in migrants from Northern European countries, while "other races" increased 53.9 per cent.

The following table indicates the declared occupations of the immigrants:

Occupation	Via Ocean Ports	From U.S.A.	Totals
FARMING CLASS—			
Males	943	357	1,300
Females	607	160	767
Children	1,260	166	1,426
LABOURING CLASS—			
Males	221	118	339
Females	38	37	75
Children	68	32	100
MECHANICS—			
Males	205	290	495
Females	84	113	197
Children	42	116	158
TRADING CLASS—			
Males	229	449	678
Females	124	260	384
Children	44	113	157
MINING CLASS—			
Males	24	36	60
Females	6	12	18
Children	6	7	13
FEMALE DOMESTIC SERVANTS—			
18 years and over	617	80	697
Under 18 years	145	.....	145
OTHER CLASSES—			
Males	351	447	798
Females	2,546	1,635	4,181
Children	2,442	1,215	3,657

Ontario was stated to be the destination of 6,859 of these new arrivals; 2,699 went to the Province of Quebec; 1,647 to British Columbia; 1,400 to Manitoba; 1,220 to Alberta; 832 to Nova Scotia; 618 to Saskatchewan; 292 to New Brunswick; 56 to Prince Edward Island; 18 to the Yukon Territory; and 4 to the Northwest Territories.

INTERNATIONAL LABOUR OFFICE REPORTS DEALING WITH AGENDA OF ANNUAL CONFERENCE

Summaries of Studies on Vocational Education—Regulation of Working Hours in Road Transport—Generalization of Reduction of Hours of Work—Statistics of Hours and Wages, Etc.

THE International Labour Office has recently issued reports on each of the six items constituting the agenda of the 24th Session of the International Labour Conference to be held in June. These reports (corresponding with the agenda) are as follows: (1) "Technical and Vocational Education and Apprenticeship"; (2) "Regulation of Contracts of Employment of Indigenous Workers"; (3) "Recruiting, Placing and Conditions of Labour (Equality of Treatment) of Migrant Workers"; (4) "Regulation of Hours of Work and Rest Periods of Professional Drivers of Vehicles Engaged in Road Transport"; (5) "Generalization of the Reduction of Hours of Work"; (6) "Statistics of Hours and Wages in the Principal Mining and Manufacturing Industries, Including Building and Construction and in Agriculture."

Technical and Vocational Education and Apprenticeship

The question of technical and vocational education and apprenticeship—the subject of the first report—was placed on the agenda of the Conference by the Governing Body at its 78th session in February, although the matter has been brought to the attention of the Conference on several previous occasions.

The report opens with a general introduction in which the Office has endeavoured to make a synthesis between the problems themselves and the trend of opinion concerning them, it being felt that such an account would be more useful than a mere description of the facts in helping the Conference to lay down a general body of principles to be recommended to members for application. The report proper consists of three parts. The first part deals with vocational and technical education including pre-apprenticeship and supplementary education, the second with apprenticeship, and the third with methods of vocational re-training for unemployed persons. The "conclusions" of the report lead up to, and comment on, a draft list of points on which the Conference might, it is suggested, instruct the International Labour Office to consult Governments with a view to a second discussion of the question at the 1939 Session.

In Part I are three chapters, dealing with pre-apprenticeship, types of vocational and technical schools and supplementary education. Part II—on apprenticeship—contains chapters on the system of regulation of apprenticeship, and on the effect upon apprenticeship of economic developments.

Regulation of Contracts of Employment of Indigenous Workers

The "indigenous workers" with which this report deals are primarily the workers employed in tropical and sub-tropical territories by agricultural and industrial undertakings which are owned and managed by Europeans, or if not owned and managed by Europeans, are worked in accordance with European methods. These workers are drawn either from the indigenous populations of the colonized territories and neighbouring territories or from certain Asiatic countries; the latter category of workers are deemed to be covered by the term "indigenous workers" in so far as they are employed under conditions similar to those under which workers belonging to indigenous populations are employed.

Recruiting, Placing and Conditions of Labour (Equality of Treatment) of Migrant Workers

The report on "Recruiting, Placing and Conditions of Labour (Equality of Treatment) of Migrant Workers" reviews the subject in all its phases under the following chapter headings: (1) "Supply of Information to Migrants"; "Recruiting and Placing in Employment"; "Conditions of Employment"; "Repatriation"; and "Bilateral Agreements".

Regulation of Hours of Work in Road Transport

Dealing with the fourth item before this year's Conference—"Regulation of Hours of Work and Rest Periods of Professional Drivers (and their assistants) of Vehicles Engaged in Road Transport"—the Grey Report on this subject first gives a review of its background up to the decision of the Governing Body to include it on 1938 agenda.

The report contains seven chapters dealing respectively with the development and structure of national regulation; scope; normal hours of work; extensions of hours; rest periods; supervision of enforcement of regulations; and conclusions. These are followed by a list of the points on which the office considers that the Conference might request it to consult governments, and an appendix containing

statistics of hours of work in road transport in various countries.

In its first chapter the report emphasized that "the problem of the regulation of hours and rest periods for motor drivers did not concern the workers alone, but likewise affected the safety of the general public. Unlike the railway worker, the road transport worker does not operate in a closed system but in direct contact with the daily life of the community on the roads. An over-tired driver is thus a potential cause of accidents and a danger to the safety of the passengers and goods carried in his own vehicle and of all other road users as well, and it becomes the duty of the State to protect the public against this danger."

In discussing regulations of hours in motor transportation, it was indicated that this proceeded in two principal directions, viz: (1) by the enactment of special laws forming part of the general labour legislation to regulate hours of work; and rest periods of road transport workers; (2) by taking advantage of the enactment of road traffic or transport legislation of various kinds, laying down conditions for the licensing and operation of motor vehicles, to provide for the regulation of the driving hours and rests of drivers of certain vehicles. It was pointed out that "the pioneer country in this field of legislation was Canada, where distances are long and motor transport developed early. As early as 1923 a provision limiting the daily driving hours of drivers of passenger vehicles was inserted in a Public Vehicle Act in the Province of Ontario, and though this example was not followed by any of the other provinces until 1927, Canadian legislation remained ahead of other countries in this domain. In 1930 a similar provision was included in the British Road Traffic Act, and in 1931 for the first time a limitation of driving hours was included in a State law in the United States of America, which have recently adopted Federal regulations under an amendment to the Interstate Commerce Act. This form of legislation is now generally found in the English-speaking countries where hours of work are not generally regulated by law, but it is also being adopted in others where road transport workers are covered by other measures as well."

Generalization of Reduction of Hours of Work

The fifth report in the series—that dealing with generalization of the reduction of hours of work—has been published in several parts, two of which had been received in this Department as this issue went to press.

The first part of the report on the Generalisation of the Reduction of Hours of Work is wholly concerned with industry, commerce and offices. It includes shops, hotels, restaurants and similar establishments, curative establishments, theatres and other places of amusements. Special regulations for these categories of establishment are dealt with separately in the various chapters.

This part of the report consists, first, of a documentary analysis of the law and practice at present in effect in the different countries, and, second, of conclusions commenting upon the possible content of international regulations, followed by a list of the points on which Governments might be consulted.

Chapter I, which deals with the structure of the regulations, contains a short description for each country summarizing the present stage of the hours of work regulations as well as the form in which these regulations are found.

Chapter II describes the scope of the various regulations distinguishing in the first place between categories of undertakings and occupations and in the second place between the categories of persons covered in and excluded from the regulations.

In Chapter III, dealing with hours of work, after an analysis of the definitions used to limit hours of work, the various methods of limitation used by national regulations are examined: namely, limitation by the day, by the week and by periods exceeding one week. In describing the normal hours of work laid down in the national regulations, distinctions are made between undertakings working in a single shift and those operating several shifts, and in the latter case, a separate place is given to those undertakings whose work is necessarily continuous because of the nature of the work. The chapter ends with a study of the solutions found in the various national regulations to the problem of making up lost time.

Chapter IV is concerned with extensions to normal hours of work. The extensions are grouped according to whether they are provided for certain categories of work, in order to meet accidental circumstances (in case of lack of skilled workers), or as a result of the fluctuating nature of certain activities. Overtime is examined specially, along with provisions concerning the suspension of the regulations or extensions of hours of work for reasons of State.

In Chapter V an examination is given to the various methods for supervision laid down in national regulations.

Chapter VI, which contains the conclusions to this Part of the Report, presents the various problems that are raised in connection with the adoption of international regulations for industry, commerce and offices. It concludes with a list of the points which the Office suggests to the Conference as the basis for the consultation of Governments.

Part III—Coal Mines

Part III of the Report on Generalization of the Reduction of Hours of Work deals specifically with coal mines. This separate study is divided into two sections.

The first section is of an essentially documentary character. It consists in an examination of the manner in which national regulations have dealt with the problems raised by regulation of hours of work in coal mines. Chapter I enumerates and classifies the various kinds of national regulations; the following chapters deal respectively with the scope of these regulations, normal hours of work, extensions of normal hours, and supervision of enforcement of the regulations.

This documentary study covers most of the countries whose annual output of coal, in recent years, has exceeded one million tons (the lignite figures being converted for this purpose into the equivalent quantity of hard coal). The countries are as follows: Australia, Austria, Belgium, Canada, Chile, China, Czechoslovakia, France, Germany, Great Britain, Hungary, India, Italy, Japan, Netherlands, New Zealand, Poland, Roumania, Spain, Turkey, Union of South Africa, United States, U.S.S.R. and Yugoslavia.

The second section, forming the conclusions, is of purely international character. It contains a rapid historical review of the previous efforts of the International Labour Organization to regulate and reduce hours of work in the coal-mining industry, followed by an examination of the problems raised by the proposal for international regulations with such a reduction in view and of the ways in which these problems might be solved. Lastly, in accordance with the customary procedure in cases of this sort, the Office proposes a list of points on which it considers that Governments might be consulted.

Statistics of Hours and Wages

The sixth report in the series (also the sixth item on the agenda) is entitled "Statistics of Hours and Wages in the Principal Mining and Manufacturing Industries, including Building and Construction and in Agriculture."

As explained in the introduction, the International Labour Office since its inception has been concerned with the improvement and development of statistics of wages and hours of work, and the steps taken in this direction by way of international conferences of labour statisticians are outlined.

The Report is divided into two parts. Part I is designed to furnish a basis for the work of the Conference if it should decide to proceed by the usual method of double discussion, and concludes with a list of the points on which the Office suggests that Governments might be consulted in the event of the Conference deciding to adhere to the double-discussion procedure. Part II is designed to enable the Conference to proceed at once to the adoption of international regulations and concludes with the texts of a proposed Draft Convention and a Draft Recommendation which the Office submits as a basis for the deliberations of the Conference.

In Section II of Part I the statistics of wages and hours of work in the different countries are described and analysed. Their sources, methods of compilation and the special characteristics of the different classes of statistics are discussed and a series of tabular statements is given, in which the principal features of the official statistics of the different countries are presented. The first chapter deals with the most usual form of wage and hours statistics, namely, those per worker, i.e. those of wage rates and normal hours or actual earnings and hours worked. A following chapter deals with another branch of these statistics which though not always considered part of this subject cannot be overlooked in any survey of this question, namely those relating to the aggregate wages paid per annum in various industrial branches or to wage earners as a whole. Statistics of this nature exist in many countries at the present time and are useful as a measure of changes in the purchasing power of the working class as a whole. In a final chapter are set forth the principles to be followed in the standardization of statistics of wages and hours of work.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

The Application of International Labour Conventions

The Committee of Experts on the Application of International Labour Conventions met at the I.L.O. on April 4, and spent the week examining the 597 annual reports received before the closure of the session from States on the measures they have taken to apply the provisions of the Conventions which they have ratified.

The Committee's conclusions have been summed up in a report which will be submitted to the Governing Body of the International Labour Office.

In their report the experts draw attention in particular to two recent developments in the work of the International Labour Organization.

The first development noted is that countries are showing a growing concern to harmonize their national labour legislation with the provisions of the Conventions which they have ratified. In Latin America, for example, several countries have shown great activity in the field of social legislation. One after another, they are adopting new principles for the regulation of labour conditions, and it is no exaggeration to say that these principles on the whole conform to the broad lines of Conventions of the International Labour Organization. This is evidence of new and very important progress in the work of the Organization in extra-European countries.

The second new development noted is that during recent years States Members have more and more shown a tendency to apply the Conventions they have ratified to their colonies and other possessions, as well as to the mother country. It will be remembered that the provisions of a Convention, after ratification by a State Member, while obligatory for the mother country, are not unconditionally compulsory for its colonies, protectorates and other possessions, the extension of the Conventions to such territories being subordinate to the possibilities of applying them to local conditions. The measures taken with a view to such application are one of the most interesting developments of international labour legislation with which the Committee had to deal. While in many cases these measures are above all precautionary measures—since the industrialization of colonies is only beginning—they are of great practical importance for the future. In certain cases, moreover, such measures have been immediately followed by practical results, such as the adoption of workmen's compensation and minimum wage scales.

In their report, the experts also stress the value of the regional conferences of representatives of labour inspection services, which the I.L.O. convened, at The Hague in 1935 and at Vienna in 1937. They also state that they attach great importance to the proposed technical conference called to prepare for the adoption of a Convention on the principles of labour inspection by a future session of the International Labour Conference. The existence of a well-organized labour inspection service, fully convinced of the necessity of a strict application of International Labour Conventions, constitutes, they affirm, one of the chief guarantees for the efficacy of these Conventions.

The total number of ratifications of International Labour Conventions officially registered is now 804.

New Zealand Ratifies Twenty-two International Labour Conventions

The Government of New Zealand has just made an important contribution to the international social legislation by the ratification of twenty-two International Labour Conventions. Among these the following deal with reducing hours of work: first, the 1919 and 1930 Conventions which aimed at the uniform application of the eight-hour day and the forty-hour week to all industrial and commercial activities; then the Conventions which are the first international steps towards the reduction of the working-week to forty hours—the 1935 Convention on the general principle of the forty-hour week, and the 1935, 1936 and 1937 Conventions applying the forty-hour week to the glass-bottle industry, public works and the textile industry respectively.

The other Conventions ratified by New Zealand concern the weekly rest in industry, measures against unemployment, unemployment indemnity, the prohibition of night work for women, the prohibition of the employment of women in underground work, workmen's compensation in industry and agriculture, the protection of dockers against accidents, workmen's compensation for occupational diseases, minimum wage-fixing machinery, the right of association of agricultural workers, the placing of seamen and seamen's articles of agreement, mercantile marine officers' competency certificates, the inspection of emigrants on board ship, and the prohibition of forced labour.

COMPARISON OF THE EMPLOYMENT SITUATION IN CANADA AND THE UNITED STATES

THE recent trends in business appear to have renewed public interest in the comparison of employment conditions in Canada and the United States. The Dominion Bureau of Statistics has therefore prepared, as an appendix to the regular monthly employment report for April (See page 540) the following review* of the situation as indicated in the available, comparable data in the two countries. The latest American figures on hand are for February 15, 1938, so that the most recent comparisons now possible are with the Canadian data for February 1 and March 1.

In the United States, as in Canada, employment statistics are currently furnished by leading industrial establishments. The United States Bureau of Labor Statistics does not publish a general index similar to that prepared in the Dominion, while differences in the classification and grouping of industries in the two countries prohibit comparisons for many important classes. The basic periods used in computing the indexes in Canada and the United States also differ, necessitating the recalculation of the figures on a comparable basis. The American indexes of factory and steam railway employment have for this analysis been adjusted from their 1923-25 base to the Canadian base, 1926=100; in the other industries for which comparisons can be made, the Dominion indexes were adjusted to the 1929 average 100, as in the United States, since 1926 data for that country were not available for most of the non-manufacturing industries.

Manufacturing

Of the possible comparisons, that of conditions in manufacturing is probably the most interesting.

The seasonal factor in employment is decidedly more marked in the Dominion than in the States. This is no doubt due in part to a difference in the dates of the enquiries; in the States, this is the middle of the month, while the Canadian statistics reflect the situation at the beginning of the month, when more of the general holidays occur, disrupting business. The variation in the industrial composition of the samples on which the indexes are computed in the two countries must also considerably influence the seasonal movements of the general indexes, but the available data do not permit any study in this respect. The fact that the numbers on which the indexes are calculated are smaller in Canada than in the States, also tends to emphasize the fluctuations in employment in the Dominion; thus, the American factories furnishing data for February reported 3,573,138 employees, while in Canada, the co-operating manufacturers employed 561,906 men and women at March 1.

To establish as much comparability as possible with the Canadian data, it was necessary to adjust the American indexes not only from their base of 1923-25=100 to 1926=100, but also for seasonal variation. With regard to the first of the calculations, it may be said that on the 1923-25 average as 100, the 1926 figure was 101·3, so that the conversion to the latter year slightly lowers the indexes as published by the Bureau of Labor Statistics.

In preparing the factors for seasonal adjustment, for the American as for the Canadian indexes, the link-relative method was used, the factors in both cases being calculated on the experience of the years 1929 to 1937. In the following brief analysis of the situation in manufacturing as a whole, the figures for both countries are in all cases the seasonally-adjusted indexes. In the review of the trends in the "durable goods" and the "non-durable goods" industries, however, the indexes have not been corrected for seasonal variation.

From 1921 to 1926 employment in manufacturing was at a relatively higher level in the States than in the Dominion; from the latter year, the growth of factory employment in this country was decidedly more rapid, and the Canadian index has since then been at a level considerably higher in relation to the basic average than the American index. Despite the difference in position, the general movements of the curves for the two countries have shown considerable similarity, in many cases being almost parallel for fairly lengthy periods.

In both Canada and the United States, employment attained its highest level in the summer of 1929, which was succeeded by a period of almost uninterrupted recession that in the States reached its maximum in the middle of 1932. The movement was then upward until the end of the year, but employment again declined during the first quarter of 1933, reflecting the circumstances leading to the American "Bank Holiday." However, this contraction did not reduce employment to quite so low a level as in 1932, possibly as a result of the operation of the National Industrial Recovery Acts.

* Owing to space limitations, charts and tables have been omitted from this article.

57200—5

In the Dominion, the course of employment was almost continuously downward from August, 1929, to May, 1933. The indexes in the two countries suffered a fairly similar loss from the high to the low points, respectively.

From the early months of 1933, the movement was very definitely upward in both countries, but more steeply so across the Border, where the index by September had gained nearly nineteen points, reaching 79·7; it was then at the level of March, 1931. In the Dominion, the improvement during 1933 raised the index to 85·7 towards the end of 1933, from 76·2 in May. However, the trend then continued upward, with comparatively little interruption, until the end of 1937; while advances were also made during this period in the States, the improvement was not so consistently maintained. Nevertheless, the gains from the low point of the depression to the 1937 high were fairly similar in the two countries.

It is interesting to note that in Canada, at the 1937 maximum, the index was less than a point below the all-time high of 118·9 recorded in three months of 1929. Across the Border, however, there was a greater difference in this comparison; at the 1929 maximum in two months of the year, the index stood at 104·5, or just over four points above the 1937 peak.

During 1937, the Canadian index of factory employment rose steadily from 109·2 at the beginning of January to 118·0 at October 1 and November 1, declining only to 117·6 at December 1, when it was still over eight points higher than at January 1. In the States, on the other hand, the index rose from 98·9 in January to 100·3 in June, thence falling steadily to 89·4 in December, when it was 9·5 points lower than in January, 1937. Further losses in the seasonally-adjusted indexes have reduced the American index to 82·9 in February, 1938, and the Canadian figure to 114·5 at February 1, and 112·9 at March 1.

Factory employment in the United States has recently receded at a swifter rate than in the months immediately succeeding the 1929 boom period. Thus, in the months from the peak of 104·5, recorded in June and July, 1929, to February, 1930, the index declined by just under seven points to 97·6 in the latter month; from the 1937 high of 100·3 in June to February, 1938, there was a shrinkage of 17·4 points, the index for the latter month standing at 82·9. When the American seasonally-adjusted index had previously stood at 82·9 (in December, 1930), it was than not quite midway to its low point of 59·6 in July, 1932.

In Canada, during the months following the 1929 maximum of 118·9 in May, June and August, there was a decrease of 5·6 points to the March, 1930, adjusted index of 113·3, from which further losses reduced the figure to its low of 76·2 in May, 1933. From August 1 of last year to March 1, 1938, the seasonally-adjusted index has declined from 115·5 to 112·9, or by only 2·6 points, while from the 1937 high of 118·0 at October 1 and November 1, the reduction has amounted to 5·1 points. It, therefore, appears that factory employment in the Dominion so far has put up an even stiffer resistance to the downward forces, which recently have so substantially lowered the American index, than was the case in the months immediately following the 1929 boom.

"Durable" and "Non-durable" Goods Industries

As already pointed out, differences in the grouping of industries in Canada and the United States preclude comparisons of conditions in particular industries. However, statistics are prepared in the United States Bureau of Labor Statistics for the classes known as "durable" and "non-durable" goods, and a similar division has now been made of the Canadian data.

The durable goods comprise the following: iron and steel, non-ferrous metals, clay, glass and stone, lumber and electrical apparatus. In the class of non-durable goods are the food, tobacco, beverage, textile, leather, pulp and paper, rubber, non-metallic mineral, chemical and miscellaneous manufacturing industries. Current figures showing the numbers employed in these various industries are not published by the United States, but according to the latest Biennial Census of Industry (1935), some 44 per cent of all factory employees were engaged in the production of durable goods, and 56 per cent in the non-durable classes. In Canada, the division of the monthly employment data in 1935 was 39·5 per cent for the former and 60·5 for the latter. In 1937, 42·3 per cent of the total number covered in the monthly surveys belonged in the durable goods group and 57·7 per cent in the non-durable division. It is possible that percentages made from the monthly data used in calculating the American indexes could not coincide with the above, based on census data.

On each side of the Border, employment in the non-durable group has been more active in relation to the basic average than the durable division. In the United States, the annual average indexes for the former have shown increases over the latter ranging from 2·9

points in 1929 to 31·8 points in 1933. As the general situation improved, this excess declined, until the 1937 average index for the non-durable goods was only 8·7 points above that for the durable class. The recent recession in American business tends again to enlarge the discrepancy between these two divisions. In January and February, 1937, the index for the non-durable was 13·2 and 12·7 points, respectively, higher than the durable, while in the present year, the former was 15·3 points higher in January and 18·4 points higher in February, than the indexes for the durable classes.

In the Dominion, the difference in favour of the non-durable division ranged from 3·1 points, on the average, in 1930, to 33·3 points in 1933, since when it steadily declined to 16·7 points in 1937. The increases in this comparison recorded in the elapsed months of 1938 have approximated the average for 1937, but at 16·7 points at Jan. 1 and 16·6 points at the beginning of February and March, were lower than last year's differences of 20·6, 20·1 and 19·2 points at Jan. 1, Feb. 1 and Mar. 1, respectively, in this comparison.

A comparison of the data for the two countries shows that from 1929 to 1933, employment in the Canadian durable goods group was higher in relation to the United States durable goods class than was the case in the non-durable goods. From 1934 to 1937, however, the situation was reversed, the non-durable industries showing a larger proportionate increase over the corresponding American indexes than was shown by the durable goods. In January and February, 1938, on the other hand, the slackening of activity in the American durable goods has so greatly exceeded that in the non-durable division that the Canadian index for the former shows a greater increase over the American index than is indicated in a comparison of the non-durable goods figures for the two countries.

For the non-durable goods, the 1937 peak of employment in the Dominion was 130·9 in October, since when the index has declined by 12·9 points to 118·0 at Mar. 1. In the States, the recent high point was in September, the index then standing at 106·3; the falling-off from that month to February was 15·3 points, a loss exceeding that in Canada by comparatively little. In the durable goods division, however, the Canadian index declined from 113·0 in July, 1937, to 101·4 in March, 1938, or by 11·6 points, while in the States there was a decrease of 25·6 points from 98·2 in May, 1937, to 72·6 in February, 1938. Activity in both durable and non-durable goods in the Dominion was higher at the beginning of March than at the same date in either 1936 or 1937, but the American indexes in both cases were lower in February, 1938, than in that month of 1936 or 1937.

In the United States, the durable goods index in February was slightly lower than the 1935 average, although it continued higher than in 1931-1934, while the index for the non-durable division was at a level about midway between the 1934 and 1933 averages. In the Dominion, the March 1 index, though rather lower than the 1937 average, was above that for any other year since 1930; in the non-durable groups, the latest index was also below the average for last year, but was higher than in other years of the record.

For manufacturing as a whole, the March, 1938, unadjusted index in the States was the same as the 1934 average, being lower than the mean for any of the intervening years. In Canada, the Feb. 1 and Mar. 1 indexes of 110·3 and 110·5, respectively, were lower than in 1937, but higher than in any other year except 1929. While the seasonality of industry enters into the case in any comparison between the situation in the first few months of the years, and the annual averages, this factor is more unfavourable to the Canadian index than to the American index.

Steam Railways

The United States Interstate Commerce Commission tabulates monthly statistics of the employment afforded by Class 1 railroads, while the railways in the Dominion also furnish current information on the subject. The statistics in the two countries differ in scope, but the figures are sufficiently similar to warrant a comparison of their movements.

The Canadian figures here used are aggregated from the various industries groups where they appear in the monthly tabulations, and include employees of all types. During 1937, the staffs of the Canadian railways averaged 129,408. In the United States, the Class 1 steam railroads employed an average of 1,115,283 men and women in 1937.

The American indexes are computed on the years 1923-25 as 100; the 1926 average on that base was 99·8, so that the recalculation on the 1926 average as 100 makes little change in the index numbers as published by the Interstate Commerce Commission.

A brief review of the situation in the two countries shows that the employment afforded by the railroads was at a relatively higher level in the United States than in Canada from 1922 to 1926. In the next two years, the upward trend in the latter compared favourably with declining activity across the Border. The number of railway employees in both countries diminished uninterruptedly between 1929 and

57200—5½

1933; while some recovery from the 1933 low was then indicated in both the United States and Canada until 1936, employment continued to be decidedly curtailed as compared with pre-depression years.

During 1937, the trend on American railroads was moderately but continuously upward from January to July, and uninterruptedly downward from then until the end of the year. The average index of employment, however, was rather higher than in 1936, while that for the Canadian steam railways was slightly lower; this was partly due to the fact that in 1936 railway construction and maintenance had been unusually active, according to the standards of recent years, many men having been transferred to that industry from the unemployment relief camps. Nevertheless, the level of employment in the Dominion continues higher in relation to the basic year than in the States, where the 1937 index averaged 62·5 per cent of that for 1926, compared with 75·7 in Canada.

The American index for January, 1938, was 53·8, or 6·5 points lower than in the same month of last year; the preliminary index for February, 52·7, was lower by 8·8 points than in February, 1937. In Canada, the January, February and March, 1938, figures at 72·4, 72·5 and 73·3, respectively, were slightly higher than in the corresponding months of last year.

Communications

The Bureau of Labour Statistics prepares monthly indexes showing the course of employment in telegraphic and telephonic communications. Figures for 1926 are not available, the indexes being based on the 1929 average as 100. Accordingly, the Canadian indexes have been adjusted to the latter base for comparison with the American data; since the 1929 index constituted 120·6 per cent of the figure for 1926, the recalculation on the 1929 base considerably lowers the Canadian index as published in our monthly and annual surveys of employment.

Activity in the communications division in both countries declined continuously from 1929 to 1934; indeed, the American figure for 1935 was also fractionally lower than in the preceding year, while that in Canada was slightly higher. In 1936 and 1937, some recovery was indicated in both countries, but in the States this was rather more marked than in Canada. Last year's index for the former was 77·9, while the Canadian index averaged 70·8 per cent of the 1929 average as 100. Employment in communications on each side of the Border has in 1938 been at a rather higher level than in the first months of either 1936 or 1937, although these industries continued quiet as compared with earlier years of the record.

Trade

The United States has since 1929 published index numbers of employment in retail and wholesale trade, based upon the 1929 average as 100. These figures cannot be adjusted to the 1926 base, so that the Canadian indexes for these two branches of industry for use in this review, have been recalculated upon the 1929 average as 100. In retail trade, the 1929 index was 131·0 per cent of the 1926 average, and that for wholesale trade was 115·8; the indexes here quoted in comparison with the American data are therefore lower than those ordinarily published.

In both Canada and the States, employment in *retail trade* showed uninterrupted recession from 1929 to 1933, the American index declining from 100 in the former to 76·1 in the latter year, while the Canadian index showed a smaller reduction, from 100 in 1929 to 90·2 in 1933. From then, employment in retail establishments in both countries improved steadily, but the gains in the Dominion were more marked. At the 1937 maximum of 99·9 in December, the index in the United States was about equal to the 1929 average, while the Canadian index in the same month was 113·7 per cent of the 1929 figure.

In January, 1938, employment in retail trade across the Border declined from December by 15 per cent, the index standing at 85·1, or several points lower than the 1937 average of 89·7; it was, however, only fractionally below the January, 1937, index of 85·4. The preliminary February figure of 82·9 was 1·4 per cent lower than in January, 1938, and 2·7 per cent lower than in February of last year. The number on the payrolls of the reporting retail stores was 586,000 in February.

In the Dominion, the employment reported in retail trade in January constituted 116·8 per cent of the 1929 average, but declined to 101·8 per cent at February 1 and to 99·8 at March 1. The index at the latter was rather lower than the March 1, 1937, figure of 101·2. The co-operating retail establishments in this country reported staffs aggregating 75,991 at February 1, and 74,453 at March 1, 1938.

In *wholesale trade* also, employment in both countries declined from 1929 to 1933, thence advancing steadily until 1937. In this industry the curtailment following the 1929 boom was not so pronounced in the Dominion as in the States; the 1933 index in the latter stood at 76·1, compared with that of 85·0 in Canada. The American index in 1937 constituted 92·0 per cent of the 1929 average, while that in the

Dominion stood at 99·7. In January of the present year the index of employment in the United States was 90·9, and the preliminary figure for February was 90·3. The latter was lower by 1·9 per cent than in February, 1937. The Canadian index upon the 1929 base stood at 100·3 in January, 99·8 in February and 99·7 in March, 1938; in each of these months, employment in wholesale trade was slightly more active than in the same period of last year.

Hotels

In the United States employment data are available since 1929; for the last four years the statistics relate only to "year-round" hotels, while in the Dominion the record has continuously included restaurants and summer hotels, as well as hotels open throughout the year. For purposes of this comparison, the Canadian indexes have been recalculated upon the 1929 average as 100; our index for that year had stood at 131·8 per cent of the 1926 average.

Activity in hotels showed in the United States a very slight loss in 1930 from the 1929 high levels; in the Dominion, on the other hand, there was a small gain. From then, however, employment in both countries declined until 1933, there being from 1929 a falling-off of 25 points in the American index and of 22·7 points in the Canadian figure. Partial recovery in succeeding years brought the 1937 index of hotel employment in the States to 87·3 per cent of the 1929 average, and that for the Dominion to 94·9. In both countries, activity in January and February, 1938, was rather higher than in the same month of 1937 or 1936.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JANUARY TO MARCH, 1938

BUSINESS transacted by the offices of the Employment Service of Canada during the quarter January to March, 1938, showed a decline from that effected during the corresponding quarter of 1937, as there was a decrease of over 4 per cent in vacancies offered and of nearly 2 per cent in placements effected. Manufacturing, logging and construction showed losses in both cases, the largest being in logging. Services and trade recorded fewer vacancies, but more placements, while farming, mining and transportation registered gains in both instances, the highest being in services and farming. Provincially, Ontario, Saskatchewan, Alberta and British Columbia showed declines both in vacancies and placements, those in the West being quite marked, while the Maritimes, Quebec and Manitoba reported increases, the gain in Manitoba more than offsetting the loss shown in Saskatchewan.

From the chart on page 554 which accompanies the article on the work of the employment offices for the month of March, 1938, it will be seen that the curves of vacancies and placements in relation to applications during the first half of January and the month of March showed a marked downward course, but during the latter half of January and throughout February little variation was indicated, although the general trend was upward. At the close of the quarter, however, the level of vacancies in relation to applications was 17 points and that of placements 14 points below the level reached at the close of the corresponding period a year ago. During the period January to March, 1938, there was a ratio of 41·4 vacancies and 39·3 placements for each 100 applications for employment, as compared with 49·5 vacancies and 45·7 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 1,017, of applicants registered 2,457 and of placements effected 964 in contrast with a daily average of 1,090 vacancies, 2,201 applications and 1,005 placements in regular and casual employment during the first quarter of 1937.

During the three months January to March, 1938, the offices of the Employment Service reported that they had made 76,915 references of persons to positions and had effected a total of 73,189 placements, of which 50,113 were in regular employment and 23,076 in casual work. Of the placements in regular employment, 36,485 were of men and 13,628 of women, while casual work was found for 13,474 men and 9,602 women. A comparison with the same period of 1937 showed that 74,329 placements were then made, of which 52,271 were in regular employment and 22,058 in casual work. Applications for employment during the period under review were received from 137,872 men and 48,855 women, a total of 186,727 in contrast with a registration of 162,808 during the same period in 1937. Employers notified the Service during the first quarter of 1938 of 77,263 positions, of which 50,260 were for men and 27,003 for women, as compared with 80,651 opportunities for work offered during the corresponding quarter of 1937.

In another section of this issue will be found a report in detail of the transactions of the employment offices for the month of March, 1938.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, MARCH, 1938

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on April 1 was 10,450, the employees on their payrolls numbering 1,001,970 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for March was 1,891, having an aggregate membership of 220,340 persons, 12·8 per cent of whom were without employment on April 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) Employment Situation at the Beginning of April, 1938, as Reported by Employers

Employment at April 1 showed a large seasonal contraction, according to information tabulated in the Dominion Bureau of Statistics from 10,450 establishments whose staffs aggregated 1,001,970 persons, compared with 1,029,001 in the preceding month. This reduction of 27,031 workers lowered the index from 107·8 at March 1 to 105·0 at the date under review, when it was two points higher than at April 1, 1937, being also higher than in the same month in any other year since 1930.

Statistics furnished by leading employers show that industrial activity has suffered a between-season's recession at the beginning of April in fifteen of the seventeen preceding years for which data are available; this ordinarily results from the release of bushmen following the completion of the season's logging operations, before any considerable numbers of workers have been absorbed into the outdoor industries opening up in the spring and early summer. The general decline at the date under review has been exceeded on two or three occasions in the years since 1920, but was greater than the average loss at April 1 in that period; that this was so, was due in the main to unusually pronounced curtailment in bush work, from which over 28,200 men were laid off by the co-operating employers, following a season of marked activity. The number released in this industry was larger than that recorded at the beginning of April in any other year since 1920, although the percentage loss has several times been exceeded. Coal mining and steam railway transportation and construction and maintenance also recorded important reductions of a seasonal character. On the other hand, manufacturing showed some improvement, and additions to staffs were noted in shipping, highway construction, services and trade.

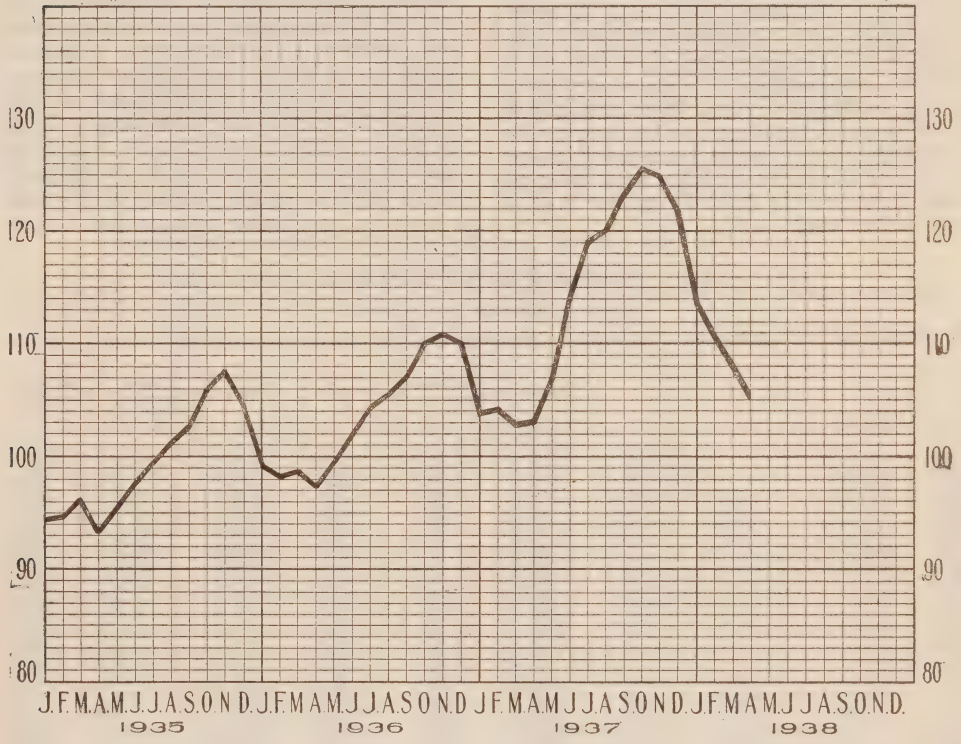
Since the curtailment in employment at the beginning of April was greater than average, the index, when corrected for seasonal trend declined, standing at 111·2, as compared with 112·3 in the preceding month. The seasonally-adjusted index, like the crude figure, was higher than at the first of April in the years 1931-1937.

The unadjusted indexes at April 1 in the years since 1927 are as follows: 1938, 105·0; 1937, 103·0; 1936, 97·4; 1935, 93·4; 1934, 91·3; 1933, 76·0; 1932, 87·5; 1931, 99·7; 1930, 107·8; 1929, 110·4, and 1928, 102·3.

For April 1, 1937, statistics had been received from 9,987 firms, whose employees had numbered 978,913, a slight contra-seasonal increase over the preceding month. The index had then stood at 103·0.

Employment by Economic Areas

Employment in four of the five economic areas showed seasonal declines on a large scale at April 1, but in British Columbia there was an upward movement, also of a seasonal character. The level of employment in Quebec, Ontario and British Columbia was higher than at the same date of 1937; in the Prairies no



change was indicated in that comparison, while in the Maritime Provinces the index at the latest date was slightly lower than at April 1 of last year, although it continued higher than at that date in any other year since 1930.

Maritime Provinces.—There was a large seasonal decrease in the Maritime Provinces; the movement was upward in Nova Scotia, but in Prince Edward Island and New Brunswick curtailment was indicated. The 715 co-operating employers reduced their payrolls from 78,275 persons at March 1 to 74,901 at the beginning of April. Logging showed a very decided seasonal contraction, over 3,700 men being released from bush work. Activity in transportation, building and railway construction and maintenance also declined, but moderately. On the other hand, food, chemical and iron and steel factories and highway construction showed improvement. Employment was not quite so brisk as at the beginning of April, 1937, when the loss reported had been on a smaller scale; the index stood at 103·6 at the latest date, compared with 105·4 at April 1 of last year. Statements had then been received from 685 firms employing 75,922 persons.

Quebec.—Manufacturing, mining, highway construction and maintenance, services and trade showed heightened activity in Quebec. The gains in manufacturing extended to most industrial divisions, the electrical apparatus group being the exception. However, the increases in these divisions were more than offset by the large seasonal decline in employment in logging camps, from which over 10,600 men were released; steam railway transportation, building and railway construction were also rather slacker. Data were tabulated from 2,521 firms in Quebec, with 299,694 employees, as against 307,213 at March 1. The index, at 107·4 at April 1, 1938, was over five points higher than at the same date of last year, although the curtailment then indicated had been on a very much smaller scale. The trend has been retrogressive in fifteen of the seventeen previous Aprils for which information is now available; the losses at the

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

latest date exceed the average recorded at this time of year, but are decidedly smaller than those reported at April 1 in 1934, 1935 or 1936.

At April 1, 1937, statistics had been furnished by 2,385 employers, whose payrolls had included 284,090 men and women, a number slightly less than at March 1 of last year.

Ontario.—Employment showed a considerable contraction in Ontario, where 4,630 employers had reduced their forces by 15,951 workers since the preceding month, bringing them to 428,027 at April 1. A small loss had been registered by the 4,440 firms making returns for the same date in 1937, when their staffs had aggregated 422,657. Employment was then at a slightly lower level, the index standing at 108·8, compared with 109·6 at the latest date. The experience since 1920 shows that activity customarily declines in Ontario at the beginning of April, there having been curtailment of operations in fourteen of the seventeen previous years for which data are available; the decrease at the date under review, however, was decidedly greater than in any earlier April.

Manufacturing showed a further falling-off at the first of April, notably in tobacco factories, while curtailment was also indicated in the textile, electrical apparatus and iron and steel groups. On the other hand, food, beverage, chemical, pulp and paper, rubber and some other factories reported heightened activity. In the non-manufacturing industries, local and water transportation, building construction, services and trade showed improvement. Logging, however, released a large number of workers, owing to the completion of the season's operations, and steam railway transportation and highway and railway construction and maintenance were also quieter.

Prairie Provinces.—As is customary in the early spring, employment in the Prairie Provinces declined at April 1; the reduction, though by no means the largest on record, exceeded the average loss indicated at the beginning of April in the last seventeen years. The index, at 89·4 at the latest date, was the same as at April 1, 1937, and slightly lower than at that date in 1936, but was higher than at April 1 in any other year since 1931. Most

Relative Weight of Employment by Economic Areas as at April 1, 1938	100·0	7·5	29·9	42·7	11·4	8·5

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas, to the total number of all employees reported in Canada by the firms making returns at the date under review.

of the decrease at the beginning of April in the present year was of seasonal character in coal mining and logging, but construction and transportation were also slacker. On the other hand, manufacturing reported some improvement, and services and trade also afforded rather more employment. The working forces of the 1,503 co-operating employers aggregated 114,126 persons, compared with 117,703 at March 1. The firms furnishing data at the same date of last year had numbered 1,439, and their employees 113,751.

British Columbia.—A substantial advance of a seasonal character was indicated in British Columbia, according to returns tabulated by the Bureau from 1,081 firms with 85,222 employees, or 3,390 more than in their last report. The increase greatly exceeded that noted, on the average, at April 1 in previous years of the record, although it was smaller than the gain recorded at the same date in 1937. The volume of employment reported was larger than in the early spring of any other year since 1930. There was improvement at the date under review in manufacturing (especially of lumber and non-ferrous metal products), and in logging and construction; transportation, services and trade also showed heightened activity. At the beginning of April of last year the 1,038 co-operating establishments had reported 82,493 employees, compared with 75,432 in the preceding month.

Table 1 gives index numbers by economic areas.

Employment by Cities

Industrial activity increased in six of the eight centres for which employment data are segregated; the gain in Montreal was considerable, while moderate improvement was indicated in Quebec City, Toronto, Ottawa, Hamilton and Vancouver. In Winnipeg, no general change was reported from March 1, while firms in Windsor released a fairly large number of workers.

Montreal.—There was a further and greater advance in industrial activity in Montreal, according to 1,447 firms who reported 151,472

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES

April 1	100·6	100·4	106·0	101·7	106·4	148·9	89·6	104·6
Relative Weight of Employment by Cities as at April 1, 1938	15·1	1·3	13·2	1·3	3·4	2·0	3·9	3·4

Note.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

persons on their payrolls, as compared with 148,340 at March 1. This increase, of a seasonal character, substantially exceeded the average gain at April 1 in preceding years of the record, although it was smaller than that indicated at the beginning of April in 1937. Manufacturing showed generally heightened activity at April 1, 1938, as compared with the preceding month, textiles, in particular, reporting considerable increases in personnel. Services, trade and construction also afforded more employment; the improvement in the last-named was most pronounced. On the other hand, transportation was rather quieter. The 1,381 establishments from which returns were received for April 1, 1937, had reported 145,545 employees, compared with 139,334 in the preceding month; the index then was some four points lower.

Quebec.—Manufacturing, services and trade showed heightened activity in Quebec City, while transportation was slacker. There was an increase of 94 in the working forces of the 177 employers making returns, who had 13,418 on their payrolls at April 1. A similar advance had been reported by the 176 firms co-operating at the beginning of April in 1937, whose staffs aggregated 12,459; the index, at 93·3, was then lower than that of 100·4 at the latest date.

Toronto.—Toronto employers reported improvement over the preceding month, but this was not equal to the average gain at April 1 in the previous years for which information is on record. Most of the betterment as compared with the preceding month occurred in manufacturing, although services and trade also afforded more employment; within the factory group, the food, textile, leather and beverage divisions reported the greatest increases. On the other hand, construction showed a slight decline. The working forces of the 1,574 employers furnishing statistics totalled 132,297 persons, compared with 131,848 in the preceding month. Employment was in much the same volume as at the same date of last year, when a larger advance had been indicated by the 1,519 concerns reporting; their payrolls had included 131,439 men and women. The

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

index at April 1, 1938, stood at 106·0, as compared with 105·8 at the beginning of April in 1937.

Ottawa.—Improvement was noted in Ottawa, there being small gains in manufacturing and services, while construction showed a fair-sized increase. An aggregate staff of 13,498 workers was employed by the 202 establishments whose statistics were tabulated, and who had 13,233 in their last report. The index, at 101·7, was fractionally lower than that of 101·9 at the same date of last year, when a similar increase had been recorded. Statements had then been compiled from 199 firms with 13,517 employees.

Hamilton.—Manufacturing showed no general change; there were slight advances in transportation and services, and building was also busier. Returns were tabulated from 296 employers with 34,298 persons on their paylists, or 82 more than at March 1. The level of employment was lower than at April 1, 1937, but higher than at the same date in any other year since 1931. At the beginning of April last spring, 290 establishments had reported 34,880 employees, a large increase over the preceding month.

Windsor.—There was a further reduction in Windsor at April 1, according to data received from 187 firms employing 20,331 men and women, as against 20,914 at the beginning of March. Iron and steel plants reported most of the curtailment, while trade afforded rather more employment. The general situation was not quite so favourable as in April, 1937, (when 176 concerns had reported 20,675 persons), but was better than at the same date of other years since 1929.

Winnipeg.—Employment in Winnipeg showed no change, on the whole, the payrolls of the 487 employers furnishing statistics aggregating 38,639 workers, as compared with 38,642 in the preceding month. Manufacturing (especially in the pulp and paper and textile divisions) was rather more active, while construction and trade showed moderate declines. An increase had been noted at April 1, 1937, and the index

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	[1]Relative Weight	April 1 1938	March 1 1938	April 1 1937	April 1 1936	April 1 1935	April 1 1934
Manufacturing	56·3	110·8	110·5	110·8	101·1	93·9	88·1
Animal products—edible	2·3	121·1	119·6	119·9	109·7	102·5	95·4

Miscellaneous	·6	134·5	133·6	129·7	121·5	117·4	107·9

[1] For explanation of "Relative Weight", see footnote to Table 3.

then was rather higher, standing at 91·6, compared with 89·6 at the date under review. Information for the former date had been received from 479 firms with 39,237 employees, or 360 more than at March 1, 1937.

Vancouver.—Improvement was reported in Vancouver, according to 460 establishments with a staff of 33,889, as compared with 33,783 in the preceding month. There was a decline in factory employment, but transportation, construction, services and trade showed heightened activity. A greater increase had been recorded at the beginning of April of last year, when employment in that city generally was at practically the same level. The index stood at 104·6 at the latest date, compared with 104·4 at April, 1937; the 436 employers then co-operating had reported 33,649 men and women on their paylists.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—Further moderate improvement was recorded in manufacturing, the gain being considerably smaller than the average increase from March 1 to April 1 in the experience of the years since 1920. The largest additions to staffs at the date under review were made in iron and steel, food, pulp and paper, rubber, beverages, chemicals, electric light and power and non-ferrous metals. Employment also advanced in leather, fur, musical instrument and clay, glass and stone and some other plants. On the other hand, declines were indicated in the lumber, textile, electrical apparatus and tobacco divisions, those in the last-named being seasonal in character. Statements were received from 6,040 manufacturers, employing 563,660 operatives, as compared with 562,578 in the preceding month. The index advanced from 110·5 at the beginning of March to 110·8 at April 1, when it was the same as at the beginning of April in 1937. It was, however, higher than at the same date in the years 1931-1936.

Since the general increase in factory employment was below the average gain at this date in the period 1921-1937, the seasonally-corrected index declined, falling from 112·9 at March 1 to 111·7 at the beginning of April 1938; it was then the same as at April 1, 1937, but was higher than in other Aprils since that of 1930.

The following are the unadjusted index numbers in manufacturing at April 1 in the years since 1927: 1938, 110·8; 1937, 110·8; 1936, 101·1; 1935, 93·9; 1934, 88·1; 1933, 76·0; 1932, 87·3; 1931, 99·7; 1930, 111·3; 1929, 116·5 and 1928, 106·6.

A brief review of the situation at April 1, 1937, shows that the 5,822 manufacturers then furnishing data had employed 561,967 workers, an increase of 16,473 in comparison with their March 1, 1937, payrolls. The greatest gains had then occurred in iron and steel, lumber and textiles.

Animal Products, Edible.—Improvement was noted in dairies, fish canneries and meat-packing establishments. Statements were tabulated from 291 firms employing 23,402 workers, as against 23,122 at the beginning of March. A larger increase had been recorded at April 1, 1937, but activity was then at a slightly lower level.

Leather and Products.—Further but moderate gains were shown in the leather group, according to statements from 300 employers whose payrolls aggregated 22,349 at the beginning of April, or 185 more than in the preceding month. A larger increase had been indicated at April 1 a year ago, and the index of employment was then some eight points higher.

Lumber and Products.—An upward trend was noted in container factories, but furniture, rough and dressed lumber and other wood-using mills were slacker. On the whole, there was a decrease of 212 persons in the lumber group, as reflected in statistics from 881 manufacturers, with 39,539 employees, as compared with 39,751 at March 1, 1938. The loss compared unfavourably with the increase usually indicated at the beginning of April in the experience of other years of the record. The index, at 74·2 at April 1, 1938, was nearly three points lower than at the same date of last year.

Plant Products, Edible.—There was an advance in employment in vegetable foods in the period under review, flour and cereal, fruit and vegetable preserving, bread and bakery, chocolate and confectionery factories reporting heightened activity. Returns were tabulated from 502 firms whose payrolls aggregated 31,872 persons, as compared with 31,237 at March 1. The index was several points higher than at the beginning of April, 1937, when a smaller gain had been noted.

Pulp and Paper Products.—The movement in the pulp and paper group was upward despite the fact that many mills were not working full time. Data were received from 615 firms employing 64,192 workers, as compared with 63,225 in their last report. On the whole, employment in this group showed little change from April 1, 1937; a greater increase had then been indicated.

Rubber Products.—Rubber works were more active, 238 persons being added to the reported staffs, which totalled 12,553 in 51 estab-

lishments. Improvement had also been shown at the same date last year, when the index was slightly higher.

Textile Products.—There was a falling-off in employment on the whole in textiles at the beginning of April, chiefly in woollen, cotton and silk mills, while garment and personal furnishing, knitting and headwear factories increased their working forces. The average change at April 1 in the seventeen preceding years for which data are available has been an increase, so that the loss at the date under review is contra-seasonal. Statements were compiled from 1,132 manufacturers with 107,591 employees, or 163 fewer than at March 1, 1938. Most of the decline occurred in Ontario. The situation was not quite so favourable as at the corresponding date of last year.

Tobacco.—Seasonal reductions in employment were recorded in this group, 2,415 persons being released from the working forces of the 46 co-operating establishments, which employed 9,965 workers at the date under review. The curtailment took place largely in Ontario. The index was many points higher than in the spring of last year, although smaller losses had then been noted.

Beverages.—The tendency was upward in this division, there being improvement in distilled and malt liquor and soft drink manufacturing. Returns were tabulated from 140 establishments with 8,411 men and women on their staffs, compared with 8,137 at March 1. Employment in the beverage group was brisker than at the beginning of April, 1937.

Chemicals and Allied Products.—Two hundred and eighty plants turning out chemicals and allied products reported 17,917 employees, as compared with 17,655 in their last return. The largest gains took place in Ontario, but the movement was generally favourable. The general advance was smaller than that indicated at the corresponding date in 1937, when the index was lower.

Clay, Glass and Stone Products.—There was an increase in the personnel of building material works, 206 of which employed 8,591 workers, as against 8,449 in their last report. Larger additions to staffs had been made at April 1, 1937, and employment in these industries was then more active.

Electric Light and Power.—Improvement was shown in this group, in which 98 plants reported 15,055 employees, or 385 more than at the beginning of March. Most of the advance was in Quebec. Employment was brisker than at April 1, 1937, the trend having then been unfavourable.

Electrical Apparatus.—Substantial curtailment was noted in electrical appliance factories, according to the 125 co-operating firms, who had 18,393 persons on their payrolls, compared with 19,232 in their last report. An increase had been noted at April 1, 1937, when the index was some two points lower.

Iron and Steel Products.—Statistics were received from 883 manufacturers in this group, whose staffs were enlarged by 650 workers to 137,635 at the beginning of April. There were gains in the crude, rolled and forged, shipbuilding, heating appliance, structural iron and steel and tool divisions, while machinery, agricultural implement, automobile and wire plants were slacker. Improvement was shown in the Maritime Provinces and Quebec, but the tendency was downward in Ontario. Very much larger additions to the personnel had been recorded, on the whole, in the same period of last year, and the index number then was fractionally higher than at April 1, 1938.

Non-ferrous Metal Products.—Returns tabulated from 178 manufacturers in this group showed that they employed 24,754 persons, as against 24,476 at March 1. Most of the increase took place in the smelting and refining division. The improvement was chiefly in British Columbia. The volume of employment was greater than at the beginning of April in 1937, although the advance then indicated had been more pronounced.

Mineral Products.—No general change was shown in these industries at the beginning of April, according to data received from 102 establishments, in which 12,524 persons were employed, or 18 more than in the preceding month. The index of employment in this group was higher than in the corresponding period of last year, when a more marked gain had been shown.

Logging

Continued and larger seasonal losses were reported in logging camps, 406 of which reduced their payrolls from 61,385 workers at March 1 to 33,150 at the date under review; this decline was greater than that indicated, on the average, at April 1 in preceding years of the record, a reaction from the unusually pronounced activity of the past season. The most extensive curtailment at the beginning of April was in Quebec and Ontario, although the movement was also downward in the Maritime and Prairie Provinces. In British Columbia, on the other hand, considerable improvement was noted. The seasonal contraction reported at April 1, 1937, had involved the release of a smaller number of workers, and the index number then stood at 132·5, as compared with 115·0 at the latest date.

Mining

Coal.—As is customary at the beginning of April, there was a falling-off in employment in coal mines during the period being reviewed; this occurred in the Prairie coal fields, those in the Maritime Provinces and British Columbia showing some improvement. Data were received from 104 operators, whose staffs included 24,087 employees, as against 25,528 in their last report. The index was slightly higher than in the spring of last year, when larger declines had been reported.

Metallic Ores.—Returns were received from 212 firms in this group, employing 37,578 workers, or 25 more than at the beginning of March. A greater increase had been indicated at the same date in 1937; the index then stood at 290·7, compared with 307·6 at the beginning of April of the present year.

Non-Metallic Minerals, Other than Coal.—Seasonal gains occurred in these industries, in which 93 firms employed 7,944 persons, as compared with 7,681 in the preceding month. More marked advances had been recorded by the employers furnishing statistics at April 1 of last year, when activity generally was at the same level.

Communications

Information was received from 85 communication companies and branches, employing 22,039 workers, or 81 more than in the preceding month. Telephones showed a moderate improvement. A rather larger gain had been indicated at April 1, 1937; the index was then at 81·4, compared with 82·5 at the latest date.

Transportation

There were slight increases in employment in the street railway, cartage and storage and shipping divisions, while steam railway operation was rather quieter. Statistics were compiled from 466 employers of 94,442 workers, as compared with 95,079 at March 1. Of the former number, 25,072 persons belonged in the local transportation, 57,417 in the steam railway and 11,953 in the water transportation division. The tendency at April 1 in the last sixteen years has usually been upward, there being, on the average, a small increase at that date; the movement at the beginning of April, 1937, however, had also been unfavourable, although the loss then recorded was smaller, and the index was a point higher than that of 78·5 at April 1, 1938.

Construction and Maintenance

Building.—Statements were compiled from 754 building contractors, with 18,047 persons in their employ, or 382 fewer than in their last report. The tendency was upward in Ontario, but was unfavourable in Quebec and the Maritime and Prairie Provinces. A general gain had been indicated at April 1, 1937; nevertheless, the index was then several points lower.

Highway.—Additions to staffs were reported on highway construction and maintenance; 365 contractors employed 44,198 men, as compared with 41,249 in the preceding month. The Maritime Provinces, Quebec and British Columbia recorded heightened activity, while there were losses in Ontario and Manitoba. Improvement over March had been shown in April of last year, but the number then engaged in this work was decidedly smaller than in the period under review.

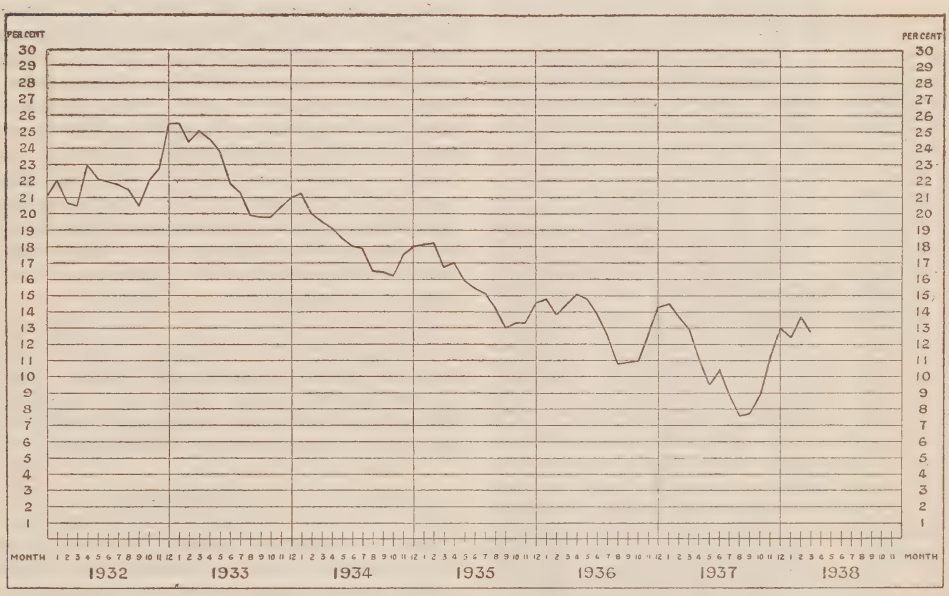
Railway.—There was curtailment in employment in the construction departments of the railways in all provinces except British Columbia. Most of the decline was due to the completion of track-clearing operations as the winter drew to a close. The working forces of the 39 co-operating contractors and divisional superintendents aggregated 23,026 men, whereas in the preceding month they had 25,283 employees. The index number was fractionally higher than in the spring of 1937, although a smaller decline had then been recorded.

Services

This group showed improvement, according to 491 firms with 28,577 workers, or 576 more than in the preceding month. Laundries and dry-cleaning establishments were decidedly busier. A greater gain on the whole had been reported at the beginning of April of last year, but employment was then in smaller volume than at the date under review.

Trade

There was a substantial increase in the aggregate forces of the 1,395 co-operating wholesale and retail establishments, which employed 105,222 workers at April 1, as compared with 104,277 at the beginning of March. This advance, which was seasonal, occurred mainly in the retail division, while wholesale houses were rather slacker. A larger gain had been indicated in trade as a whole at the same date a year ago, when the index of employment was fractionally higher, standing at 127·5, compared with 127·1 at the beginning of April, 1938.



Tables

Index numbers of employment by economic areas, leading cities and industries, respectively, are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of March, 1938

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons engaged at work other than their own trades or who are idle due to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Activity for local trade union members at the close of March tended more favourably than in the preceding month, though the change was slight, unemployment standing at 12·8 per cent as compared with a percentage of 13·7 in February. The percentage for the month under review was based on the reports received from 1,891 labour organizations with an aggregate of 220,340 persons, 28,141 of whom were idle on the last day of the month. The situation, however, remained much the same as in March of last year when 12·9 per cent of inactivity was recorded, fluctuations in the various trades and industries acting in a rather offsetting manner. Quebec unions showed a gain in work afforded of over 2 per cent from February, the manufacturing industries, particularly the garment trades and pulp and paper industry, showing employment betterment which was in part counteracted by the recessions evident in the iron and steel trades and among fur workers. Improvement among steel workers in Ontario was the determining factor in the more favourable conditions indicated from that province, while in British Columbia the advancement recorded was of more general distribution. In Nova Scotia, there was but a fractional rise in the level of employment noted from February. In Alberta, however, the usual suspension or partial suspension of industry in coal mining with the approaching spring and summer season was apparent to a rather marked degree, which was largely responsible for the drop of over 4 per cent reported in that province from February. Activity was retarded in Manitoba and Saskatchewan by slightly over one per cent. while New Brunswick unions showed but a nominal slowing up in work available. Contrasted with the returns for March, 1937, Nova Scotia unions registered an increase in employment of nearly 4 per cent during the month reviewed, mainly due to the improved conditions reflected in the coal mining industry, and lesser gains were evident among Quebec, Saskatchewan and Alberta members. In British Columbia, unemployment in the wood

products division, and in building and construction, and transportation caused the percentage of idleness in that province to be over 5 per cent above that of March, 1937, and in Manitoba, New Brunswick and Ontario there was some employment cessation.

Returns on unemployment for the largest city in each province with the exception of Prince Edward Island are tabulated separately each month. During March, Regina and Montreal unions showed gains in employment of over 2 per cent from February, and in Toronto and Vancouver fractional advances only were noted. On the other hand, Edmonton, Halifax, Saint John and Winnipeg unions all recorded declines in activity on a small scale. Conditions for Regina and Montreal members were also moderately improved from March of last year, while in Edmonton and Toronto activity tended slightly upward. Curtailment in employment of noteworthy proportions, however, was manifest by Vancouver members, and recessions of minor importance were reflected from Winnipeg, Halifax and Saint John.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3·1	2·0	3·4	2·7	2·1	3·2	2·0	7·9	3·4
Average 1920.....	1·8	2·0	7·2	3·4	3·1	3·2	2·8	11·2	4·9
Average 1921.....	11·3	8·5	16·6	9·7	8·5	7·8	7·8	23·5	12·7

Appearing with this article is a chart which illustrates the trend of unemployment by months from January, 1932, to date. A slight downward tendency was noted in the course followed by the curve during January of this year from the close of 1937, an evidence of an increased volume of work. This improvement, however, was not maintained, the curve in February showing a slightly upward movement, but in March the trend was again in a more favourable direction. The variations in these three months, however, were slight. At the close of March, there was a barely perceptible change in the level of the curve from March a year ago.

Heightened activity was reflected in the manufacturing industries during March from both the preceding month and March a year ago as manifest by the reports compiled from 534 organizations with an aggregate of 82,976 members. Of these, 9,482, or a percentage of 11·4, were idle on the last day of the month as compared with percentages of 14·0 in February and 12·2 in March, 1937. Wood and garment workers and papermakers were much better engaged than in February, and noteworthy improvement was recorded by general labourers, and meat cutters and butchers. Textile and carpet, and brewery workers also, showed some employment advancement. On the other hand, fur and glass workers indicated extensive losses in work available which, however, did not greatly affect the percentage in the manufacturing industries as a whole. Moderate curtailment only was evident among gas and jewellery workers, and activity eased off slightly for bakers and confectioners, printing tradesmen, metal polishers, leather and iron and steel workers. Among cigar and tobacco, and hat, cap and glove workers the situation remained unchanged from February. In making a comparison with the returns for March, 1937, garment workers, as in the previous comparison, were afforded a much better volume of work during the month reviewed,

and considerable betterment in the situation was recorded by glass workers. Fur, jewellery, and cigar and tobacco workers, and general labourers showed gains of moderate proportions. Among brewery workers a more favourable employment movement was noted, though the change from March last year was quite slight. On the contrary, wood, hat, cap and glove, and leather workers, and meat cutters and butchers showed a large falling off in work afforded, and recessions in activity, on a much smaller scale, were evident among bakers and confectioners, textile and carpet, and iron and steel workers, printing tradesmen, papermakers, and metal polishers.

Employment in the coal mining industry subsided slightly during March from the previous month, but the situation was much improved from March of last year. This was apparent from the returns tabulated from 55 associations, including a membership of 20,503 persons, 1,563 or 7·6 per cent of whom were idle at the end of the month contrasted with a percentage of 5·4 in February, and with 13·5 per cent of inactivity in March, 1937. Nova Scotia and British Columbia unions showed a higher level of employment during March than in the previous month, which was, however, more than offset by the recessions noted in Alberta. Nova Scotia, Alberta, and British Columbia unions, however, all participated in the better movement reflected from March of last year, the improvement in British Columbia being particularly noteworthy. In addition to the total unemployment reported among the miners, a number were registered as working at greatly reduced time.

The 215 associations of building and construction tradesmen from which reports were compiled during March involving a membership of 23,355 persons showed that 9,539 or a percentage of 4.·8 were without employment on the last day of the month as compared with a percentage of 42·5 in February. Little variation in conditions was reflected from March a year ago, though the tendency was less favourable, unemployment for that month standing at 39·1 per cent. Painters, decorators and paper hangers showed considerably greater activity than in February, and among tile layers, lathers and roofers more moderate gains occurred. Carpenters and joiners, steam shovelmen and granite and stone cutters also recorded improvement on a smaller scale. Hod carriers and building labourers, however, suffered important losses in work afforded, and among plumbers and steamfitters noteworthy employment recessions were manifest. Minor contractions in activity were evident among bridge and structural iron workers, bricklayers, masons and plasterers, and electrical workers. A decidedly better situation than in March of last year was apparent among steam shovelmen, granite and stone cutters, and tile layers, lathers and roofers, and increases of much lesser degree were recorded by bridge and structural iron workers, and plumbers and steamfitters. This improvement, however, was slightly more than offset by the curtailment evident among the remaining tradesmen, painters, decorators and paper hangers, and hod carriers and building labourers, particularly, showing employment declines of substantial proportions. Bricklayers, masons and plasterers, and carpenters and joiners reflected moderate curtailment in employment, while among electrical workers the change was practically negligible though tending in an unfavourable direction.

Unemployment in the transportation industries during March remained at exactly the same level as in February, the percentage of idleness for each of these months standing at 9·0. Reporting for March were 825 organizations of transportation workers with a total of 64,251 members, 5,799 of whom were out of work at the end of the month. Fluctuations, however, were apparent in the various groups, the steam railway division, which comprised over 78 per cent of the entire group membership, reported, showing nominally restricted activity, as did also street and electric railway employees, and teamsters and chauffeurs, which was just counterbalanced by the expansion noted in the navigation industry. The trend of employment in the transportation industries as a whole was, however, slightly less favourable than in March last year when 7·5 per cent of inactivity was recorded. As in the previous comparison, steam railway employees showed a falling off in work available during the month reviewed which was of somewhat greater proportions than when compared with the February returns. Employment for teamsters and chauffeurs declined moderately and activity for street and electric railway employees eased off very slightly. Navigation workers, however, were much more active than in March, 1937.

Retail shop clerks reported all their members at work during March as in both the preceding month and March of last year, according to the reports tabulated from 3 associations comprising a membership of 1,240 persons.

Civic employees showed but a fractional gain in work afforded during March over the previous month or over March, 1937, the same degree of change being evident in each comparison. Forwarding reports for March were 83 associations of these workers with a total

57200—6½

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Month	Fishing	Lumbering and Logging	Mining	Manufacturing industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing, publishing and lithographing	Electric current	Wood products	Fibres, textiles and textile products	Textile and carpet workers	Garment workers	Hat, cap and glove workers	Animal products	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Mineral products	Miscellaneous manufacturing industries	Building and construction	Transportation	Shipping and stevedoring	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail shop-clerks)	Services	Governmental	Miscellaneous	All occupations

of 10,224 members, 132 or 1·3 per cent of whom were idle at the close of the month as compared with an unemployment percentage of 1·7 in both the preceding month and the corresponding month of last year.

The trend of activity in the miscellaneous group of trades during March was less favourable than in February, though the variation was quite slight, the 142 labour organizations furnishing reports with a membership total of 9,479 persons, showing that 788 or 8·3 per cent were idle at the end of the month as compared with a percentage of 7·8 in February. Unclassified workers and theatre and stage employees recorded moderate recessions in activity from February, and stationary engineers and firemen a very slight adverse change. Hotel and restaurant employees, however, were somewhat better engaged, and barbers showed but a fractional rise in work afforded. Contrasted with the situation in March of last year when 7·7 per cent of the members reported were unemployed, unclassified workers showed noteworthy curtailment of employment during the month surveyed, and activity declined slightly for barbers. Among hotel and restaurant, and theatre and stage employees, and stationary engineers and firemen, however, some small advancement was apparent.

The fishing industry showed renewed vigour in pronounced degree during March as evident from the reports received from 3 organizations including a membership of 612 persons. Of these, 100 were out of work on the last day of the month, a percentage of 16·3 as compared with 38·4 per cent of inactivity in February. A noteworthy increase in unemployment, however, was reflected from March of last year when 9·4 per cent of idleness was registered.

The lumbering and logging industry, with 582 members reported at the end of March, indicated that 25 or a percentage of 4·3 were out of work in contrast with percentages of 4·7 in February and 2·7 at the end of March, 1937.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1937, inclusive, and also the percentage of unemployment by provinces for March of each year from 1919 to 1935, inclusive, and for each month from March, 1936, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for March, 1938

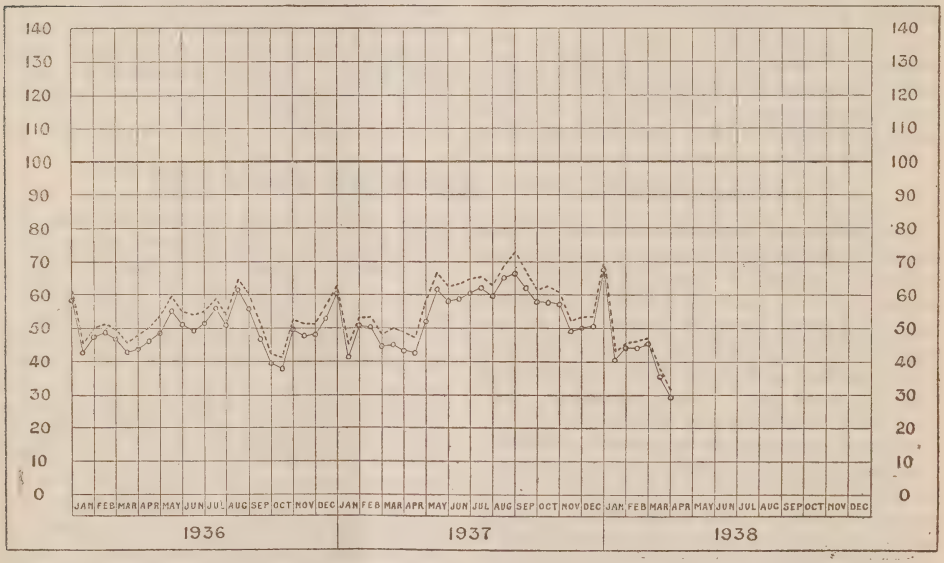
The volume of business transacted by the offices of the Employment Service of Canada during the month of March, 1938, as represented by the average daily placements effected, showed losses of nearly 12 per cent and 7 per cent, respectively, from the previous month and from the corresponding period a year ago. Total placements, however, were higher than in March, 1937, as the number of working days was greater. Although a substantial gain over February was recorded in services, and others, not so large, in transportation, farming and trade, these increases were insufficient to offset the marked decline in logging, together with the smaller losses in manufacturing, construction and maintenance, and mining. In comparison with March, 1937, decreased placements were reported in logging, manufacturing, mining and farming, the heaviest decline being shown in the first-named group, but a substantial gain was recorded in construction and maintenance and smaller increases in services, transportation and trade, which more than offset the declines just mentioned.

The accompanying chart shows the trend of employment since January, 1936, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. As may be seen from the graph, the curves, both of vacancies and placements in relation to applications, showed a sharp downward trend throughout the month, and at the close of March the level of the curve of vacancies was 17 points and that of placements nearly 14 points below those attained at the close of the corresponding month a year ago. These adverse changes were mainly due to the compulsory registration of applicants for relief. The ratio of vacancies to each 100 applications was 38·1 during the first half and 31·7 during the second half of March, 1938, in contrast with ratios of 50·0 and 48·8 during the corresponding periods of 1937. The ratios of placements to each 100 applications during the periods under review were 35·8 and 29·3, as compared with 44·8 and 43·1 during the corresponding month of 1937.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during March, 1938, was 898, as compared with a daily average of 1,006 during the corresponding month a year ago and with 991 recorded daily in February, 1938.

The average number of applications for employment received daily by the offices of the Service during the month under review was 2,599, in comparison with 2,034 in March, 1937.

Applications for work during the preceding month of 1938 averaged 2,121 daily.



The average number of placements made daily by the offices of the Service during March, 1938, was 837, of which 547 were in regular employment and 290 in work on one week's duration or less, as compared with a total daily average of 949 during the preceding month. Placements in March a year ago averaged 895 daily, consisting of 612 in regular and 283 in casual employment.

During the month of March, 1938, the offices of the Service referred 24,047 persons to vacancies and effected a total of 22,595 placements. Of these, the placements in regular employment were 14,769, of which 10,221 were of men and 4,548 of women, while placements in casual work totalled 7,826. The number of vacancies reported by employers was 14,547 for men and 9,696 for women, a total of 24,243, while applications for work numbered 70,150, of which 51,895 were from men and 18,255 from women. Reports for February, 1938, showed 23,767 positions available; 50,894 applications made, and 22,776 placements effected, while in March, 1937, there were recorded 25,126 vacancies, 50,848 applications for work, and 22,353 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1928, to date:—

Year	Placements		
	Regular	Casual	Total
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938 (3 months)	50,113	23,076	73,189

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Nova Scotia

During the month of March orders received at employment offices in Nova Scotia called for over 33 per cent more workers than in the preceding month and over 1 per cent more than in the corresponding month of last year. There was an increase also in placements of nearly 31 per cent when compared with February and of over 4 per cent in comparison with March, 1937. Placements by industrial groups showed slight variation from March of last year, the largest changes being gains in services and farming and declines in logging and manufacturing. Industrial divisions in which most of the placements were effected

during the month were logging 63, construction and maintenance 301 and services 455, of which 367 were of household workers. There were 110 men and 123 women placed in regular employment.

New Brunswick

Orders listed at employment offices in New Brunswick during March called for over 22 per cent more workers than in the preceding month and over 53 per cent more than in the corresponding month of last year. There was an increase also in placements of nearly 20 per cent when compared with February and of nearly 53 per cent in comparison with March, 1937. The most important increase in placements over March of last year was in construction and maintenance, with smaller gains in services, manufacturing and trade. The only group to show any loss was logging, and this was quite small. Placements by industrial divisions included manufacturing 46, construction and maintenance 206, trade 49 and services 585, of which 433 were of household workers. Placements in regular employment numbered 34 of men and 80 of women.

Quebec

Opportunities for employment, as indicated by orders received at employment offices in the Province of Quebec during March, were nearly 18 per cent better than in the preceding month and over 26 per cent above the corresponding month of last year. There was an increase of over 12 per cent in placements when compared with February and of nearly 41 per cent in comparison with March, 1937. Placements under construction and maintenance on relief projects showed the largest increase over March of last year and were mainly responsible for the gain under this comparison. There was, however, a substantial advance in services and a moderate increase in trade. Small losses were reported in manufacturing and logging. Placements by industrial divisions included manufacturing 178; logging 246; construction and maintenance 3,212; trade 150 and services 2,685, of which 2,438 were of household workers. During the month 3,683 men and 1,720 women were placed in regular employment.

Ontario

There was an increase of over 14 per cent in the number of positions offered through employment offices in Ontario during March when compared with the preceding month, but a decline of 15 per cent in comparison with the corresponding month of last year. Placements were nearly 15 per cent higher than in February, but over 8 per cent less than during March, 1937. An increase in placements over March of last year in farming and services was more than offset by declines in logging, construction and maintenance and manufacturing. The changes in other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were manufacturing 491; logging 703; farming 1,207; construction and maintenance 1,079; trade 245 and services 3,125, of which 2,231 were of household workers. There were 3,130 men and 1,391 women placed in regular employment.

Manitoba

Employment opportunities, as indicated by orders received at employment offices in Manitoba during March, were over 29 per cent less favourable than in the preceding month, but nearly 19 per cent better than during the corresponding month of last year. There was a decrease of nearly 31 per cent in placements, when compared with February, but an increase of over 16 per cent in comparison with March, 1937. Except for a small decrease in logging and a nominal loss in construction and maintenance, all industrial divisions showed increases in placements over March of last year, the largest being in services. Placements by industrial divisions included logging 133; farming 726; construction and maintenance 187 and services 711, of which 602 were of household workers. Regular placements numbered 1,092 of men and 354 of women.

Saskatchewan

During the month of March, positions offered through employment offices in Saskatchewan were nearly 20 per cent higher than in February, but 41 per cent below March, 1937. There was an increase of nearly 17 per cent in placements when compared with the preceding month, but a loss of nearly 37 per cent when compared with the corresponding month of last year. All industrial divisions participated in the decline in placements from March, 1937, the most important losses being in farming, construction and maintenance and services. Placements in farming numbered 295 and in services 519. Of the latter 387 were of household workers. During the month 315 men and 294 women were placed in regular employment.

Alberta

The demand for workers, as indicated by orders received at employment offices in Alberta during March, was nearly 14 per cent higher than in the preceding month, but nearly 13 per cent below the corresponding month of last year. There was an increase of

*115 Placements effected by offices since closed.

over 8 per cent in placements when compared with February, but a decrease of nearly 13 per cent when compared with March, 1937. A decline in placements under construction and maintenance accounted for the loss for the province as a whole from March of last year, as a small gain in services was offset by declines in trade and logging. Minor changes only were reported in all other groups. Placements by industrial divisions included manufacturing 46; farming 529; transportation 77; construction and maintenance 310 and services 597, of which 395 were of household workers. During the month 699 men and 365 women were placed in regular employment.

British Columbia

There was a decline of nearly 34 per cent in the number of positions offered through employment offices in British Columbia during March when compared with the preceding month and of over 23 per cent in comparison with the corresponding month of last year. Slightly smaller percentages of loss were reported in placements under both comparisons. The decrease in placements from March, 1937, was largely due to a decline in logging, supplemented by smaller losses in services, farming and manufacturing. The only group to show any appreciable gain was the highway division of construction and maintenance. Placements by industrial divisions included manufacturing 52; logging 524; farming 112; construction and maintenance 1,691 and services 638, of which 447 were of household workers. There were 1,158 men and 221 women placed in regular employment during the month.

Movement of Labour

During the month of March, 1938, the offices of the Employment Service of Canada effected 14,769 placements in regular employment, 7,103 of which were of persons for whom the employment located was outside the immediate vicinity of the offices at which they were registered. Of the latter, 548 were granted the Employment Service reduced transportation rate, 527 travelling to centres within the same province as the despatching office and 21 to other provinces. The reduced transportation rate which is 2·5 cents per mile with a minimum fare of $4 is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Offices in Ontario issued 402 certificates at the reduced rate during March, all to provincial centres. At Port Arthur 218 bush workers, 18 mine employees, 9 power construction workers and 1 hotel cook secured certificates for transportation to various points within the Port Arthur zone. The Port Arthur zone, in addition, received one retail clerk from Sudbury and one foreman from Hamilton. For employment within their respective zones the Sudbury office transferred 73 bush workers and the Fort William office 2 teamsters. The North Bay zone was the destination of 2 labourers conveyed from Ottawa and of one labourer travelling from Toronto. Under the Dominion-Provincial Youth Training Plan there was a movement of labour during March which included the issue of 76 certificates, all of which were granted to persons desiring to attend student training classes in a variety of lines of work at various Ontario centres. Workers transported at the Employment Service reduced rate in Manitoba during March numbered 51, of whom 30 went to provincial employment and 21 outside the province. Provincially the Winnipeg office was instrumental in the despatch of 26 farm hands, one farm domestic, 2 bushmen and one mine cook to centres within its own zone. The transfers to other provinces were also from Winnipeg, and included 13 bush workers, 2 domestics, one miner and one café chef going to Port Arthur, 2 farm hands to Prince Albert and one farm hand each to the Saskatoon and Weyburn zones. In Saskatchewan during March one certificate was granted to a farm hand proceeding from Regina to North Battleford. The labour movement in Alberta during March originated at Edmonton, and involved the transfer of 90 persons to situations within the province. Travelling from Edmonton to employment within the territory covered by that city office were 53 transportation company employees, 9 mine workers, 6 sawmill workers, 5 bushmen, 5 farm hands, one farm domestic, 3 oil refinery workers, 3 fish company employees, 2 hotel cooks and one carpenter. From Edmonton, in addition, one farm hand and one oil driller proceeded to Calgary. Benefiting by the reduced transportation rate in British Columbia during March 4 persons were transported to employment within the province. These received their certificates at Vancouver, from which centre one miner and one farm housekeeper journeyed to Kamloops and one miner and one farm hand to positions in the Vancouver zone.

Of the 548 workers who took advantage of the Employment Service reduced transportation rate during March, 275 were conveyed by the Canadian National Railways, 269 by the Canadian Pacific Railway, 2 by the Northern Alberta Railway, and 2 by the Pacific Great Eastern Railway.

(4) Building Permits issued in Canada during March, 1938

According to returns tabulated by the Dominion Bureau of Statistics, the value of the building permits issued by 58 cities during March was $3,556,567. This was an increase of $1,194,610 or 50·6 per cent over the February total of $2,361,957, but a decrease of $3,110,672 or 46·7 per cent as compared with the aggregate of $6,667,239 reported for March, 1937, when the construction of several large industrial buildings had been authorized.

The building represented by the construction permits taken out in the first three months of the present year was valued at $7,764,625; this was lower than the total of $10,527,992 reported in the first quarter of 1937, but was higher than in 1936, also exceeding the 1934 and the 1933 figure. The cumulative total for this period in each of the years since 1931 has been below the average of $18,133,290 indicated in the months, January-March in the years, 1920-1937.

Some 50 cities furnished detailed statistics for March, 1938, showing that they had granted about 375 permits for dwellings valued at more than $1,100,000 and more than 1,700 permits for other buildings estimated to cost approximately $2,200,000. During February, authority was given for the erection of about 125 dwellings and over 1,000 other buildings, estimated to cost approximately $700,000 and $1,600,000, respectively.

Nova Scotia, Quebec, Ontario, Saskatchewan, Alberta and British Columbia reported increases in the value of the building authorized during March, 1938, as compared with the preceding month. The greatest gains were those of $114,670 or 165 per cent in Nova Scotia, $173,129 or 26·8 per cent in British Columbia, and $517,483 or 127·2 per cent in Quebec. There were small reductions in the remaining provinces.

As compared with March, 1937, Nova Scotia, New Brunswick, Quebec, Manitoba, Saskatchewan and Alberta recorded increases; in this comparison also, the most pronounced gains were in Nova Scotia and Quebec, where the authorizations were higher by $102,045, or 124·2 per cent, and $284,021 or 44·4 per cent, respectively. Prince Edward Island, Ontario and British Columbia showed reductions as compared with March of last year, that of $2,542,326 or 65·1 per cent in Ontario being greatest.

Of the larger cities, Montreal and Toronto reported increases as compared with the preceding month and with March, 1937; in Winnipeg there was a gain over the same month of last year, but a loss as compared with February, 1938, while the reverse was the case in Vancouver, where the total exceeded that for the preceding month, but was lower than in March, 1937. Of the other centres, Halifax, New Glasgow, Sydney, Quebec, Sherbrooke, Brantford, Chatham, Fort William, Kingston, Niagara Falls, Oshawa, Owen Sound, Peterborough, St. Catharines, Sarnia, Welland, Riverside, Woodstock, Brandon, St. Boniface, Regina, Saskatoon, Edmonton, Lethbridge, Kamloops, Nanaimo, New Westminster and North Vancouver reported higher totals than in either February, 1938, or March, 1937.

The following table gives the value of the building authorized by 58 cities during March and in the first quarter of each year since 1928, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first quarter of the same years are also given (1926=100).

Year	Value of permits issued in March	Value of permits issued in first quarter	Indexes of value of permits issued in first quarter (1926=100)	Average indexes of wholesale prices of building materials in first quarter (1926=100)
	$	$		
1938.....	3,556,567	7,764,625	34·5	91·3
1937.....	6,667,239	10,527,992	46·8	92·5
1936.....	2,368,537	5,592,471	24·9	84·0
1935.....	4,022,755	8,507,270	37·8	81·4
1934.....	1,109,085	2,710,999	12·1	82·2
1933.....	953,966	3,065,821	13·6	75·2
1932.....	3,396,729	9,453,012	42·0	79·3
1931.....	9,948,979	24,746,094	110·0	83·7
1930.....	13,356,787	29,493,262	131·1	96·7
1929.....	24,068,018	42,950,228	190·9	99·2
1928.....	15,128,413	33,163,338	147·4	95·5

The value of the building authorized in the first three months of 1938 was lower by 26·2 p.c. than in the same period of 1937, and was also lower than in the first quarter of 1935; it was, however, higher than in the same period in 1936, 1934 or 1933. As already stated, the totals for the months January-March in the years since 1931 have been much below the average for those months in the last eighteen years. The index numbers of wholesale prices of building materials in the last three months, while slightly lower than in the same quarter of 1937, were higher than in the first three months of other years since 1931. However, wholesale prices in this period have also been considerably lower than preceding years of the record.

The accompanying table gives the value of the building permits issued by 58 cities in February and March, 1938, and March, 1937. The 35 cities for which statistics are available since 1910 are marked thus *.

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF APRIL, 1938

Reports of the Superintendents of the Employment Service

THE employment situation at the end of April, 1938, was reported by the superintendents of the Employment Service of Canada to be as follows:—

In some parts of the Maritimes wet weather had retarded spring ploughing and planting, but in other sections orchard spraying had become quite general and early land had been planted to potatoes and grain. Pulpwood cutting, river driving, the sawing of barrel stock and pulp wood were the chief lines of activity in logging. Fishing was good, although prices offered for herring and scallops were disappointing to the fishermen. Cod, haddock, halibut and gaspereaux were plentiful. Coal mines in the New Glasgow area operated from three to six days per week, while those in Cape Breton and vicinity worked from one to five days. Manufacturing was only fair, the closing down of several concerns in Saint John having seriously affected a large number of men and women there. No idleness, however, was reported by the iron and steel companies. All buildings and dwellings under construction were progressing rapidly and highway construction had commenced. Transportation was brisk, although winter activities at the Port of Saint John had ceased and this had affected a large number of train crews. Trade was good. In the Women's Division a shortage of experienced domestic help was in evidence. At Sydney, the first class of the Household Training School under the Dominion-Provincial Youth Training Plan had completed its course and all the graduates had secured satisfactory positions. Keen interest had been taken in this project and a second class was being recruited.

Except for increased activity during the sugaring season, the demand for farm help in the Province of Quebec was not much greater than last month's. Where river driving was

in progress, many experienced river men found employment, but in some districts where operations had been delayed due to the low water level, logging was quiet. Mining was somewhat slack. Manufacturing was as follows: At Bagotville, Chicoutimi, La Tuque, Matane and Three Rivers, greatly reduced output from the mills; at Hull, match, toy and paper factories, very busy; at Montreal, metals, clothing, boots and shoes, active, important demands also noted for railway workers; at Quebec, leather and clothing very quiet; at Sherbrooke, slackening in the metal industry, also in cottons, where marked staff reductions had taken place. Silk and woollen mills, however, were active, with high production. The spring and summer program of road and building construction was not yet fully underway, but repairs to dwellings, the erection of smaller buildings, as well as some road maintenance work furnished employment for a number of men. Construction of the Val d'Or-Rouyn line of the Canadian National Railways had not yet been resumed. Navigation had opened and ports were gradually becoming busier. Trade was generally satisfactory, although slight contractions were registered at La Tuque, following the closing of the pulp mill and at Quebec and Montreal, where the usual after-Easter slackness prevailed. In the Women's Division many vacancies for household, hotel and restaurant workers were listed, and in some sections suitable female applicants were scarce.

Vacancies for farm help in Ontario were fewer than usual, chiefly due to unfavourable weather conditions. Except for river driving, logging was quiet and mining, also, was slack. Employment in manufacturing remained practically stationary, many plants working only part time with reduced staffs; nevertheless in the iron and steel group some improvement was reported, but where extra hands were required only former employees were being rehired. A greater volume of work was gradually getting underway in building construction, but this was not, as yet, adequate to absorb all skilled hands. Highway construction also was more active. Transportation and storage were quiet and trade was fair. In the Women's Division, cooks-general were sought after and experienced applicants difficult to obtain; however, very few calls were listed for waitresses, many of whom were available. Coloured help also was more in demand. At Toronto, the Homecraft Training graduates' second class had all been placed and very good reports received as to their efficiency. As a result of this, it is evident that a better trained class of workers will greatly help the domestic problem. In casual work many women were employed the greater share being for spring cleaning in private homes.

Fewer placements were made in farming in the Prairie Provinces on account of inclement weather, although there was a good demand from sheep ranchers for experienced men for the lambing season. Logging was slightly more active, but mining was very quiet, except for development work at the new mines in the Drumheller district. Increased activity, also, was noted in the Taber oil fields. Manufacturing was unchanged. No outstanding building projects were underway and the bulk of permits issued was for repair and alteration jobs. At Moose Jaw extra railway gangs had been taken on, but no new hands were being hired. A decided improvement for day workers was noted in the Women's Division with placements and orders in domestic service remaining steady.

Nearly all necessary help for spring work on farms in British Columbia had been hired, so that the demand for farm labour had fallen off; sheep shearing, however, was in progress and experienced men found employment in that line. Logging was quiet. Sawmills were operating fairly steadily, but single mills were slack. Mining was active, particularly on gold properties. Manufacturing was unchanged. Conditions in building construction, on the whole, were undoubtedly better than for some time past, but not sufficiently so as to make any appreciable difference to the number of unemployed workers, both skilled and unskilled. Construction of small houses and repairs, also, was stimulated by the receiving of beneficial help from the Domestic Housing Scheme, thereby giving employment to a large number of building tradesmen. At Prince George, considerable work was being done in clearing and enlarging the new landing field at the local airport. Drydock and shipyards were actitve at Prince Rupert and an excellent season in this industry, likewise, was reported by Victoria. Shipping and longshoring, however, were quiet at Prince Rupert and Vancouver. Trade was fair. Casual work in the Women's Department was slack, but experienced help was lacking to fill all orders which were listed for cooks-general.

The Home Office (Great Britain) has recently issued its quarterly bulletin entitled, "How Factory Accidents Happen," which contains practical descriptions of certain types of accidents notified to inspectors of factories.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, April, 1938, summarized the employment situation as follows:—

Employment showed a further improvement in March. It improved in building and public works contracting, agriculture, tailoring and dressmaking, the motor vehicle, cycle and aircraft industry, shipbuilding and ship-repairing, the distributive trades, and hotel and boarding house service. On the other hand, employment declined in coal mining, the iron and steel industry, metal goods manufacture, and most of the textile trades.

It is estimated that at March 14, 1938, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,380,000. This was 56,000 more than at February 14, 1938. On a comparable basis there was an increase of about 16,000 as compared with March 15, 1937.

Among persons, aged 16-64, insured under the general scheme of unemployment insurance (including the special schemes for the banking and insurance industries), the percentage unemployed in Great Britain and Northern Ireland at March 14, 1938, was 12·9 as compared with 13·2 at February 14, 1938. For persons aged 16-64 insured under the agricultural scheme the percentages were 6·4 at March 14, 1938, and 8·4 at February 14, 1938. For both schemes combined the percentage unemployed at March 14, 1938, was 12·6 as compared with 13·0 at February 14, 1938. On a comparable basis there was an increase at March 14, 1938, as compared with March 15, 1937, of about 1·7 in the percentage unemployed among persons within the general scheme, and of about 1·4 among persons within the agricultural scheme. For the two schemes combined the percentage rose by about 1·6 between these dates.

At March 14, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,350,121 wholly unemployed, 331,247 temporarily stopped, and 67,613 normally in casual employment, making a total of 1,748,981; this was 61,440 less than at February 14, 1938. On a comparable basis there was an increase of about 202,000 as compared with March 15, 1937.

The total of 1,748,981 persons on the registers at March 14, 1938, included 994,659 persons with claims admitted for insurance benefit, 549,315 with applications authorized for unemployment allowances, 48,802 persons with applications for insurance benefit or unemployment allowances under consideration, and 156,205 other persons, of whom 33,863 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at March 14, 1938, was 1,844,583, as compared with 1,907,795 at February 14, 1938. On a comparable basis there was an increase at March 14, 1938, of about 224,000 as compared with March 15, 1937.

United States

In an official press release dated April 23, 1938, United States Secretary of Labor, Miss Frances Perkins, announced that non-agricultural employment showed a further slight decline in March with 50,000 fewer workers being employed.

"Ordinarily between 200,000 and 300,000 workers go back into industry at this season," Miss Perkins said. "Compared with March, 1937, it is estimated that there are about 2,450,000 fewer people at work on non-agricultural jobs, excluding W.P.A. and other Federal and State emergency projects."

Employment in manufacturing industries decreased contra-seasonally in March, as about 40,000 wage earners were laid off. Weekly factory pay rolls showed a gain of $200,000, indicating some improvement in plant operating schedules. Factory employment was about 20 per cent below the level of March of last year and factory pay rolls were down by about 27 per cent.

Of the 89 manufacturing industries for which the Bureau of Labor Statistics receives reports, 53 showed declines in employment in March, and 45 had smaller weekly pay rolls. Employment continued to decline in the heavy industries, except for some of the factories supplying building materials. The industries manufacturing durable goods, as a group, employed fewer wage earners than at any time since January, 1935. Their forces were 27 per cent smaller than at the peak of May, 1937.

Other basic industries in which working forces were reduced, in contrast to a normal employment increase in March, were Class I railroads, which laid off nearly 12,000 men; bituminous coal mines, which laid off 11,000 workers; and metal mines, which reduced their forces for the sixth consecutive month. Anthracite mines had fewer workers than in February, but their pay rolls were larger. Public utilities reported small seasonal reductions in

employment, and wholesale firms cut their staffs by 1·5 per cent, or about 21,000 workers. Brokerage houses again reduced the number of their employees. Retail stores and dyeing and cleaning firms reported increases in employment somewhat smaller than is usual for this time of the year, while in the other service industries there were small declines.

Private building contractors, instead of taking on more men as is usual in March, reduced their forces by 1 per cent, particularly in the northern and eastern States. The industries supplying building materials had more employees than in February. Public construction jobs financed from P.W.A. or regular federal funds employed more workers.

Reports on employment by States indicate that declines were rather widespread, with 32 States and the District of Columbia showing smaller employment. Practically all of the larger industrial States had fewer persons at work in March in industries reporting to the Bureau. In Massachusetts, Ohio, and Michigan employment reductions were approximately 1 per cent, in Illinois 2 per cent, and in Pennsylvania and New Jersey about one-half of 1 per cent. In New York there was little change. Gains were substantial in Washington and Oregon, as the furniture and lumber industries became more active, and in some of the southern States.

Public Employment.—As employment in industry declined during the month of March, the number of persons engaged in most of the programs financed wholly or partially from Federal funds increased substantially. The most marked increase (15 per cent) occurred on projects operated by the Works Progress Administration, including work projects of the National Youth Administration and Student Aid. Planned to expand as unemployment in industry increases, employment on these projects reached the highest level (approximately 2,900,000) since December, 1936. Pay-roll disbursements amounted to $121,700,000. Since virtually no new allotments were made for Federal projects under the Works Program, only a moderate increase (4 per cent) in employment was reported on these projects, and pay rolls declined slightly. Compared with March, 1937, employment and pay-roll disbursements on Federal projects were down by 39 and 42 per cent, respectively.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher wages shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the

work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister.

The new Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for over time and as to the proper classification of any work for the purpose of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wage officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada unless the Minister of the Department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada;

GROUP "A" CONTRACTS

(1) Works of Construction, Remodelling, Repair or Demolition

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

DEPARTMENT OF FISHERIES

Supply and installation of a new engine in the launch *Clupea*. Name of contractors, Vivian Engine Works, Ltd., Vancouver, B.C. Date of contract, April 12, 1938. Amount of contract, $5,920. A fair wages schedule was included in the contract as follows:—

	Per hour
Ships—Fitters	$0 84
Ships—Fitters' helpers	0 63
Ships—Carpenters	0 75
Labourers	0 50

DEPARTMENT OF NATIONAL DEFENCE

Construction of a building for the Chief Inspector of Arms and Ammunition, Quebec, P.Q. Name of contractor, Mr. Emile Frenette, Quebec, P.Q. Date of contract, April 1, 1938. Amount of contract, $128,475. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 60
Blacksmiths	0 60
Brick and hollow tile layers	0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters	0 60
Cement and concrete mixer operator:	
Steam	0 60
Gasoline or electric	0 50
Cement finishers	0 55
Compressor operator (Gasoline or electric)	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 65
Drivers	0 40
Engineers, operating, steam:	
Single or double drums	0 60
Three or more drums	0 70
Engineers on steel erection	0 75
Electricians	0 65
Firemen—Stationery	0 45
Hoist operators (gasoline or electric)	0 50
Labourers	0 40
Lathers—	
Metal	0 65
Wood	0 55
Machinists	0 65
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Ornamental iron workers	0 60
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 65
Roofers, felt and gravel	0 45
Rodmen—Reinforced steel	0 50
Sheet metal workers	0 65
Shovel operators—Gasoline	0 85
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Stonecutters	0 70
Tile setters—Ornamental	0 80
Tile setters' helpers (all men assigned to help tradesmen)	0 45
Welders on steel erection	0 75
Watchman	0 35
Structural steel workers	0 75

Completion of observation towers on hangars A.1 and A.3 at the R.C.A.F. Station, Trenton, Ont. Name of contractors, L. G. Ogilvie & Co., Ltd., Montreal, P.Q. Date of contract, April 11, 1938. Amount of contract, $7,090. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters	0 70
Engineers on steel erection	0 80
Electricians	0 70
Labourers	0 40
Painters and glaziers	0 60
Plasterers	0 80
Plumbers and steamfitters	0 75
Structural steel workers	0 80
Sheet metal workers	0 70
Welders on steel erection	0 80
Watchman	0 35

DEPARTMENT OF PUBLIC WORKS

Construction of a public building at L'Assomption, P.Q. Name of contractors, Messrs. Heroux & Robert, Ltée., Montreal, P.Q. Date of contract, April 26, 1938. Amount of contract, $16,652 and unit prices for any additional work. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Cement and concrete mixer operator:	
Steam	0 55
Gasoline or electric	0 50
Cement finishers	0 55
Carpenters and joiners	0 70
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Driver	0 40
Electricians (inside wiremen)	0 75
Lathers, metal	0 75
Labourers	0 40
Motor truck driver	0 40

	Per hour
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
Ornamental iron workers	0 66
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Painters and glaziers	0 66

Roofers, felt and gravel	0 45
Stone masons	0 80
Stonecutters (on the job)	0 80
Structural steel workers	0 65
Sheet metal workers	0 65
Watchmen	0 30

Construction of a wharf, approaches and breakwater repairs at William Head Quarantine Station, Nanaimo District, B.C. Name of contractors, Victoria Pile Driving Co., Ltd., Victoria, B.C. Date of contract, April 8, 1938. Amount of contract, approximately $16,392.13. A fair wages schedule was included in the contract as follows:—

	Per hour
Piledriver foreman	$1 25
Piledriver engineer	1 12½
Piledriver men	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourers	0 45
Watchman	0 45

Construction of a public building at Rogersville, N.B. Name of contractor, Mr. Joseph S. Roy, Moncton, N.B. Date of contract, April 4, 1938. Amount of contract, $9,500 and unit prices for any additional work. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 70
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 35
Cement and concrete mixer operator:	
Steam	0 55
Gasoline or electric	0 40
Cement finishers	0 50
Carpenters and joiners	0 50
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Driver	0 30
Engineers on steel erection	0 75
Electricians (inside wiremen)	0 55
Lathers, metal	0 50
Labourers	0 30
Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
Ornamental iron workers	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 35
Painters and glaziers	0 50
Plumbers and steamfitters	0 55
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 35
Roofers, felt and gravel	0 35
Stonemasons	0 70
Stonemasons' helpers (mixing and tempering mortar)	0 35
Stonecutters (granite, sandstone, limestone)	0 60
Structural steel workers	0 75
Sheet metal workers	0 55
Watchman	0 25

Construction of a public building at Scotstown, P.Q. Name of contractor, Mr. Alcide Blondeau, Stanstead, P.Q. Date of contract, March 26, 1938. Amount of contract, $17,121 and unit prices for any additional work. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 70
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 35
Cement and concrete mixer operator (gasoline or electric)	0 40
Cement finishers	0 50
Carpenters and joiners	0 50
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Driver	0 30
Electricians (inside wiremen)	0 55
Lathers, metal	0 50

Hammer operator	0 70
Apprentices to fitters, machinists and sheet metal workers only; 16 to 21 years of age:	
1st year	0 25
2nd year	0 30
3rd year	0 40

NOTE.—Only one helper to be employed to each journeyman. Not more than one apprentice to be employed to each five journeymen.

Major reconditioning of Fairchild 71 Monoplane 633. Name of contractors, Wells Air Harbour, Lulu Island, B.C. Date of contract, April 26, 1938. Amount of contract, $4,450.51. The preceding fair wages schedule was also included in this contract.

System of Voluntary Apprenticeship Introduced in Virginia

On April 1, 1938, Virginia's Governor James H. Price signed a bill, which passed the Legislature March 12, 1938, providing for a system of voluntary apprenticeship.

The Act makes the Commissioner of Labour responsible for its administration. It provides for the appointment by the Governor of an apprenticeship council consisting of three representatives each from employer and employee organizations respectively. The State Supervisor of Trade and Industrial Education and the Commissioner of Labor are ex-officio members of the Council without vote. The Council is to advise the Commissioner on all matters relating to the development of an adequate voluntary apprenticeship system within the State.

The Apprenticeship Council, in co-operation with local and State joint apprenticeship committees, is authorized to determine standards for apprentice agreements not lower than those established by the Act; to approve apprentice agreements which meet the standards established by the Act; to terminate apprentice agreements in accordance with the provisions of the Act; to keep a record of apprentice agreements; to issue certificates of journeymanship upon completion of apprenticeship; and to appoint local and State joint trade apprenticeship committees. The Act stipulates that the administration and supervision of related and supplemental instruction for apprentices, co-ordination of instruction with job experiences, and the selection and training of teachers and co-ordinators for such instruction is the responsibility of State and local boards responsible for vocational education.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated. It may be stated that this has been the practice in the past.

Manufacturing: Textiles and Clothing

TORONTO, ONTARIO.—CERTAIN MANUFACTURERS OF DRESSES AND THE INTERNATIONAL LADIES' GARMENT WORKERS' UNION, LOCAL NO. 72 (DRESSMAKERS).

This agreement, which covers the manufacture of dresses and associated articles, is to be in effect from January, 1938, to January 20, 1940, or for a further two years if no notice is given. At the end of the first year, however, if the cost of living has increased, the wage scale may be increased by mutual consent or by decision of the arbitration board.

The employers recognize the union and will employ only union members. No worker after the first week's trial may be discharged without sufficient cause and without the consent of the union.

Hours: for the year 1938, 8 per day, 4 on Saturdays, a 44 hour week; from January 20, 1939, 8 per day on first five days of the week, a 40 hour week. The reduction in hours from 44 to 40 hours per week shall not mean any reduction in wages.

Overtime: to be worked only with the permission of the union and then only if no additional union workers are available or no room or facility in the factory for such additional help. Overtime to be paid at time and one quarter.

Minimum wage rates: full fledged cutters $30 per week; cutters now receiving $25 and less than scale to receive an increase of $2 per week; cutters now receiving below $25, an increase of $3 per week; pressers to be paid 23 to 25 cents per dress, 30 cents for suits, with 25 per cent extra for samples; operators to be paid on a basis which will yield to at least half of the operating staff of the employer and to any medium operator $28.60 for a full working week, and in shops where piece work is the system, when half of the operating staff fail to earn $28.60, the piece work prices of such employer will be readjusted to bring them up to this standard, subject to the decision of the board of arbitration; finishers to be paid a minimum of $15.50 per week for either time or piece work; drapers to be paid a minimum of $19 per week, and in any event each draper was to receive an increase of $1 at the time the agreement went into effect.

A shop chairman and price committee to be chosen by the employees in each shop who will settle piece work prices with the employer, subject to the approval of the union.

Every garment with which the employer deals either directly or indirectly is to be completely manufactured in the inside factory and on the premises of such employer.

In slack periods, the work in the shop to be divided as equally as possible among all the employees properly engaged in the work.

For the purpose of settling any disputes, an arbitration board to be formed, and if necessary a chairman mutually agreed upon included. The decision of this board to be binding.

Manufacturing: Printing and Publishing

MONTREAL, QUEBEC.—PUBLISHERS OF FRENCH NEWSPAPERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL NO. 145 (JACQUES CARTIER LOCAL).

Agreement to be in effect from January 1, 1938, to December 31, 1939.

Only union members to be employed.

Hours: for the year 1938, 44 per week; for the year 1939, 40 hours per week.

Overtime: time and one-half before midnight and double time after midnight for evening papers; time and one-half until noon and double time after noon for morning newspapers. Work on eight specified holidays, double time.

Weekly wage rates for day work: for the year 1938, $44 per week of 44 hours; for the year 1939, $40 per week of 40 hours. For night work, 15 per cent extra to be paid.

Wages for apprentices: first and second years at the discretion of the employer, thereafter from 37.21 cents per hour during first six months of third year to 86 cents during second half of sixth year. Provision is made for extra pay for work on morning newspapers, up to $1 per week extra.

One apprentice allowed for the first four journeymen or a fraction of four and one for each additional five journeymen.

MONTREAL, OTTAWA, TORONTO, HAMILTON AND LONDON.—CANADIAN LITHOGRAPHERS' ASSOCIATION AND THE AMALGAMATED LITHOGRAPHERS OF AMERICA, LOCALS NOS. 27 (MONTREAL), 40 (OTTAWA), 12 (TORONTO), 42 (HAMILTON), AND 47 (LONDON).

Agreement to be in effect from December 1, 1937 (except for wage scales which are to be in effect from March 1, 1938) and to remain in effect until November 30, 1939, and thereafter from year to year subject to notice. (Most of the provisions of this agreement were made obligatory throughout the province of Quebec under the Workmen's Wages Act as noted in the April issue of the LABOUR GAZETTE).

The agreement includes persons engaged in the process of lithography, by lithographic, planographic, photolithographic or gelatine processes, whether direct or offset, and whether in trade plants, private, industrial or any other establishments.

Hours: for day work 8 per day, 5 on Saturdays, or 9 per day from Monday to Friday, a 45 hour week; for night work, 9 hours per night for 5 nights, a 45 hour week.

Overtime: all time worked before or after regular hours of the shop, time and one half for first three hours of overtime on Monday to

Friday inclusive; all other overtime, including work on Saturday, Sunday and on eight specified holidays (except in the English shops of Montreal where there are seven holidays), double time.

No piece work to be done in any shop.

Minimum weekly wage rates for day work; for work on different sizes of presses and whether one, two or three colours, rates vary from $27 for the smallest size presses up to and including 12 x 19 (one colour) to $60.75 for the fifth size class (three colours), and $58.50 for the largest size presses (two colours); presses for lithographing on tin and for direct rotary presses, $41.85; for flat bed presses (direct process), $38.25; for press feeders, from $14.40 to $17.10 for smallest presses to $17.10 to $24.75 for largest size presses (one colour), and from $15.30 to $19.35 for smallest presses to $18 to $27 for largest size press (two colours); for press helpers, $13.50; for artists (reproducers only) from $23.40 for vacuum frame and contact negative operators to $54 for process (colour correctors), with $45 for commercial artists, general letterers and engravers. All employees on night shifts to be paid 15 per cent higher than rate for day work. Handicapped employees may work for lower wage rates, the rates to be established by both parties to the agreement.

One apprentice allowed for every four journeymen or fraction thereof in the press room and one apprentice for every five journeymen or fraction thereof in the art and transfer departments. However, apprentices employed in any shop at October 22, 1937, may continue their apprenticeship even if the proportion of apprentices exceeds the above.

Minimum wages for apprentices for day work: in press-room, from $17.10 during first six months to $33.75 during second half of fourth year; in all departments except press-room, from $9 during first six months to $24.75 during second half of fifth year; for improvers, from $27.45 during first six months to $35.55 during second half of second year. For night work, 15 per cent above day scale to be paid.

In shops where the prevailing or standard number of weekly hours of work is less or the wage rate higher than established in this agreement, such hours shall not be increased nor such higher wage rates reduced during the life of this agreement.

A labour committee made up of an equal number of representatives of the employers and employees to be appointed to implement and interpret the conditions of the agreement.

Manufacturing: Miscellaneous Products

TORONTO, ONT.—CERTAIN JEWELLERY MANUFACTURERS AND THE INTERNATIONAL JEWELLERY WORKERS' UNION, NO. 33.

Agreement reached at time of the strike which was reported in the LABOUR GAZETTE, November, 1937, page 1185. Agreement to be in effect from October 15, 1937, to October 1, 1938, but will continue to October 1, 1939, if a code is signed by October 1, 1938.

No discrimination to be shown against any employees for their union activities. Employees reserve the right to refuse to work with any worker who is not a union member.

Hours: 8 per day, 4 on Saturdays, a 44-hour week, except in June and July when there shall be no work on Saturdays, a 40-hour week.

Overtime: no overtime during June and July except with special permit from the advisory board. During the other months, except December, overtime restricted to 13 hours in a week, 200 hours per year. Overtime regulations for December to be determined by the advisory board. Payment for overtime was to be time and one-quarter until December 31, 1937; from January 1, 1938, time and one-third is to be paid.

Minimum wage rates: journeymen working on gold or platinum cast work or on jewellery in which gold is a part, 70 cents per hour until October 1, 1938, and 75 cents thereafter; journeymen working on silver and base metals, 62½ cents per hour; journeymen working full time on hand-made platinum work, $1 per hour; setters and engravers on time work, 82½ cents per hour until October 1, 1938, and 87½ cents thereafter. Minimum prices are included for setters and engravers working on piece work. All journeymen time workers working on platinum and gold who before this agreement received more than 62½ cents per hour, notwithstanding any other provisions of the agreement, were to receive a flat increase of 7½ cents per hour October 15, 1937, and a further increase of 5 cents per hour October 1, 1938. The advisory board may permit an employee lacking expertness through physical disabilities or an extended period of unemployment, to work for a lower wage rate for a limited period, but in no case may more than 25 per cent of the employees of a shop be so paid.

Apprentices are limited to one apprentice to each four journeymen.

Wages for apprentices: during first six months $8 per week, with increases each six months until for second half of fifth year, the wage is to be $22.50 for apprentice jewellers and engravers, $25 for apprentice setters and $28 for apprentice polishers, press hands and casters.

No work to be taken by an employee to be done outside the employer's workshop.

During temporary slack periods, the work to be distributed fairly amongst the employees competent in the particular work.

A permanent advisory board to be formed for the settlement of any disputes.

Construction: Buildings and Structures

OTTAWA, ONTARIO.—OTTAWA BRANCH OF THE ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL NO. 93.

Agreement in effect from May 1, 1937, to April 30, 1939, and thereafter from year to year, subject to notice.

Only union members to be employed if available. Union representatives may visit all jobs to confer with the shop steward.

An industrial council made up of five members of each party and an impartial chairman chosen by them is to be formed for the purpose of settling any disputes. The decision of this council is binding on both parties.

Other clauses of this agreement which include a 44-hour week and a minimum wage of 85 cents beginning May 1, 1938, were noted in the LABOUR GAZETTE, December, 1937, page 1389, in the summary of the Order in Council making the wages and hours schedule binding under the Industrial Standards Act of Ontario.

TORONTO, ONT.—GENERAL CONTRACTORS' SECTION OF THE BUILDERS' EXCHANGE AND CONSTRUCTION ASSOCIATION OF TORONTO, AND THE BRICKLAYERS', MASONS' AND PLASTERERS' INTERNATIONAL UNION, LOCALS NO. 2 (BRICKLAYERS) AND NO. 26 (STONEMASONS).

Agreement which includes the city of Toronto and within 10 miles of its limits, to be in effect from April 1, 1938, to March 1, 1939, and thereafter from year to year, subject to notice. On receipt of such notice, the joint arbitration committee will meet and come to a decision.

Only union members to be employed and the union agrees to give preference in supplying men to the employers, parties to the agreement.

Hours: 8 per day from Monday to Friday, a 40-hour week. When work cannot be done during the regular working day, it may be done as a night shift of not more than 8 hours at the regular wage rate. When two or three shifts per day are worked, they may be worked between 1 a.m. Monday and 8 a.m. Saturday, and on such shifts the day shift to be paid at straight time and the second and third shifts at time and one-seventh.

Overtime to be paid at time and one-half. Work on Saturdays, Sundays and on seven specified holidays only to be done when most necessary, and such work to be paid at double time. However, when required for the pouring of concrete on Saturdays, bricklayers and stonemasons may work, being paid straight time for the morning and time and one-half for Saturday afternoon and evening.

Minimum wage rate for journeymen bricklayers and stonemasons: $1.05 per hour (an increase of 15 cents per hour over the previous rate).

For apprentices, wages and conditions are to be as stipulated by the Ontario Apprenticeship Board.

A joint arbitration committee to be immediately appointed, who shall meet on request and whose decision will be binding on both parties. No strike to occur pending such decision.

TORONTO, ONT.—CERTAIN TERRAZZO CONTRACTORS AND THE BRICKLAYERS', MASONS' AND PLASTERERS' INTERNATIONAL UNION NO. 2 (TERRAZZO MECHANICS).

Agreement which covers the city of Toronto and within 10 miles of its limits to be in effect from December 1, 1937, to March 31, 1939, and thereafter from year to year, subject to notice. Upon notice being given by December 1, negotiations for a new agreement to start January 1, and if necessary referred to a joint arbitration committee.

Only union members to be employed and the union to give preference in supplying men to contractors who are parties to the agreement.

Hours: 8 per day, from Monday to Friday, 40 per week. Eight hours' pay for 7 hours' work where two or three shifts are worked and where the overtime shifts equal at least two-thirds of the regular shift. Where work cannot be done during the day, it may be done at night at regular wage rates. When work is required for the pouring of concrete on Saturdays, it may be done for straight time pay on Saturday morning and time and one-half after noon.

Overtime: time and one-half; work on Saturdays, Sundays and on eight specified holidays only in emergencies and to be paid at double time.

Wages per hour for terrazzo mechanics: 80 cents from December 1, 1937, to February 28, 1938; 85 cents from March 1, 1938, to May 31, 1938; 90 cents from June 1, 1938, to March 1, 1939.

A joint arbitration committee to be immediately appointed, who shall meet upon request whenever required. No stoppage of work to take place until the matter in dispute has been referred to this committee. In case of any dispute which cannot be settled by the contractor and the business agent of the union, or in case of violation of the agreement, the dispute will be referred to a conciliation committee.

Transportation and Public Utilities: Street and Electric Railways

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THE MOTORMEN, CONDUCTORS AND BUSMEN IN THEIR EMPLOY.

Agreement made December 10, 1937, after further negotiations had taken place following the report of the board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, October, 1937, page 1062 and December, page 1303). The agreement is retroactive to May 1, 1937, and remains in effect to April 30, 1938, and thereafter from year to year subject to notice.

Neither the Company nor the employees to discriminate against any employee for being or not being a member of any labour organization.

Hours: all runs posted for selection to conform as nearly as possible to a 7-hour day, and on such runs, employees to be paid for a minimum time of 6 hours and 45 minutes. At least 60 per cent of the total runs to be completed within 11 hours and all within 13 hours. Except in cases of emergency, no men permitted to work more than six times the maximum run in any week.

Overtime to be paid for platform time in excess of 7 hours and 20 minutes. (Reporting time, pull-in time and box time in all cases is paid at regular rates.) Overtime pay is time and one-half.

Wages per hour for motormen and conductors and busmen: for two men car operators on any day except Sunday, 45 cents for first six months, 48 cents for second six months, 52 cents for second year, 54½ cents after two years; for one man car operators on any day except Sunday, 5 cents per hour over the two men car rate; for work on Sundays, 5 cents per hour over the rates for other days. (These rates are from 1½ to 2½ cents higher than in the previous agreement.) Extra motormen, conductors and busmen reporting regularly at the Company's stated time every day during the week to be paid a minimum of $18 per week.

Vacation: each motorman, conductor and bus driver having twelve months or more service with the Company by May 1 of any year, and who has worked a minimum of 193 days in the twelve months preceding May 1 of that year is entitled to a vacation with pay of from 8 to 12 days varying with the number of days worked in the preceding year. (The previous agreement provided for the annual vacation only after five years' service.)

Employees to be given free transportation on the Company's lines.

Seniority to govern the selection of runs. When employees are laid off because of slack work, the junior men to be laid off first.

Any dispute which cannot be settled between the Company and employees will be considered by officials of the Company with a grievance committee of the employees.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE MECHANICAL DEPARTMENT.

Agreement made December 10, 1937, after further negotiations had taken place following the report of the board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, October, 1937, page 1062 and December, page 1303). The agreement is retroactive to May 1, 1937, and is to be in effect to April 30, 1938, and thereafter from year to year subject to notice.

Hours: for car house section, 8 per day, 88 in two weeks for mechanics and 8 per day, 48 per week for other employees; for shops section, 8 per day, 44 per week. Shifts to be rotated in the car house so that no man will work more than three months on one shift.

Overtime and work on Sundays and Dominion holidays, time and one-half; overtime pay for work over 16 consecutive hours, double time.

Wages per hour: machinists, blacksmiths, welders, armature winders, carpenters, painters, sheet metal workers, pipe fitters, 67½ cents from May 1, 1937, to October 31, 1937, and 68 cents from November 1, 1937; machinists' helpers and drill pressmen, blacksmiths' helpers, armature winders' helpers, from 41 cents during first six months to 50 cents after one year; car wiremen and air brake repairmen and inspection, 59 cents; upholsterers, 55½ cents; electric repairmen (bench work) and electrical inspection and light repairmen, 53 to 55½ cents; pitmen leaders, from 47½ cents first six months to 53 cents after one year; pitmen, from 43 cents first three months to 46½ cents after 6 months; babbittmen, from 41 cents first six months to 51½ cents after one year; wheelmen and brush hands, 51½ cents; fendermen, from 41 cents first six months to 44 cents after one year; motor repairmen of box type motors, from 43 cents first three months to 46½ cents thereafter; car cleaners, sweepers, stove tenders and any unskilled help (with established seniority), 41 cents; mechanics' apprentices from 26½ cents during first six months to 62 cents in second half of fifth year.

Seniority to govern in the department.

Apprenticeship is for five years, and apprentices to start between the ages of 16 and 21 years.

Other provisions of this agreement relating to union membership, vacation, free transportation, seniority and settlement of disputes are similar to those in the agreement summarized above for the motormen, conductors and busmen employed by this Company.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE TRACK DEPARTMENT.

Agreement made December 10, 1937, after further negotiations had taken place following the report of the board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, October, 1937, page 1062 and December, page 1303). The agreement is retroactive to May 1, 1937, and is to be in effect to April 30, 1938, and thereafter from year to year subject to notice.

Hours: for day work, 8 per day, a 48 hour week from May 1 to September 30, and 8 per day, 4 on Saturdays, a 44 hour week from October 1 to April 30; for night work and shift work, 8 hours per shift, a 48 hour week.

Overtime: time and one-half for work over 8 hours per day or 48 per week and double time for work over 16 consecutive hours; time and one-half for work on Sundays and Dominion holidays except when regular shift work; men working shifts on Sundays or holidays to be given a day off in seven.

Wages per hour: leading trackmen 59 cents, electric welders 63 cents, electric welders' assistants 50 cents, acetylene cutters 53 cents; switch inspector and switch and diamond repairmen, emergency men, grinder men, flat car motormen and tool repairmen 50 cents; flat car motormen on part time, compressor men, derrick men, 45 cents; labourers with established seniority 41 cents.

Other provisions of this agreement relating to union membership, vacation, free transportation, seniority and settlement of disputes are similar to those in the agreement summarized above for motormen, conductors and busmen employed by this Company.

Transportation and Public Utilities: Water Transportation

SAINT JOHN, N.B.—VARIOUS STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL NO. 810 (COAL HANDLERS AND TRIMMERS).

Agreement to be in effect from November 1, 1937, to October 31, 1938, and thereafter from year to year, subject to notice.

Only union members to be employed, but if none available others may be employed but only until union men can be secured.

Wages per hour for coal handlers and trimmers: 90 cents for day work and $1.10 for night work. (These are increases of 10 cents per hour over the previous rates.)

Work on Sundays, on six specified holidays and also work after 1 p.m. on Saturdays from June 1 to September 30, and all work during meal hours to be paid at double time.

Waiting time to be paid at full rate for first hour and half rate for succeeding hours. When work is suspended for want of cars or any other cause except on account of the weather, the rate of pay to be the same as for waiting time.

When men are ordered or start work for the day or night shift, they are to be paid at least for two hours.

The minimum number of men who must be employed for certain types of work is specified.

No stoppage of work to occur in case of any dispute but it will be referred to an arbitration committee whose decision is final.

SAINT JOHN, N.B.—VARIOUS STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1039 (STEAMSHIP HORSE AND CATTLE FITTERS, SEALERS, LINERS AND CLEANERS).

The agreement which came into effect November 1, 1935, and was summarized in the LABOUR GAZETTE, December, 1935, page 1155, remains in effect until October 31, 1938, and from year to year subject to notice. An increase in wages has, however, been given. The wage for day work is now 70 cents per hour (an increase of 5 cents), and for night work $1 per hour (an increase of 2½ cents).

MONTREAL, QUEBEC.—VARIOUS STEAMSHIP AND STEVEDORING COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL NO. 375 (LONGSHOREMEN, OCEAN STEAMSHIPS).

Agreement to be in effect from March 5, 1938, to December 31, 1938, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1937, page 576 and April, 1936, page 369, with certain changes:

Wages per hour: from 7 a.m. to 12 noon and from 1 p.m. to 6 p.m., 77 cents; from 7 p.m. to 11 p.m., 87 cents; from midnight to 5 a.m. 97 cents. (These are increases of 12 cents per hour.) For working on nitrate, bulk sulphur, full cargoes of china clay and fertilizer, for shifting bunker coal and handling cargo in refrigerators which is to be transported at 32 degrees Fahrenheit or lower, for grain trimming and bagging, for work performed in open 'tween deck where there is grain running in a hatch connected with the said open deck, 15 cents over regular rates to be paid as before, making the three rates for this work, 92 cents for day hours, $1.02 for evening hours and $1.12 for night hours.

MONTREAL, QUEBEC.—VARIOUS STEAMSHIP COMPANIES AND STEVEDORING COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1552 (SHIPLINERS, OCEAN STEAMSHIPS).

Agreement to be in effect from April 14, 1938, to December 31, 1938, and thereafter from year to year, subject to notice.

This agreement covers all fitting of vessels lying in the harbour for grain and cattle and all woodwork in connection with the stevedoring gear, except where permanent gear men are employed. (The previous agreement for shipliners on ocean steamships was with the Independent Association of Carpenters and Shipliners of the Port of Montreal.)

Hours: both parties to endeavour to ensure that the average number of hours of the workers shall not exceed 48 per week.

Double time to be paid for work on Sundays and two holidays, and double time for work during meal hours and until relieved.

Wages per hour: 77 cents from 7 a.m. to 12 noon and from 1 p.m. to 6 p.m., 87 cents from 7 p.m. to 11 p.m. and 97 cents from midnight to 5 a.m. (These are increases of 12 cents per hour over the previous rates.) For work in holds of steamers in which bulk sulphur or bulk fertilizer has been stowed and where old wood is being used in whole or part, 10 cents per hour extra to be paid.

The running of grain in the pipes is to be stopped while men go down in the hold to work.

THOROLD, ONTARIO.—ONTARIO PAPER COMPANY, LIMITED, AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, NO. 1477.

This agreement which covers the work of unloading pulpwood boats and loading paper boats, is in effect from July 20, 1937, to July 20, 1939, and thereafter from year to year subject to notice. It was reached following the strike which was reported in the LABOUR GAZETTE, August, 1937, page 850.

Members of the union are to be employed, if available and considered competent by the Company.

Hours: 10 per day.

Overtime: time and one half; work on Sundays and three holidays, time and one half.

Wages per hour: signalmen, boat hold loaders and paper roll off man 59 cents; wood pile and conveyor men, water boys, paper shed men, dock sling men and wood and paper checkers, 54 cents.

Provision is made for arbitration in case of a dispute.

VANCOUVER, B.C.—SHIPPING FEDERATION OF BRITISH COLUMBIA AND THE BURRARD COASTWISE LONGSHOREMEN'S ASSOCIATION (LONGSHOREMEN, COASTWISE VESSELS).

Agreement to be in effect from March 12, 1938, to March 11, 1940, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, April 1, 1937, page 455, with certain exceptions:

No replacement of any member who has withdrawn or been expelled from the union to be permitted without the consent in writing of the federation and the association.

For working through meal hour, time and one-third to be paid, until relieved.

Wages are increased 5 cents per hour for straight time and 15 cents for overtime over the previous rates, making the hourly rates as follows:

	Straight time	*Overtime*
Cement—		
Double winch drivers, ship men and pilers	$1.00	$1.35
Dock truckers	.90	1.20
All Other Commodities—		
Double winch driver	1.00	1.30
All other labour	.90	1.20

Transportation and Public Utilities: Local and Highway Transportation

OTTAWA, TORONTO, HAMILTON, ST. CATHARINES, MIDLAND, ONTARIO.—CERTAIN AUTOMOTIVE TRANSPORT OPERATORS ENGAGED IN LOCAL AND LONG DISTANCE TRUCKING AND THE AUTOMOTIVE TRANSPORT SECTION OF CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES (TRUCK DRIVERS, WAREHOUSEMEN, CHECKERS AND LOADERS).

Agreement to be in effect from May 1, 1938, to December 1, 1938, and thereafter, subject to 30 days' notice.

No discrimination to be shown against employees for being members of this union nor for serving on committees representing employees.

Hours: except in case of emergency, employees not to be required to work more than 60 hours in any one week; those engaged in pick-up and delivery service or in warehouse not to be required to work beyond a spread of 12 hours in a 24-hour period. Employees "deadheading" on employer's business will be paid for necessary travelling time at regular rate. Employees not to be required to take more than one hour for meal period.

Rates of wages are from 35 to 60 cents per hour, according to class of service with extra rates for overtime under certain circumstances.

Where wages, hours and conditions are more favourable to the employee than those of this agreement, they shall not be changed to adversely affect the employee.

Seniority to be considered in giving promotions and in case of reduction in staff and re-employment of men laid off.

Employees will not be required to operate equipment that is unsafe or dangerous. All motor vehicles will be equipped with a closed cab, and in the winter season with heaters and defrosters.

Records of hours and wages of employees to be kept by the employer in proper form approved by the parties to the agreement and available for inspection by properly authorized persons or committees.

Employees required to wear uniforms will not be required to pay for more than half of their price, the price to be agreed upon by both parties.

No strikes or lockouts to occur while the agreement is in force. Any complaint or grievance of any employee or other dispute which cannot be settled satisfactorily between the parties to the agreement will be referred to an arbitration committee consisting of two representatives of each party; if these four cannot agree on a chairman, the Minister of Labour for the Ontario Government will be asked to name one. The decision of this committee to be final and binding.

TORONTO, ONTARIO.—TORONTO AUTO LIVERY OWNERS' ASSOCIATION AND THE TORONTO TAXI DRIVERS' UNION.

Agreement signed at conclusion of the strike reported on page 486 of this issue, agreement to be in effect from April 25, 1938, to April 25, 1939, and thereafter subject to one month's notice. Agreements with substantially similar terms were signed with individual employers.

The company recognizes the union as the collective bargaining agent for those employees who are members of the union. No discrimination against employees on account of union activity. All drivers to apply to join the union within 15 days of commencing their employment and must become and remain union members.

Hours: 11 per day either in one shift or in not more than two shifts of which the shorter shall be at least 4 hours.

Overtime to be paid at 35 cents per hour.

Wages: no taxi driver may be employed on a commission basis only. Regularly employed drivers are to be paid at the rate of 25 per cent commission on all receipts and charge accounts, with a guaranteed minimum of $12.50 per week of 66 hours. Spare or extra drivers to be paid $2.50 per day or $1.25 per half day, with a minimum of $1.25 even if hours worked are less than five. The driver is responsible for payment for all runs except when the employer has authorized the extension of credit for such runs.

Seniority to be considered in laying off drivers, due to lack of work and in re-employing them.

If drivers required to wear uniforms, half the cost to be paid by the employer and half by the driver. The uniform must bear the international union label.

Allowance to be made for food and lodging expenses for all out of town trips.

Taxi drivers to be responsible for any fines and for any damage to the employer's cars if such damage is caused by the driver's negligence, but in no case is a driver responsible for more than half the cost of repairs or for more than $12.50 for damages for any one accident.

The employer agrees to the establishment of a shop committee elected by the employees, for the purpose of taking up grievances with the employer.

Service: Recreational

SAINT JOHN, N.B.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL NO. 440 (MOVING PICTURE MACHINE OPERATORS AND STAGE MECHANICS).

Agreements to be in effect from September, 1937, to August 31, 1938.

Only union members to be employed as moving picture machine operators and stage mechanics, and the union is to furnish competent workers.

Any dispute over the provisions of the agreement is to be referred to an arbitration board.

Minimum wage rates vary in the different theatres parties to this agreement: for moving picture machine operators, for a six day week, from $30 for first operator and $22 for second operator in one theatre to $40 for shift operators and $25 for relief operator in another theatre; overtime rate from $1 to $1.25 per hour; for stage mechanics, $25 for 6 day week; for carpenter, electrician and property man from $2.50 at one theatre to $3 per performance for these trades at another theatre.

QUEBEC, P.Q.—ONE THEATRE AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, NO. 523. (MOVING PICTURE MACHINE OPERATORS AND STAGE MECHANICS).

Agreement to be in effect from September 1, 1937, to September 1, 1939.

Only union members to be employed as moving picture machine operators and stage employees and the union agrees to furnish competent men for the work. Whenever musicians are employed by the theatre, all such must be members of the American Federation of Musicians.

Hours: two operators to be employed at all times, hours not to exceed 49 per week of seven days. Hours at which stage mechanics are to report for work is given for various types of shows, and they are to remain at work until end of the performance. When moving pictures only are shown, one man to be employed for afternoon and evening but two men if continuous performance.

Overtime for operators, $1.25 per hour per man for all work over 49 hours per week and also for rehearsal of programs and screenings. Overtime for stage workers, 75 cents per hour to midnight, $1.25 per hour after midnight.

Minimum wage rates: moving picture machine operators, $45 per week; carpenter $40, property man and electrician $35, stage man when moving pictures only are shown, $33.25 per week.

HAMILTON, ONTARIO.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, NO. 129 (STAGE MECHANICS).

Agreements, which apply to theatres showing moving pictures only to be in effect from September 1, 1937, to September 1, 1940.

Only union members to be employed and the union agrees to furnish competent men.

Hours: regular men to report at 12 noon, remaining till 11.30 p.m. with one hour and a half off for supper.

Overtime: all extra work, $1 per hour; double time from midnight Saturday to 8 a.m. Monday, with minimum of four hours except for Sunday concert or lecture for which $6 will be paid.

Minimum wage rates for electricians: $36.40 per week in one theatre from September 1, 1937, to August 31, 1938, and $40.56 in another theatre for the same period. A wage increase of 3 per cent is provided from September 1, 1938, and a further increase of 3 per cent from September 1, 1939.

HAMILTON, ONTARIO.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, No. 303 (MOVING PICTURE MACHINE OPERATORS).

Agreement to be in effect from September 1, 1937, to August 31, 1940.

Only union members to be employed and the union agrees to furnish competent men. The president, secretary and business agent of the union to be allowed to visit the projection room of the theatre when business demands.

Hours: in three theatres, regular hours from 1 p.m. to 11 p.m., divided into two shifts with two men on each shift. Free overtime allowed for 30 minutes before 1 p.m. and 15 minutes after 11 p.m. if necessary; in the fourth theatre, regular hours from 7.30 p.m. to 11.30 p.m., six nights per week and 3 hours on Saturday afternoon; 15 minutes free overtime allowed if necessary.

Overtime: $2 per hour for week days and $3 per hour for Sundays, with a minimum of three hours overtime for work on Sundays. Midnight shows $6 per man, morning shows $5 per man.

Weekly wage rates are given for the year, September 1, 1937, to August 31, 1938, with increased rates for the year 1938 to 1939, and further increased rates for the year September 1, 1939, to August 31, 1940. In two theatres the respective rates for all moving picture machine operators in each of these three years is $46.80, $48.20 and $49.65; in a third theatre, $41.60, $42.85 and $43.14; in the fourth theatre, $37.44, $38.56 and $39.72.

FORT WILLIAM AND PORT ARTHUR, ONTARIO.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, No. 467 (MOVING PICTURE MACHINE OPERATORS).

Agreements to be in effect from September 1, 1937, to September 1, 1939.

Only union members to be employed and the union agrees to supply competent men.

Hours: in theatres not running continuous performances, two operators to be employed, hours 6½ per day for 5 days and 8 hours on Saturday, a 40½ hour week; in theatres running continuous performances, two operators and one relief operator to be employed during regular time pictures are being shown.

Overtime pay to begin 15 minutes after regular closing time: for operators who work the 40½ hour week, overtime is $1.35 per hour in two theatres, $1.35 for first operator, $1 for second in another theatre, $1 in a third theatre. Where continuous performances are being shown, any work after regular hours (11 p.m. or 11.30 p.m.) to be paid at $1.35 per hour except at one theatre where overtime is $1 for first operator and 85 cents for second operator. All Sunday work, double time. Midnight shows, previews, etc., to be paid at $5 per man; screenings, etc., at overtime rates.

Wages per week: for the 40½ hour week, $45 for each operator in two theatres, $45 for first operator, $40 for second in a third theatre; for work when peformances are continuous, $49.50 for first and second operators, $30 for relief operators in two theatres, $47 for first operator, $40 for second and $25 for relief operator in a third theatre and $40 for first operator, $33 for second and $18 for assistant in the fourth theatre.

MOOSE JAW, SASK.—CERTAIN THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, No. 406 (MOVING PICTURE MACHINE OPERATORS AND STAGE EMPLOYEES).

Agreement to be in effect from September 1, 1937, to August 31, 1939.

Only moving picture machine operators who are supplied by the union to be employed, and the union agrees to furnish competent men.

Hours for maintenance men: 49 per week.

Overtime: late shows on week days to be paid at $1 per man per hour, with no overtime computed under one hour. Midnight shows at Sunday midnight or Monday morning to be paid at $5 per man per show.

Wages for operators to be $120 per week for ten hours per day, divided between three operators. Wages for maintenance man: $20 per week.

EDMONTON, ALBERTA.—CERTAIN THEATRES AND THE NATIONAL UNION OF THEATRICAL EMPLOYEES, No. 11 (MOVING PICTURE MACHINE OPERATORS).

Agreement to be in effect from September 1, 1937, to August 31, 1940. In July or August, 1939, however, the parties to negotiate regarding a wage increase.

Only members of this union to be employed and the union agrees to supply competent operators.

Seniority to prevail when displacing men, provided the man to be retained is acceptable to the employer.

Hours: a week to consist of 6 days, not including Sunday. In one theatre 6 hours per day, in three other theatres 5½ per day with ½ hour extra when necessary. Operators to report for duty one half hour before opening of show. Maintenance of projection equipment to be done on the operator's own time.

Two operators required for all shifts.

Overtime, including previews, to be paid at regular rate in one theatre and at 35 cents for each quarter hour at five other theatres.

Wages per week for moving picture machine operators: in three theatres, $41 per week for each of the four operators; in another theatre, $37 for each of the three operators; in another theatre $128 per week divided among four operators; in the sixth theatre $36 for each of the two operators.

The employer and the executive of the union will adjust any disputes that may arise and their decision will be accepted.

Vancouver and Other Centres in British Columbia.—Certain Theatres and the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators, No. 168. (Moving Picture Machine Operators).

Agreements to be in effect from Sepetmber 1, 1937, to August 31, 1939 (August 31, 1940, at three theatres). (A strike in most of these theatres took place before this agreement was reached and was noted in the Labour Gazette, November, 1937, page 1188).

Only union members to be employed and the union agrees to supply competent men.

Hours vary from 27 to 36 per week in the different theatres. Two moving picture operators to be on duty at all times in which pictures are being shown.

Overtime: midnight shows at time and one half, with minimum of $10 for two operators; Sunday work at double time. Other overtime at regular hourly rates.

Wages were in most cases increased 5 per cent, with a further 5 per cent increase to be given for the year September 1, 1938, to August 31, 1939. Wages per week per operator, from September 1, 1937, to August 31, 1938: at three theatres in Vancouver, $54.60 for a 36 hour week ($57.20 for year 1938-1939); at other theatres in Vancouver where operators work a 36 hour week, wages are from $52.52 to $54.08 at five theatres ($54.03 to $55.55 in 1938-1939); from $36 to $47.50 at three theatres ($36 to $50.50 in 1938-1939); at three theatres in Vancouver working a 27 hour week rates vary from $27 to $38.33 ($27 to $40.15 in 1938-1939); at theatres at New Westminster working a 30 hour week, $42 to $45.10 per week ($44 to $49.50 in 1938-1939); at eight theatres in suburban Vancouver, for a 27 hour week wages are $39.80 per week ($41.70 in 1938-1939); at "mountain towns" namely, Kamloops, Kelowna, Nelson, Penticton, Rossland, Trail and Vernon, and also at Chilliwack, Nanaimo and Prince Rupert, $33.10 for a 27 hour week ($34.65 in 1938-1939); at Port Alberni, $36.75 for a 33 hour week ($38.50 in 1938-1939). (At Port Alberni the agreement was not signed until April 8, 1938, following dispute reported on page 484).

Victoria, B.C.—Certain Theatres and the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators, No. 168. (Moving Picture Machine Operators).

Agreements to be in effect from September 1, 1937, to August 31, 1939. (A strike in most of the theatres took place before this agreement was reached and the strike noted in the Labour Gazette, November, 1937, page 1188.)

Only union members to be employed and the union agrees to supply competent men.

Hours: for the four operators at a theatre the hours average 33 per week.

Overtime (except half hour for maintenance) to be paid at time and one half; midnight shows at time and one half, with a minimum of $10 for the two operators; Sunday work at double time.

Wages per week from September 1, 1937, to August 31, 1938: at two theatres, $176.40 divided between four operators ($184.80 for year 1938 to 1939); at another theatre, $148.26 divided between four operators ($155.31 for year 1938 to 1939).

Service: Business and Personal

Toronto, Ontario.—Certain Hotels and the Hotel and Restaurant Employees' International Alliance and Bartenders International League, No. 280 (Beverage Dispensers).

Agreement to be in effect from September 1, 1937, to August 31, 1939.

Only union members to be employed or any others employed must join the union. The union to use its influence with organized labour and others to patronize only such hotels as display the union card.

Hours for all persons working in the beverage and tap rooms: 54 per week to be worked in 6 days.

Overtime to be paid at 50 cents per hour.

Minimum wages per week in class "A" hotels: from September 1, 1937, to August 31, 1938, waiters handling beverages $19, tapmen $22; from September 1, 1938, to August 31, 1939, waiters handling beverages $21, tapmen $24. Minimum weekly wages in class "B" hotels are $3 per week less than in class "A" hotels. Spare men to be paid 50 cents per hour with a minimum of three hours' pay, or $4 per day. A waiter employed 5 hours per day within a 7 hour period, 6 days per week to be considered a steady spare man and be paid $14 per week. Any employee who was being paid higher wages before the agreement was made was to have no reduction in his wages.

Vacation: each full time employee who has been in the establishment for one year, to have one week's vacation with pay each year.

Any dispute which cannot be settled satisfactorily between the parties to be referred to an arbitration committee whose decision will be final. No strike or lockout to occur pending the decision of this committee.

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are noted in the article beginning on page 579:

Ontario

Plasterers, Ottawa
Plumbers, Ottawa
Electrical workers, Ottawa
Plumbers, Teck Township
Carpenters, Sault Ste. Marie
Coal storage and delivery industry, Toronto
Barbers, Cobourg
Barbers, Port Hope
Barbers, Midland
Barbers, Kirkland Lake
Barbers, Sudbury and Copper Cliff

Saskatchewan

Painters and Decorators, Moose Jaw
Dray and Transfer Industry, Regina
Barbers, Estevan

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized on page 503 of this issue. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreement which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published, and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette*. Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette*, the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938.

Recent proceedings under the Act include requests for the extension of the following agreements, which were published in the following issues of the *Quebec Official Gazette:* shoe repairers at Sherbrooke, hairdressers at Sherbrooke, longshoremen (inland and coastal navigation) at Montreal, and dressmakers throughout the province, in the issue of April 16; building trades in eastern townships, building trades at Hull, printing trades at Quebec, building trades at St. Hyacinthe, and building trades at Sorel, in the issue of April 23, and fur workers at Montreal in the issue of April 30. In addition, two corrections to the request for the extension of the agreement for building trades at Montreal were published in the April 9 issue.

Mining Accidents in Nova Scotia in 1937

According to the *Annual Report on Mines, 1937*, published by the Nova Scotia Department of Public Works and Mines there were 27 fatal accidents in Nova Scotia coal mines during the fiscal year ending November 30, 1937. All of these accidents occurred underground, 15 being due to "falls of roof or face" and 12 due to "mine cars and locomotives." The number of fatal accidents in the preceding year was 16.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Saskatchewan

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers or employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and this issue, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, and June, 1937, page 640; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and this issue, page 507.

Industrial Standards Act of Ontario

Logging

LOGGERS, PORT ARTHUR FORESTRY DIVISION.—An Order in Council, dated April 9, 1938, and published in *The Ontario Gazette*, April 16, makes binding the terms of a schedule of wages and hours in the logging industry which includes: cutting pulp, cutting timber, saw logs, peeling, skidding, river driving, tie making, loading, cutting of piling, maintenance of men in camps, cooking, etc.

The schedule is in effect from April 1, 1938, to April 1, 1939.

Minimum wages for a maximum of 26 days' work per month: general bushmen and handyman helpers, $42.50; loaders, skidders' helpers, feeders of ties to and onto jack ladders, sorters and sluicers of pulpwood and ties, $45; teamsters and skidders driving less than four horses, $50; teamsters driving four or more horses, $55; truck drivers (hauling wood products), $75; tractor drivers, $85. In addition to the above monthly wages, all the above classes of workers to receive suitable board and lodging for all days of the calendar month, including Sundays and holidays.

Minimum wages for a calendar month: cookees and kitchen staff, $40; camp watchman, $42.50; bull cooks and night watchmen, $45; barn bosses, $55. In addition to the above they will receive suitable board and lodging for the calendar month, including Sundays and holidays.

Minimum wages per day: river drivers and boatmen (on river driving), $2.60; employees engaged in watering wood throughout the progress of the drive, $2.60; camp and dam builders, $2.50. In addition to the above they will receive suitable board and lodging for all days in the calendar month, including Sundays and holidays.

A scale of piecework rates is included in the schedule for pulpwood cutters, and employees on a piecework basis may be charged an amount not exceeding 85 cents per day for suitable board and lodging. In poor or scattered timber, the operator shall give special rate consideration to the pieceworkers.

(For those classes of workers mentioned in the last schedule which was summarized in the June, 1937, issue of the LABOUR GAZETTE, the wage rates are unchanged in this schedule, but several classes not mentioned in previous schedules are included in the wage schedule noted above.)

The advisory committee appointed under the Act may set a lower rate for handicapped workers.

There shall be specific compensation to pulp cutters or piece cutters for the construction of main roads.

There shall be no change in the rates of employees who are now receiving higher wages than the above schedule.

Construction: Buildings and Structures

ELECTRICAL WORKERS, OTTAWA.—An Order in Council, dated March 26, and published in *The Ontario Gazette* April 2, makes binding a schedule of wages and hours in the electrical repair and construction industry in the city of Ottawa and the adjacent suburban area.

The schedule is to be in effect from April 12, 1938, "during pleasure."

The electrical repair and construction industry includes all electrical installation in buildings, structures or premises and all electrical installations of equipment, apparatus or appliances for operation in buildings, structures

or premises and the repair and maintenance of such, except: maintenance work done by persons regularly employed by a manufacturing, industrial or service institution in maintaining the equipment and premises used in the operation of the institution, and except work done in the manufacturing processes, and except work done in repairing or servicing electrical equipment or appliances in repair or service shops or departments and except work done by regular employees of manufacturers or their agents under a service contract or guarantee of such equipment or appliances.

Hours: 8 per day, from Monday to Friday, a 40-hour week. If required to work on Saturday morning on work that is immediately necessary for the protection of life or property, this may be done at regular rates of pay. Employees who work on night shifts to receive 8 hours' pay for 7 hours' work but if employed at night work for not more than 8 hours when the work is of such a nature that it cannot be performed during the regular day hours, regular rates to be paid.

Overtime: time and one-half; work on Sundays and eight specified holidays, double time.

Minimum wage rate: 75 cents per hour until July 31, 1938, and 80 cents per hour thereafter. (The previous rate in effect was 70 cents per hour, as noted in the LABOUR GAZETTE, November, 1936, page 1081.) A special minimum rate may be established by the advisory committee for any handicapped person.

Apprentices are governed by the Ontario Apprenticeship Act.

PLASTERERS, OTTAWA.—An Order in Council, dated March 26, and published in *The Ontario Gazette*, April 2, makes binding the terms of schedule governing the plastering industry in the city of Ottawa and adjacent suburban area.

The Order in Council is to be in effect from April 12, 1938, "during pleasure."

The plastering industry includes plasterers and plasterers' labourers engaged in construction and repair work except employees of manufacturing plants or industrial establishments regularly engaged in the repairing, servicing and upkeep of the plant and equipment of such plant or establishment, such servicing to include new installations or alterations of a minor nature.

Hours for plasterers: 8 per day, 4 on Saturdays, a 44 hour week. (No regular hours are established for plasterers' labourers.) In case of shift work, one and one seventh regular wage rates to be paid for night shifts. However, where work is of such a nature that it cannot be done during regular working hours, it may be done at night at regular wage rates for not more than 8 hours.

Overtime: Time and one half for overtime from 5 p. m. to midnight from Monday to Friday and from 1 p. m. to 5 p. m. on Saturdays; all other overtime, including work on Sundays and seven specified holidays, double time.

Minimum wage rate for plasterers: 80 cents per hour until July 31, 1938, and 85 cents thereafter. (The previous rate was 80 cents, as noted in the LABOUR GAZETTE, October, 1936, page 951.) The advisory committee may fix a special minimum wage rate for a handicapped employee. No minimum wage rate is established for plasterers' labourers.

PLUMBERS, OTTAWA.—An Order in Council, dated March 26 and published in *The Ontario Gazette* April 2, makes binding the terms of a schedule governing the plumbing and heating industry in the city of Ottawa and adjacent suburban area.

The schedule is to be in effect from April 12, 1938, "during pleasure."

The plumbing and heating industry includes al plumbing, steamfitting, pipe fitting, hot water fitting and gas fitting installations in or about buildings, structures and premises or for equipment operating or to be operated therein and repair and maintenance of such installations except maintenance work done by persons regularly engaged in repair and maintenance of such installations in a manufacturing, industrial or service institution in maintaining equipment used in the operation of such institution.

Hours: 8 per day from Monday to Friday, a 40 hour week. In case of shift work, the night shift to receive 8 hours' pay for 7 hours' work.

Overtime: Work required on Saturday morning for the protection of life or property and the setting of sleeves and inserts may be done at regular wage rate. Overtime to be paid at time and one half. Work on Sundays and eight specified holidays, double time. A special minimum rate may be established for handicapped workers by the advisory committee.

Minimum wage rate: 90 cents per hour to May 1, 1938 and 95 cents thereafter. (The previous rate was 83 cents, as noted in the LABOUR GAZETTE, September 1936, page 837.)

CARPENTERS, SAULT STE. MARIE.—An Order in Council, dated April 9, and published in *The Ontario Gazette*, April 16, makes binding the terms of a schedule for the carpentry industry in the city of Sault Ste. Marie and within five miles of it.

The schedule is to be in effect from April 26, 1938, "during pleasure."

The carpentry industry includes carpenters' and joiners' work in the construction or erection of the whole or any part of a new building, structure or sewer, excluding employees of manufacturing plants engaged in manufacturing processes and employees of manufacturing plants and industrial establishments regularly engaged in repair, servicing and upkeep of the plant and equipment used in the operation of such establishment and such servicing to include new installations and alterations of a minor nature.

Hours: 8 per day, 6 days per week, a 48 hour week. When shift work is carried on, night shifts to be paid 8 hours' pay for 7 hours' work. When, however, work is of such a nature that it cannot be done during the day, it may be done at night for regular wage rate for 8 hours' work.

Overtime: time and one half for first three hours; thereafter and also for all work on Sundays and three specified holiday, double time.

Minimum wage rate: 75 cents per hour. (This is no change from the previous schedule which was summarized in the LABOUR GAZETTE November, 1937 page 1275). The advisory committee may fix a special minimum wage rate for handicapped workers.

PLUMBERS, KIRKLAND LAKE, ETC.—An Order in Council, dated April 9, and published in *The Ontario Gazette* April 16, makes binding the terms of a schedule of wages and hours for the plumbing and heating industry in the townships of Teck, Lebel, Gauthier, McVittie,

McGarry and Hearst, in the District of Temiskaming.

The schedule is to be in effect from April 26, 1938, "during pleasure".

The same work is included as noted above for plumbers at Ottawa.

Hours: 8 per day, 4 on Saturday, a 44 hour week.

Overtime: time and one half. Work on Sundays and eight specified holidays, double time.

Minimum wages rates: 90 cents per hour until May 31, 1938 and $1 per hour thereafter. The advisory committee may establish a lower wage rate for any handicapped worker.

Trade

COAL DRIVERS AND HANDLERS, TORONTO.—An Order in Council, dated March 26, and published in *The Ontario Gazette*, April 2, makes binding the terms of a schedule of wages and hours in the coal industry in the city of Toronto and neighbouring municipalities.

The schedule is to be in effect from April 12, 1938, "during pleasure".

The coal industry is defined as all work usually performed in connection with the storage, warehousing, transfer and delivery of all kinds of coal and coke.

Minimum hourly rates of wages for all employees engaged on a time basis: boat trimmers, stackers on conveyers, truck drivers and teamsters, 50 cents; yardmen, 45 cents; truck drivers' helpers, 40 cents. For those working on piece rates, tonnage rates are set for delivery of coal or coke from the docks and from retail yards.

Service: Business and Personal

BARBERS, COBOURG.—An Order in Council, dated March 26, and published in *The Ontario Gazette*, April 2, makes binding the terms of a schedule of wages and hours governing the barbering industry in the town of Cobourg, from April 12, 1938, "during pleasure".

The regular working period is the hours during which barber shops are permitted to be open by local municipal by-laws.

Minimum wages: those employed full time on a straight salary basis, $18 per week; those employed full time on a commission basis or paid a salary plus commission, $12.50 per week plus 65 per cent of proceeds in excess of $20 from the work of the employee; those employed nights and Saturdays, that is for four hours or less from Mondays to Fridays inclusive and all day or less on Saturdays, $10 per week plus 65 per cent of proceeds over $15; those employed Saturdays or the day before a holiday and on the previous evening only, $5 per week plus 65 per cent of proceeds in excess of $7.50 from the work of the employee; those employed for Saturday or the day before a holiday only, $4 per day or part thereof plus 65 per cent of proceeds in excess of $6 from the work of the employee; those working on days other than Saturday or the day before a holiday, $2.50 per day or part thereof plus 65 per cent of proceeds in excess of $4 from the work of the employee. No deduction may be made from minimum wages for materials supplied, laundry service or operating expenses. A scale of prices for each operation is included in the schedule.

57200—8

BARBERS, PORT HOPE.—An Order in Council, dated March 26, and published in *The Ontario Gazette*, April 2, makes binding the terms of a schedule of wages and hours governing the barbering industry in the town of Port Hope, from April 12, 1938, "during pleasure".

The terms of this schedule are the same as summarized above for barbers at Cobourg.

BARBERS, MIDLAND, PENETANGUISHENE, PORT MCNICOLL AND VICTORIA HARBOUR.—An Order in Council, dated March 26, and published in *The Ontario Gazette*, April 2, makes binding the terms of a schedule for the barbering industry in the towns of Midland and Penetanguishene and the villages of Port McNicoll and Victoria Harbour, from April 12, 1938, "during pleasure".

The schedule is similar to that summarized above for barbers at Cobourg, with the following exceptions:

Minimum wages: those employed full time on a commission basis or on a salary plus commission, $13 per week plus 65 per cent of the proceeds in excess of $19 from the work of the employee; those employed nights and Saturdays, that is four hours or less on Monday to Friday inclusive and all day or less on Saturday, $7.50 per week plus 65 per cent of proceeds in excess of $12.50 from the work of the employee; those working on Saturday or the day before a holiday and on the previous evening only, $5 per week plus 65 per cent of proceeds in excess of $7.50; those employed for Saturday or the day before a holiday, $4 per day or part thereof plus 65 per cent of proceeds in excess of $6 from the work of the employee; those working on days other than Saturday or the day before a holiday, $2.50 per day or part thereof plus 65 per cent of proceeds in excess of $4.

BARBERS, SUDBURY AND COPPER CLIFF.—An Order in Council, dated March 26 and published in *The Ontario Gazette*, April 2, makes binding a schedule of wages and hours for the barbering industry in the city of Sudbury and the town of Copper Cliff, from April 12, 1938, "during pleasure".

The schedule is similar to the one summarized above for barbers at Cobourg except for minimum prices and wage rates:

Minimum wage rates: for those employed full time on a straight salary basis, $28 per week; those employed full time on a commission or salary plus commission basis, $18 per week plus 65 per cent of proceeds in excess of $27; those employed for four hours or less from Monday to Friday inclusive and all day or less on Saturday, $10 per week plus 65 per cent of proceeds in excess of $15 from the work of the employee; those employed on Saturdays or the day before a holiday and on the previous evening only, $7 per week plus 65 per cent of proceeds in excess of $11 from the work of the employee; those employed for Saturday or the day before a holiday, $5 per day or part thereof, plus 65 per cent of proceeds in excess of $8 from the work of the employee; those working on days other than Saturday or the day before a holiday, $3 per day or part thereof, plus 65 per cent of proceeds in excess of $5 from the work of the employee.

BARBERS, KIRKLAND LAKE.—An Order in Council, dated March 26 and published in *The Ontario Gazette*, April 2, makes binding a schedule of wages and hours for the barbering industry in the township of Teck, from April 12, 1938, "during pleasure".

The schedule is similar to the one summarized above for barbers at Cobourg except for minimum prices and wage rates:

Minimum wage rates: for those employed full time on a straight salary basis, $25 per week; those employed full time on a commission or salary plus commission basis, $20 per week plus 65 per cent of proceeds in excess of $30; those employed for four hours or less from Monday to Friday inclusive and all day or less on Saturday, $11 per week plus 65 per cent of proceeds in excess of $15 from the work of the employee; those employed on Saturdays or the day before a holiday and on the previous evening only, $8 per week plus 65 per cent of proceeds in excess of $11 from the work of the employee; those employed for Saturday or the day before a holiday, $6 per day or part thereof, plus 65 per cent of proceeds in excess of $8 from the work of the employee; those working on days other than Saturday or the day before a holiday, $4 per day or part thereof, plus 65 per cent of proceeds in excess of $6 from the work of the employee.

Industrial Standard Act of Saskatchewan

Construction: Buildings and Structures

PAINTERS, MOOSE JAW.—An Order in Council, approved March 26, and published in *The Saskatchewan Gazette*, April 16, makes binding in the city of Moose Jaw and within five miles of the city hall a schedule entered into between the Moose Jaw employers of the painting, decorating and paperhanging industry and the employees of this industry, from April 26, 1938, for a period not exceeding twelve months.

The painting, decorating and paperhanging industry includes such work done in the construction, erection, alteration, remodelling or renovating of any building or structure or part thereof.

Hours: 8 per day, 4 on Saturdays, 44 hour week.

Overtime: time and one-quarter for first two hours, time and one-half after two hours; and on Sundays and five specified holidays, double time.

Minimum wage rates for painters, decorators and paperhangers; 65 cents per hour except where equipment is furnished other than regular tools, when minimum rate will be 75 cents, and for spray painting, 80 cents per hour. A special minimum rate may be established by the advisory board for handicapped persons.

No apprentice to be employed without the approval of the advisory board.

Transportation and Public Utilities: Local and Highway Transportation

EMPLOYEES OF THE DRAYING, TRANSFERRING AND STORING INDUSTRY, REGINA.—An Order in Council, approved November 2, 1937, and published in *The Saskatchewan Gazette*, April 16, makes binding the terms of a schedule entered into between the Regina employers of the draying, transferring and storing industry and the employees of the industry, from April 26, 1938, for a period not exceeding twelve months.

This industry includes the hauling or transferring of merchandise or household goods and public warehousing. It does not include regular employees of merchants, industrial or manufacturing establishments who are engaged in hauling or transferring merchandise or household goods in connection with the ordinary operations or business of such merchant, industrial or manufacturing industry; nor regular employees of any draying, transferring or storage industry who are engaged solely in the transferring or hauling of materials in bulk, such as coal, gravel, top soil, etc.; nor regular employees of draying, transferring or storage industry engaged solely in transferring goods or materials on foot, bicycle, motorcycle or side car.

Hours: 48 per week.

Overtime: no employee may work more than 56 hours in any one week except with a permit from the Industrial Standards Officer. Overtime to be paid at 40 cents per hour; work on Sundays and six specified holidays, 80 cents per hour.

Minimum wage rate: $18 per week except for casual labour or part time employment, for which 35 cents per hour will be paid. Any employee employed for three months or more previous to September 1, 1937, to receive at least the wage he was then receiving.

Vacation: all regular employees with two years or more of continuous employment with any employer to receive one week's vacation with pay.

Service: Business and Personal

BARBERS, ESTEVAN.—An Order in Council, approved April 26, and published in *The Saskatchewan Gazette*, April 30, makes binding in the town of Estevan and within five miles of it the terms of a schedule between the Estevan employers of the barbering industry and the Estevan employed barbers, from May 10, 1938, "during pleasure" or for the period of twelve months.

Hours to be limited to those during which barber shops are permitted to be open under the town by-laws. Wednesday afternoons from March 1 to September 1 are holidays.

Minimum wages: those employed full time on a percentage or commission basis or on a salary plus commission, $12 per week of 57 hours or 60 per cent of money taken in by the employee, whichever is greater; those employed on salary or commission basis or a combination of same, 30 cents per hour or 60 per cent of proceeds, whichever is greater. No deduction from wages may be made for materials supplied, laundry service or operating expenses. A scale of minimum charges for each operation is also included in the schedule.

PRICES, RETAIL AND WHOLESALE IN CANADA, APRIL, 1938

Cost of living, Prices of Staple Articles and Index Numbers

IN retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was little changed from that of the previous month, the cost of foods being unchanged while fuel and rent each showed small increases. In wholesale prices the Dominion Bureau of Statistics index number was again lower due in large part to lower prices for grains, butter and hides.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.69 at the beginning of April, the same as at the beginning of March, as compared with $8.54 for April, 1937; $7.82 for April, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.24 for April, 1930. The largest change during the month under review was a seasonal fall in the cost of eggs while there were less important decreases in the cost of potatoes, flour, rolled oats, veal and prunes. The decreases were offset by advances in the cost of beef, pork, bacon, butter, cheese, and evaporated apples. Including the cost of fuel and rent with that of foods the total budget cost $17.50 at the beginning of April as compared with $17.48 for March; $17.18 for April, 1937; $16.33 for April, 1936; $21.53 for April, 1930; $21.64 for April, 1926; $20.66 for April, 1922; $26.92 for July, 1920 (the post-war peak); and $14.32 for April, 1914. In fuel there was a slight increase in the cost of wood in some localities while rent was somewhat higher also in several cities.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of 1926 as 100 declined more than 2 per cent during the month from 83·3 for the week ended April 1 to 81·5 for that ended April 29. For the first week in March the index was 83·5. Some comparative figures on a monthly basis are 86·1 for April, 1937; 72·2 for April, 1936; 63·5 for February, 1933 (the low point in recent years); 94·5 for April, 1929; 101·2 for April, 1926; 98·4 for April, 1922; 164·3 for May, 1920 (the post-war peak); and 64·0 for April, 1914. All of the eight principal groups in the classification according to chief component materials were lower at the end of April than at the beginning but the decrease in the Vegetable Products group was much the greatest, amounting to 5 per cent and due in large part to lower prices for grains. The Animal Products group was down more than 2 per cent, live stock and meats being higher in price, while butter declined more than six cents per pound. In this group fish, hides and milk were also lower. Changes in other groups were comparatively small. Raw cotton was somewhat higher in price while raw wool and woollen cloth were lower. In non-ferrous metals copper advanced slightly, while lead and tin were lower.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of April of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rate for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles com-

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures, as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended April 29, 1938, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 683)

paratively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index

*The figures for "all items" were calculated by giving the ollowing weights to each group: Food, 35%; Fuel, 8%; Rent, 18¼%; Clothing, 18¼%; Sundries, 20%.

number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

Meat prices averaged higher at the beginning of April than one month earlier, the principal increases being as follows: sirloin steak from 25·2 cents per pound in March to 25·9 cents in April, leg roast of mutton from 23·4 cents to 24·3 cents, fresh pork from 22·6 cents to 23·6 cents, and breakfast bacon from 30·4 cents to 31·9 cents. The price of bacon was considerably higher in the cities in the western provinces than in those in the east. Eggs were generally lower, decreases being greater in the Prairie Provinces than in other parts. The Dominion average price for fresh grades was down from 32 cents per dozen to 29 cents. The price of butter was again higher, creamery averaging 39·7 cents per pound as compared with 39·1 cents in the previous month. Cheese also was slightly higher, averaging 23·7 cents per pound. Potatoes averaged 5 cents per 90 pounds lower at 90·1 cents. Evaporated apples averaged 15·6 cents per pound as compared with 15·1 cents in March. United States anthracite coal was little changed in the average at $14.52 per ton.

Following are the prices reported for Welsh coal, "cobbles" and "French nut": Halifax, $15.50; Charlottetown, $14; Moncton, $16; Saint John, $15 and $14; Quebec, $13.50; Three Rivers, $15 and $14; Sherbrooke, $14.75; St. Hyacinthe, $14.50; Thetford Mines, $16.75; Montreal, $14.25 to $14.75; Ottawa, $16; Kingston, $15; Belleville, $15; Peterborough, $16.75; Oshawa, $15; Toronto, $14.50 and $14; St. Catharines, $15; Hamilton, $14.50 and $14; Brantford, $16.25; Galt, $16; St. Thomas, $16; Cobalt, $19; Timmins, $18.50; Port Arthur, $17.25; Fort William, $17.25; Winnipeg, $20.

According to a press despatch appearing in the *Melbourne Argus*, Melbourne, Australia, the "work history" of 12,000 unemployed persons in the metropolitan area was to be recorded by the Department of Labour there. This was the first step in the State Ministry's plan to find work for the unemployed, it being explained that the "work history" of unemployed persons covered the last eight years and enabled the department to classify the unemployed in districts, trades and various degrees of skill. It was stated that employers were coooperating in the plan and that 500 men had been placed in jobs, 200 of them being permanently placed.

This plan was adopted and followed similar plans which had been adopted successfully in England and New Zealand.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, wholesale and retail prices in Great Britain and several of the principal commercial and industrial countries appeared in the April issue of the Labour Gazette.

Great Britain and Northern Ireland

Wholesale Prices.—The Board of Trade index number on the base 1930=100, was 104·1 for March as compared with 105·8 for February, a decrease of 1·6 per cent for the month. Although food prices decreased 2·6 per cent during the month, the decrease was of a seasonal nature, the index for food prices being the same as that for March, 1937, namely 100·7. The index for industrial material and manufactures was 105·7 for March as compared with 106·9 for February and 110·7 for March, 1937.

The *Statist* index number on the base 1867-1877=100, was 94·2 at the end of March as compared with 96·4 at the end of February, a decrease of 2·3 per cent for the month. All groups making up the index showed declines, the most important ones being as follows: non-ferrous metals 5·8 per cent, textiles 3·9 per cent, sundries 3·3 per cent and vegetable foods 2·2 per cent. The general index was 12·2 per cent lower than that for the end of March, 1937.

Cost of Living.—The Ministry of Labour's index number on the base July, 1914=100, was 154 at the first of April as compared with 156 at the first of March. The index for food prices was 137 as compared with 140 at the beginning of March, the reduction being due to declines in almost all the items included in the food prices index.

Eire

Cost of Living.—The cost of living index number of the Department of Industry and Commerce, on the base July, 1914=100, was 173 for mid-February as compared to 177 for mid-November, a decrease of 2·2 per cent for the quarter. The index for food declined from 165 to 159 during the same period due mainly to a seasonal decrease in the price of eggs.

France

Wholesale Prices.—The General Statistical Office index number, on the base 1914=100, was 619 for March as compared with 614 for February. The index for food prices declined from 625 to 617 during the period. The industrial material price index increased from 605 to 623 during the same period. The index based on gold currency, 1914=100, was 58 for March as compared with 61 for February.

Germany

Wholesale Prices.—The index number of the Federal Statistical Office on the base 1913=100, was 105·8 for March as compared with 105·7 for February. The indexes for manufactured goooods and industrial materials and semi-manufactured goods were unchanged while the index for agricultural products was 0·3 per cent higher than it had been in February.

Cost of Living.—The official index number on the base 1913-1914=100, was 125·5 for March as compared with 125·2 for February, an increase of 0·2 per cent for the month. Prices of food and clothing increased 0·6 per cent and 0·2 per cent respectively, rent and sundries were unchanged and heating and lighting materials decreased 0·1 per cent.

India

Wholesale Prices.—The January index number of the Labour office, Government of Bombay, on the base July, 1914=100, was 104 for "all items," showing no change from the previous month in this figure. The combined index for all foods was 107 in January as compared with 105 in December. The index for non-foods increased from 105 to 107 in the same period.

Cost of Living.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100, was 107 for February. This figure has been unchanged since last October when the index stood at 108.

United States

Wholesale Prices.—The Bureau of Labour Statistics index number on the base 1926=100, was 79·8 for February as compared with 80·9 for January, a decrease of 1·4 per cent for the month. This represents the lowest level reached since June, 1936. With the exception of fuel and lighting materials, which increased 0·3 per cent, all groups showed decreases. The foods group declined 3·7 per cent, farm products 2·5 per cent, hides and leather products 2·1 per cent, textile products 1·6 per cent, building materials 0·8 per cent, metals and metal products and chemicals and drugs 0·6 per cent each, sundries 0·5 per cent and housefurnishing goods 0·3 per cent.

Cost of Living.—The index number of the Industrial Conference Board on the base 1923=100, was 86·7 for March showing no change from the February figure. Food prices and prices of sundries advanced 0·2 per cent and 0·3 per cent respectively while clothing prices declined 0·7 per cent, rent 0·3 per cent and fuel and lighting materials 0·1 per cent. As compared with March, 1937, the general index showed a decline of 1·4 per cent but was still 20·9 per cent higher than the low point in 1933.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FIRST QUARTER OF 1938

The number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the first quarter of 1938 was 239, there being 78 in January 70, in February and 91 in March.

The report for the fourth quarter of 1937, showing 279 fatalities was given in the Labour Gazette, February, 1938, page 229. In the first quarter of 1937, 229 fatal accidents were recorded (LABOUR GAZETTE, May, 1937, page 590). The supplementary list of accidents, not reported in time for inclusion in the reports covering the periods in which they occurred, contains 25 fatalities for 1937.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the LABOUR GAZETTE. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the first quarter of 1938 were as follows: agriculture, 25; logging, 32; fishing and trapping, 8; mining, non-ferrous smelting and quarrying, 58; manufacturing, 32; construction, 25; electric light and power, 4; transportation and public utilities, 32; trade, 13, service 10. Of the mining accidents, 29 were in "metalliferous mining," 24 in "coal mining," and 5 in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, 9 were in "vegetable foods, drink and tobacco," 1 in "animal foods," 2 in "textiles and clothing," 1 in "leather, fur and products," 7 in "saw and planing mill products," 1 in "wood products," 1 in "pulp, paper and paper products," 2 in "iron, steel and products," 2 in "non-ferrous metal products," 4 in "non-metallic mineral products," and 2 in "chemical and allied products."

In construction there were 10 fatalities in "buildings and structures," 1 in "railway," 11 in "highway and bridge," and 3 in "miscellaneous construction."

In transportation and public utilities there were 18 fatalities in "steam railways," 7 in "water transportation," 1 in "air transporta-

tion," 4 in "local and highway transportation" 1 in "storage" and 1 in "telegraph and telephones."

In trade there were 3 fatalities in "wholesale," and 10 in "retail."

Of the fatalities in service, 4 were in "public administration," 1 in "laundering, dyeing and cleaning," 1 in "custom and repair," 3 in "personal, domestic and business," and 1 in "professional establishments."

There was no serious disaster resulting in the loss of a very large number of lives during the period under review.

Accidents involving the loss of two or more lives were as follows:

Five miners were killed and ten injured at Levack, Ont., on February 4. These men were being lowered in a mine following blasting operations, when a skip overturned on striking an obstruction, pinning some of the workers between the skip and shaft timbers. Following a coroner's inquest the jury recommended that skips being lowered in mine shafts after blasting operations should be brought to a full stop 200 feet above the blasting bulkhead, and should proceed thereafter on a slow signal and that men with lights be placed in each corner of descending skips to watch for any obstructions below.

Five men were killed and five others injured in an explosion in a coal mine, at Hinton, Alberta, on March 30. Until completion of the necessary repairs to the air shaft and ventilation system to restore the mine to working condition, it was necessary to postpone an inspection to determine the cause of the explosion.

At Kirkland Lake, Ontario, on March 15, four miners lost their lives when a stope burst and caved in on them.

On March 2, four ice-cutters were killed near Stratford when a train struck their car in a snow-storm.

When an oil refinery still exploded in Turner Valley, Alberta, on February 26, two company officials and a labourer lost their lives from burns and injuries. The finding of the coroner's jury was that the still was just a welded vessel with insufficient supports and it was recommended that the provincial government inspect all oil refineries when being constructed, and when in operation, and make it obligatory to obtain a licence before refining operations were allowed to be started.

Two miners were killed by a premature discharge of dynamite, at Ronda Mine, Ontario, on February 18. Two smelter workers were burned to death when splashed by molten metal following an explosion due to clay falling into a converter, at Falconbridge, Ontario, on March 3. Another two miners lost their lives, near Kirkland Lake, Ontario, when an auto crashed into a parked truck, on March 15.

Two coal miners were suffocated by gas in a mine, at Luscar, Alberta, on March 14.

Two liquor still workers lost their lives when a still exploded and drenched them with boiling brew.

Two plumbers were drowned near Digby, Nova Scotia, on February 7, when their truck crashed through a bridge. A truck operator and his helper were drowned, near Millidgeville, New Brunswick, on January 13, when a truck load of gravel broke through the ice.

During this quarter four accidental deaths of seamen occurred in Canadian waters. These are not included in the statistical record for Canada, owing to the fact that the men killed were employed on ships registered in other countries. A seaman on a British freighter, was lost overboard about January 15 while en route from Cardiff, Wales, to Saint John. A seaman on an East Indian steamer was scalded by escaping steam, and died in Halifax hospital on February 1. A seaman on a Dutch freighter, fell down a hatch in Montreal harbour on November 17, 1937, and died on February 16, 1938. An oiler on the ss. *Montclaire* was drawn into a winch when he became entangled in fall rope in Saint John harbour, on February 28.

Supplementary List of Accidents

A supplementary list of accidents occurring during 1937 has been compiled which contains 25 fatalities, of which 2 were in agriculture, 2 in logging, 1 in fishing and trapping, 3 in mining, non-ferrous smelting and quarrying, 3 in manufacturing, 4 in construction, 1 in electric light and power, 6 in transportation and public utilities, and 3 in service. One of these accidents occurred in April, 1 in August, 2 in September, 1 in October, 12 in November and 8 in December.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Damages Awarded Trainman in Alberta for Accident

On February 7, 1938, the Supreme Court of Alberta, Appellate division, reversed the judgment of the lower court and awarded damages of $495 for loss of earnings, medical costs, etc. to a brakeman for an injury which was received in the course of his duties and which incapacitated him for work from February 3 to April 4, 1937. In Alberta, conductors and trainmen are within the scope of the Workmen's Compensation Act, 1908, and not under the collective liability system set up by the Workmen's Compensation (Accident Fund) Act, 1918. Under the former statute, actions for damages must be brought and compensation determined by a court.

In stepping to the ground from the ladder of a freight car, the plaintiff slipped on a stone, hurt his ankle and rolled down an embankment to the main track lines which were nearly four feet below the freight line track.

In the opinion of the Court, the place where the plaintiff was obliged to descend from the freight cars had been permitted to become peculiarly and unnecessarily dangerous. Several stones of the kind upon which the employee was injured seemed to be near the landing place. Although it could not be said that the defendant was obliged to remove such stones, the presence of this added danger made it imperative that the defendant should exercise due care to protect its employees against such danger. Even if the plantiff had looked down before he took the last step, as the defence argued he had not done, and had not slipped on the stone, he might have rolled down the embankment with much more serious consequence if a train had been running on the main line. *Langley v. C.N.R.* (1938) 1 D.L.R. 652.

Winnipeg Taxi-driver Awarded Wage-Claim

Judgment for the plaintiff was given by the Manitoba Court of Kings' Bench on February 10 in an action brought by a taxi-driver for wages alleged to be due under the Winnipeg City by-law prescribing a minimum wage for taxi-drivers. The claim covered the period from March 15, 1933, when the by-law went into effect until January 21, 1935, when wages were paid by the week. The Court ordered that the question of the amount to be paid should be referred to the Master of the Court.

The facts in the case were broadly similar to those in a case stated by a Winnipeg police magistrate for the Manitoba Court of Appeal in a prosecution of the same taxi company. The judgment of the Court of Appeal (LABOUR GAZETTE, 1935, p. 305) was to the effect that the time spent by a taxi-driver with his taxi on call from the employer was time spent "on duty" within the meaning of the Winnipeg City by-law and that he must be paid for such time. Mr. Justice Taylor of the Court of King's Bench followed this judgment in the matter of the validity of the claim for the time spent waiting for calls.

The defendants contended, further, that the plaintiff had no right to claim additional wages since he had accepted without question the wages he was paid and had furnished his employer daily with a card indicating the number of hours spent in actual driving and stating that he claimed pay only for the length of time shown on the card. It was also argued that there was no provision in the Highway Traffic Act empowering the City to give authority in the by-law to any driver to bring a personal action for the minimum wage prescribed and that the by-law contained no such provision; that the remedy was prosecution of the defendant company.

On both points the Court decided in favour of the plaintiff. Quoting from a recent judgment of the Judicial Committee of the Privy Council, the judge pointed out that since the statute imposed a duty of a positive kind, "it is not open to the defendant to set up an estoppel;" the plaintiff cannot be released from an obligation to obey a statute nor can the defendant be enabled to escape from an obligation.

As to the plaintiff's individual right to sue, reference was made to several judgments in English cases and it was held that they all go to establish that under similar legislation, a wage-earner can recover in an individual action to the amount of wages earned by him as a minimum wage to which he was entitled under the provisions of a statute, less whatever amount he has already been paid. *MacKenzie v. Moore's Taxi Co. Ltd.,* (1938) 2 Dominion Law Reports 195.

Damages Awarded for Accident in Ontario Laundry

The Ontario Court of Appeal on March 24 dismissed with costs an appeal by the defendant employer from a judgment awarding damages for an injury suffered by the plaintiff through having her arm caught between the rollers of a mangle in the defendant's laundry. Judgment was delivered by Mr. Justice Middleton who stated:—

This is one of those unfortunate cases in which the plaintiff recovers damages for an

injury sustained by her as an operative in a small factory carried on by the defendants instead of compensation under the Workmen's Compensation Act. It is also unfortunate for the defendants because they remain individually liable instead of having the protection afforded by the main provisions of the Act rendering them only liable to pay the assessment in the first part of the Act. This is altogether by reason of the regulations preventing the application of Part I to small industries where it is assumed that the expense of collecting the due assessment would be so great as to render the collective scheme unworkable. The effect of the statute is to leave these small factories subject to the provisions of Part II of the Workmen's Compensation Act.

It was held that the verdict of the jury was justified by the evidence, that the machine was not in a safe condition at the time of the accident because the safety guard was not in a proper and rigid position and that the defendants were to blame in not warning the plaintiff of the danger. The jury had found further that the plaintiff was herself guilty of contributory negligence in disregarding the instructions as to the proper manner in which the articles were to be fed to the mangle. Damages of $1,800 were awarded to the infant plaintiff and $653.50 to her father for out-of-pocket expenses. One-third of the latter's damages were directed to be abated on the ground of his daughter's negligence. Provision for taking into account contributory negligence in the assessment of damages is made in Part II of the Workmen's Compensation Act.

Mr. Justice Middleton pointed out that since there was no complaint as to the discounting of the father's damages by reason of the infant's negligence or the fact that the trial judge had directed that the father should only recover County Court costs, the Court of Appeal had no right to interfere in these matters. *Spencer et al v. Defazio et al,* (1938) Ontario Weekly Notes, 128.

Violation of Lord's Day Act by Fur Dyers

On February 25, Mr. Justice Tetreau of the Superior Court of Montreal condemned a firm of fur dyers to pay a fine of $100 and costs for violating the Lord's Day Act by requiring some of their employees to work on Sunday.

The defence claimed that the fur dyeing process was a continuous one and that it was necessary to employ at least one man on Sunday to remove the skins from the dyeing solution. The Court pointed out, however, that the defence had failed to establish the date on which the furs were put in the solution and that there was no proof that they had to be removed on the Sunday in question, so that the work could not be held to be a "work of necessity" as exempted by the Act. *R. v. Sable, Ltd.*

Industrial Standards Act before Saskatchewan Court

Two recent cases involve an interpretation of the Saskatchewan Industrial Standards Act as applied to one-man barber shops.

On December 9, 1937, at Regina, Judge Hannon of the District Court upheld the Crown's appeal against the dismissal of a charge that the proprietor of a one-man barber shop failed to post the schedule of wages and hours made binding under the Industrial Standards Act by Order in Council of July 29, 1937. The Act stipulates that a copy of the schedule must be posted in a conspicuous place where the employees are at work. As the main purpose of the appeal was to obtain an interpretation of the Act, the judge did not impose costs but fined the defendant $1 and in default of payment one day in jail.

The defence contended that the operator of a one-man shop was not an employer under the Act and therefore not subject to the provision requiring the posting of notices. The Court pointed out, however, that the Act provides that, for the purposes of the Act, every person in any way engaged in any industry, shall, in so far as he personally performs work in such industry, be deemed an employee and that every person who is the proprietor of a shop or business shall be deemed an employer. The section then provides that the provisions of the Act and schedules shall, *mutatis mutandis,* be construed accordingly, "notwithstanding that such person may thereby become both an employer and employee, or may become an employer for one purpose and an employee for another purpose, or that the status of such person may be changed from time to time." In the language of the Court, such person may be "subject to the obligations of an employer on the one hand and entitled to the privileges and rights of an employee on the other, according as may be the circumstances of any particular incident involved."

The Court did not agree with the opinion of the magistrate that only in the schedule is it set forth that the same person may be both an employer and an employee but held that the language of the schedule is only a definite and explicit statement of this section of the Act. This interpretation was supported by the marginal note to the section, "One-man operators and partners".

A second complaint was later laid against the same defendant that he had violated a regulation requiring employers governed by schedules under the Industrial Standards Act to keep certain records available for inspection "by any person acting under the authority of the Act or of any schedule thereto". The charge was dismissed by the magistrate.

The defendant had refused to show two members of the advisory board set up under the Industrial Standards Act the records of his business. Counsel for the defence put forward several arguments: (1) that the prosecution was not instituted properly since the Act provides that any prosecution must have the written consent of the Commissioner of Labour and Public Welfare and in this case the complaint was signed by an "Acting Commissioner," (2) that the proprietor of a one-man shop was not an employer under the Act, (3) that the regulation is *ultra vires* of the Executive Council since the Act gives power only to the Commissioner to require the production of records and there is no provision in the Act for the delegation of this power. The first two arguments were held to fail, the second one having been ruled against by the Court of Appeal in the earlier case. The contention that the regulation was outside the scope of the powers given by the Act to the Lieutenant-Governor in Council was accepted by the Court. Further, it was held that the two members of the advisory board, who had demanded production and inspection of the records, were not "persons acting under the authority of the Act or schedule". The advisory board is not given power to demand the production of information and even if the board had such power only the whole board could act as there is no provision by which the board can delegate its powers to two members.

The Court also agreed with the contention of the defence that notice of intention to require production should have been given. The regulations state that the Commissioner may require the employer to produce information "at such time or times as the Commissioner may require". The Court stated that "the Commissioner can have production and inspection only at a place named....." by him and this presupposes a notice that the information will be required. It can hardly be argued that the advisory board or its members could act without such a notice for this would be tantamount to according them wider powers than the Commissioner whose authority comes from the Act itself. *R. v. Turner* (1938 1 W.W.R. 498 and Regina Police Court, April 2, 1938.

THE LABOUR GAZETTE

PREPARED AND EDITED BY
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 38] JUNE, 1938 [NUMBER 5

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada showed an increase at the beginning of May, according to returns received by the Dominion Bureau of Statistics from 10,551 firms, each employing a minimum of 15 workers and representing all industries except agriculture, fishing, hunting and highly specialized business. The working forces of these firms aggregated 1,024,702 persons, or 23,500 more than in the preceding month. The employment index (with the average in the calendar year 1926, as the base equal to 100) stood at 107·4, as compared with 105·0 at April 1, and 106·3 at the beginning of May of last year. The indexes for May 1 of recent years are as follows:—1936, 99·5; 1935, 95·2; 1934, 92·0; 1933, 77·6; 1932, 87·5; 1931, 102·2; 1930, 111·4; 1929, 116·2; 1928, 106·8 and 1927, 101·8. The industrial expansion indicated at the latest date was on a scale rather greater than the average between April 1 and May 1 in the years, 1929-1937; the index of employment, after correction for seasonal influences therefore rose slightly, from 111·2 in the preceding month to 111·5 at the beginning of May.

Unemployment in Trade Unions.—At the beginning of May, 1938, the unemployment percentage reported to the Department of Labour by local trade union members throughout Canada stood at 13·1 as compared with percentages of 12·8 at the beginning of April, 1938, and 11·1 at the beginning of May, 1937. The May percentage was based on the reports received from 1,917 labour organizations, comprising a membership of 220,696 persons, 28,841 of whom were out of work.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada for the month of April, 1938, recorded an increase over the previous month, but a decrease from April a year ago in the average daily placements effected, services and farming showing the highest gains under the first comparison and logging, construction and maintenance and farming the greatest losses under the second. Vacancies in April, 1938, numbered 25,072, applications 58,638 and placements in regular and casual employment 22,889.

Prices.—In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was $17.36 at the beginning of May as compared with $17.50 for April, a slight increase in rent being more than offset by a decline in the cost of foods. Some comparative figures for earlier dates are $17.28 for May, 1937; $16.36 for May, 1936; $15.41 for June, 1933 (the low point in recent years); and $21.49 for May, 1930. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 continued downward in May being 80·3 for the week ended May 27 as compared with 81·5 for the week ended April 29 and 83·3 for that ended April 1. The decline in May was due mainly to lower prices for grains, milled products and non-ferrous metals. On a monthly basis the index number was 82·3 for April; 85·1 for May, 1937; 71·9 for May, 1936; 63·5 for February, 1933 (the low point in recent years); and 93·4 for May, 1929.

Business Statistics.—The latest information available reflecting industrial conditions in Canada is given in the table on page 600. The index of the physical volume of business continued upward in April being 5 per cent higher than in March and 7 per cent higher than in February. It was, however, 11 per cent lower than in November, 1937, the highest level recorded by the index since 1929, and 8 per cent lower than in April, 1937. Of the principal factors used in the construction of the index number, mineral production, manufacturing, construction, trade employment, car loadings, imports and exports indicated advance in April as compared with March but all were lower than in April last year except mineral production and trade employment both of which should gain in this comparison also the increase in the former being about 27 per cent. The output of electric power was substantially lower in April both as compared with the previous month and with April, 1937. Information available for May indicates employment to be at a higher level than in April and higher also than in May, 1937. The number of cars of revenue freight

*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended May 27, 1938.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending May 28, 1938, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending May 21, April 23 and March 26, 1938; May 22, April 24 and March 27, 1937. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

loaded and the value of construction contracts awarded were greater than in the previous month but less than in May, 1937. The production of steel ingots and castings was about 7 per cent lower than in April and 5 per cent lower than in May, 1937. The wholesale prices index number was lower in both these comparisons.

Strikes and Lockouts.—The number of strikes and lockouts during May was 15, involving 2,054 workers with a time loss of 11,727 man working days, as compared with 15 disputes in April, involving 2,874 workers and a time loss of 17,548 days. Nearly all of the time loss for the month was due to strikes of saw-mill workers at Fort Frances, Ont., and silk factory workers at Louiseville, P.Q., as most of the other disputes involved small numbers of workers for short periods. In April the strike at Fort Frances and strikes of taxicab drivers at Toronto, Ont., and of steamship employees on the Great Lakes caused most of the time loss. In May, 1937, the number of disputes was 46, the highest in many years, involving 10,393 workers with a time loss of 53,818 days. These figures were exceeded in recent years only in April and August, 1937. Of the fifteen disputes recorded in May, 1938, twelve were recorded as terminated, four resulting in favour of the employers concerned, two in favour of the workers involved, while compromise settlements were reached in four cases, and the results of two disputes were recorded as indefinite. Three disputes, involving approximately 590 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Proposed Dominion expenditures on work creating projects

Clarifying the specific purposes of proposed expenditures totalling $40,000,000 for work-creating projects, the Minister of Labour Hon. Norman McL. Rogers, made the following statement in the House of Commons on May 20.

"In view of questions raised during the recent Debate on unemployment I believe it will meet the wish of the House if a brief statement is made at this time with respect to the supplementary estimates which have just been tabled. In these estimates provision is made for work-creating projects amounting to a total expenditure of over $40,000,000. This is in addition to work-creating projects in the main estimates amounting to an almost equal sum.

"Apart from expenditures on public buildings in the various provinces and the normal outlay for the repair of wharves and breakwaters, the larger items in these estimates carry out the policy of the government to stimulate basic industries and broaden the foundations of a long-range program of conservation and development.

"$1,310,000 is set aside for improved road transportation into new mining areas and a further supplementary vote for geological surveys in addition to the $300,000 appearing in the main estimates.

"The total of proposed expenditures on highway improvement apart from mining roads is over $3,500,000. Of this total there is a new item of $1,000,000 to reduce the menace of level crossings as a supplement to the contribution of $500,000 to the grade-crossing fund already made in the main estimates. Over $3,000,000 is assigned to Trans-Canada, tourist highway and national parks. Another item in the group of expenditures designed to assist the tourist industry is the sum of $450,000 for the restoration and development of historic sites.

"Over $7,000,000 is to be spent on special projects of harbour and river development including a contribution of $300,000 to the Grand River conservation project in Ontario. There are substantial construction outlays for harbour improvements at Halifax, Saint John, Quebec, Montreal, Toronto, Hamilton and Vancouver.

"The sum of $1,000,000 is also to be spent on canal improvements in addition to the expenditures appearing in the main estimates.

"The sum of $650,000 is to be spent for the encouragement of the fishing industry.

"The expansion of facilities for air transportation is given a prominent place in the development program. The sum of $800,000 is allocated for the construction and improvement of airports along the Trans-Canada route and an additional $500,000 for assistance to municipal airports. This is in addition to the sum of $1,722,400 for the construction of airports in the main estimates, and $800,000 for assistance to municipal airports.

"As announced in the Speech from the Throne the Youth Training Plans are to be extended. The sum of $2,250,000 is included in the estimates for training projects for unemployed young people and older unemployed persons. A considerable portion of this amount will be used for forestry training and conservation.

"To provide for rehabilitation and water storage in the prairie provinces under the

Prairie Farm Rehabilitation Act the sum of $3,500,000 is included in the supplementary estimates. This amount will be expended largely in the drought areas of Saskatchewan and Alberta.

"New expenditures are included for forest conservation and fur conservation.

"It is also possible at this time to make a further announcement which I believe will be welcomed in this House and in the country. In accordance with the principles laid down in the recommendations of the National Employment Commission legislation will be introduced at the present session to provide additional encouragement to low-cost and low-rental housing. Legislation will also be introduced to provide low-interest loans to municipalities for self-liquidating projects. These important developments of the government's program are designed to give further stimulus to the construction industry and to provide additional employment through private and public enterprise in large centres of population and in localities which may not benefit directly from the construction of public buildings and other works projects."

(Since the above statement was made, the legislation to which the Minister referred was introduced. One measure, which received its third reading in the House of Commons on June 6, authorizes provision of a sum not exceeding $30,000,000 for self-liquidating municipal projects. Another measure, which is reviewed below, provides for repeal of the Dominion Housing Act of 1935 and re-enactment of certain provisions with amendments and additions.

Introduction of new Dominion Housing Legislation

On Wednesday, June 8, Hon. Charles A. Dunning, Minister of Finance, introduced a bill repealing the Dominion Housing Act of 1935 and re-enacting certain provisions of the old Act—with amendments and additions; and making certain provisions with respect to low rental houses and municipal taxes.

Introducing the resolution, Hon. Mr. Dunning said that "the new act will be divided into three parts, each district and whole in itself and attempting to deal with a specific phase of the housing problem."

As summarized by the Minister, Part I involves the repeal of the Dominion Housing Act and the re-enactment of parts of it, together with important changes and additions designed to bring the facilities of this act to individuals and communities that have not hitherto benefited from it. This part of the legislation (part I) is intended solely for families who wish to own homes, and strong emphasis is placed upon facilities for families in the lower income brackets and in the small and remote communities.

Part II contemplates an experiment on a comprehensive scale in the low rental housing field.

Part III is intended as an attack on the major obstacle retarding the building of new houses, the high level of real property taxes.

Referring to loans made under Part I, the Minister of Finance outlined the provisions of the new bill, as follows:

"A housing loan may in future be made for from 70 to 80 per cent of the lending value of the new house, and of this total, whatever it may be, the Dominion will advance 25 per cent, and the private lending institution or local municipal authorities, as the case may be, 75 per cent. Under the old legislation the Dominion's advance was 20 per cent of the lending value, and the maximum amount of the joint loan was 80 per cent, with provision made by regulation for 75 per cent and 80 per cent loans in certain cases as well. This change will simplify accounting, lessen bookkeeping costs, and eliminate the temptation to manipulate estimates of cost and of appraised value in order to bring the loan within the existing 70, 75 or 80 per cent categories. Provision will be made in the bill that in the case where the lending value does not exceed $2,500—that is the definitely low cost house—a loan may be made up to 90 per cent, of which the Dominion is to advance its 25 per cent.". . . .

"A further important change in connection with Part I is to make it possible for a payment to be made to a lending institution to assist it in defraying the special costs incurred in arranging loans, making appraisals, inspections and so forth in small and remote communities designated. This payment is not to exceed $20 for any one loan, plus a mileage allowance fixed by the minister for necessary travelling expenses based upon the distance from the nearest place from which the loan can be arranged and supervised by the lending institution. . . .

"Another new provision in Part I increases the maximum amount which may be paid out by the minister in respect of advances, losses and expenses. A maximum of ten million dollars was the authority under the old act; it is proposed to increase this authority to twenty million dollars. Under the old act the Dominion has already committed itself to $4,500,000 in respect of the $17,300,000 housing construction. The figure of $20,000,000 provided in the resolution now before the house gives us under the authority a leeway of about $15,500,000 which, together with the funds advanced by the lending institutions under the provisions of the act, should make it possible to make aggregate loans up to $60,000,000 or more under this part of the national housing act."

Referring to Part II of the bill, Hon. Mr. Dunning explained that with the approval of the governor in council it gave authority to the Minister of Finance to make loans to local housing authorities for the purpose of assisting in the construction of houses to be leased to families of low income, the aggregate principal amount of such loans not to exceed $30,000,000.

Dealing with Part III of the bill Hon. Mr. Dunning stated that with the approval of the

governor in council the Minister of Finance would be "authorized to pay the municipal taxes levied upon a house, the construction of which begins between June 1, 1938, and December 31, 1940, up to the following amounts:

100 per cent of such taxes for the first year in which the house is taxed;

50 per cent of such taxes for the second year in which the house is taxed; and

25 per cent of such taxes for the third year in which the house is taxed.

"Municipal taxes are defined to include the general municipal tax and the school tax, but excluding special and local improvement taxes. The minister pays only the increase in such taxes due to the construction of the new house. . . .

"The second condition is that the cost of the construction of the house must not exceed $4,000. Municipal taxation assistance is confined entirely to low cost homes."

Referring to the stimulus such a housing program would give to employment in the building and allied trades Hon. Mr. Dunning stated:

"It has frequently been estimated that eighty per cent of every dollar spent in house building goes to labour, either direct or indirect. If this estimate be correct, the $100,000,000 spent on the construction of low cost housing during the next three years would provide $80,000,000 in wages to workmen in the construction trades and in the building material and supply industries, and the result would be, if that were true, that for every $1,000 paid in wages the tax subsidy would cost the Dominion about $54.70—and that is very much cheaper than relief."

Statistics of material aid recipients

The total of unemployed persons receiving non-agricultural material aid throughout Canada in April 1938, revealed a continuing substantial reduction from the previous year, according to preliminary figures compiled by the Registration Branch of the Department of Labour.

These figures, released on June 7 by Hon. Norman McL. Rogers, Minister of Labour, showed that about 169,000 fully employable persons were receiving non-agricultural material aid in April, 1938. This was a decrease of 31 per cent from April, 1937, when the number was 245,023. In comparison with the total for March, 1938, a decrease of 3·3 per cent was indicated. Seventy per cent of the total of fully employable persons on aid was reported from 51 cities of over 10,000 population.

When totals of all those in receipt of non-agricultural material aid in April were compared with the corresponding month of 1937, a decrease of 24·2 per cent was shown. The preliminary grand total of persons on non-agricultural aid, including totally unemployable, partially employable and fully employable, together with all dependents of family heads, was 632,000 in April, 1938. This was a decrease of 3·2 per cent from March, 1938.

Early April figures from the registration showed an aggregate of 90,000 farmers (resident farm operators) as receiving agricultural material aid for subsistence across Canada. These, together with their dependents, accounted for a farm population of 406,000. Of this total, 350,000 or 86·3 per cent were located in Saskatchewan where drought conditions of last year continued to augment the totals; in this Province the number of all classes dependent upon agricultural aid showed an increase of 95·1 per cent over April, 1937, but showed no change from March, 1938. Due to increases in Ontario and Quebec, however, the total for all provinces increased by one-half of one per cent.

Shipping Dispute Settled by Conciliation of Department of Labour

The services of the Conciliation Branch of the Dominion Department of Labour were sought in connection with a dispute involving directly three steamship companies operating on the Great Lakes and the Canadian Seamen's Union.

The immediate cause of the dispute was the dismissal of three men from the ss. *Red Cloud* at Montreal on Saturday June 4 and this resulted in the tying up of the ss. *Damia* in the locks at Cornwall, thereby obstructing all traffic in the canal.

The union officials alleged that the three companies concerned had discriminated against members of the Canadian Seamen's Union.

Early the next morning (June 5) the ss. *Damia* was backed into the canal basin in order to permit traffic to proceed.

Negotiations carried on by the Conciliation Branch resulted in a settlement of the dispute, which covered not only the Cornwall situation but applied to the Great Lakes generally.

Immediately following the settlement the ss. *Damia* proceeded to its destination at Montreal.

Death of Hon. M. M. MacBride, Ontario Minister of Labour

The death occurred on June 5, of the Hon. Morrison Mann MacBride, Ontario Minister of Labour, at his home in Brantford. Born of pioneer Scottish parentage at White Lake in 1877, he was educated in the public and high schools of Arnprior. Early in life he entered the printing trade, becoming a member of the printer's union, and served his apprenticeship at Ottawa, Quyon, and Galt. In 1903 he joined the staff of the *Winnipeg Free Press,* and in 1905 he returned to Brantford to enter into business for himself.

His municipal career included a number of terms as alderman in Brantford and eight terms as Mayor of that city. Four times he

was elected a member of the Ontario Legislature, the first occasion being in 1919 when he was Labour representative for South Brant.

In 1937 he was appointed to the Labour portfolio in the Ontario Cabinet, and this summer he had planned to make a survey of working conditions in the province with a view to promoting industrial relations.

Convention of International Association of Public Employment Services

The twenty-sixth convention of the International Association of Public Employment Services was held in Ottawa on May 25-27 with an attendance of 156 official delegates from 28 States and 18 from Canadian Provinces. Featuring the convention were the presentations on the "Employment Service and Employment Problems" and "Unemployment Compensation" (which are reviewed in this issue on pages 638-644).

In addition, the panel discussions covered practically every phase of public employment service activity.

At the convention's first session the delegates were welcomed by Dr. H. L. Keenleyside of the Department of External Affairs; and addresses were given by Mr. R. A. Rigg, Director of the Employment Service of Canada; and by Mr. W. Frank Persons, Director of the United States Employment Service.

The delegates were subsequently the guests of the Department of Labour of Canada at the annual banquet. Presiding at this function was Mr. V. C. Phelan, Assistant Director of the Employment Service of Canada, and felicitous addresses were given by Hon. Norman McL. Rogers, Minister of Labour; Mr. W. M. Dickson, Deputy Minister of Labour; Colonel Henry Bankhead, Commercial Attache at the United States Legation; and Mr. P. J. Charlet, President of the Association.

At the concluding luncheon there was an address by Dr. William M. Leiserson, of the National Mediation Board, Washington, who spoke on unemployment compensation responsibilities.

The election of the chief officers resulted as follows: President, Byron Mitchell, director of Texas State Employment Service; first vice-president, V. C. Phelan, assistant director of the Employment Service of Canada; second vice-president, Mrs. A. L. Wilder, director of the New Hampshire State Employment Service; third vice-president, W. T. Doe, director of the Ohio State Employment Service; secretary-treasurer, B. C. Seiple, associate director, Ohio State Employment Service; general secretary, Charles L. Hodge, Federal Railroad Retirement Board, Washington.

Holidays with Pay in Great Britain

Elsewhere in this issue there will be found a review of the report of the Committee on Holidays with Pay.

Among its recommendations the Committee suggested that an annual holiday with pay of not less than a week's duration, should be established as part of the terms of employment of all manual and clerical employees and drew attention to the requirements of the various Unemployment Insurance Acts. The Committee pointed out that the provisions of the unemployment insurance acts regarding benefits and payment of contributions would have to be altered in order to bring about a general arrangement of holidays with pay.

According to the *"London Times"* the Minister of Labour has referred to the Unemployment Insurance Statutory Committee for advice on the question of whether any change in the law of unemployment insurance either as regards contributions or benefit is required in relation to holidays and other periods of suspension from work with or without pay.

The matters which the Unemployment Statutory Committee will now examine include among others:

(1) The payment of unemployment insurance contributions in respect of paid holidays.

(2) The question whether unemployment ought in any circumstances to be payable for days of holiday.

(3) The question whether unemployment benefit ought, in any circumstances, to be payable for periods during which workpeople not on holiday are suspended from work and are in receipt of payments from their employers.

(4) The present rule that days of recognized holiday for which no payment is received are treated as days of unemployment for the purpose of serving the waiting period, and for the purpose of preserving the continuity of unemployment, but not for the purpose of drawing benefit.

Orders prohibiting industrial homework in New York State

Industrial homework in the artificial flower and feather industry is prohibited in New York State by Homework Order No. 3 issued by Industrial Commissioner Elmer F. Andrews which became effective on May 2.

This Order was issued on the ground that "the wages and other working conditions of some 5,000 homeworkers employed in the industry at the peak of the season jeopardize the wages and other working conditions of the 4,000 women in the shops and are injurious to the health and welfare of the homeworkers themselves."

It will affect 269 shops in the artificial flower and feather industry, most of which are concentrated in New York City.

Commissioner Andrews stated that the Order will mainly affect the employers in the artificial flower industry since there is no homework in the feather industry, all work being done by factory workers.

This is the third industry in which the Commissioner has prohibited industrial homework under the new Homework Law enacted in 1935. The first Order was issued in the men's and boys' outer clothing industry in 1936. Early last year homework was banned in the men's and boys' neckwear industry.

According to the *"Industrial Bulletin"* (official publication of the New York State Department of Labour), the new Order prohibiting homework on artificial flowers and feathers follows an investigation of homework wages and other working conditions in this industry by the Division of Women in Industry and Minimum Wage under the supervision of Frieda S. Miller, Director of the Division. The investigation was undertaken in response to complaints from women factory workers that their wages are being undermined by the competition of low-paid homeworkers, enlisted in large numbers for the few weeks of the busy season.

The investigation showed that, in the spring of 1937, homeworkers in the industry outnumbered women workers in the shops. Whole families, including young children, were working for wages far below the subsistence level.

Outline of measures for dust control in foundries

An outline of measures for dust control in foundries forms the subject of a preliminary report by Mr. Theodore Hatch, Associate Dust Control Engineer, Division of Industrial Hygiene, of the State of New York Department of Labour. As stated in its introduction, the purpose of the report published in a recent issue of the *"Industrial Bulletin"* (official publication of the New York State Department of Labour), is to review the foundry dust problem and to present in outline some of the measures that have been developed for its control. In so doing it was pointed out that there is no single solution of the problem which will meet the requirements of every foundry.

The factors entering into the dust problem and the sources of dust in foundries were detailed, and dust control recommendations were made concerning the various foundry operations—moulding, melting and pouring, core-making, shake-out, removal of sand core, sand re-conditioning, etc.

Dealing generally with methods for control of dust, the report states:

"Dust control measures vary in details from one foundry to another. Steel foundries differ in their requirements from non-ferrous foundries and small jobbing foundries differ from highly mechanized production plants. In foundries of the latter type, mechanical ventilation can be applied to practically all the important dust-producing processes. In the small jobbing plants, however, only a few operations can be thus controlled. Good housekeeping, proper use of general ventilation, the intelligent application of water and other common-sense measures constitute the most important items in the control program. Localized operations such as grinding, tumbling and blast cleaning, of course, require adequate coal exhaust ventilation in any foundry."

The report also emphasizes that "above all there must be a complete understanding and acceptance of the program, beginning with the plant manager and extending down through the whole organization."

Relief appropriation in the U.S.A.

Early in May, the United States House of Representatives voted a $3,000,000,000 appropriation to cover the cost of the Administration's program of relief measures.

The appropriation was allotted as follows: work relief, $1,250,000,000; public works, $965,000,000; Farm Security Administration, $175,000,000 and the National Youth Administration, $75,000,000. Smaller sums were appropriated for administrative expenses and other purposes.

The $3,000,000,000 program is part of a larger plan whereby $4,500,000,000 in loans and expenditures would be made, the $1,500,000,000 being provided in previous legislation for highway building purposes; Civilian Conservation Corps Camps; and for loans made by the Reconstruction Corporation.

Status of "salaried employees" studied by I.L.O. Committee

The Advisory Committee on Salaried Employees, which was established by the International Labour Office to secure the opinions of organizations of salaried employees on the social problems which most particularly concern this important category of workers, has completed its work. At a recent session in Geneva the Committee studied the definition of the term "salaried employee" and noted that there are constant difficulties in the application of social legislation in countries where no distinction has yet been made in legislation between salaried employees and other groups of workers.

Until such time as it is possible for the different States to accept an international legal definition of the term "salaried employee," the Committee considered that it would be highly desirable for this matter to be regulated on a national basis within each country at the earliest possible time.

In the light of the principles which experience has shown to give the greatest guarantees, the Committee was of the opinion that the best procedure would be to formulate a general definition based on the predominantly non-manual character of the work performed. This general definition would be supplemented, if necessary, by enumeration by occupations of the workers who could be considered as being within the category of salaried employees for the purposes of legislation, or by enumeration of establishments.

The Committee drew special attention to the necessity for establishing a clear legal definition of the status of commercial travellers and representatives, whose position is very vague in a large number of countries.

The Committee also had before it a report by the International Labour Office on the various systems introduced in certain countries during recent years to ensure organized contact between salaried employees and employers for the study of questions which might be the subject of legislation or be regulated in contracts of employment.

Believing that it is desirable to adopt as widely as possible the principle of the occupational representation of salaried employees, provided always that the free exercise of trade union rights is not thereby impeded, the Committee considered that encouragement should be given to efforts of the kind made in recent years, more especially in Belgium, France and Great Britain, to set up joint committees for private undertakings and utilities (commercial enterprises, banks, insurance companies, etc.), especially as the experience gained in this field over a long period of years in public administration and services has been appreciable.

In conclusion, the Committee studied the documents prepared by the International Labour Office on the regulation of the conditions of work of all groups of salaried employees and technicians. It expressed the wish that in every country measures be taken in agreement with the trade union organizations to secure satisfaction, by means of legislation or collective agreements, for the economic, social and legal requirements and the legal protection of salaried employees, with special reference to stability of employment, termination of contracts, the protection of salaried inventors, the radius clause, the reduction of hours of work, shop closing, arrangements for health and comfort and sickness leave, holidays with pay, and social insurance. The Committee also considered that measures are required to meet the insufficient payment of several groups of salaried employees.

After drawing the attention of Governments and employers to the necessity for specially protecting young and old salaried employees, the Committee requested the International Labour Office to continue and extend its collection and dissemination of information on all these points, such work having proved extremely useful to all concerned.

Report on health and pensions insurance in Australia

On page 1057 of the October, 1937, issue of the LABOUR GAZETTE reference was made to a report on a proposed plan of unemployment insurance submitted to the Commonwealth Parliament of Australia. Recently, a report on Health and Pensions Insurance made by Sir Walter S. Kinnear at the request of the Commonwealth Government has been received.

The report is divided in three parts—Part I deals with "General Principles Underlying Social Insurance"; Part II is entitled "Health Insurance"; and Part III refers to Pensions Insurance.

Health Insurance.—In his report, Sir Walter Kinnear suggests that "a National Health Insurance scheme should be established in Australia on a compulsory and contributory basis which would cover all persons over 16 years of age employed under a contract of service in any of the States of the Commonwealth, except persons employed otherwise than by way of manual labour whose rate of remuneration is in excess of £365 per annum" and except certain other special classes of persons which are specified in an appendix to the report.

It is recommended that weekly contributions payable in respect of each insured person should be shared equally between the employers and employees and that it should be equivalent in value to the benefits payable in the case of persons, of the same sex, who entered at the age of sixteen. The weekly contributions based on calculations made by actuaries to cover benefits and costs of administration are 1 shilling 3 pence for men, and 1 shilling 2 pence for women. It is stated that "the sufficiency of these contributions is dependent upon the terms agreed upon with the medical profession and with the chemists for the provision of medical benefit." It is also recommended that the scheme should bear the entire cost of ad-

ministration other than costs of a purely supervisory executive at the central department.

The following benefits under the proposed National Health Insurance scheme are suggested:—

(*a*) Medical benefit consisting of free medical attendance and treatment of insured men and women including the supply of drugs and medicines and certain medical and surgical appliances.

(*b*) Sickness Benefit.

Men, 20s. a week.

Women, 15s. a week, with an additional allowance of 3s. 6d. a week in respect of each dependent child under 16 years of age.

(*c*) Disablement Benefit.

Men, 15s. a week.

Women, 12s. 6d. a week, with an additional allowance of 3s. 6d. a week in respect of each dependent child under 16 years of age.

(*d*) Additional benefits out of valuation surpluses, taking the form of increases in the foregoing rates, and payment towards the cost of certain treatment such as dental and ophthalmic treatment, treatment in hospitals and convalescent homes, etc.

Commenting on the effect of a health insurance scheme the report states:—

"The net effect of the initiation of a health insurance scheme would be that workers would be protected to the extent of the benefit provided, against the losses arising from illnesses (short or long) up to the old age pension age, and that they would secure free medical attendance and treatment (including drugs) from the doctors and chemists of their own choice. It is estimated that, in addition to the payment for medical benefit, the cash disbursements for sickness under the scheme would, in the course of time, exceed £3,000,000 a year, and that about 1,000,000 persons would participate in one or other of the benefits of the scheme in each year."

Pensions Insurance.—Dealing with pensions insurance it is suggested that "a widows', orphans' and old-age contributory pensions scheme should be set up in Australia and that it should be closely interlocked with the suggested National Health Insurance scheme and that all persons insured under the latter scheme whether as employed or voluntary contributors, should also be insured under the pensions scheme."

The suggested pensions benefits as summarized in the report are as follows:—

(*a*) A widow's pension of 12s. 6d. a week until the date of the first quinquennial increase of contributions, thereafter 15s. a week for life (unless she remarries) with an additional allowance of 3s. 6d. a week for each dependent child under 16 years of age.

(*b*) An orphan's pension of 7s. 6d. a week until the attainment of 16 years of age. An orphan is a child both of whose parents are dead, but the allowance of a child of a widow who remarries might be increased to 7s. 6d. a week.

(*c*) An old-age pension of 15s. a week at the age of 60 for life for an insured woman with an additional allowance of 3s. 6d. a week for each dependent child under 16 years of age.

(*d*) An old-age pension of 20s. a week at the age of 65 for life for an insured man with an additional allowance of 3s. 6d. a week for each dependent child under 16 years of age.

(*e*) Old-age pensioners who were insured on attaining the old-age pension age, to be entitled to free medical benefit for life.

On the basis of the proposed benefits "and in accordance with the proposal to restrict the amount of the contributions of all contributors to the value of the benefits at the age of sixteen and including the estimated costs of administration, the contributions per week, as calculated by the actuaries" are set out in the report as being 2 shillings 9 pence for men and 1 shilling 4 pence for women. As in the case of the health insurance contribution, it is suggested that the pension contribution should be shared equally between employer and employee.

It is pointed out in the report that "owing to the necessity for building up reserves and the need for a proper insured status on the part of claimants the benefits of the scheme would only come into operation gradually." A graduated scale of contributions for the first ten years is therefore suggested.

It is proposed in the report that in order to create a financial reserve and as a contribution from the state "the Commonwealth Government should start the scheme with a grant of £1,000,000 a year for the first five years and thereafter that the grant should be increased at the rate of £500,000 a year until it reaches a maximum of £10,000,000 in the year 1960 at which date the grant would be stabilized. All payments in excess of the yearly cash disbursements should be invested, and it is estimated by the actuaries that with interest at 3½ per cent the interest income on the fund so created should be sufficient, with the yearly grant of £10,000,000 from the Commonwealth Government, to cover all future liabilities under the scheme.

"The net effect of a contributory pension scheme would be that the industrial population of Australia would secure, on a self-respecting basis, a guaranteed measure of security in their old-age, and protection for their widows and children in the event of premature death, and that eventually £46,000,000 a year would be distributed in benefits under the various schemes among over treble the present number of participants. Under the existing system only 37½ per cent of the men and 33 per cent of the women in the old-age pension groups are in receipt of old-age pensions. Separate statistics are not available to show what percentage of the 230,000 widows in Australia are at present in receipt of invalid or old-age pensions, but the proportion cannot be high."

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

SIX applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From 23 truck drivers and helpers in the employ of the United Delivery, Limited, Ottawa, Ontario. The dispute relates to the employees' request for an agreement respecting wages and working conditions, also to the alleged unjust dismissal of an employee.

(2) From cartage service clerks, garagemen, foremen, stablemen, horseshoers, motormen, wagonmen, etc., in the employ of the Express Department of the Canadian National Railways, at Drummondville, St. Hyacinthe and Montreal in the Province of Quebec, and at Brantford, Guelph and London in the Province of Ontario. The employees concerned, 250 in number, are members of the Canadian Brotherhood of Railway Employees. They request an agreement respecting wages, hours and working conditions.

(3) From 40 employees of the Diamond Truck Company, Limited, Montreal, P.Q., being truck drivers, warehousemen, etc., members of the Automotive Transport Section, Canadian Brotherhood of Railway Employees. The employees' request for an agreement respecting wages and working conditions is given as the cause of the dispute.

(4) From various classes of employees of the Canadian Pacific Railway Company at the Britt Coal Dock, Britt, Ontario, being clam tower operators, riggers, land, hoist or crane operators, clam firemen, power house firemen, land hoist or crane fireman, hatchman, cable car trippers, trestlemen and coal handlers, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The dispute relates to the employees' request for increased wages, 70 men being directly affected and 100 indirectly.

(5) From red cap messengers in the employ of the Toronto Terminals Railway Company, being members of the Canadian Red Cap Messengers' Federal Union No. 134. Seventy-seven employees are stated to be directly affected by the dispute, which relates to hours of labour, seniority, pass rights, holidays with pay, and wages.

(6) From the Lethbridge Collieries, Limited, at Lethbridge, Alberta, and their employees, being members of District 18, United Mine Workers of America (joint application). The matters involved in the dispute are wages and certain working conditions, approximately 500 employees being directly affected.

Board Established

The Minister of Labour established a Board of Conciliation and Investigation on May 27th to deal with a dispute between Hendrie and Company Limited, of Toronto, and their motor truck drivers, and appointed Messrs. H. A. F. Boyd, of Hamilton, and J. L. Cohen, K.C., of Toronto, members thereof on the recommendation of the company and employees, respectively. The application in this matter was received in the Department of Labour during March (LABOUR GAZETTE, April, 1938, page 374). The dispute directly affects 100 employees, who request an agreement respecting wages, hours and working conditions.

Other Proceedings

The personnel of the Conciliation Board established early in May (LABOUR GAZETTE, May, 1938, page 479) to deal with a dispute between the Canadian Press and 85 employees engaged in its telegraph service, members of the Commercial Telegraphers' Union, was completed on May 16th by the appointment of Professor Norman A. M. MacKenzie, of Toronto University, as chairman. This appointment was made on the joint recommendation of the other Board members, Messrs. W. Rupert Davies and Leonard James Ryan.

It was reported in the LABOUR GAZETTE for April, 1938, page 374, that at the joint request of the Canadian Collieries (Dunsmuir), Limited, and the Western Fuel Corporation, Limited, and their employees on Vancouver Island, the Conciliation Board established in July, 1937, was being reconvened, a settlement of the differences concerning wages and working conditions not having been reached since the Board adjourned on August 20. Word has now been received from the chairman of the Board, Mr. L. W. Brockington, K.C., that a temporary agreement has been reached between the parties, pending an experiment with contract labour and certain technical and financial investigations.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1938

THE following table shows the number of disputes, workers involved and time loss for May, 1938, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*May, 1938	15	2,054	11,727
*April, 1938	15	2,874	17,548
May, 1937	46	10,393	53,818

*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of strikes and lockouts recorded for May was the same as for April, the numbers of workers involved and the time loss were somewhat lower as only two of the disputes involved relatively large numbers of workers or caused much time loss, namely the strikes of silk factory workers at Louiseville, P.Q., and of sawmill workers at Fort Frances, Ont. In April, strikes of taxicab drivers at Toronto, Ont., steamship employees on the Great Lakes and St. Lawrence River and the strike of sawmill workers at Fort Frances, Ont., caused considerable time loss. In May, 1937, the number of disputes was the highest in many years and many of the disputes involved considerable numbers of workers while nearly twenty thousand days in time loss was due to strikes of dress factory workers at Montreal, P.Q., knitting factory workers at Toronto, Ont., and foundry workers at Sorel, P.Q.

Six disputes, involving 664 workers, were carried over from April, and nine disputes commenced during May. Of these fifteen disputes, twelve were terminated during the month, four resulting in favour of the employers involved, two in favour of the workers concerned, while compromise settlements were reached in four cases and the results of two disputes were recorded as indefinite. At the end of May, therefore, there were three disputes recorded as strikes or lockouts, namely: bakers, Hamilton, Ont., sawmill workers, Fort Frances, Ont., and sawmill workers at Timmins, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to ten such disputes, namely: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; meat packing employees, Vancouver, B.C., December 29, 1936, one employer; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; cotton dress factory workers, Montreal, P.Q., November 25, 1937, one employer; dress factory workers (cutters), Toronto, Ont., January 21, 1938, three employers; dress factory workers (cutters), Toronto, Ont., January 26, 1938, one employer; fur factory workers, Toronto, Ont., March 4, 1938, one employer; and fur factory workers, Toronto, Ont., March 17, 1938, one employer. The last two were added to the list this month.

The disputes involving cleaners and dyers employed by two firms in Toronto, Ont., commencing December 9, 1937, and January 3, 1938, respectively, carried in the above list for some time have been reported by the union to have lapsed by May 31 and have consequently been removed from the list.

In connection with the strike in the above list involving cotton dress factory workers in one establishment at Montreal, P.Q., commencing November 25, 1937, a picket was fined $50 and costs on May 23 on a charge of intimidation.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A minor dispute involving teamsters at Sydney, N.S., employed at a retail store, for one day on April 14 was reported too late for inclusion in the LABOUR GAZETTE for May. Three teamsters ceased work in protest against the dismissal of one teamster, and resumed work when he was reinstated.

A minor dispute involving four waitresses for three hours on May 5 in one restaurant at Port Arthur, Ont., has been reported in the press. An agreement with the local of the Hotel and Restaurant Employees' International Alliance and Bartenders' International League was reported to have been secured.

A dispute involving salmon fishermen at Vancouver and other ports in British Columbia has been reported. The representatives of the canning operators have been negotiating with representatives of various unions as to prices of fish for the season which opens for blue back salmon on June 1 and for sockeye salmon on June 26. Two of the unions were reported to have demanded to be recognized as bargaining agencies for the fishermen and to have ordered their members not to commence fishing until recognition was conceded. Docks at Vancouver and other points were picketed from May 26. Fishing for blue back salmon commenced when the season opened on June 1, and negotiations between the packers and other unions were in progress as to prices for other salmon. The fishing for spring salmon was reported to be carried on and not appreciably affected by the dispute with the two unions.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to May

HERRING FISHERMEN, NORTH SYDNEY DISTRICT, N.S.—As noted in the LABOUR GAZETTE for May, the fishermen resumed fishing for herring for bait on May 4, selling only to the fishermen and not to the dealers. By May 26 the season was over and no settlement had been reached. The dealers were reported to have imported herring and the herring run was less than usual.

Disputes Commencing During May

BAKERS, MONTREAL, P.Q.—Employees in eleven bakeries, members of the Bakery and Confectionery Workers' International Union of America, ceased work on May 1, the agreements with the employers not having been

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1938*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to May, 1938				
FISHING, ETC.—				
Herring fishermen, North Sydney District, N.S.	.....	200	400	Commenced April 27, 1938; for increase in price of fish; terminated May 3; return of workers; indefinite.
MANUFACTURING—				
Fur, Leather, Etc.—				
Fur factory workers, Toronto, Ont.	1	23	100	Commenced Mar. 4, 1938; against employment of members of another union; working conditions no longer affected by May 31; replacement; in favour of employer.
Fur factory workers, Toronto, Ont.	1	25	100	Commenced Mar. 17, 1938; against sending work to a shop employing members of another union; working conditions no longer affected by May 31; replacement; in favour of employer.
Textiles, Clothing, Etc.—				
Cap factory workers, Toronto, Ont.	1	8	16	Commenced Mar. 2, 1938; against lay-off o union workers and for union agreement; terminated May 3; negotiations; workers reinstated; compromise.
Printing and Publishing—				
Commercial artists, Toronto, Ont.	1	23	92	Commenced Mar. 29, 1938; for renewal of union agreement; terminated May 5; return of workers; in favour of employer.
Miscellaneous Wood Products—				
Sawmill workers, Fort Frances, Ont.	1	385	8,500	Commenced April 15, 1938; against reduction in wages and for renewal of agreement; unterminated.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1938*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during May, 1938.				
MANUFACTURING—				
Vegetable Foods—				
Bakers, Montreal, P.Q....	11	62	100	Commenced May 1; for increased wages and reduced hours; terminated May 3; negotiations; compromise.
Bakers, Hamilton, Ont...	1	4	16	Commenced May 27; against reduction in wages and for renewal of union agreement; unterminated.
Textiles, Clothing, Etc.—				
Clothing factory workers (sportswear, etc.), Winnipeg, Man.....	1	12	24	Commenced May 2; *re* union wage rate for new work; terminated May 3; negotiations; compromise.
Textile factory workers (silk), Louiseville, P.Q.	1	950	1,900	Commenced May 4; *re* lay-off of certain workers; terminated May 5; return of workers pending new agreement.
Miscellaneous Wood Products—				
Wood factory workers, Hespeler, Ont.....	1	21	53	Commenced May 26; misunderstanding as to piece work rates; terminated May 28; negotiations; in favour of employer.
Sawmill workers, Timmins, Ont.....	3	200	200	Commenced May 31; for increased wages; unterminated.
CONSTRUCTION—				
Buildings and Structures—				
Labourers, Eastview (Ottawa), Ont.....	1	70	140	Commenced May 18; against reduction in wages; terminated May 19; negotiations; in favour of workers.
Painters, Eastview (Ottawa), Ont.....	1	15	30	Commenced May 18; sympathy with labourers on strike the same day; terminated; May 19; negotiations; in favour of workers.
TRANSPORTATION AND PUBLIC UTILITIES—				
Miscellaneous—				
Grain shovellers, Port Colborne, Ont.....	1	56	56	Commenced May 2; for increased wage rates; terminated May 2; negotiations; compromise.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

renewed. The union demanded an increase in wages of $3 per week over the former rates of $40, $37 and $34 for the various classes of bakers with reductions in hours from 54 per week to 48. As a result of negotiations the strike was terminated on May 6, the 48 hour week being agreed upon, the wage scale to be settled by arbitration.

BAKERS, HAMILTON, ONT.—Employees in one bakery ceased work on May 27 as the employer had refused to renew the agreement with the Bakery and Confectionery Workers' International Union of America which had expired on April 30. The employer was reported to have proposed to reduce the wages of the foreman from $25 per week to $20 and the minimum for bakers from $18 to $16. At the end of the month a settlement had not been reported.

CLOTHING FACTORY WORKERS (SPORTSWEAR, ETC.), WINNIPEG, MAN.—Employees in one establishment, members of the United Garment Workers of America, ceased work on May 2 as a result of a dispute as to the application of the union scale of wages for a new garment. The union proposed arbitration and this being objected to declared a strike. Work was resumed when the union rate was established on May 4 as a result of negotiation.

SILK TEXTILE FACTORY WORKERS, LOUISEVILLE, P.Q.—Employees in one establishment ceased work on May 4 as a result of a dispute as to the lay-off of a number of workers, stated by the employer to be due to lack of materials. The employees, members of the Federal Union of Textile Workers, claimed also that the employer had not complied with the wage provisions of the agreement made at

the termination of a strike in September, 1937. The employer issued a notice that the plant would reopen on May 6 and employees would be reinstated without discrimination. At a union meeting the members voted to resume work but to terminate the agreement and negotiate a new one.

WOOD FACTORY WORKERS, HESPELER, ONT.—Employees in one establishment ceased work on May 26 owing to an adjustment of piece rates, believed to result in a wage reduction of five per cent. As a result of negotiations a settlement was reached on the rates and it was stated that the dispute was due to a misunderstanding. Work was resumed on the next working day.

SAWMILL WORKERS, TIMMINS, ONT.—Employees in three establishments ceased work on May 31 to secure a new agreement with an increase in wages, the minimum to be raised from 27½ cents per hour to 40 cents. The strikers were members of the Lumber and Sawmill Workers' section of the United Brotherhood of Carpenters and Joiners of America. It was alleged that in one mill some workers had been dismissed for union activity. At the end of the month the dispute was unterminated but on June 1 a conciliation officer of the Ontario Department of Labour arrived at Timmins to assist in bringing about a settlement. On June 7 a settlement providing for an increase of five cents per hour was reported.

LABOURERS, EASTVIEW (OTTAWA), ONT.—A number of building labourers, members of the National Catholic building union, on one job ceased work on May 18 against the payment of only 30 cents per hour to labourers levelling the ground, etc., instead of 40 cents as for the building labourers. Work was resumed on May 20 when it was arranged that 40 cents would be paid. A number of painters ceased work in sympathy with the labourers, returning on May 20 when the strikers' demand was conceded.

GRAIN SHOVELLERS, PORT COLBORNE, ONT.—Employees at one elevator at Port Colborne, members of the International Longshoremen's Association, ceased work on May 2 to secure increases in wages of 15 cents per hour with time and one-half rates for overtime after nine hours and on Sundays and holidays, the minimum rate to be raised from 45 cents to 60 cents per hour. Work was resumed next day when an increase of five cents per hour was made with time and one-half rates after ten hours and on Sundays and holidays.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. The annual review containing a table summarizing the principal statistics as to strikes and lockouts in Great Britain and other countries appeared on pages 272-278 of the March issue.

Great Britain and Northern Ireland

The number of disputes beginning in April, 1938, was 83, and 21 were still in progress from the previous month, making a total of 104 in progress during the period involving 37,400 workers, with a resultant time loss of 151,000 man working days.

Of the 83 disputes beginning in April, 13 arose out of demands for advances in wages, 3 out of proposed wage reductions and 12 out of other wage questions; 6 arose over questions relating to hours of labour, 26 over questions respecting the employment of particular classes or persons, 12 over questions respecting working conditions and 8 over questions of trade union principle. Two disputes were due to sympathetic action and one arose out of demands for the withdrawal of summonses against certain workers for breach of contract.

During April final settlements were reached in 72 disputes. Of these 16 were settled in favour of the workers, 38 were settled in favour of the employers and 18 resulted in compromises. In the case of 6 other disputes work was resumed pending negotiations.

On May 1, 2,600 miners at a colliery in Kent ceased work in protest against the dismissal of 226 of their fellow workers. These miners were dismissed because the mine operators claimed that certain parts of the mine were not giving satisfactory results. No details of a settlement have yet been noted.

According to press reports dated June 1, the strike of motion picture projectionists in the London and Manchester areas, which was reported in the May issue of the LABOUR GAZETTE has been settled following mediation by officials of the Ministry of Labour. The terms of the settlement are not given.

Czechoslovakia

The Statistical Annual published recently by the Statistical Office of the Republic of Czechoslovakia contains figures dealing with strikes and lockouts for the year 1936 and previous years; certain of the figures for the year 1935 shown in the table accompanying

the annual review of strikes and lockouts in the March issue of the LABOUR GAZETTE, page 275, have been revised.

The number of strikes and lockouts in 1936 was 262 as compared with 219 in 1935; the number of workers involved was 51,617 as compared with 36,831 the previous year and the resultant time loss was 585,085 man working days as compared with 434,895 man working days in 1935.

France

A dispute between metal workers and their employers in the Paris region which began on April 15 and involved about 160,000 workers was settled on May 29 when a collective labour contract was signed after government arbitration. The terms of the agreement were not announced.

On May 4 about 1,600 stewards, cooks, etc., of one steamship line at Le Havre ceased work demanding certain changes in working conditions. The strike affected seven liners but only one sailing was cancelled. Coming at the beginning of the tourist season, this strike threatened serious consequences and the Minister of Merchant Marine told delegations that the government was determined to maintain the service. On May 9 the men agreed to return to work and to accept the rules of disicipline against which they had protested.

Jamaica

About the first of May workers on sugar plantations ceased work demanding increases in wages. The workers had been receiving 50 cents per day but demanded that this be increased to $1.00. The strike was accompanied by rioting and destruction of property as a result of which three strikers were killed. Order was restored among the sugar plantation workers when a government commission was appointed to study conditions.

On May 21 waterfront workers in Kingston went on strike demanding a minimum wage of 25 cents per hour. These strikers were joined by civic workers, sugar and banana plantation labourers and others. Ships were unable to unload cargoes and it was necessary to use detachments of soldiers and sailors from a British man-of-war to protect property and restore order. According to press reports the disputes had not been settled by the end of the month.

Poland

The Inspector General of Labour of the Department of Public Welfare has recently published a report covering strikes and lockouts during the year 1935.

The number of strikes beginning during 1935 was 1,165 involving 445,503 workers in 10,551 establishments. In addition there were 15 strikes carried over from the previous year and there were 6 lockouts all of which began during the year.

Of the 1,165 strikes which began during the year, 433 were settled in favour of the workers, 440 were partially successful and 188 were unsuccessful; in 104 cases the result was uncertain.

Questions affecting wages caused 749 or 64·3 per cent of the strikes which began during the year.

The building industry had the largest number of strikes, 191 involving 27,294 workers but the textile industry with 155 strikes had 124,996 workers involved.

The report of the Central Statistical Office, dealing with industrial disputes for the second quarter of 1937, reports that there were 704 strikes in progress during that period, involving 142,714 workers with a resultant time loss of 1,157,753 man working days. There was also one lockout affecting 84 workers and resulting in a time loss of 1,513 man working days.

Sweden

The Statistical Office of Sweden has recently published a report dealing with strikes and lockouts for the year 1936 which shows that there were 60 industrial disputes, involving 3,474 workers and resulting in a time loss of 437,500 man working days.

The forestry industry and the construction industry each experienced 20 strikes but the time loss resulting from the strikes in the forestry industry was 315,450 man working days as compared to 34,550 in construction. Wage questions were the cause of 63·3 per cent of the year's strikes while 15·0 per cent arose out of questions concerning collective agreements. Of the 60 strikes, 13 were settled in favour of the workers, 2 in favour of the employers, 39 resulted in compromises and the result of 6 strikes was indefinite or unknown.

United States

On May 20 employees of a rubber company at Akron, Ohio, went on strike in protest against the employment of apprentices while senior men were unemployed. The strikers, who were members of the United Rubber Workers of America picketed the five factories of the company allowing only maintenance men to enter. On May 27, union officials announced that the company had made an agreement under the terms of which workers' grievances would be settled. About 10,000 men were involved in this dispute.

On May 27 employees of another rubber company at Akron went on strike claiming

that negotiations which the United Rubber Workers of America had been carrying on with the company had borne no results. There were some clashes between pickets and police in which it was reported that over eighty persons were injured. On May 30 union officials announced that an agreement had been reached settling outstanding grievances and that the company would sign a collective agreement under which future grievances could be negotiated. The workers, reported to number about 8,000 resumed work the following day.

The strike of 15,000 fur workers which was reported in the May issue of the LABOUR GAZETTE, page 489, was settled on May 26 when officials of the International Fur Workers Union announced that a three year agreement had been reached with the Associated Fur Coat and Trimming Manufacturers Inc. The agreement provided that eight months, from May 1 to January 1 shall constitute a continuous season's work; previously the period was confined to six months with intervals and the union had demanded that nine months should constitute a continuous season's work. The agreement established minimum weekly wages of from $36 to $60 representing increases of from $2 to $6 per week. The agreement contained other clauses regarding the employment of apprentices and unskilled workers, etc.

STRIKES IN 1937

The May issue of the *Monthly Labour Review* contains an analysis of strikes in the United States during 1937.

There were 4,740 strikes which began in the United States during 1937, involving 1,860,621 workers, with a resultant time loss of 28,425,000 man working days. The number of strikes was the largest for any year in the country's history, but the number of men involved was less than half the figure for 1919. Time-loss was greater than in any year since 1927, the first year for which such figures are available.

The analysis of causes shows that 19 per cent of the strikes ended in 1937 arose out of demands for increases in wages, but a further 36·6 per cent which are listed under the heading of causes arising from union recognition dealt in a large measure with wage questions.

The analysis by results shows that 46·4 per cent of the strikes ended in 1937 resulted in substantial gains to the workers, 31·8 per cent resulted in partial gains or compromises, 17·3 per cent resulted in little or no gains to the worker, 3·8 per cent of the strikes arose from disputes between unions and are so reported in the analysis of results, 0·5 per cent were indeterminate and 0·2 per cent did not have the results reported.

Approximately 57½ per cent of the workers involved in the 1937 strikes were in five industry groups: transportation equipment manufacturing industries (372,399 or 20 per cent) where there were large strikes in automobile manufacturing; textiles (213,455 or 11·5 per cent); iron and steel (186,017 or 10 per cent); extraction of minerals (162,645 or 9 per cent); and transportation and communication (135,489 or 7 per cent).

Convention of Labour Educational Association of Ontario

With an attendance of 102 delegates representative of all the important industrial centres in the province, the thirty-sixth annual convention of the Labour Educational Association of Ontario was held in Brantford on May 24.

In addition to the official welcome extended by His Worship, Mayor R. Waterous, and Mr. Thos. Rall, President of the Brantford Trades and Labour Council, others to address the convention included: Hon. M. M. MacBride, Ontario Minister of Labour; Mr. George Keen, General Secretary of the Co-operative Union of Canada; and Mr. Drummond Wren, Secretary-Treasurer of the Workers' Educational Association of Canada.

Reviewing the year's activity, the report of the Executive Committee emphasized efforts to secure enactment of the Trades and Labour Congress Draft Bill on the right of organization. Satisfaction was expressed with the growth of the international trade union movement in the province during the past year, and the need for vigilance in maintaining democratic institutions was stressed.

Among the recommendations contained in the adopted resolution were:

Amendment of the Workmen's Compensation Act to include all workers within its scope, the position of hotel and restaurant employees being particularly referred to.

Amendment of the Minimum Wage Act to include domestic workers with a view to eliminating an alleged practice, viz.—the employment by working married women (with working husbands) of young girls as domestics at low wages.

Inclusion of "prevailing rate" employees under federal superannuation act.

Endorsing the union blue label of the cigar makers and supporting its recognition in the purchase of cigars.

In addition to the above, there were a number of resolutions dealing with questions of safety and health.

CANADIAN ASSOCIATION OF ADMINISTRATORS OF LABOUR LEGISLATION FORMED AT OTTAWA CONFERENCE

AT a conference of Dominion and provincial officials, held in Ottawa on May 23, 24 and 25, it was decided to form an organization to be known as the Canadian Association of Administrators of Labour Legislation. The objects of the Association, the membership of which is to consist of government officers responsible for the enactment and enforcement of labour laws and regulations throughout Canada, will be to serve as a medium for the exchange of information and encourage co-operation among its members; to promote the highest possible standards of law enforcement and administration; and to attain uniformity of legislation and regulations thereunder. A constitution is to be drafted and submitted to the various governments for ratification before the next general meeting, which is to be held in Ottawa beginning May 15, 1939.

Among those in attendance at the conference were the following:—

Representing the Dominion Department of Labour:—
W. M. Dickson, Deputy Minister of Labour;
M. S. Campbell, Chief Conciliation Officer;
R. A. Rigg, Director of the Employment Service of Canada;
C. W. Bolton, Chief of the Statistical Branch; and
Miss M. Mackintosh, Chief of the Library and Research Branch.

Representing the province of New Brunswick:
H. R. Pettigrove, Fair Wage Officer; and
F. H. Gillespie, Member of the Fair Wage Board.

Representing the province of Quebec:
J. O'Connell-Maher, Secretary of the Department of Labour;
G. Cromp, Vice-president of the Fair Wage Board; and
L. G. Giguere, Manager of the Building Materials Joint Committee.

Representing the province of Ontario:
J. F. Marsh, Deputy Minister of Labour;
L. Fine, Chief Conciliation Officer;
J. C. Adams, Solicitor for the Department of Labour;
A. W. Crawford, Director of the Minimum Wage Branch;
J. R. Prain, Chief Inspector; and
P. Farmer, Industrial Standards Officer.

Representing the province of Manitoba:
Hon. W. R. Clubb, Minister of Labour; and
A. MacNamara, Deputy Minister of Labour.

Representing the province of Alberta:
W. D. King, Deputy Minister of Trade and Industry.

Representing the province of British Columbia:
A. Bell, Deputy Minister of Labour; and
R. Morrison, Assistant Deputy Minister of Labour.

Welcoming the delegates at the opening session of the conference, the federal Minister of Labour, Hon. Norman McL. Rogers, warmly commended the proposal to form a permanent association of labour department officials in Canada. He expressed the conviction that great benefits would be derived from the regular discussion of common problems and the free exchange of ideas and information among the members of such an organization. The minister pointed out that one of the primary functions of the Dominion Department of Labour is the dissemination of statistical and other information relating to the conditions of labour, and in this connection drew special attention to the valuable service performed in recent years by the International Labour Organization as an agency for the collection of information regarding labour problems throughout the world. Emphasizing the desirability of a greater degree of uniformity of labour legislation and high standards of administration, Mr. Rogers promised the full co-operation of his department in any action that might be taken with a view to improving industrial relations and bettering the lot of Canadian wage-earners.

Two sessions of the conference were devoted to round-table discussions of minimum wage and fair wage legislation in Canada, including the various Industrial Standards Acts and the Quebec Collective Labour Agreements Act. The discussion of minimum wages was under the chairmanship of Mr. James F. Marsh. A paper describing developments in the province of British Columbia was read by Mr. Adam Bell, and representatives of the other governments outlined the action taken in the field of minimum wages within their respective jurisdictions. Mr. W. D. King was in the chair during the discussion of fair wages, which was opened by Messrs. J. O'Connell-Maher and George Cromp, who presented a summary of legislation recently enacted in this regard in the province of Quebec. The statements of the Dominion and other provincial representatives were followed by a lengthy general discussion of administrative problems.

A provisional executive of the Association, consisting of one representative of the Dominion and each of the provinces, is to function until ratification of the constitution has been completed. Messrs. Adam Bell and A. W. Crawford, who acted as charman and secretary, respectively, of the conference, will continue to serve in these capacities while the organization is taking definite shape.

59089—2½

DOMINION-PROVINCIAL YOUTH TRAINING IN 1937

IN a recent press release by the Minister of Labour, Hon. Norman McL. Rogers, the extent of the Dominion-Provincial youth training program in 1937 was reviewed and its achievements summarized. After outlining the purpose of the $1,000,000 appropriation approved by Parliament in 1937 (LABOUR GAZETTE April, 1937, page 414 and June, 1937, page 596) the article described the four main categories of projects specified as coming within the scope of the vote as follows:

(*a*) training projects of an occupational nature; (*b*) learnership courses in industry; (*c*) work projects to combine training with conservation and development of natural resources; and (*d*) physical training programs to maintain health and morale. These projects were to be open to all young people, 18 to 30 years of age, without gainful employment and in necessitous circumstances. The selection of those participating was to be made by the provinces, subject to Dominion approval, without discrimination or favour in regard to racial origin, religious beliefs or political affiliations.

Under the first head, training projects of an occupational nature, came a wide variety of courses. Household training for women was included. For men, the category comprised courses in such activities as woodworking, radio servicing, motor mechanics, carpentry, cement working, electrical work, blacksmithing, egg and poultry grading. Women were taught catering for tourists, rug making, dress making, salesmanship, stenography and power machine operating. This list does not by any means exhaust the subjects in which instruction was given under the occupational head, but it indicates the lines followed.

The second general heading, learnership courses in industry, including apprenticeship training. Learnership is, however, not the same thing as actual apprenticeship to a trade or industry. The former provides for comparatively brief courses of training, partly through the medium of classes and also, sometimes, in an industrial plant, to fit the trainee for employment. Where training was given in an industry its cost was defrayed under the program.

Projects for forest conservation and mining came under the third heading. Forestry projects were operated in nearly every province. Mining activities, as might be expected, were more restricted. Four provinces, however, submitted mining projects—Nova Scotia, Quebec, Ontario and British Columbia. In the first two, training in hard rock mining was given in mines acquired for the purpose. Instruction in Ontario was technical and students received it at the Haileybury School of Mining. Training in Placer Mining was provided in British Columbia.

As regards the fourth category—physical training programs to maintain health and morale—the Provinces generally recognized the importance of keeping up, or, where necessary, re-establishing the strength and spirit of their youth.

Detailing the particular types of training undertaken in each province, the report proceeded: In Prince Edward Island training in household services and home management was given to unemployed young women. Men in the same circumstances received agricultural instruction, blacksmithing and carpentry courses, and forestry training. Nova Scotia, as already mentioned, went extensively into hard rock mining. Courses for women in household work, and for both men and women in agriculture and home crafts were also on the program. New Brunswick projects included forest conservation, surveying of Crown Lands and prospecting, women's courses in household work, home making and handicrafts, agricultural training for men and women, occupational training and training for leaders for courses.

Quebec also operated a mine training project. The Quebec list comprised vocational guidance and occupational training for men and women, women's courses, rural and agricultural training, forestry and leisure time activities. As already mentioned, Ontario gave technical training in mining and also forestry, household work for women, rural and agricultural training for both sexes, apprenticeship and learnership courses and urban occupational training.

A forest conservation and training project was one of those operated in Manitoba. The Dominion-Manitoba Agreement also covered learnership, home service training, urban occupational training, agricultural training for rural young people and an agricultural certificate course in association with the University of Manitoba.

In co-operation with the University, Saskatchewan carried on a series of farm courses for men and women. Some of these were highly practical in their nature, others more technical. Saskatchewan also operated a project to provide for training and placement of unemployed young women in the urban centres; and urban occupational training for men. In Alberta, courses carried on in co-operation with the University of that province, were available to both men and women. A forest

conservation project was operated under the Alberta Forest Service. The program also included training for household workers, urban occupational training and agricultural apprenticeship.

A placer mining training project for men was a feature of the British Columbia program. It also included forestry training, urban occupational courses for both men and women, and physical training for both sexes.

Statistically, it was recorded that 55,457 young unemployed needy Canadians were trained in 1,474 classes during the fiscal year 1937. Of these, 32,301 were men and 23,156 were women.

The numbers, by provinces, of those given training were as follows:

	Men	Women
Prince Edward Island	457	460
Nova Scotia	300	132
New Brunswick	770	361
Quebec	13,542	6,853
Ontario	1,586	1,330
Manitoba	3,893	3,255
Saskatchewan	5,471	3,468
Alberta	2,589	1,568
British Columbia	3,693	5,729
	32,301	23,156

These young men and women, the great majority of whom were aged 18 to 30 years, received a total of 909,609 days' work, or instruction, under the plan.

Concerning those who found employment, directly or indirectly, as a result of training, the statement observes: "When considering this, it should be remembered that a large number of those who received training in some form or another did not take courses which would lead to employment. To illustrate, thousands of young men and women took physical training under the plan. Physical training courses, while of great value in restoring health and morale, do not lead directly to employment, in the sense that a course in household training for a woman, or radio servicing for a man, might.

"Consequently, while 55,400 men and women were trained, only about 14,650 finished courses of a character to fit them for employment. Of this number, 3,282 (2,064 men and 1,218 women) or slightly over 22 per cent found work. This would appear to indicate that work can be found by at least some of Canada's unemployed young people provided they are equipped by training to do it. The belief that this was true was one of the important reasons for the Youth Training Program.

"Terms of the program did not provide that persons receiving training in the various courses must necessarily come from those whose names were on the relief rolls. The plan recognized that a large number of needy unemployed young men and women in Canada were not on relief. Such young people were frequently in as great need of training as those on relief rolls. And training was given to them.

"On the other hand, the desirability of giving young people on relief full opportunity to profit by the program was fully recognized. The figures show that this opportunity was appreciated by thousands. During the period in which courses were operated last year, nearly 6,800, or, to be exact, 5,259 men and 1,507 women who were on relief applied for and received training."

Index of Occupations in U.S.A.

The United States Department of Commerce has published an "Alphabetical Index of Occupations" by industries and social-economic groups.

The index is based upon the occupational designations returned on the schedules at the Twelfth, Thirteenth and Fourteenth Censuses of the United States which are supplemented by designations obtained from various occupational glossaries and from other sources. For the purpose of the index occupations have been arranged into nine social-economic groups. To these nine groups have been added two additional groups—first, a group entitled "Indefinite, illegible, and unknown occupations," for the classification of occupational designations which are too indefinite or too illegible to be classified in the nine specified social-economic groups, and for the classification of workers whose occupations are omitted for the returns; and second, a group entitled "New Workers" for the classification of workers who have never had steady jobs but who want work.

Workmen's Compensation in Great Britain, 1936

According to a pamphlet issued by the British Home Office entitled *"Workmen's Compensation, Statistics of Compensation and Proceedings"* there were 461,557 cases of accidents coming within the scope of the Workmen's Compensation Acts during 1936. Of these accidents, 2,286 were fatal and 459,271 were non-fatal. Fatal accidents in 1936 involved the payment of £661,592 in compensation; compensation paid for non-fatal claims amounted to £5,786,345 making a total of £6,447,937. The report shows that the aggregate number of persons coming within the provisions of the Workmen's Compensation Acts who were employed in the seven industries (shipping; factories; railways; docks; mines; quarries and contructional work) during 1936 was 7,606,066.

The report also shows that the average amount of compensation in cases of death was £289; in cases of disablement the average amount (including cases settled by payment of a lump sum) was £12 12s. The average amount paid in lump sums was £102, while the average amount paid in weekly payments (including weekly payments made prior to settlement by a lump sum) was £8 3s.

REPORT OF INDUSTRIAL RELATIONS COMMITTEE OF CANADIAN MANUFACTURERS' ASSOCIATION

AT the annual general meeting of the Canadian Manufacturers' Association held in Ottawa, June 1-3, the report of the executive council, which was adopted, contained an expression of the Association's views on industrial relations as embodied in the report of its Industrial Relations Committee. The text of this Committee's report was as follows:—

International Labour Organization

At the 1937 session of the International Labour Conference, at which the employers of Canada were represented by Mr. A. R. Goldie, with Mr. H. W. Macdonnell as adviser, the principal action taken was to pass a forty hour week draft convention applying to the textile industry, and to raise the age of admission for both industrial and non-industrial employment from fourteen to fifteen. The proposal to pass forty hour week conventions applying to the printing and chemical industries having failed to obtain the necessary two thirds majority, the Conference decided to put on the 1938 agenda the question of a general forty hour week convention, that is, one applying to all industrial employment. Your Committee remains convinced,—the alleged success of the forty hour week in the United States, France and New Zealand, to the contrary notwithstanding, that a compulsory forty hour week on an international basis is unsound, and has given instructions accordingly, to the delegate nominated to attend this year's Conference, Mr. A. R. Goldie, who will have as his adviser, Mr. J. M. McIntosh, Secretary of the Ontario Division.

The agenda of the 1938 Conference includes the question of technical and vocational education, and apprenticeship, to which your Committee has given considerable attention in the last two years, in view of the need it recognizes for Canadian employers to take steps to provide a supply of skilled workers in these days when Britain and other European countries can no longer be depended on to supply the requirements of Canadian industry.

Collective Bargaining

Six of the provinces of Canada, in the last two years, have passed legislation laying it down that employees have the right to form and join trade unions and to bargain collectively through them, employers being forbidden by intimidation, or otherwise, to prevent their employees from joining unions. Your Committee has taken the position that if trade unions are thus to be recognized as bargaining agents, they should be required to file copies of their constitution and by-laws and of the names of their officers, as well as an annual financial statement setting out receipts and expenditures. Your Committee is also of opinion that if trade unions are to be given the new rights and privileges accorded in the new legislation, they should be required by incorporation, or otherwise, to become answerable in law for breaches of contracts into which they enter.

Workmen's Compensation

The only three developments of any moment in the past year have been the report of a special committee of investigation in Alberta, the question as to the success, or otherwise, of the so-called differential (preferred) system of merit and demerit rating which was worked out and recommended to the Board two years ago by a committee set up by the Ontario Division, and the introduction in Quebec of a private bill to scrap the present compulsory state insurance system and revert to the old system under which employers took out employers' liability insurance with ordinary insurance companies, and claims were adjudicated in the ordinary civil courts.

As regards Alberta, it was decided, even though the consolidated bill introduced as a result of the report of the commission of investigation, contained some minor amendments that were objectionable, not to oppose its passage. As regards Ontario, arrangements have been made for the Board to advise the Association's Committee of the various difficulties which have arisen in connection with the application of the new differential rating system, and the Committee is to be given an opportunity of recommending modifications of the original plan with a view to meeting them. As regards Quebec, both employers and employees having opposed the above-mentioned bill, it was withdrawn and an opportunity is to be given to all concerned to study the whole question of the working of the present Act, with a view to its amendment at the next session.

Minimum Wage and Industrial Standards Legislation

The experience of the past year, particularly in Quebec and Ontario, has confirmed the opinion of your Committee that, if the

purpose of both types of Act is, as their sponsors have declared and as your Committee believe should be the case, to put a stop to the payment of unduly low wages, minimum wage legislation is distinctly preferable to Industrial Standards or "Codes," legislation, as being less disruptive of normal and healthy employer-employee relations. At the same time, your Committee considers that the experience of the past year both in Ontario and Quebec, shows clearly that it is impracticable and highly undesirable for any government-appointed minimum wage board to attempt to go beyond the fixing of minimum wages properly so-called.

Unemployment Insurance and Old Age Pensions

Your Committee collaborated with other standing committees of the Association in preparing representations to be made to the Royal Commission on Dominion-Provincial Relations. The specific subjects dealt with were Unemployment Insurance and Old Age Pensions. As regards the former, the brief presented dwelt on (1) the very high cost; (2) the fact that any actuarially sound scheme would not provide for more than a limited number of people for a limited length of time, leaving the remainder of the unemployed still to be provided for by some relief or assistance scheme; and (3) that it was imperative that any scheme inaugurated should be Dominion-wide in scope.

As regards Old Age Pensions, it was urged that the present non-contributory deserving poor type of Act should be replaced by a contributory, "all-in" measure, which the experience of some eighteen other countries had shown to be preferable.

Your Committee has noted with great interest that the National Employment Commission in its final reports recommends, among other things:

1. The necessity of setting up, along with any national scheme of unemployment insurance, a supplementary unemployment assistance scheme to take care of the employable unemployed who would not be taken care of under the Unemployment Insurance Scheme.

2. That the responsibility for taking care of the unemployable unemployed should rest with the Provinces and Municipalities.

3. That permanent apprenticeship and learnership courses should be established, the cost to be met primarily by industry with assistance from the Provinces.

4. That the National Employment Commission should be succeeded by a small administrative Committee to administer registration, employment service, training and rehabilitation projects, grants-in-aid, and the like.

Consumers' Co-operative Census in the U.S.A.

According to the May issue of *Consumers' Co-operation,* the major section of the census of the consumers co-operative movement in the United States recently completed by the United States Bureau of Labor Statistics shows that in the field of the co-operative purchase of customers' goods, 3,600 co-operative associations, with 667,000 individual members did a business of $182,685,000 in 1936.

Other sections of the report, covering other types of consumers' co-operatives, showed 3,728 co-operative telephone associations with 330,000 members; 259 electric supply co-operatives serving 161,000 farm homes; 42 co-operative burial associations serving 27,000 members, and 35 co-operative housing associations with 2,200 family members.

The report shows that of the 3,600 consumers' goods co-operatives 2,400 are co-operative store associations with 330,500 members and a business of $107,250,000; 1,150 are co-operative petroleum associations with 325,000 members and a business of $69,985,000; the other 50 are distributive associations with 22,250 members and a business of $5,450,000.

According to the report the typical American co-operative has a membership of from 100 to 250 members. Associations handling petroleum products are found almost wholly in the Mississippi Valley. States with the largest number of co-operatives reported in the survey are Minnesota with 224 associations with 64,000 individual members; Wisconsin, with 200 co-operatives having 51,000 members; Kansas, with 151 co-operatives reporting 21,000 members; Illinois with 149 associations having 66,000 members; and Nebraska reported 123 co-operatives with 25,600 members.

The growth of the Consumers' co-operative movement is indicated on the comparison of figures for previous years. In 1920, there were 696 associations with 196,352 members; in 1929 there were 1,577 associations having a membership of 287,641; while in 1936 there were 3,600 associations with 677,750 members.

OLD AGE AND BLIND PENSIONERS IN CANADA

Financial and Statistical Summary as at March 31, 1938

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at March 31, 1938. (The text of the Old Age Pensions Act was given in the LABOUR GAZETTE for April, 1927, page 375 and the new regulations were reviewed in the issue for March, 1938, pages 286-288).

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. With the recent entry of New Brunswick and Quebec into the system, all the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $365 a year and who has resided in Canada for 20 years, and in the

OLD AGE PENSIONS—FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT MARCH 31, 1938

—	Alberta Act effective Aug. 1, 1929	British Columbia Act effective Sept. 1, 1927	Manitoba Act effective Sept. 1, 1928	New Brunswick Act effective July 1, 1936	Nova Scotia Act effective Mar. 1, 1934	Ontario Act effective Nov. 1, 1929

province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount, if any, that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937, (LABOUR GAZETTE, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $240 per annum. The amount a blind pensioner may earn without having his pension reduced is $200 a year, if single, and $400 if married to a spouse who is not receiving a pension in respect of blindness under the Act. The maximum pension is reduced, however, to $120 per annum in the case of a blind person who marries another blind person.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette,* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

RECENT REGULATIONS UNDER PROVINCIAL LEGISLATION

Provisions of Minimum Wage Orders in Alberta, British Columbia, New Brunswick and Quebec, etc.

ORDERS made recently under provincial labour laws exempt indentured apprentices from the application of the Order under the Alberta Male Minimum Wage Act and lay down new conditions for women employed in part-time and short-time work in the catering industry in Alberta; amend the regulations in British Columbia concerning hours of women in the catering industry and bring taxicab drivers within the Hours of Work Act. In New Brunswick, a regulation has been made continuing in effect the previous Order for workers employed in forest operations; and under the Workmen's Compensation Act three new diseases have been added to those for which compensation is to be paid. In Quebec, Fair Wage Order No. 4 was amended and new Orders made concerning stationary enginemen, persons engaged in the manufacture of shoe counters, cotton textile workers employed by the Dominion Textile Company and certain of its subsidiaries and regarding teachers in the city of Verdun.

Alberta Male Minimum Wage Act

Order 1A of the Board of Industrial Relations approved by order in council of April 26, exempts indentured apprentices in any occupation from Order No. 1 which fixed minimum wages for all male employees in the province with certain exceptions. (LABOUR GAZETTE, October, 1937, p. 1100.)

Alberta Minimum Wage Act, 1925

Order 10 of the Board of Industrial Relations on April 23 amends all the minimum wage orders applying to female workers in Alberta, except Order No. 5 relating to employment in theatres, motion picture houses, dance halls, cabarets and other places of amusement. The amendment concerns part-time and short-time work. In the orders as made in November, 1937 (LABOUR GAZETTE, January, 1938) it was stipulated that in case of employment by the hour, by the day or for any period less than six consecutive days in a week, the minimum rate should be 30 cents an hour and where employment was for four consecutive hours or less, the employee must be paid for four hours at the rate of 30 cents.

This section is now replaced by a new provision which stipulates that where the usual hours of employment in any establishment are less than 48 hours in a week and any person is employed for less than 48, a pro rata deduction may be made from the minimum wage, provided that where the hours worked by an employee in any week are not more than 40, she must be paid as if she had worked for 40 hours, but that employees who are hired by the hour or by the day or for busy periods only or as part-time workers or as substitutes for regular workers and who work for less than 40 hours in a week, must be paid at not less than 30 cents an hour and must be paid for not less than four hours' work.

British Columbia Female Minimum Wage Act

An order of the Board of Industrial Relations of May 18 amends the order relating to the hotel and catering industry and requires the working hours of employees on split shifts to be confined within 14 hours immediately following commencement of work instead of within 12 hours as formerly stipulated. However, when a split shift extends over 12 hours, the employee must be paid not less than one and one-half times the regular rate for the additional time.

British Columbia Hours of Work Act

The taxicab industry was brought within the Hours of Work Act by an order in council approving a resolution of the Board of Industrial Relations on May 5, 1938. The industry is defined to include the work of all employees in charge of or driving a motor-vehicle with seating capacity for at least seven passengers used for the conveyance of the public and driven or operated for hire.

New Brunswick Forest Operations Act

Order 11 of the New Brunswick Forest Operations Commission which came into effect April 1 continues until August 15, 1938, the scale of wages for the logging industry set out in Order 9 of April 19, 1937. Under that Order, no employee on piece-work may receive less than $34 a month with board, and the average amount paid is not to be less than $40 a month with board. Wages of foremen, book-keepers, clerks, cooks, tractor operators and truck drivers are not to be included in the average.

New Brunswick Workmen's Compensation Act

By order in council of April 14, regulations under this statute were amended to make certain industrial diseases compensatable:

acute bursitis of the elbow (miner's beat elbow), carbon monoxide poisoning, conjunctivitis and retinitis due to oxy- and acetylene welding and cutting. Radio broadcasting stations were added to the establishments which are excluded from the collective liability system of workmen's compensation unless more than two persons are employed.

Quebec Fair Wage Act

Several new Orders have been made by the Quebec Fair Wage Board. Order No. 4, applying generally to wage-earners except in the rural districts of the province, was summarized in the May issue of the Labour Gazette. Certain amendments have been made in this Order by order in council and, as permitted by the Order, some changes have been made by resolution of the Fair Wage Board.

Order No. 4 stipulated that it should supersede, wherever there was conflict, Orders 1, 2 and 3 of the Board (Labour Gazette, November, 1937, p. 1208) which continued in force the Orders of the former Women's Minimum Wage Commission. The effect of this provision was that the latter Orders were to apply, after Order No. 4 came into effect, to females in rural districts employed in industrial establishments and in retail and wholesale stores and to men in the same occupations as such women until a further Order was made. A so-called "merger Order" has now been approved by order in council and was gazetted on May 21. This Order, numbered 1-2-3, replaces the three separate Orders and, like them, applies to females and to males in similar occupations in industrial establishments and retail and wholesale stores in rural districts.

Order No. 5 covering the silk textile industry was noted in the Labour Gazette, March, 1938, p. 294.

Orders 6 to 9 relate, respectively, to stationary enginemen on the Island of Montreal, to workers in the leather industry making shoe counters, to cotton textile workers employed by the Dominion Textile Company, Montreal Cottons Company, Ltd., and the Drummondville Cotton Company and to teachers in the City of Verdun. Orders 6, 7 and 9 were made after a conciliation committee appointed under the Fair Wage Act had failed to bring about the settlement of a dispute between employers and employees in the industry concerned and had reported to that effect to the Fair Wage Board.

In Orders 6, 7 and 8 it is stipulated that any provisions of Order No. 4, which do not conflict with the provisions of the Order, shall apply to the industry covered.

Amendments in Order No. 4

Order No. 4 gave power to the Board to modify or suspend the provisions of the Order concerning the conditions as to hours of labour in retail stores, saw-mills, foundries, seasonal industries, etc., concerning the punitive rate for part-time and overtime work, conditions of temporary employees, deductions from wages, lower rates for apprentices and the determination of the students or apprentices to whom the Order is to apply. Some changes have been made under this authority but no official information regarding them is yet available.

On May 13, before the Order became effective, the section relating to workers whose wages on January 1, 1938, were higher than the minima fixed by the Order was amended. The original Order provided that, after it had been in effect for two months, the Board might, by by-law, make exceptions to the regulation requiring that there should be no reduction in such wages and, by resolution, approved by the Minister, it might authorize reductions in case of sickness, accident to the property or special conditions affecting industry. The new section enables the Board to permit reductions in the wages of such persons at any time but not below the minima fixed by the Order.

Certain changes, approved by order in council and gazetted, also came into effect on May 15, the same date as the Order. They provide that the power of the Board to interpret the Order may be exercised either by a resolution of the Board or by a written decision signed by all members of the Board, that cities and towns incorporated since the last Census are to be considered as being in Zone IV. The town of Levis has been transferred from Zone II, to which it belonged under the original Order to Zone III and the section providing special rates for part-time telephone operators in charge of switchboards of less than 100 lines has been repealed.

Workers in Rural Districts

Order 1-2-3 does not apply to persons working under a collective agreement registered under the Professional Syndicates Act or made binding under the Collective Labour Agreements Act or to persons to whom Order No. 4 applies or any other Order whose provisions conflict with it. Neither does it apply to apprentices receiving financial aid under any federal or provincial law or to municipal employees covered by Order No. 4.

It is to remain in force from May 15, 1938, to May 15, 1939, and for a year thereafter unless repealed by Order in Council. The Fair Wage Board has power to modify or suspend any provision of the Order in exceptional conditions. For the purposes of the Order, industrial establishments are divided into two groups: those in municipalities with a population of 5,000 or more or those employing 10 or more wage earners are in Rural Zone No. I;

those in municipalities with a population of less than 5,000 or in unorganized territory and employing less than 10 wage earners are in Rural Zone No. II. Establishments which are partly industrial and partly commercial are classified as industrial unless otherwise decided by the Board.

For employees in industrial establishments in Rural Zone No. I, the minimum wage for a 50-hour week is $10.50 and the minimum hourly rate 21 cents for not less than 60 per cent of the workers, $8.50 a week and 17 cents an hour for not more than 25 per cent, $6.25 a week and 12½ cents an hour for not more than 15 per cent of the employees. In Rural Zone No. II, the minimum rates for a 50-hour week are $9, $7.50 and $6 and the hourly rates are 18 cents, 15 cents and 12 cents for the same percentages of workers.

For fruit and vegetable canning during the season and in the Canadian raw tobacco industry, special rates have been fixed. In canning factories operating from June 15 to October 15, the minimum rate is 12½ cents an hour. Half of the workers employed in the raw leaf tobacco industry outside the factory must be paid at least 16 cents per hour and the other half not less than 12½ cents per hour.

For overtime after 50 hours in a week up to 55 hours, the minimum hourly rate indicated above must be paid. That is, the first five hours are to be paid at the regular minimum rates but time worked in excess of 55 hours in a week must be paid for at the rate of time and one-half.

Changing periodically from piece rates to hourly rates or *vice versa* for the same operation is prohibited and piece rates for the same operation must be uniform for all employees.

For "commercial establishments," which means retail and wholesale stores, except those employing only members of the employer's family, different rates are fixed for two zones, Rural Zone No. I including municipalities with a population of 4,000 or more and Rural Zone II, municipalities with a population of less than 4,000.

In Rural Zone No. I, 50 per cent of the employees in any retail or wholesale establishment must be paid at least $9 and the other 50 per cent at least $6 a week for a 54-hour week or for the regular work week if less than 54 hours. For extra employees, the minimum rate is 16 cents per hour. Any time worked in excess of 54 hours must be paid for at the rate of time and one-half the regular rate. In Rural Zone No. II, the corresponding minimum weekly rates of $8 and $6 apply to a week of 60 hours or less if the regular work-week is less. Extra employees must be paid at least 14 cents per hour.

Wages must be paid weekly to all within the scope of this Order but in certain cases they may be paid at longer intervals not exceeding two weeks. Employees working on a commission or fixed rate and bonus basis must be paid the minimum rate. No deductions for absence may exceed the value in wages of the time lost. Employees working less than two hours in a day must be paid for at least that period at the hourly rate. Every employer is required to keep a list of the wage-earners in his plant, dividing them into those who were classified for the purpose of determining the minimum wage payable during the previous month and those who may not be included in the percentages for that purpose as prescribed by Order No. 4. The latter Order requires men and women to be listed separately and the percentage to which each rate applies must be determined for each sex. Temporary and seasonal employees, members of the employer's family, apprentices, and workers covered by another Order may not be included in the number to be classified.

When a collective agreement covering any persons or establishments to which this Order applies, provides for shifts, overtime and holidays, these provisions are to be considered as part of the Order and failure to comply with them is a violation of the Order.

Special uniforms, when required by the employer, must be furnished and laundered at his expense.

STATIONARY ENGINEMEN

Order No. 6 applying to stationary enginemen on the Island of Montreal and in municipalities within a five-mile radius of the Island, who are not covered by a collective agreement, came into force on May 15 and is to remain in effect until October 15, 1938, when it is to be renewed for six months with a 10 per cent increase in wages unless a contrary order is made. The term "stationary enginemen" relates to all persons in charge of the installation or operation of motive power and their helpers as classified in the Stationary Enginemen's Act.

First-class enginemen are to be paid not less than $200 per month with no restriction on the number of working hours. For other classes of enginemen both minimum hourly and weekly rates are fixed. The weekly rates are to be paid for a work-week of not less than 48 and not more than 54 hours; and the hourly rates for a work-week of not less than 55 and not more than 60 hours. Where the hours of work in a week are less than 48, the minimum wage payable is an hourly rate determined by dividing the weekly rate by 48.

	Hourly Rate	Weekly Rate
Second Class Enginemen.. ..	.60c.	$32 40
Third Class Enginemen.. ..	.50c.	27 00
Fourth Class Enginemen.. ..	.45c.	24 30
Firemen..	.35c.	18 90

The minimum rates must be paid according to the class of work done and not according to the certificate held under the Stationary Enginemen's Act. Where meals are provided by the employer on the premises, the taking of such meals is to be optional with the employee.

As regards overtime, the Order provides that for time worked in excess of 12 hours in any day where there are less than 60 working hours a week or for any time worked in excess of 60 hours per week, the hourly rate is to be increased by 25 per cent. Time and a half must be paid for work on Sunday, on weekly rest days and for work in excess of the regular shift on legal holidays where a day off during the next week is not provided for. The legal holidays for the purpose of the Order are New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day. Two week's holiday with pay must be given each year to a chief engineman in charge of a first-class plant. Such an engineman with shift enginemen working under him is not himself to be part of a regular shift.

Workers on Shoe Counters

Order No. 7, approved by Order in Council on May 7, came into force on May 14. It relates to wage-earners in the leather industry who are engaged in the manufacture of shoe counters and is to remain in effect until October 15 and then to be renewed for six months unless an order is made to the contrary. Employers and employed in the industry in Chambly and St. Hyacinthe, having agreed that Order No. 7 should be retroactive to December 12, 1937, it is declared in effect in those towns from that date.

The minimum rates apply to a 50-hour week and all time in excess of 12 hours in a day where the weekly hours are less than 50, or any time in excess of 50 hours a week is to be considered overtime and paid for at one and a half times the regular rate. Double time must be paid for work on legal holidays, religious holidays and Sundays.

Employees may be paid by the hour, piece or otherwise but in no case may the wage be less than 38 cents per hour for at least 60 per cent of the workers in any establishment, 30 cents for not more than 25 per cent and 22 cents an hour for not more than 15 per cent. Piece rate workers must be paid a minimum of $1.30 per thousand pairs of straight moulds, $1.60 per thousand pairs for right or left moulds, $2 per thousand for straight Benco and $2.25 per thousand pairs for right and left Benco. On carriage-boot moulds, the minimum rate is $2.50 per thousand pairs with an additional seven cents for each lot of work distributed which requires adjustment.

Moulders may not be held responsible for counters that are torn or split because of being too large for the moulds and the approval of a sample by the foreman or his substitute is sufficient authorization for the moulder to continue his work. When counters have been sent to the packing department, only imperfect ones may be returned to the moulders for correction. Absence on account of illness is not to deprive the worker of his turn to be given work.

Cotton Textile Workers

Order No. 8 in force on May 29 continues in effect until September 3, 1938, the scale of wages and hours provided by collective agreements signed on December 27, 1937, by the Dominion Textile Company and its subsidiaries, Montreal Cottons Limited and the Drummondville Cotton Company on the one part and the National Catholic Textile Federation and other unions and representatives of unorganized employees in the spinning mills of these companies, on the other. The agreements provided for their expiry on September 3, but they could be terminated on May 28 on three months' notice from one of the parties. A notice to this effect was given by the National Textile Federation but on the employing companies' refusal to negotiate a new agreement, the union requested the Fair Wage Board to give the existing agreements the force of a temporary Order of the Board.

The agreements applied to all employees paid by the hour or piece and the Order of the Fair Wage Board has a similar application except that workers engaged exclusively in rayon operations are excluded but the Order relates to those in the Valleyfield "Grey Mill" and the Magog "Printworks" who handle both cotton and rayon so that it is difficult to classify them.

As to hours of work, the provisions in the agreements have been incorporated in the Order. The wage-rates apply to a basic 50-hour week, except for certain classes, with day or night shifts of 10 hours each from Monday till Friday inclusive. The day shift must fall between 7 a.m. and 6 p.m. and the night shift between 6 p.m. and 5 a.m. with an hour off at noon and at midnight. The overtime rates of 5 per cent above the regular rates for

all classes of workers which were fixed in the agreements are payable after 50 hours or after 10 hours in a day.

Maintenance men have a 55-hour week with no restriction on the number of hours in a shift and any time in excess of 55 must be paid for at overtime rates. Stokers and watchmen may work 12 hours a day or night for six days a week after which they must be paid for overtime. Where it is considered necessary to operate a mill or a department of a mill for 120 hours a week or more, there may be three shifts of eight hours each. Where there are less than 90 hours of work a week, two shifts of eight hours each may be worked.

Special conditions are laid down for persons employed in the dyeworks in the Valleyfield "Grey Mill" and the employees in the printing and dyeing departments of the "Converting Division" and the Magog "Printworks" of the Dominion Textile Company. At the option of the companies, there may be three shifts, each of 48 hours a week or less, or two shifts, each of 55 hours a week or less. In either case, hours of work must fall between 7 a.m. Monday and 12 a.m. Saturday. This latter provision applies also to employees in the bleaching, dyeing and finishing departments of the "Colonial Bleachery."

As provided in the collective agreements, the Order stipulates that if a legal holiday occurs during the first five days of any week, the day shift must work 10 hours on the succeeding Saturday or, at the option of the Board, five hours on each of the two succeeding Saturday mornings. The night shift must work six hours on the next succeeding Saturday night from 6 p.m. to midnight and one additional hour each night for four nights in the succeeding week or, at the option of the Board, one additional hour for nine nights during the next pay fortnight. No overtime rates are payable in such cases. This provision does not apply to Christmas Day, New Year's Day, Ste. Jean Baptiste Day and Good Friday; time lost on these days need not be made up.

The Company must supply an employee, at his request, with a note-book to keep track of his wages; it must supply the Board, if requested to do so, with a list of the learners or apprentices employed in its mills, and a statement showing the piece rates and the operations performed by males and by females and by both.

The number of apprentices in any mill at any one time may not exceed 5 per cent of the total number of employees and the period of apprenticeship may not be longer than one year or shorter than three months.

All machines, except continuous process ones, must be stopped during meal hours.

Teachers in Verdun

Order No. 9, effective July 1, 1938, until June 30, 1940, fixes minimum and maximum salaries for lay teachers employed by the Roman Catholic School Board of the city of Verdun on the same scale as those paid by the Catholic School Board of Montreal. For females, the salary range is from $625 to $1,200 with an annual increase of $75 for teachers or assistant principals except that the maximum for the latter is $1,300. For female principals, the scale is from $1,000 to $1,400 with an annual increase of $100. For males, the range is from $900 to $2,500 if unmarried, from $1,200 to $2,500 if married; for assistant principals, the same scale applies, except that the maximum is $2,700 in each case. Principals may be paid from $2,000 to $3,000 with an annual increase of $200. If extra courses are given to pupils from the seventh to tenth year, the salary is to be increased by $100 for female teachers giving a course to seventh and eighth year or to ninth and tenth year pupils and by $200 for male teachers giving seventh and eighth year courses and $400 if a course is given to ninth and tenth year pupils. A bonus of $200 or $100, as the case may be, is given to male or female principals of schools of 16 rooms or more when they have reached the maximum salary. Other scales are fixed for teachers of special subjects and for extra teachers. Any increase in the salary paid in Montreal is to apply to the teachers of Verdun.

The Fair Wage Board has power to fix the salaries of substitute teachers at a rate no higher than that provided for regular teachers. In all other replacements, unless the Board rules otherwise, the new teacher is entitled to the same salary as the one who is replaced.

Statistics of Home Improvement Loans

According to an announcement made by Honourable Charles A. Dunning, Minister of Finance, home improvement loans as at May 20, 1938, numbered 39,470 and amounted to $15,467,915.50, an increase of 1,485 in the number of loans and of $618,780.70 in value over the figures reported to April 30, 1938.

An increase of 647 loans amounting to $271,-761.70 in Ontario brought the grand total for that province to 17,436 loans for $6,905,659.20. Quebec with an increase of 322 loans totalling $170,726.75 shows a total of 5,936 loans for $2,986,493.46. British Columbia in third position with an increase of 142 loans for $41,-886.60 brought the grand total for the province to 4,383 loans amounting to $1,399,939.15.

LABOUR LEGISLATION IN ALBERTA, 1938

MEASURES of labour interest enacted by the Legislature of Alberta during its session from February 10 to April 8, 1938, include a revision of the Workmen's Compensation Act, first enacted in 1918, new laws dealing with conciliation and arbitration in industrial disputes and security for wages in the mining industry and amendments in statutes relating to coal mines, minimum wages for men, hours of labour and relief of unemployment.

Freedom of Association and Conciliation in Labour Disputes

The Industrial Conciliation and Arbitration Act which came into force on May 1 and which repeals the Labour Disputes Act of 1926 and the Freedom of Trade Union Association Act, 1937, enacts somewhat similar provisions to those of the latter statute and provides new machinery for conciliation and arbitration in industrial disputes. The Act applies only to matters within the legislative jurisdiction of the province and in the sections designed to settle industrial disputes, it lays down procedure like that provided in the British Columbia Industrial Conciliation and Arbitration Act of 1937 (LABOUR GAZETTE, December, 1937).

The Trade Union Freedom of Association Act was based on a draft Bill of the Trades and Labour Congress and declared it lawful for employees to form a trade union and to bargain collectively through the union and its officers. It was declared unlawful for any employer to impose any conditions in a contract of employment seeking to restrain an employee from exercising his rights under the Act and any employer who intimidated or threatened an employee with loss of employment or who discharged an employee with the object of preventing any employee from belonging to a trade union, was liable to a penalty.

The sections of the 1938 Act relating to freedom of association recognize the right of employers and employees to organize for any lawful purpose and, like the British Columbia Act, declare it lawful for employees to bargain collectively with their employers "through representatives of employees duly elected by a majority vote of the employees affected." Any employer refusing so to bargain is liable to a maximum fine of $500.

The Alberta Act, as it was amended by the Legislature, makes provision for the appointment of employees' representatives for the purpose of collective bargaining It stipulates that immediately after the holding of any meeting of employees to appoint such representatives, the chairman of the meeting must send to the Minister of Trade and Industry a statutory declaration giving the name of the employer, the place of employment, the total number of employees, the number attending the meeting, the names and addresses of the representatives and in case an election is held, the names of the candidates and the number of votes cast for each candidate. If the chairman fails to make such report to the Minister, any other person present at the meeting who knows the facts may forward the declaration to the Minister. It is provided that no election of representatives by a meeting of employees shall have any effect until such report has been made to the Minister but failure to comply with the requirement is not to constitute an offence. It is stipulated further that "it shall be lawful for the majority of the employees at any meeting of the employees to prevent the attendance at such meeting of any persons whose attendance such majority does not desire."

It is declared unlawful, as before, for any employer to impose any condition in a contract of employment or to continue such condition in effect which seeks to restrain any employee from exercising his rights under the Act. A maximum fine of $500 is provided for any person who by intimidation, threat of loss of position or any other threat or by actual loss of employment seeks to compel any person to join or refrain from joining any organization or to refrain from becoming an officer of an association or to refrain from attending any meeting held by the employees to discuss grievances or to appoint representatives to carry on collective bargaining or to refrain from acting as a representative for collective bargaining. An "organization" in the Act means any organization or association of employees formed for the purpose of regulating relations between employers and employees and includes a trade union; or any organization or association of employers formed for the purpose of regulating relations between employers and employees. It is stipulated that nothing in the section relating to intimidation shall prevent an organization of employees from maintaining the existing agreement or entering into a new agreement with an employer or organization of employers whereby all the employees are required to be members of a specified employees' organization. The Act is not to affect in any way the right of an employer to suspend or discharge employees for sufficient cause.

New sections require every employees' organization and its branches or locals to file

with the Minister a certified copy of its constitution and by-laws with amendments and before January 31 of each year to furnish a list of the names and addresses of its president, secretary, organizers and other officers as of December 31. This information is to be used only for the purposes of the Act and is not to be available for the inspection of the public. When requested by the Minister, any employees' organization must submit a general statement of its receipts and expenditures for the preceding year accompanied by a statutory declaration and giving such further information as may be required. For failure to furnish the information, an officer of an organization is liable to a maximum fine of $100 and costs and in default of payment, to imprisonment for not more than 30 days. As the Bill was presented to the Legislature, employees' organizations were to be required to furnish such information annually. The Legislature amended the section to provide, as in the New Brunswick Labour and Industrial Relations Act, that the information must be furnished only when requested by the Minister.

The Legislature also changed the Bill to stipulate that such information may be used only by the Minister and officers of his Department for the purpose of making statistical summaries and that no summary may give any details in such a way as to enable any person to identify them as relating to any particular organization. Neither may any person in the Government service communicate or allow to be communicated, except as stipulated above, any information obtained under this section or allow any person not in the Government service to inspect any document surveying such information. A maximum fine of $100 or imprisonment for not more than 30 days is provided for the violation of the section.

As regards industrial disputes, the Act applies to any dispute between an employer and a majority of his employees. The matters that may be involved in a dispute within the Act are similar to those in the British Columbia Act of 1937 and the Dominion Industrial Disputes Investigation Act. Either party to a dispute may apply to the Minister for the appointment of a conciliation commissioner and the Minister, within three days after receipt of the application, must decide whether the dispute is a proper one for reference to a conciliation commissioner. Power is given to the Minister to appoint a conciliation commissioner on his own initiative whenever any dispute exists or is apprehended and any dispute of a similar kind to one being dealt with may be referred by the Minister to a conciliation commissioner whether the latter has been appointed on application or on the Minister's own motion. The provisions relating to the appointment and duties of a conciliation commissioner and the reference of a dispute not settled by conciliation to a board of arbitration are identical, except in one particular, with the British Columbia Act of 1937. Within 14 days the commissioner is required to transmit to the Minister a report on the dispute and his efforts to settle it.

If the report states that the commissioner has failed to bring about a settlement, the Minister shall, in case the commissioner was appointed on the application of one of the parties to the dispute, appoint a board of arbitration. The latter board is to be composed of three members, one nominated by the employer and one by the employees and an independent person agreed upon by the two others. If either party fails to appoint its representative within the time specified in the notice to it by the Minister, not to exceed seven days, or if the two members fail to appoint a chairman within five days after the two representatives have been appointed, the Lieutenant-Governor in Council is to appoint the chairman. If one of the parties to a dispute is an organization, notification is to be served by the Minister to the president or secretary of the reference of the dispute to a board. In other cases, the Minister has power to determine the persons to be notified as representatives. No person may be appointed a member of a board of arbitration unless he is a British subject, nor, and in this particular the Act differs from that of British Columbia, unless he has been a resident of the province for three years immediately preceding the date of appointment. Provisions are laid down for filling vacancies on the board, providing clerical assistance, giving power to summon witnesses, to require the production of documents and inspect premises. Any party to a dispute before a board may be represented by not more than three persons designated by it. If any party without good cause fails to attend any proceedings before the board, the board may proceed as if the party had been represented. The findings and recommendations of a majority of the members of the board are to be those of the board.

Within not more than 14 days after its appointment, the board is to make its report dealing, as far as possible, with all factors in the dispute and making recommendations regarding them but if all the parties agree, the time given to the board to make its report may be extended. The Minister is to have a copy of the board's report sent to the parties and if he thinks fit, he may publish it. The question of its acceptance or refusal must be submitted to a vote of the employees and of

the employers, if more than one employer is involved, and the Minister is to fix the date of voting, which is to be by secret ballot, and he may supervise the taking of the vote. If the report is accepted by the parties, it is to be retroactive to the date of the application for the appointment of a conciliation commissioner and the board of arbitration may state the period during which it should remain in force. The Act stipulates that no court is to have power to enforce any report of a board of arbitration and no report shall make any recommendations conflicting with the provisions of the Factories Act, Hours of Work Act, Minimum Wage Act, 1925, Male Minimum Wage Act or the Industrial Standards Act or any agreement made thereunder.

As in British Columbia, no employer may declare a lockout nor may any employees, who are parties to a dispute within the meaning of the Act, go on strike from the time an application for the appointment of a conciliation commissioner has been made until 14 days after the taking of a vote on the acceptance of a report of a board of arbitration.

In the case of any dispute, no employer may change conditions as to wages and hours without the consent of the employees nor may the employer declare a lockout or the employees go on strike prior to an application for the appointment of a conciliation commissioner. The onus for making an application in the case of a dispute concerning wages and hours is placed on the party proposing the change. Neither party may alter the conditions of employment as to wages or hours or be concerned in anything in the nature of a strike or lockout and the relationship of employer and employee cannot be interrupted by the dispute or anything arising out of it until the application has been made for the appointment of a conciliation commissioner.

It is stipulated, however, that where there is an agreement between an employer and an organization of employees which provides for the arbitration of disputes and which has been approved in writing by the Minister, the parties to the agreement shall, so long as it remains in force, be exempt from the provisions of the Act relating to conciliation and arbitration.

A maximum fine of $500 is provided for any person who violates any provision of the Act for which a penalty has not been provided.

Funds required for the administration of the Act are, in the absence of any vote of the Legislature, to be paid out of the General Revenue Fund. The Lieutenant-Governor in Council is given power to make regulations not inconsistent with the Act concerning any matter which appears to him advisable for its effective operation.

Workmen's Compensation

The revised and amended Workmen's Compensation Act (Accident Fund) which will come into force on Proclamation is designed to implement certain recommendations of the Special Committee appointed by the Legislature in April, 1937, to inquire into the operation of the Act. (Labour Gazette, May, 1937, page 480 and March, 1938, page 297). The following provisions are based on these recommendations. The Board no longer has power to withdraw industries from the operation of the Act but may add to or reclassify them as formerly. The Alberta Act, like that of British Columbia, has always made provision for meeting, to some extent, the cost of medical aid by deductions from wages. In the past, the amount deducted has been in the discretion of the Alberta Board. From January 1, 1939, however, the amount deducted by an employer from the wages of a workman and paid to the Workmen's Compensation Board to meet the cost of medical aid may not be less than one or more than five cents per day or part of day worked. This clause was added to the Bill in Committee.

To aid in equalizing assessments it is provided that where in any year payments from the medical aid fund are in excess of receipts, such excess is to be charged to the Accident Fund and distributed among the classes or sub-classes in proportion to the total medical aid payments from such classes or sub-classes during that year. Any surplus in the Accident Fund standing to the credit of any class or sub-class at the end of any year may be transferred at the discretion of the Board to the equalization reserve. The Board is required to engage in educational work and instruction in accident prevention and first aid of workmen and others by means of demonstrations, lectures, classes or in any other manner and to hold examinations and issue certificates to persons skilled in such matters.

Other changes made in the Act include an amendment in the definition of "medical aid" which was inserted in the Bill by the Legislature, by adding the words "special treatment by all those who are licensed to practise the healing art in the Province."

The clause giving the Board power to determine whether any employee is a workman within the meaning of the Act is now reworded to state that the Board may determine whether or not any person or aggregation of persons is an employer within the meaning of the Act and, if so, whether any employee is a workman within the Act. A further amendment expressly provides that no decision of the Board shall be binding upon it as a precedent but that each case shall be decided on its merits. As regards bringing under

the Act any industry or establishment or any employer or workman on application of the employer or a majority of the workmen, a change is made by stipulating that an order to such effect is to remain in force until rescinded by the Board of its own motion or on application. Formerly, an order of this kind was effective for not less than twelve months at the end of which the employer or a majority of the employees might withdraw on notice to the Board. In default of such notice the order remained in effect.

The Board is vested with new powers regarding accident prevention in addition to those noted above as implementing recommendations of the Special Committee. The section of the Act enabling the Board to order an employer to install safety devices was amended to require the employer to keep posted in a conspicuous place a copy of such order until the order has been complied with and the Board has authorized removal of the notice. Similarly, an employer who fails to comply with such an order or in whose plant dangerous conditions exist and who has been notified by the Board to close the whole or part of his establishment, may now be required by the Board to post a copy of the closing order in a conspicuous place on the premises. Where an accident in respect of which compensation is payable is due entirely to failure of the employer to comply with the directions of the Board or with the regulations under the Act, the Board may levy upon the employer an amount not exceeding one-half of the amount of compensation payable in respect of the injury. If satisfied, however, that the failure was excusable, the Board may relieve the employer in whole or in part from such liability. No employer may begin operation of any mine or plant, within the scope of the Workmen's Compensation Act, in which power-driven machinery is used and which has not been in operation for the preceding seven months, until leave is obtained from the Board on written application and after inspection by the Board's officers.

A clause added to the Act is similar to one incorporated in the Nova Scotia Workmen's Compensation Act in 1928 and provides that where a workman is found dead in the underground workings of a coal mine at a place where he had a right in the course of his employment to be, it is to be presumed that his death was the result of injury arising out of and in the course of his employment unless there is evidence sufficient to rebut such presumption.

A change is made in the waiting period. Formerly, no compensation was paid for the first three days of disability in any case. The Act now provides that only medical aid is payable for the first three days unless the workman is disabled for more than thirty days when payment is made from the date of disability.

Where an employer or the members of his family apply to come under the Act and they receive no stated wage, they are to specify in the application the sum or sums, not less than $1,200 or more than $2,000 per annum, for which they desire protection.

Under the Act as amended in 1937, a medical board could be appointed to act as a final authority in medical matters and required to certify to the Workmen's Compensation Board as to the condition of the workman, his fitness for employment and, if unfit, the cause of such unfitness and the extent of his permanent or temporary disability. The new Act provides that this is to be done unless the Workmen's Compensation Board directs otherwise.

The cost of maintenance and repair of apparatus used by an injured workman, which formerly was defrayed out of the medical aid fund after the first year, is now to be met from the Accident Fund.

In cases where a workman or dependant has accepted a lump sum in commutation of pension payments, it is now expressly stipulated that such workman or dependants have no further claim against the Board in respect of the accident or injury. The section enabling the Board to make advances on account of compensation in cases of urgent need was amended to restrict this provision to beneficiaries residing in Alberta.

A new section provides that where a workman entitled to compensation is no longer supporting his family and his dependants are residing in Alberta without adequate means of support, the Board may divert the whole or part of the compensation for the benefit of the wife or children.

The scale of compensation to dependants remains unchanged but payments in respect of children are now continued up to the age of 18 years instead of 16.

In the case of workmen injured while doing rescue work in a mine after an accident or explosion, compensation is to be 100 per cent of earnings instead of 66⅔ per cent as in other cases. Except for this provision compensation for total disability remains unchanged. For permanent partial disability, instead of paying 66⅔ per cent of diminution of average earnings as formerly, the Board is now to estimate the impairment of earning capacity from the nature and degree of the disability and award compensation accordingly. Earnings used for computing such claims are the same as before, namely, the average earnings of workmen employed at the same work as

shown by the records of the Board for the eight years immediately preceding the first day of January preceding the date of the injury. In cases of temporary partial disability, compensation is also to be based on the Board's estimate of impairment of earning capacity but average weekly earnings are to be based, as in case of death and total disability, on the actual earnings of the workman during the previous twelve months or, where these are not ascertainable, on the average earnings of a person in the same grade of employment. The Board may fix periods of payment other than weekly.

An amendment was made in the section requiring that, in fixing the amount of a payment, any allowance or benefit which the workman received from his employer during the period of his disability should be taken into consideration. It is now provided that any sum deducted from compensation under this provision may be paid to the employer out of the Accident Fund, but where such allowance or benefit has been charged against the workman for repayment to his employer, whether the workman is on relief or otherwise, payments of compensation made by the Board to the employer are to be credited by him to the account so charged.

In addition to provisions respecting medical aid which give effect to recommendations of the Special Committee, the Act gives the Board full authority to furnish medical aid and to make regulations with respect to it. The provision for a subsistence allowance to a workman undergoing treatment at a place other than that in which he resides, was amended to make such allowance payable from the Accident Fund. The section dealing with transportation of injured workmen was redrawn to make it clear that such transportation is to be provided by the employer at his own expense and that if he fails to provide it he is liable, by order of the Board, to pay for such conveyance as may be procured by the workman or by some one for him or provided by the Board.

New provisions relating to assessments enable the Board to make a levy on employers at a sufficient rate to provide a reserve for equalizing assessments and a reserve for the payment of all costs in connection with silicosis as well as such other reserves as will ensure as nearly as possible within each class uniform assessments from year to year. The Board may also adopt a system of merit rating and may reduce the assessment of any employer where the machinery and equipment and the precautions taken are found to ensure a maximum margin of safety and where the accident record has been consistently good.

59089—3½

The section requiring companies to include in their payroll reports to the Board every person employed as a workman notwithstanding the fact that the company is under no legal obligation to pay such person any wages or salary and authorizing the Board to fix a sum deemed reasonable as a wage or salary not to exceed $2,000 for the purpose of assessment for such person, was redrawn. It is now provided that every person rendering service to a company under a contract of service, written or oral, expressed or implied, shall be deemed to be a workman and included on the payroll, whether or not such a person is a member, officer or executive of the company and whether or not the company is under legal obligation to pay such person any wages or other remuneration, and the Board, as before, may fix a maximum salary of $2,000 for such person.

A new provision requires every municipal assessor or, in the case of an improvement district, the Department of Municipalities, to make an annual return to the Board showing the names, addresses, nature of business and usual number of employees of all employers of labour in the municipality or district, except farmers, together with any other information required by the Board.

The latter is given wider powers in the matter of obtaining information from employers and any member or officer of the Board who divulges any such information or any information concerning an employer or employee with whom it transacts business, except in the performance of his duty, is guilty of an offence. Neither may the Board or its officers furnish any information concerning any employer or employee, except of a general nature, or except to the person himself or except as directed by the Government.

Where an employer engages in an industry to which the Act applies and has not been assessed the Board, if of the opinion that the industry is temporary, may require the employer to pay, or give security for payment of, the assessment for which he would have been liable had his industry been in existence when the last preceding assessment was made. Where work within the scope of the Act is performed under contract for a municipal corporation or for a board or commission managing any work or service for such corporation, assessments may be paid by the corporation, board or commission and the amount deducted from the moneys due the contractor in respect of the work.

Several amendments were made to ensure the payment of assessments by employers. They may be collected in half-yearly, quarterly

or monthly instalments or otherwise and where the funds in any class appear to be sufficient for the time being any instalment may be abated or its collection deferred. Where an employer defaults in the payment of an assessment and an execution entered with respect to it is returned unsatisfied, any judge of the Supreme Court, on application of the Board, may restrain the debtor from carrying on any industry within the Act until the amount due on the execution and all assessments made by the Board and the costs of application are paid. The section giving sums due the Board by an employer priority over all debts and charges, except wages, was amended to provide that notwithstanding any provision in any other Act such priority is not to apply against wages due employees in cases where the exercise of such priority would deprive the claimant of his wages.

Where any business to which the Act applies, or any stock or equipment connected therewith, is sold, the purchaser, before paying or giving security for any part of the purchase price, must obtain from the vendor a certificate from the Board that it has no claim on such business or stock. Where the vendor has not furnished such certificate the purchaser is liable for any indebtedness of the vendor to the Board. A similar provision governs sales of lumber other than those made by regularly established retail dealers in the course of their business. In such cases, the liability of the purchaser for the vendor's indebtedness to the Board may not exceed 75 cents for each 1,000 feet, board measure, of lumber purchased.

The amount of any assessment is also made a charge upon any real estate of an employer not otherwise subject to a lien created by the Act from the date of the lodging in the proper Land Titles Office of a certified copy of such assessment. Where assessments are to be recovered by the Board by distress and sale of the goods and chattels of the employer, the Secretary of the Board must give at least ten days public notice of such sale. If an assessment remains unpaid for 30 days the Board, in lieu of, or in addition to, other proceedings provided for in the Act, may send to the clerk of the municipality in which the defaulter's establishment is situated a certificate giving the latter's name and address and the amount owing, whereupon the clerk is to enter the amount on the collector's roll, collect it as if it were taxes and remit it to the Board. The collector may add 5% to the amount to be collected and retain such percentage for his services. Subject to any Dominion Act, debts due to the Board are to have priority over all others in the distribution of property in the case of an assignment or death or of the winding up of a company. No employer may have workmen in his employ unless he has complied with the provisions of the Act and where an employer fails to pay any assessment for a period of one year the Board may notify him to refrain from employing any workman until all dues are paid.

Security for Miners' Wages

The Mining Industry Wages Security Act which as regards Section 3, came into force on April 8 and the rest of which is to come into force on proclamation, repeals the Coal Miners Wages Securities Act, enacted in 1928 and amended in 1934. The new statute applies not only to coal mines but to any quarry, salt mine or any works operated for the purpose of processing salt or tar sands near where the salt or tar sands are got or to any drilling operation for natural gas, oil or salt.

Section three requires every employer engaged in an industry covered by the Act to make to the Minister charged with its administration, on May 15 of each year, a statement of the total amount of wages paid or payable by him for the 12 months ending April 30 and, when required by the Minister, to furnish a statement showing his assets and liabilities giving in detail all mortgages or charges against any of his assets and the nature of them and the amount secured for such mortgages and charges as of April 30. It is further provided in the same section that every employer who proposes to engage in an industry within the Act shall, before beginning operations, deliver to the Minister such a statement as that indicated above. As under the repealed statute, employers are required on or before June 1 in each year to lodge with the Minister security for the payment of wages to workmen employed by them for the next 12 months. Where the period during which wages have been paid or are payable to workmen immediately preceding June 1 is less than 12 months, the amount of the security is to be determined by the Minister; in other cases, the amount is to be equal to the greatest amount paid by the employer in any one month during the previous year. A new section provides that if it appears to the Minister at any time that the amount of the security has become inadequate by reason of the amount of wages payable by the employer, he may require additional security and within 30 days after a notice to that effect, the employer is required to furnish it.

The security is to consist of cash or a guarantee bond of a bonding company authorized to do business in Alberta or such

marketable bonds or securities as may be approved by the Minister.

A new section empowers the Minister to order an employer to cease operating any industry in respect of which he is in default in furnishing any security or where he has failed to pay the wages payable to any workman employed in an industry within the Act. Any employer refusing to obey such an order is liable to a penalty of $100 for each day on which the offence continues.

An employer is required to keep posted in a conspicuous place where the industry is carried on, a notice in a form prescribed by the Minister to the effect that he has furnished security as required and that in case default is made in the payment of wages, the Minister may apply such security in paying wages and that in the case of any such default prompt notice should be given to the Minister. Any sum in the hands of the Minister by way of security or on account of any security held by him is to be available for the payment of all the wages for which it was given.

Other sections of the Act remain as enacted in 1934.

Amendment to Coal Mines Regulation Act

The Coal Mines Regulation Act of 1930 stipulated that when the amount of wages depended on the amount of mineral got out by employees, the mineral was to be weighed as near the mine entrance as possible or at the working face and the employees paid according to the amount they had mined. An amendment in this Act provides that this shall be done unless it be expressly agreed otherwise by the employer and employees. Where conditions are such that the mineral from any individual working place cannot be weighed separately and where the product from a number of working places is taken from one central loading point or chute, the total amount must be weighed and a *pro rata* distribution made among the workmen concerned according to the extraction made from each individual working place and such distribution must be determined by measurement.

The Minister is empowered to exempt any mine from the above provisions if he is satisfied that there are special circumstances making it inconvenient to apply them. The repealed section placed the onus of satisfying the Minister on this point on the parties interested.

Administration of Certain Acts

The Workmen's Compensation Board (Additional Duties) Act, which is to come into force on proclamation, will transfer to the Workmen's Compensation Board the administration of the Boilers Act, the Factories Act and the Coal Mines Regulation Act. The powers given to a Minister of the Crown by these three statutes are now granted to the Workmen's Compensation Board.

Fair Wages

Part II dealing with Fair Wages has been added to the Male Minimum Wage Act. Under this Part, the Board of Industrial Relations, with the approval of the Lieutenant-Governor in Council, may, after inquiry, prescribe as the fair rate of wages such rate as it considers proper for a fixed period or until another order has been made by the Board and upon publication the rate prescribed is to be the rate payable on any work carried out under a contract or a sub-contract where the original contract for the work or the contract under which the employer is carrying out the work contains a provision for the payment of fair wages to all employees engaged on the work. The rate prescribed is to apply also to employees whose rate of wages is not fixed by the contract of hiring. The employees to whom the Part applies may be in any industry, trade or occupation in any part of the province but the Act does not apply to farm labourers or domestic servants.

Industrial Standards Act

Amendments in this Act transfer the powers of the former Commissioner of Labour in regard to the Act to the Board of Industrial Relations created under the Hours of Work Act, 1936, specify more clearly the powers of a conference of employers and employed and stipulate that if a schedule is agreed to by a majority of the employers and employees at the conference it may be submitted to the Minister of Trade and Industry for approval by order in council.

As the Bill was presented to the Legislature, the powers of a conference were defined as in the Ontario Industrial Standards Act but the Legislature struck out the clause enabling a conference, with the approval of the Board of Industrial Relations, to levy on the employers or on both the employers and employees in an industry subject to competition from other provinces an assessment to meet the cost of enforcing the schedule and to authorize an advisory committee to collect assessments and out of the revenue engage inspectors and other officers to enforce the minimum wages and maximum hours fixed by the schedule.

The Act, as amended, now provides that a schedule may establish maximum daily and

weekly hours, the period of the day and the days of the week during which the working hours must fall, minimum rates of wages for regular time and the rates and conditions governing overtime. Employers and employees may be classified in a schedule and each group provided for separately with respect to any of the matters dealt with in a schedule. A schedule may also define any terms used in it, specify the particular operations included in the industry, prohibit overtime work without a permit and authorize the advisory committee to issue such permits subject to the conditions laid down in the schedule, fix the minimum charge which may be paid, accepted or contracted for with respect to the labour content of any service, work, operation or art and with the approval of the Board of Industrial Relations fix the minimum charge which an employer or employee may contract for or accept for any service, work, operation or art, and, finally, authorize the advisory committee to fix a special rate for any employee who performs work included in more than one classification of employees or whose work is only partly subject to the provisions of the schedule, or who is handicapped.

A further amendment provides that where an employee by collusion with his employer or otherwise works for less than the minimum wage prescribed under the Act, or directly or indirectly returns to his employer any part of his wage thereby reducing the actual amount he retains as wages below this minimum, both are liable to fines of not more than $100 each in addition to other penalties provided by the Act.

Any employer who discriminates against or discharges an employee who makes a complaint or gives or is likely to give evidence under the Act is liable to a maximum penalty of $500 or, in default of payment, to imprisonment for six months. Where a complainant requests that his name and identity be not made public, the request must be complied with unless the disclosure is necessary for a prosecution under the Act or is considered by the Board to be in the public interest.

Hours of Labour

The Hours of Work Act, 1936, providing for an eight-hour day and a 48-hour week for female employees and a nine-hour day and a 54-hour week for male workers in any industry except farming or except where exemption is provided for in the Act or regulations, was amended to define "overtime" in the case of female employees as time worked in excess of nine hours a day and 48 hours a week or in the case of male workers in excess of 10 hours a day and 54 hours a week.

A clause in the Bill empowering the Board of Industrial Relations to prescribe for the alternation of employees on the day and night shifts where such alternation was not provided for in an agreement between the employer and employees was struck out by the Legislature.

Department of Trade and Industry Act

An amendment in this Act enables the Minister of Trade and Industry or his designated agents to require the production of any statistical information from any persons engaged in any trade or in any agricultural, commercial or industrial activity. For failure to furnish such information, when it is available, within 30 days of a written request by the Minister or within any longer period fixed by the Minister, there is a penalty of $10 for each day of such default and costs. The onus of proving that he had not or was unable to procure the information is on the accused. The information thus obtained may only be used by the Minister and the officers of the department for the compilation and publication of statistical summaries relating to the trade and must not enable any person to identify any particulars given with any individual business. Any Government employee communicating or allowing to be communicated any such information, except as provided, or allowing any person access to the documents containing it, is liable to a fine not exceeding $100 and costs or to imprisonment for not more than 30 days.

Other sections in the amending Act give power to the Lieutenant-Governor in Council to lay down standards for commodities used in industry or for sale to the public. These clauses are very similar to sections which were enacted in the Industrial Standards Act, 1935, but repealed in 1936. The Lieutenant-Governor in Council may fix standard specifications as to the nature, contents and quality of any commodity and establish the manner and occasion of providing the public generally or any specified persons with these specifications. He may also prescribe a penalty for contravention of any regulation made under this provision not to exceed $200 and costs or imprisonment for 60 days. Regulations are to come into force on publication in the Alberta Gazette unless it is otherwise stipulated.

The advisory board and the advisory committee which the original Act empowered the Government to appoint are replaced by a general advisory board to be called the Trade and Commerce Advisory Board appointed by the Minister with the approval of the Govern-

ment to advise the Minister, when requested to do so, concerning the trades and businesses carried on in the province and by special advisory boards or committees to advise concerning any specified industry or trade. Subject to the Public Service Act, investigators, officers, and other employees may be appointed to enable the Minister and these bodies to carry out their duties, the remuneration of such persons and the manner in which they discharge their duties to be fixed by the Minister.

Licensing of Workmen

The Tradesmen's Qualification Act, 1936, allowing the Lieutenant-Governor in Council to prohibit any person carrying on any trade covered by the Act who does not hold a certificate of proficiency under the Act was amended to provide that the prohibition may apply to any area or areas designated or to any part of the province except an area or areas designated.

Bakeshops

The Bread Act, 1934, requiring every person operating a bakery or bakeshop to be licensed and permitting the Minister of Health to cancel or suspend a licence where he is satisfied that there has been a violation of any provision of the Act or of any regulation made under the Department of Trade and Industry Act, Factories Act, Minimum Wage Act, Male Minimum Wage Act or Industrial Standards Act, was amended to include as a "bakeshop" any place where cakes, pastries, pies and other bakery products are made.

Unemployment Relief

The Unemployment Relief Act, 1933, is to continue in force until March 31, 1939, and any obligation incurred under it prior to March 31, 1938, may be paid from the General Revenue Fund.

The Bureau of Relief and Public Welfare Act, 1936, was amended to enable this authority to appoint committees of not more than three members to investigate relief problems presented to the Agricultural Committee on Relief and to recommend arrangements for acquiring and distributing fruit, vegetables and clothing for relief purposes.

The provision that the term "unemployment relief" as used in the Act applies only to aid given persons approved by the Bureau of Relief and Public Welfare has been struck from the definition.

The section laying down conditions for the receipt of unemployment relief in municipalities to which assistance in meeting the cost is given by the Dominion or provincial Government or by both is amended to make it clear that the conditions apply only to such municipalities. Such places must make provision, in case of urgent necessity, for relief including food, fuel, clothing and shelter for persons who have resided in the municipality for at least 12 consecutive months in the preceding two years and who have not received assistance from municipal or provincial funds during the preceding 12 months. Further, every municipality must, in case of urgent necessity, make provision for relief for any employable person living there but who is not a resident within the meaning of the term as defined. In such cases, notice must be sent to the municipality of which the person concerned is believed to be a resident or, if he is not a resident of Alberta, to the Bureau of Relief and Public Welfare. If the municipality or the Bureau to which notice was sent fails within one month to accept liability for providing relief for such person, the municipality supplying such relief may apply to the judge of the district court for an order determining the liability. The Provincial Treasurer is empowered, on the recommendation of the Commissioner of Relief and Public Welfare, to pay the full amount of such assistance to the issuing authority if there is unreasonable delay in obtaining reimbursement from the municipality liable for the amount.

Where a judge of a District Court issues an order to a person receiving relief from a municipality of which he is not a resident to return to the municipality of which he is a resident, the former municipality is to continue to give relief until 20 days after the issuing of the Order, after which period the municipality where he has residence will be liable for relief and for providing transportation and a home.

A minimum fine of $50 was added to the section providing a maximum penalty of $500 and costs for any municipality which without lawful excuse fails to provide adequate unemployment relief for any resident. This section is further amended to provide that no magistrate or justice of the peace may accept any information or complaint or issue a summons or warrant pursuant to any provision of this Act until he has notified the municipality affected and has satisfied himself that the circumstances justify the acceptance of the information and complaint and the issue of the summons or warrant, or until 15 days after giving such notice. Where relief has been refused or is inadequate, any employable person may prefer a charge against the municipality responsible for the provision of

this relief before any police magistrate or justice of the peace whereupon the magistrate or justice must proceed to the determination of the charge as provided in the Act.

Old Age Pensions

The Old Age Pensions Act was amended to bring blind persons over 40 years of age within its scope as provided in the Dominion Old Age Pensions Act. All the orders in council made under the Old Age Pensions Act have been validated and confirmed.

Civil Service

An amendment in the Public Service Act provides that the Lieutenant-Governor in Council may constitute a joint council to be known as the Alberta Civil Service Joint Council consisting of six members, three appointed by the Lieutenant-Governor in Council and three by the Civil Service Association of Alberta. The functions and conduct of proceedings of the Council may be prescribed by the Lieutenant-Governor in Council. The Act states that its purpose is to secure the greatest measure of co-operation between the Government and its employees. The amending Act repeals the section providing that any application for increase of salary made by an employee in the public service, or by another person on his behalf with the employee's consent or knowledge, was to be considered as a tendering of the resignation of such employee.

Wage Deductions for Taxes

The Municipal District Act was amended to provide that every employer in a municipal district must, on request of the secretary-treasurer, furnish monthly the names of his employees and if any of the employees have failed to pay the school taxes for which they are liable the secretary-treasurer may, by written notice, direct the employer to deduct the amount due from the next wage payment made to the employee and forward it to the secretary-treasurer. Penalties are provided for any employer who fails to furnish the required information or make the deduction ordered.

Teachers

The section of the School Act enabling school boards to provide superannuation, sick pay and group insurance for teachers and other employees was amended to require that where the scheme was one to which a school board makes contributions, a by-law to that effect must be approved by a majority of the proprietary voters of the district.

Credit Unions

The Credit Union Act, in force on March 31, 1938, under the Minister of Trade and Industry, provides for the incorporation of credit unions, the objects of which are stated to be the promotion of co-operative enterprise and the creation of a source of credit at legitimate interest rates for their members for provident, productive and merchandising purposes.

Application for incorporation must be signed by at least ten persons and submitted in writing to the supervisor of credit unions to be appointed under the Act. If approved by him, the union must be registered by the Registrar of Joint Stock Companies. Standard by-laws applicable to all credit unions are to be drawn up by the supervisor with the approval of the Lieutenant-Governor in Council and supplemental by-laws may be made by a credit union but must be approved by the supervisor.

The capital of a credit union is unlimited but may be reduced by by-law upon a court order confirming the reduction being obtained as prescribed in the Companies Act, 1929. The capital is divided into shares of a par value of $5 each which may be paid by instalments. Shares are transferable and repurchasable by the union, subject to the authorization of the directors, except where the number of shareholders would be reduced to less than ten by such action. The liability of a shareholder to the creditors of the union is limited to the amount unpaid on shares held by him but no shareholder is liable for such unpaid balance until the funds of the union are found insufficient to meet the claims of the creditors.

A credit union is to be governed by a board of directors of five members, a credit committee and a supervisory committee of three members each. A director may be a member of the credit committee but no director or member of the credit committee may be a member of the supervisory committee. Officers are to be elected by the directors from among themselves and the names of the directors and officers must be filed with the supervisor within ten days after election. Only the secretary and treasurer or the secretary-treasurer may receive any remuneration.

The directors are to have the general management of the credit union, while the credit committee is to consider application for loans, the interest to be charged and the security required. Loans may only be made to members and the maximum interest chargeable is 1 per cent per month on unpaid balances. The supervisory committee is to examine the affairs of the union at least

quarterly, audit its books and report to the annual meeting. It may, if necessary, suspend any officer of the union and call special meetings to consider any important matter.

With the consent of the supervisor, and on a vote of three-fourths of the directors, a credit union may borrow money up to 25 per cent of its combined capital, surplus and deposits and, on the vote of three-fourths of the members of the union present at an annual meeting or at a special meeting called for the purpose or one-third of the membership, whichever is the greater, may borrow up to 50 per cent of its assets, provided those supporting the resolution represent a majority of the shares.

The entrance fees, fines and 20 per cent of the net earnings must be set aside in a reserve fund and, if provided by the by-laws, an additional 5 per cent may be placed in an educational fund to be expended within three years. From the remainder of the net earnings, a dividend may be paid to shareholders.

Housing

The Edmonton Charter was amended to empower the City Council to make by-laws for the purpose of providing employment and improving housing conditions by enabling the construction of dwellings at a reasonable cost for sale or lease to persons with small income. To this end the City Council may promote the incorporation of or directly apply to incorporate under any appropriate Act a limited liability company having as its primary object the establishment or operation of a housing scheme as defined in the Dominion Housing Act, 1935. It may undertake such a housing scheme, act as "local authority" or "approved lending institution" as defined in the Dominion Act, pass by-laws, make regulations and do whatever acts are deemed necessary to carry out the object of the legislation.

Resolutions

A resolution was adopted directing the Government to investigate the possibility of arranging for shipping coal in car-loads at cost price to municipalities for distribution among the people on relief and to give coal mines now in operation or fit to operate opportunity to take care of such requirements and to urge such mines to take as much timber as possible from producers of mine timbers in Alberta.

Another resolution expressed the opinion of the Legislature that the Federal Government should accept full responsibility for all unemployed and unemployable ex-service men.

Reduction of Public Relief in Urban Areas of U.S.A.

Telegraphic reports from 33 States and the District of Columbia for 101 urban areas show a decrease of 6 per cent in the number of cases receiving public general relief, and a decrease of 10 per cent in the amount of obligations incurred from March to April, according to figures recently made public by the Social Security Board. Decreases in the number of cases were reported for more than three-fourths of the 101 cities, while increases of as much as 1 per cent were reported for only 16 cities. Decreases of 10 per cent or more in the number of cases were reported for 42 cities, and of 20 per cent or more for 12 cities.

Decreases of 1 per cent or more in the amount of obligations incurred for public general relief were reported for 87 of the 101 cities, while increases, ranging from 1 to 17 per cent were reported for only 11 cities. The decreases in the amount of obligations incurred ranged from less than 1 per cent to as high as 70 per cent, with drops of 20 per cent or more in 28 cities, and of as much as 10 per cent but less than 20 per cent in 34 other cities.

Public general relief, it was explained, includes all State and local relief in cash and in kind extended to the needy, except public assistance to the needy aged, needy blind, and dependent children under the Social Security Act, other public assistance of these special types, and aid to veterans under State and local statutes. It does not include expenditures from public funds for maternal and child health and welfare services, costs of hospitalization, burials, institutional or boarding-home care of children and adults, earnings under the Works Program, loans and subsistence grants made by the Farm Security Administration, or Federal surplus commodities. Nor does it include aid granted by private relief and welfare agencies. Voluntary reports on the amount of relief extended and number of cases of general relief are telegraphed to the Social Security Board each month by State agencies.

RELATIONSHIP OF THE EMPLOYMENT SERVICE TO UNEMPLOYMENT INSURANCE

Summary of Papers presented at convention of International Public Employment Services

AT one of the sessions of the twenty-sixth convention of the International Association of Public Employment Services, held at Ottawa on May 25-27, the subject of unemployment compensation was dealt with in two papers. Under the title, *"Administrative problems in Social Security,"* Mr. Frank Bane, executive Director of the United States Social Security Board, prepared a paper which was read by Mr. Motley, Chief of the Employment Service Division, Washington.

At the same session, Mr. Tom Moore, formerly vice-chairman of the National Employment Commission addressed the convention on the subject of *"The Interrelation of The Employment Service and Unemployment Insurance."*

Mr. A. J. Odam, Statistician of the Employment Service of Canada, presided at this session.

Situation in United States

In the introduction to his paper on Administrative Problems in Social Security, Mr. Bane referred to the "single nation-wide system designed to promote the job security of workers" now in operation in the United States, the purpose of which was "to furnish work-opportunity and work-protection. And its interlocking parts are public employment service and unemployment compensation."

Mr. Bane then dealt with the development and background of the employment service and unemployment compensation in the United States. He referred to the establishment of the first federal employment service which came about as a result of the World War and the reduction of immigration to the United States "almost to the vanishing point." The ordinary functions of the Federal Bureau of Immigration thus being substantially reduced and "acting under its legal authority 'to direct workers to opportunities for profitable employment' transformed itself in fact, if not in name into an employment service. . .

"When in 1917 the United States entered the war, the shoe was on the other foot. Unemployment vanished; and the problem was not to find jobs for workers, but workers for jobs. Under this impetus Federal interest in the employment field was officially recognized for the first time, and the United States Employment Service, as a unit of the Department of Labour, came into being in January, 1918". . .

Mr. Bane noted the various steps taken to establish a public employment service on the basis of federal-state co-operation, culminating in 1933 with the enactment of the Wagner-Peyser Act. He also referred to the efforts made in state legislatures as far back as 1916 (Massachusetts) to obtain unemployment compensation legislation. "Yet Wisconsin was the only state which actually succeeded in passing such a law prior to Congressional consideration of the Social Security Bill. Unemployment compensation, as finally embodied in the Social Security Act, is the direct outgrowth of all this past effort and past experience.

"The inclusion in the Social Security Act of a provision requiring that 'payment of unemployment compensation solely through public employment services in the state or such other agencies as the Social Security Board my approve' recognizes that employment service and unemployment compensation are mutually complementary parts of the same system."

Dealing with the present position of employment service and unemployment compensation in the United States Mr. Bane stated:

"By 1937—four years after the passage of the Wagner-Peyser Act and two years after the passage of the Social Security Act—every State in the Union, together with the District of Columbia, Hawaii and Alaska, was co-operating with the federal government in both public employment service and unemployment compensation. In 49 of these 51 jurisdictions both services are under the direction of the same overhead state agency. As a result of the expanded employment service activities necessitated by this new joint set-up, the coast-to-coast network of the federal-state labour exchanges has grown enormously; more than 1600 public employment offices are now in actual operation.

"Another milestone was passed last January, when benefits became payable in 22 States. Up to that time, Wisconsin, where benefits became payable in July, 1936, was the only State to have reached this stage of full operation. This past April two more States began benefit payments, bringing the total to 25. The remainder will follow suit during the coming months—four by or before September, 20 next December or January, and the last two the following July.

"As of last December 15, about 21,000,000 workers were in jobs covered by the 51 state unemployment compensation laws. Because of labor turn-over, the total coverage under these programs is probably from 25 to 50 per cent higher than this estimate of covered employment on a particular date. More than half of these covered workers are in the States where benefits are now being paid. Since January, some 2,800,000 unemployed workers in these 25 states have been found eligible for

benefits. And by the middle of May benefit payments totalled about $119,000,000."

Differentiating between unemployment compensation and relief, Mr. Bane declared that the former "was never intended to provide for all the want caused by unemployment."

He then stressed the necessity of operating the two systems of employment service and unemployment compensation together. Referring to the new responsibilities which the administration of unemployment compensation places upon the employment service it was stated that under the authority of the Social Security Board administrative grants to the States totalling over $47,000,000 have been made. Of this amount about $12,500,000 has been made for the specific purpose of extending State Employment Services to meet their new responsibilities in connection with unemployment compensation.

Concluding his paper Mr. Bane declared:

"Wherever you take hold of this problem of simplication—whether from the angle of the employer, the worker, or the administrative agency—you come right back to the point at which I started—employment service and unemployment compensation must be one system—in the local office, in the State agency and equally at the Federal level. The administrative control must be unified under one overhead agency in the local office at the state level—and incidentally, in my opinion, in Washington as well. The Federal agency responsible for this integrated service should have discretionary powers so that it can help the States develop realistic and flexible methods of meeting varying problems from State to State and within each State. But do not misunderstand the point I am trying to make; the issue I raise is one federal agency—not what federal agency.

Integration of employment service and unemployment compensation is of course, not the only factor in increasing the administrative efficiency of this system. But it is a big factor, an urgent factor, and one from which the potential gains are already clearly apparent. Here we have a double-hitched team. Both horses are headed in the same direction, all right. But whoever sits on the driver's box must have all the reins in his hands if the team is to pull together. And they—both driver and team—will have to pull for all they are worth if they are to continue the progress that, in spite of many obstacles, has been so well begun in these past several years.

Situation in Great Britain

Introducing his subject "The Interrelation of the Employment Service and Unemployment Insurance" Mr. Tom Moore referred to a statement made in 1933 in one of the reports of the International Labour Office that "A good organization of the Labour Market is one of the corner stones of general economic organization." "This" Mr. Moore declared "has been accepted in Great Britain in the broadest manner, and not only were labour exchanges established nearly 30 years ago but they have been constantly expanded until they are to-day the keystone of much of the social as well as their economic activities, especially those that so closely affect the lives of the wage-earners in that country."

Mr. Moore then referred to the early development of the labour exchanges which "quickly drove out of the field agencies operated on a profit basis."

After pointing to the important functions performed by the British labour exchanges, particularly during the war, Mr. Moore made reference to the possible value which might be made (should need arise for industrial mobilization to meet a national emergency) of the records which were now available through information gathered by the Employment Service and the Unemployment insurance scheme which together gave one of the most complete indexes of the nation's manpower.

In addition to providing an index of the industrial man-power of the country, Mr. Moore enumerated the other functions of the employment service in Great Britain, thus:

"You find the employment exchanges in Great Britain are the centre of selection for those eligible to enter government training schemes, for vocational guidance and follow-up work of juvenile workers, for labour transference projects, and to a certain extent for payment of Government relief to those still in need and still considered as employable. This is done under the unemployment assistance legislation. It should be made clear here, and I cannot emphasize this too much, that the actual administration of this is in the hands of a separate board, being financed wholly by government funds. The benefits are paid only on proof of need and then only to such as are in insured industries and have exhausted their rights to benefit or who are not insured but are capable of and available for employment.

"The part the employment offices play is first to certify that the applicant comes within either of the two above classes. The question of need (means test) is then decided by the unemployment assistance board, in no way connected with the unemployment insurance or employment office machinery. This independent board also fixes the amount of assistance to be paid and it is only at that stage that the employment offices again come into the picture as paying agents. The recipients are paid at the same time and in the same way as those receiving insurance, thus removing the degrading effects that often result in destroying the morale of honest workers forced to accept state relief."

Dealing with unemployment insurance, the speaker pointed out that in Great Britain, it is now almost universal with approximately 15 million employees covered, including agricultural workers who were brought within the scheme last year. Domestic servants in private homes are excluded. Toward the end of 1937, it was reported that of the approximately one million and a half unemployed registered in the employment offices, 53 per cent drew unemployment insurance, 38 per

cent unemployment assistance allowances and 9 per cent made no application.

Another interesting factor he noted was that an average of more than 50 per cent are unemployed for three months or less, and more than 65 per cent for 6 months or less. Most of the remainder are in the depressed areas such as the Lancashire cotton areas and Welsh coal fields where unemployment has become chronic. These percentages reveal the amount of labour turnover and also demonstrate the extent of coverage by unemployment insurance of those unemployed.

Mr. Moore further pointed out that the duties of employment officers in Great Britain included: registration of all insured workers; certification as to the eligibility of their claims (subject to statutory provisions for review by courts of referees and authorizing the amounts of payment by the Head Insurance Office); and the placing of the greatest possible number at work as expeditiously as possible. Indicating the close relationship between employment placements and unemployment compensation, each operating in their respective spheres, Mr. Moore declared:

"It is not an unwarrantable assertion that no insurance or compensation scheme can be sound that does not recognize the importance of keeping insured workers employed to the fullest extent, not only for the good of the worker himself but also as to the soundness of the scheme that is being operated.

"Neither is it sound to do so where placements would lead to a breaking down of standards of wages and working conditions already established, and thus both the British and American schemes and our stillborn Canadian one of 1935, contain certain clauses aimed to give protection against this.

"Again, employment offices cannot enter the relief field or should not, only in so far as they may be effective in working towards or assisting in rehabilitating those capable of being put to work. With all their other duties, placement must remain in the forefront at all times."

In Great Britain, Mr. Moore indicated that employment offices hold the same position in the labour field as departments of trade and commerce, with their attaches, do in respect to assisting in the expansion of commerce. On this point he observed:

"Employment placement officers are expected to keep well informed of all industrial activities in their areas. To assist them to do this, each one is assigned a certain number of out-of-office hours each week during which time they act as scouts for placements, visit jobs and factories, see how their placements have worked out, ferret out advance information as to immediate or long range labour supplies that may be needed, and in every conceivable way anticipate labour requirements of their clients. It is not uncommon to see a notice on a factory job-notice board: 'All workers engaged through the Employment Service.' As a matter of fact, these notices are provided free by the offices in many districts.

Mr. Moore then detailed the set-up and administration of the British Employment Service, "backed up advisory councils functioning in connection with some 400 main offices."

In Great Britain, he emphasized that "both the employment service and unemployment insurance are administered under the Minister of Labour, and all employees are civil servants with all that that means in Britain."

Setting forth the background in Great Britain as compared with Canada or the United States, Mr. Moore stated:—

"In placing all this before you, I am not unmindful of advantages which obtain because of the close compact population in Britain which does not apply here nor in the United States. Further, there is centralized control by the National Government and no state right or provincial claims for jurisdiction to complicate matters. Again there are decades of experience and usage to work upon. Long before State schemes came into being, trade unions were looking after their unemployed members and paying unemployment benefits.

"Against this Great Britain pioneered her schemes when little was known of the way in which to deal with the problem as a national responsibility. To-day there are the experiences of many countries to draw upon. In 1934 I served on a committee in Geneva where the experience of some 30 countries was pooled and from which emanated a draft convention incorporating basic principles of unemployment insurance plans. There is no longer necessity to work in the dark as Great Britain had to do. Nevertheless, each country has its own problems to meet and try to solve, and can accept international information only as a guide of what might be done and, also equally important, what to avoid doing."

In conclusion, Mr. Moore declared:—

"In my opinion, no employment service can be expected to function fully unless linked to it is unemployment insurance; otherwise, it will not be used by workers in times of acute unemployment when it is known that to register for a non-existent job is merely a waste of time.

"Neither can an unemployment insurance plan work properly unless it is backed by an efficient placement service, geared to gather all essential data upon which the planning for labour stabilization must depend. The scheme must be supported by advisory councils which can not only keep alive the interest of parties concerned in the work being carried on but bring to the service that fund of practical knowledge of the requirements of to-day and to-morrow which only those actually facing the problems can possibly have."

According to a bulletin issued by the Ontario Accident Prevention Associations information supplied by the Workmen's Compensation Board of Ontario shows that there were 4,026 accidents reported to the Board in April in comparison with 4,805 accidents in the same month of 1937. Of these accidents 19 were fatal. Total awards for compensation and medical aid amounted to $516,479.06, medical aid cost making up $106,013.77 of the total.

THE EMPLOYMENT SERVICE AND EMPLOYMENT PROBLEMS

Viewpoints of Labour and of the Employer Presented before International Association of Public Employment Services

FEATURING one of the sessions of the twenty-sixth convention of the International Association of Public Employment Services, were informative papers given under the heading—"The Employment Service and Employment Problems." The labour viewpoint was presented by Mr. H. B. McKinnon, Member of Parliament for Kenora-Rainy River, and a member of the Brotherhood of Locomotive Engineers, while the viewpoint of the employers was expressed by Mr. Edward J. Harding, Managing Director, Association of General Contractors, Washington.

In presiding at this session, Mr. H. C. Hudson, General Superintendent, Province of Ontario (Employment Service of Canada), observed that "the criterion of success or failure is not the collection of statistics, however valuable they may be, but rather the degree to which the office or service is able to bring together the jobless man and the manless job."

The Labour Viewpoint

In commencing, Mr. McKinnon defined the approach of the worker to the employment service as follows:

"The natural approach to a public employment service on the part of the working man is that of the person who is in need of help and who goes to a very good friend to secure assistance. As I view it, the public employment service is designed to help the wage earner who is out of a job, or perhaps the wage earner who is in employment which he does not like, to obtain a job which he is competent to fill and which is to his liking."

He pointed out that in Canada during the pioneering period, very frequently "jobs went looking for men," but that with urban growth and industrial development, and particularly since the War, "there have been few shortages of men and shortages of jobs have been much more frequent."

"In these circumstances," the speaker noted, "public employment offices were bound to develop; and the old system of letting the worker find a job for himself—or letting a fee charging employment office, operated for profit, find a job for him—has been outgrown."

Emphasizing that the public employment service is here to stay and any changes in the future should and will be along the lines of expansion rather than contraction, Mr. McKinnon discussed his subject upon the basis of workers and of industry.
its future operation in the interests of the

He first referred to the practical abolition throughout Canada of the old fee charging employment agencies due largely to the insistent demand of organized labour to have them out-lawed. Similarly, he stated, that it was "largely through the insistence of the unions that public employment offices were established in some of the larger cities even before the War."

The speaker then outlined the steps taken in the formation of public employment offices through the enactment of the Employment Offices Co-ordination Act by the Dominion Parliament and the functioning of its complementary body, the Employment Service Council, upon which organized labour was represented.

Dealing with the problems confronting the public employment office system, Mr. McKinnon instanced the case of outlying districts;* and on this phase he expressed himself as follows:

"In Canada in such industries as mining, pulp and paper, and some others, the plants which develop from these industries are by no means confined to the larger cities. I have the honour to represent in the Parliament of Canada a constituency largely made up of working people, a district which relies pretty heavily on primary and non-city industries, as well as on railroading (with which, incidentally, I am most familiar being a railroad employee myself) and from my observation, I would say that it is extremely difficult to fit an employment service to the needs of the public in such a district, though I have often thought that something more should be done for these people than is done at the present time. I take it that the argument is that where you get large cities—Winnipeg, Montreal and Toronto, for instance—where you have a variety of industries, concentrated in a small area, public employment offices may function very smoothly. Where you get one or two or three industries as the whole support of a large town, or where you get industries located in isolated districts, I suppose it is really difficult for public employment offices to place applicants who are laid off by these industries, for the reason that there are no numerous other employers to offer jobs to the people thus laid off.

"Where you get industries in outlying districts, such as the mines in Northern Ontario, where a distance of many miles separates people from the nearest industrial centre, and where the nearest industrial centre itself may happen to have already more than enough applicants for all available jobs, it becomes very hard to place workers who are laid off temporarily or permanently, and who have absolutely no hope

* One of the subjects taken up at a panel discussion of the convention was "How Best to Serve Outlying Areas."

of placement in the immediate locality where they have been working."

Mr. McKinnon drew attention to the function and place of trade union business agents in the employment sphere:

"While the workers are strongly back of a public employment service, many organized trades do not feel that they themselves should necessarily have their placement work handled through the employment office. The practice has developed in many lines for the business agent or other officer of a trade union to become a placement officer for the members of the union. This arrangement has worked out very satisfactorily in numbers of cases, both in so far as the employer and in so far as the employee is concerned; there is no reason why any attempt should be made to upset this arrangement which works very satisfactorily. I am sure that in these cases the trade unions would stoutly resist any effort to reduce their own placement activities which are a necessary part of the work of the trade union. However, in insisting upon this point, the trade unions are not at all inconsistent with their attitude of general support of a public employment service. If some trade unions make their own placements to the satisfaction of all concerned, they are relieving the taxpayer of having to do that amount of work at the public expense, but the general arguments in favour of a public employment service still holds good in other classes of employment, which are the majority, where placements through the trade union have not become established. The general principle that a free public employment service is the soundest system of placement in jobs is not weakened by the exception of trade union placements in some specialized classes of employment."

Emphasizing the necessity of strict neutrality on the part of the employment service during a strike situation, the speaker paid tribute to the Employment Service of Canada in this respect:

"I think that the record of our public employment offices in Canada must have been very good in this respect, because we do not seem to have received complaints, and I am sure that we would have received them had there been any departure from a proper line of conduct."

The speaker considered that the new unemployment insurance system in the United States "would certainly seem to be the longest step forward in financial security for the workers which has yet been taken on the continent of North America."

He emphasized that in Canada "organized labour has made it definitely clear that the system of unemployment insurance which it thinks would best meet the needs of the Canadian people is a system wholly under Federal control, operated by the Dominion Government in the interests of all parts of the country," adding that "the present Dominion administration is trying to get the provinces to agree but so far without complete success."

In establishing a system of unemployment insurance, he considered that "the public employment service would have to be the agency to carry out administration." In conclusion, Mr. MacKinnon stated:

"Considering unemployment insurance as a probability of the future, expansion of the public employment service must come. But even apart from unemployment insurance, I for one feel that the public employment service is a branch of government which should and will grow in importance and, consequently, in size. Changes in industrial organization which brought about the start of the employment service are continuing at a rapid rate. In Canada our industries are becoming more and more important, and I am sorry to have to add that the difficulties of the worker in securing a job seem to have increased since the War, particularly to have increased by comparison with pre-war days. Expansion of the public employment service is not a cure for unemployment, but it is of great assistance in aiding the workers to secure jobs—an assistance which should be given as widely as possible. For this reason I feel that the public employment service has a great future ahead of it, and while on the present occasion I do not speak as a direct representative of organized labour, nevertheless, as a working man myself, as a trade unionist, as a representative of a working class riding in Parliament, and as one who has observed the problems of the workers and their own efforts to solve them, I know there is no doubt that the trade unions will be solidly back of any program for the necessary expansion of public employment office work."

Viewpoint of Employers

In presenting the employer's viewpoint on how the public employment office can be of the greatest service and assistance to an employer, Mr. Edward J. Harding, managing director of the Associated General Contractors of America, made it clear that he was discussing the subject from the standpoint of employers in the construction industry.

Indicating the background of the Associated General Contractors of America, Mr. Harding stated that it is composed of 2,500 of the nation's leading contracting firms whose numbers regularly handle more than 60 per cent of all construction work—building, highway, railroad, etc.—done by contract. He also explained that his observations "are in the nature of a composite of situations which have come to the attention of the Association in its service to its members."

Before drawing upon the experience of the Association, the speaker explained the type of service required by the construction industry because of its particular problems. He drew attention "to the fact that the product is usually sold before it is produced; that the contractor makes his price for the finished structure before it is commenced. The contractor therefore assumes responsibility for future happenings which will affect the cost of production. He has not only fixed the price but has guaranteed a date of completion.

Therefore in the execution of the contract he is working against time, changing economic conditions, the weather and a multitude of other possible contingencies."

Operating under these circumstances the construction employer often required immediate and specific assistance; and Mr. Harding amplified this factor as follows:

"When he needs additional help, he needs it quickly and this help must be of a specific kind. Therefore a considerable amount of information needs to be available concerning the applicant. Ordinarily a contractor whose work is confined to a particular class of work in a localized area, will be quite familiar with the availability of workmen of the various classes in that area. However, even in such circumstances there are many situations wherein the facilities of a public employment agency could be of great value to him. There is always the present possibility that he will obtain a contract calling for work somewhat different from that which he has customarily done and requiring workers with a particular line of experience. Again, workers are continually changing their place of residence and the employer would desire a service from which he could readily ascertain the whereabouts of particular workers whom he may desire to hire. It would also be of advantage to this type of employer to be able to ascertain quickly which workers might be available at a particular time . . .

"The Associated General Contractors recognize that the employer should be co-operative if the public employment service is to function to the greatest advantage. It therefore counsels its members to discuss their employment problems with the public employment service officials in the area and to anticipate their employment needs as much as possible and supply advance information to the employment service as to their needs.

"In order to be able to service a contracting firm to the best advantage it is necessary to have in considerable detail data of the workers' past experiences. Unlike some other industries the construction industry does not find sufficient merely a word or two classifying the capability of the applicant. Whereas 'Garage Mechanic —10 years experience' may tell a sufficient story for the operator of a garage, the words 'Carpenter—10 years experience' would not be sufficient in the construction industry. There is a wide variety of operations handled by carpenters and a given applicant might be an expert woodworker and experienced in interior trim but he might be entirely out of his element and all but useless for outside work where he would be required to work at a height on a scaffold. It becomes necessary therefore that there be considerable information as to the class of work that the worker has previously performed. Likewise, the physical condition of the applicant is of great importance. While handicapped workers may be able to turn out very excellent work at an acceptable rate of production, under certain conditions, there are other situations which require extreme agility or where the worker is exposed to unusual hazards. Even from the social standpoint, it is unfair to the applicant to expose him to a condition which is likely to endanger his own safety or health or the safety of others."

He considered that the ability of the public employment office to service construction employers "has been vastly improved because of duties in supplying workers on public construction."

Illustrating how important the public employment service has become to the construction industry in the United States the speaker quoted statistics for the calendar year 1937 which indicated that placements in the building industry constituted 31·8 per cent of the total of all placements made by public employment offices.

He considered it "would be a great service to *bona-fide* construction employers if they could be privileged to examine in detail the record cards in the employment office in order to determine the special qualifications of applicants."

In making this suggestion, the speaker recognized "that this is an important matter of policy and there is a continuing possibility that any general availability of information might result in uses other than the intended purposes."

With the establishment of proper safeguards, to protect such information from misuse, Mr. Harding recommended that "a means be provided whereby the *bona-fide* employer could establish himself as such and thereby become entitled to all available information likely to service a legitimate need. This would avoid many misunderstandings and disappointments to applicants who have been referred but are found unacceptable to the employer after having reported possibly at expense to themselves. It would also avoid dissatisfaction on the part of the employer with the service."

Mr. Harding then proceeded to deal with conditions prevailing in the United States under which the public employment service is utilized by construction employers—first, voluntarily; and second, under compulsion by reason of regulations which are attached to public contracts when emergency public funds are used to finance the project.

Dealing with labour difficulties, the speaker referred to the provisions of the Wagner-Peyser Act under which officers of the United States Employment Service are required to give notice, before referral of any existing strikes or lockouts; and also whereby it is the practice under the same Act to require the applicant for work to sign a form that he has been notified of a strike or lockout if in the determination of the unemployment service one exists. In this respect, Mr. Harding told of difficult situations of jurisdictional labour disputes in the handling of work, etc.—disputes to which the employer was not a party.

Mr. Harding declared that the public employment agencies of the United States "are now generally regarded as an integral part of our national life"; and that "they are steadily improving the service rendered and the officials

concerned are evidencing a continuing desire for further improvement."

In concluding his observations (applied chiefly to situations as encountered in the United States), Mr. Harding hoped that they would reflect to some degree "the needs of the Canadian construction employers" and thus prove helpful to those handling the public employment services in Canada.

He summarized the following principles as essential for a well-rounded service to meet the needs of the construction industry in the United States:

1. Full information regarding applicants.
2. Availability of full information to *bona-fide* employers.
3. Impartiality to both applicants and *bona-fide* employer.
4. Avoidance of involvement in labour difficulties.
5. Assistance in locating specified workmen.
6. Avoidance of referring applicants already employed.
7. Prompt service or admission of inability to meet specific requests.
8. Continuing co-operation with employer groups for the promotion of mutual understanding.

Convention and Meetings of Canadian Railway Shopmen

With an attendance of 160 delegates and 7 grand lodge officers, the 10th convention of Division No. 4, Railway Employees Department of the American Federation of Labour, was held in Vancouver during the week of May 9.

During the convention the delegates were addressed by Hon. G. S. Pearson, British Columbia, Minister of Labour; Mr. Percy R. Bengough, vice-president of the Trades and Labour Congress of Canada; His Worship, Mayor Millar of Vancouver; and by Mr. William Bartlett on behalf of the Vancouver railroad workers.

On a resolution submitted by the Canadian Pacific Joint Protective Board of the Brotherhood of Railway Carmen, the Division reiterated "its unalterable opposition to amalgamation, unification, pooling and further railway consolidations" and instructed its officers, in co-operation with such standard railroad labour organizations as are willing and ready to co-operate, to oppose any such merger to the limit, making use of the local machinery of the railway labour movement in every locality and directing the activities of these movements."

The Division was also insistent that the competition of highway and canal traffic be brought under regulation and control "similar to that now applied to steam railways."

Among other proposals, approved by the convention, were the following:—

Lowering of the qualifying age for old age pensions from 70 to 60 years, and of the retiring age for railway pensions to 60 years.

State manufacture of munitions of war and failing this, more rigid and effective state control, to the end that "private fortunes shall not be again massed through war contracts."

Abolition of the Canadian Senate and amendments to the British North America Act.

Establishment of a Canadian edition of the railroad workers' newspaper *Labor*.

Co-operation of all railroad labour organizations in an effort to have the pension schemes on Canadian railways made "at least equal" to those provided in the United States Railroad Retirement Act.

Full assistance to the railroad workers in the United States in their efforts to maintain existing wage rates.

Robert J. Tallon, president of the Division since its founding, was re-elected President. He is a member of the International Association of Machinists and secretary-treasurer of the Trades and Labour Congress of Canada. Thos. Broad, who became vice-president following the death of Frank McKenna, was re-elected vice-president. He is a member of the Brotherhood of Railway Carmen. The other executive officers are elected by the various craft unions which make up the Division. Fort William was chosen as the next convention city.

Prior to the convening of the Division convention, the Joint Protective Boards of the Brotherhood of Railway Carmen for the Canadian Pacific and Canadian National Railways and District Lodge No. 30 of the Brotherhoods of Boilermakers and Helpers held their regular meetings, while conferences of delegates representing the other unions were also held.

Other officers elected were:—

Canadian National Boards—Vice-chairman eastern lines, Henri Vallincourt of Montreal; vice-chairman western lines, Joseph Allen of Calgary; secretary-treasurer, William Chisholme of Toronto.

Canadian National Boards—Vice-chairman Atlantic region, David Chandler of Moncton; vice-chairman central region, Thomas Upton of Montreal; vice-chairman western lines, H. Davis of Prince Albert; secretary-treasurer, F. J. Cullum of Stratford.

At the conclusion of the Division convention, the System Federations for the Canadian Pacific and Canadian National met in regular session. These conventions reviewed matters submitted to them by the Division and internal affairs pertaining to their respective railways. Of special interest was the decision of the Canadian National System Federation to urge a minimum 40-hour week for its membership.

LABOUR AND INDUSTRY IN ONTARIO IN 1937

Eighteenth Report of the Provincial Department of Labour

THE eighteenth report of the Ontario Department of Labour reviewing its activities during the fiscal year ending March 31, 1937, has been received.

As usual, the report deals in detail with the administration of the following branches of the provincial Department of Labour; the Ontario Government offices of the Employment Service of Canada; Private Employment Agencies; Factory Inspection Branch; Board of Examiners of Operating Engineers; the Boiler Inspection Branch; Apprenticeship Board; the Minimum Wage Board; and the Industrial Standards Act.

Employment Conditions.—Reviewing industrial conditions in the Province, the Deputy Minister states that employment was in somewhat greater volume during the fiscal year ending March 31, 1937, all 13 divisions of industry, with the exception of construction sharing in the improved employment conditions. The most important gains were made in the mining industry, the index number of employment rising 32 points above that of the preceding year, the logging industry ranking second with an advance of 16 points. Manufacturing on the whole afforded greater employment, the chief gains being in the iron and steel industries, which play such an important part in the industrial composition of the Province, an advance of 15 points over the same time in the preceding year being recorded.

These gains, the report states, were offset to a certain extent by a decrease in the volume of employment in the construction industry, a decline of 20 points in the index number being registered. Private and commercial building, however, was in greater volume, the extent of which is indicated in an 8·7 per cent increase in the value of building permits issued for the year.

Employment Service.—A total of 119,120 placements were made by the Ontario Government offices of the Employment Service of Canada in the 27 centres operating in the Province during the fiscal year, 93 per cent of 128,041 vacancies reported being filled. The general improvement in conditions throughout the Province resulted in an increase in the number of placements which were made in private industry, business and agriculture, with the result that nearly 58 per cent of the placements were for work of a regular nature, that is for work lasting at least two weeks, as compared with 50 per cent last year. Highway projects continued to give employment to large numbers of men, 50 per cent of whom were recruited from the relief lists of the locality. Placements of handicapped ex-service men totalled 1,801 during the fiscal year.

Private Employment Agencies.—During 1936-37 three licensed private employment agencies transacted business in the Province, 1,691 placements being reported to the department. Under the Employment Agencies Act one person was prosecuted and found guilty of operating a private employment agency without a licence, a fine of $300 and costs or one year's imprisonment being imposed.

Factory Inspection.—A marked increase in the activities of the "Composite Inspection Service" is recorded in the report of the Factory Inspection Branch of the department. While the number of factory inspections decreased during the year, the total number of inspections increased by 7,010, investigations under the Industrial Standards Act forming the major portion of this increase. "On numerous occasions," the report states, "the members of the staff were called upon to act as conciliators in connection with industrial disputes, and were successful in arranging settlements of what might have been prolonged strikes." A total of 29,254 inspections were made during the year, the distribution of the investigations being as follows: Factory inspections, 17,244; investigations for the Apprenticeship Branch, 1,613; for the Industrial Standards Branch, 7,499; for the Main Office, 694; and special investigations, 2,204.

There were 3,858 permits issued by the Branch, an increase of 849 over the preceding year. This was due largely to an increase of 206 in the number of overtime permits, 514 in the homeworkers' permits, and 107 permits to employees giving out homework and who were not formerly required to obtain permits.

During the year, the number of industrial accidents, both fatal and non-fatal was slightly higher than in the previous year; this is attributed to "the result of the re-employment of men who had been out of work for a long time and who were over-anxious to make good." Mention is made of the reduction in the number of cases of industrial diseases reported.

Referring to industrial building activities, the Chief Inspector states: "the amount of industrial building carried on during the fiscal year still appears to lag behind the improve-

ment generally conceded to have occurred during this period in other classes of building." The chief inspector notes, however, that a large number of buildings which have been unoccupied for some years have been renovated and are being used again for industrial purposes.

During the period reviewed, 232 complaints were received. Upon investigation 119 of these were upheld, 49 not upheld, 32 are pending investigation and 32 did not come within the jurisdiction of the Factory Inspection Branch. The greatest number of complaints were in connection with hours of labour, there being 61 in this classification; 30 were due to violations of the Minimum Wage Act, 18 as a result of violations of the Operating Engineers Act; fire protection, 13, etc.

Proceedings were taken against twelve firms by the Factory Inspection Branch, all of these cases dealing with hours of labour for youths, young girls and women, and one concerning hours of labour in bakeshops. Conviction was recorded in each case and fines amounting to $130 were imposed.

Hours of Labour.—During 1936-37 there were 339,544 employees in industries, mercantile establishments and office buildings covered by the Factory Inspection Branch. Of these 153,440 males and 75,095 females worked 45 hours per week; 25,677 males and 12,337 females worked 50 hours; 21,730 males and 8,179 females worked 54 hours; 2,013 males and 871 females worked 58 hours; while 14,598 males and 2,970 females worked 60 hours a week.

There were also 22,634 employees, male and female, working approximately 50 hours per week.

Boiler Inspection.—During the fiscal year 1937 there were 283 drawings and specifications surveyed by the Boiler Inspection Branch of the department and 522 first, 359 second and 493 final inspections were made of new pressure vessels. The number of inspections of used pressure vessels, including 257 annual inspections, totalled 1,041, with 249 final inspections. A total of 2,507 certificates were issued during the year, 221 more than in the preceding year, and the sum of $15,254.55 was transmitted to the Treasurer of Ontario, an increase of $1,720.41.

Operating Engineers.—The Board of Examiners of Operating Engineers reported that 16,272 certificates were issued to engineers and firemen. During the fiscal year, 1,644 examinations were held, of which 751 were in Toronto and 893 at outside centres. The net revenue of this branch amounted to $26,062.53 or an increase of $1,140.71 as compared with last year's total.

Industrial Disputes.—During the fiscal year 1937, there were 78 industrial disputes reported in Ontario, in which 13,251 workers were involved with a time-loss of 148,929 working days. The report states that this "is the greatest number of disputes in any year since 1921, although there were more persons involved in disputes in 1934 and there was a greater time-loss in 1934, 1923, 1922 and 1921 than in 1937."

More than half of the total time-loss occurred in the textile and clothing industry, in which there were 13 disputes recorded, involving 3,292 persons in a loss of 76,374 working days. The second greatest time-loss was in the logging industry, where 4 disputes involved 2,695 persons in a loss of 30,682 working days.

Of the 78 disputes, 24 were settled in favour of the workers, 20 in favour of the employers; 26 resulted in a compromise, 5 were partially successful or indefinite in their outcome, and 3 disputes were unterminated at the end of the fiscal year.

Apprenticeship Act.—During the year, there were 518 apprentices working under contract and registered in the Apprenticeship Branch of the department. This was an increase of 188 as compared with the previous year. The activity of this branch was greatly increased because of the work entailed in the organization and registration of the barbering and hairdressing trades which were brought within the scope of the Act.

Minimum Wages in Ontario in 1937

The seventeenth and final report of the Minimum Wage Board is also contained in the report of the department, the Minimum Wage Board being replaced by the Industry and Labour Board in accordance with new minimum wage legislation which received Royal Assent March 25, 1937.

"The provisions of the new Act," the report states, "are the same in many respects as those of the former legislation. The principal difference is that the new Act applies equally to male and female employees whereas the only provision in the Old Act affecting male employees was section 11 (6) under which any male who replaced a female employee could not be paid less than the prescribed minimum wage. . .

"The new Board is given greater powers and a wider scope of activity than the Minimum Wage Board and the membership has been increased from three to five so that representation may be given to employers and employees.

"The penalty for discharging or discriminating against an employee who gives testimony or sup-

plies information to the Board or who initiates or takes part in any proceeding had or taken for the purpose of assisting the Board to establish a minimum wage has been increased from a minimum fine of $10 to one of $50.

"The minimum fine for the underpayment of an employee remains at $25 but the minimum fine for a second offence is now $50 for each employee affected.

"Where correct time records are not kept by the employer it shall be presumed that the underpaid employee has been employed for the full working period and is entitled to the full weekly wage for the full period of employment."

Homework.—During the year the Board established piece-work rates for home workers. Increases in piece work rates were secured where it was shown that the home-workers could not earn the minimum wage rates fixed for factory workers.

Complaints.—During the twelve month period from April 1, 1936 to March 31, 1937, the report states that complaints were received by the Board from 677 persons, and many others were received by the office and inspectors which did not require special investigation.

Arrears of Wages.—The total amount of arrears of wages collected during the year from 427 employers for 796 female employees was $20,083.41.

Adjustments.—A constant check is made by the Board to ensure adequate enforcement of each minimum wage order and for this purpose wage sheets are collected annually and in some cases more frequently from approximately 20,000 employers of female workers in all parts of the province.

During the fiscal year reviewed, adjustments involving 1,121 employers and 1,993 employees were effected.

Permits.—There was a slight increase in the number of permits issued in the fiscal year authorizing wages lower than the specified minimum rates. "Such permits" the report explains, "are isued on signed application by both employer and employee where, because of age or disability the worker is unable to compete with normal persons." Permits are issued for one year or less, but renewals are granted without investigation in the case of workers over sixty years of age or where the disability is permanent and handicaps the employee in the work performed. Permits were issued to 29 firms during the fiscal year covering 49 employees; while 75 firms had permits in force at the end of the fiscal year covering 135 employees.

Prosecutions.—During the year, 39 prosecutions were undertaken by the Board; in 16 of these cases fines were levied. "The policy of the Board," the report states, "has been to demand immediate adjustments for the first violation of underpayment, to collect the full amount of arrears if adjustments are not immediately made and the law complied with in all respects after the first warning, and to prosecute where it is evident that violations are deliberate or warnings and adjustments have not had the desired effect. Occasionally, first offenders are prosecuted but only where there is ample evidence that the employer is aware of the law or where he refuses to make adjustments ordered by the Board."

Administrative Problems.—Referring to the administrative problems involved in the enforcement of Orders of the Board the report states:

"Increasing employment and the return of more prosperous conditions in industry have been reflected in a diminishing number of underpaid employees and a reduction in the amount of arrears collected. The improvement in administrative problems is not as marked as was to be expected, and despite the best efforts of the Board and the departmental inspectors, it is apparent that many employers are still ignorant of the provisions of The Minimum Wage Act and some continue to disregard the provisions of the orders, in spite of repeated warnings and the collection of arrears.

"Under improved economic conditions there is little excuse for underpayment of any female employee but during the past year the Board has continued to refrain from court action where satisfactory adjustments could be arranged with the approval of all parties concerned and where it was evident that such adjustments would result in future compliance with the law.

"Failure on the part of employers, particularly those in small establishments, to keep accurate, complete records of the time worked by each employee continues to be the chief obstacle to proper enforcement of the Act. The employees are frequently to blame for this condition because they resent punching a clock or signing a register on entering and leaving the premises. The Board knows of no other way in which accurate time records may be kept and, where memory is resorted to, or it is taken for granted that a daily schedule will be lived up to, it becomes impossible to establish the actual hours worked when complaints are investigated.

"Another difficulty facing the Board is the tendency on the part of employees to exaggerate their claims for arrears when making complaints. Seldom are all the facts given to the Board either by the employee concerned or by a third party through whom the complaint is received. The necessity for careful investigation handicaps the Board in its efforts to deal promptly with all complaints, particularly in small centres and isolated districts where the departmental inspectors do not regularly visit employers and where special trips are necessary. Whenever a specific, signed complaint is received a thorough investigation is made and

the complainant is notified in writing when the Board fails to find evidence of violation so that further particulars may be submitted.

"In some cases, where the Board is convinced that violations have occurred, action cannot be taken because of the impossibility of securing the necessary court evidence. Employees sometimes sign receipts for money they have not received or for larger amounts than they have actually been paid and it is not an infrequent occurrence to find records of hours which have been manipulated to conform with the wages paid, rather than being accurate records of the time employees were on duty. In most of such cases there has been collusion between the employer and the employee and the Board has been made aware of the violation only after the employee has been dismissed.

"So long as such practices continue it will be impossible for the Board to protect employees who are unwilling or afraid to reveal the facts during the period of employment. Because of such difficulties the Board is forced to make settlements out of court and to order adjustments rather than to institute court proceedings."

Industrial Standards Act.

During the fiscal year reviewed by the report, the Minimum Wage Board in co-operation with Advisory Committees appointed for each industry, continued to enforce the provisions of schedules of wages and hours under the Industrial Standards Act.

Reference is also made to the enactment of legislation providing for the administration of the Industrial Standards Act by the Industry and Labour Board, the transfer of administration being made in May, 1937, immediately following the appointment of the new Board (LABOUR GAZETTE, May, 1937, page 505, and June, 1937, page 598).

The report states that there were 39 schedules under the Industrial Standards Act in effect at the close of the fiscal year reviewed as compared with 35 at the close of the previous year. A large proportion of these schedules were renewals from the previous year but several represented the application of the Act in new zones. It is stated that the schedules for the men's and boys' clothing industry and the barbering trades represent the only industries added to the list during the fiscal year.

Public Inquiries.—The Board continued the practice of holding public inquiries where violations appeared to be widespread but the existing evidence of the nature of the offence did not warrant prosecution. These inquiries had the effect of spreading information regarding the purposes and benefits of the Act and of securing co-operation from some offenders who had violated certain provisions of the schedules in ignorance of the law.

Six inquiries of this nature were held during the past year.

Prosecutions.—Fifty informations were laid in court including 4 which were not disposed of by the end of the fiscal year. Convictions were secured in 23 cases, 6 were dismissed by the magistrates; and 17 were withdrawn for various reasons. The total amount of fines imposed where convictions were registered amounted to $261. In addition to the fines imposed, court orders were secured requiring the payment of arrears to underpaid employees amounting to $530.29 for the 13 employees employed by 6 employers. In one case arrears amounting to $79 were ordered to be paid to the Treasury of the Province because of evidence of collusion.

Collection of Arrears.—In addition to the arrears collected through court actions, a total of $7,289.87 was collected from 123 employers for 308 underpaid employees. This money was paid to the Board and transferred to the employees, and an additional sum of $184.24 was paid direct by employers to employees in cases where it was not deemed necessary to take official action or order arrears to be paid. The total amount of arrears collected was $8,092.40.

Trade Union Book List

"A Trade Union Library" is the title of a book list published recently by the Industrial Relations Section, Department of Economics and Social Institutions, Princeton University, Princeton, New Jersey.

The book list is a revised edition of one first issued in May, 1935, and it is stated that "many changes have been made in the light of rapid developments since that time." A large number of new publications have been added throughout the list, the sections on labour relations and social security legislation being much expanded. In addition a section on company industrial relations policies has been introduced "on account of the increasing recognition of the importance of such policies to all concerned in the improvement of effective group relations."

The list is compiled with a view to assisting trade union executives and members, as well as students of labour relations, in collecting a working library of the representative literature concerning the history of the American trade union movement.

ANNUAL REPORT OF SASKATCHEWAN BUREAU OF LABOUR AND PUBLIC WELFARE, 1937

THE third annual report of the Bureau of Labour and Public Welfare of Saskatchewan reviews the activities of that department during the year ending April 30, 1937. The report is the seventeenth since the Bureau of Labour and Industries was established and the third since the Bureau of Labour and Public Welfare was formed. (During the session of 1934-35, the Legislature of Saskatchewan enacted legislation whereby a Bureau of Labour and Public Welfare was organized to take over some of the administrative duties previously under the old Department of Railways, Labour and Industries—LABOUR GAZETTE, November, 1934, page 986).

The Bureau of Labour and Public Welfare in addition to matters relative to relief was responsible for the administration of the following Acts during the fiscal year reviewed by the report: The Factories Act; the Building Trades Protection Act; One Day's Rest in Seven Act; the Minimum Wage Act; the Employment Agencies Act; the Weekly Half-Holiday Act; the Workmen's Wage Act; the Two Platoon Act; and the Masters and Servants Act.

Fair Wages.—As pointed out in the report, the Commissioner of the Bureau is the Fair Wage officer of the provincial government and has authority to fix rates of wages and hours of labour on contracts let by the government for the construction of public works or in the carrying out of any other undertaking, the cost of which is borne wholly or in part by the government.

Included in the report is the schedule of wages and hours for government work in urban centres in 1937.

Strikes and Lockouts.—During the calendar year 1936, the report records that there was one industrial dispute in Saskatchewan, four employees being effected.

Factories Act.—During the year ending April 30, 1937, 230 inspections were made of industrial establishments coming under the provisions of the Saskatchewan Factories Act. These included inspections of 205 saw mills and 25 custom cordwood cutting saws. In many cases recommendations were made for the safety and health of employees.

Inspection work was also carried on during the year under the regulations governing the construction and operation of elevators.

One Day's Rest in Seven Act.—During the year an amendment was made to the One Day's Rest in Seven Act providing for exemption of hotels and restaurants when not more than two employees are employed in any classification of work. Provision was made, however, that where such exemption is applicable employees shall be entitled to two half-day holidays in every seven days.

Fourteen charges were laid during the year for infractions under this Act. In thirteen instances the employers were found guilty and fined; one case was appealed and the appeal was upheld on the ground that the employee was acting in the capacity of manager.

Employment Service.—The report of the Employment Service Branch indicated the volume of transactions for the year ended April 30, 1937 to be as follows: applicants 37,767; vacancies, 37,373; placements, 34,684. For the previous year the comparable statistics were: applicants, 37,027; vacancies, 35,978; placements, 33,201.

Farm Wages.—The average wage for farm work prevailing throughout the year was: (Winter) $5.00 plus Government bonus; (Spring) $10 to $25 per month; (harvest) $1.50 to $3.00 per day; (Fall) after threshing to freeze-up $10 to $20 per month. Wages for men working in the lumber camps averaged $13 per month.

Immigration.—A total of 525 immigrants were reported as coming to Saskatchewan in 1936. In the period 1931 to 1936 inclusive a total of 4,502 immigrants entered Saskatchewan the report states.

Farm Improvement and Employment Plan 1936-37.—On October 14, 1936, the Dominion and Provincial Governments entered into an agreement for the purpose of placing and maintaining in employment on farms during the period October 1, 1936 to March 31, 1937, individuals over the age of 16 years who were unemployed, and who would otherwise be in receipt of direct relief. This assistance was afforded to single men and women and those married couples who had no domicile. The Dominion Government agreed to assume 50 per cent of the cost, exclusive of the costs of administration. . .

Each person taking employment under the scheme was to receive $5 per month and a bonus of $2.50 per month if remaining in the same place of employment for the entire period.

The scheme was open to persons who were not under hire to an employer. The fact, however, that any person was receiving board

and lodging was not, in the absence of an agreement to the contrary, construed as being payment for services or as employment.

Statistics respecting the operation of the scheme show that during the fiscal year $1,023,351.16 was paid to 20,913 males, 4,850 females and 1,090 married couples. An amount of $621,811.76 was paid to 27,524 employers. Transportation costing $2,901.82 was made available to 2,162 males and 185 females. Clothing to the value of $4,662 was issued to 1,447 males and 108 females. Total net payments on account of these items amounted to $1,652,726.74.

The bonus of $2.50 per month was paid to 15,277 males, 5,109 females and 948 married couples and amounted to $287,373.20. The total number of man days worked by the people benefiting under the scheme was 4,214,824 man days.

Minimum Wage Act

During the period under review there were 1,373 general inspections under the Minimum Wage Act and 171 special investigations. The number of business places affected were 606, in which there were 2,009 experienced female employees and 676 inexperienced female employees, together with 3,187 experienced male employees and 355 inexperienced male employees. In addition to these, there were 471 females and 135 males employed on part time. During the year there were 99 overtime permits issued as follows; 30 to factories and 69 to retail stores.

By negotiating with employers the inspectors were successful in collecting $3,776.67 in back wages to the benefit of 100 women and 38 men.

In some cases, the report states, in order to bring about compliance with the Orders, it was necessary to lay informations. During the year there were 15 charges laid against six employers, one of which was withdrawn. In six instances the employer was found guilty and fined; two cases were dismissed by the magistrate; in six cases the employers were found guilty in the magistrate's court and on appeal to the District Court were dismissed.

The report also contains the full text of the five Orders of the Board, together with tabular statistics showing the number of women and men employed in the different cities of the province and the rates of wages paid. These statistics indicated that there were 220 firms in eight cities of the province employing a total of 1,564 females and 1,098 males. The largest number of these (641 males and 127 females) were in the $17 and over a week wage group.

LABOUR AND INDUSTRY IN NOVA SCOTIA IN 1937

Fourth Annual Report of Department of Labour

The fourth annual report of the Deputy Minister of Labour, Nova Scotia, for the fiscal year ending November 30, 1937, indicates continued improvement in employment conditions. The Nova Scotia Department of Labour was established under the Department of Labour Act (LABOUR GAZETTE, August, 1934, page 748) and included in the annual review are the reports of the Deputy Minister, the Minimum Wage Board, the Employment Service Offices, the Inspector of Factories and the Supervisor of Unemployment and Relief.

Unemployment and Relief.—The relief situation in the province is reviewed in the reports of the deputy minister and the provincial relief supervisor. Summarizing the relief situation the deputy minister states:

"The amounts paid by joint contract under Municipal-Provincial-Dominion agreements as direct unemployment relief shows a reduction of 28.5 per cent and the number on relief a reduction of 33 per cent, being the lowest amount since the first year of relief payments, 1930-31. Perhaps a better picture of true conditions may be gained from the fact that in the month of November, 1936, seventeen (17) municipalities paid $56,655.81, while in the month of November, 1937, this was reduced to seven (7) municipalities paying $22,842.89.

"Continued close attention to employment in mining districts has resulted through co-operation with the operators and unions in the placing in employment during the year of 1,143 men, so that the time is fast approaching when relief payments will altogether disappear in these sections. The necessity and desirability of maintaining local responsibility for care of necessitous persons in normal times has been demonstrated by the absence of disruption or distress in municipalities where relief was terminated during the year."

Apprenticeship Training.—Definite progress is reported in apprenticeship training with the establishment of the Mine Apprenticeship Project at Chester Basin, many young men already being placed in employment. Household training classes have been established in Sydney and Halifax, and surveys conducted in New Glasgow and Amherst, while a "large measure of success" is reported in the operation of a joint Municipal-Provincial experiment in a learnership program. It is also

reported that a committee appointed under the Nova Scotia Apprenticeship Act is formulating regulations for apprenticeship in the building trades.

Employment Service.—The annual report of the Nova Scotia Employment Offices of the Employment Service of Canada shows that placements were close to the five year average, and states that this "is a remarkable showing in view of a total absence, the first since 1932, of relief camp placements." A tabular summary gives a comparison of the number of vacancies, applications and placements during the years 1931 to 1936. In 1936 there were 10,618 vacancies reported to the Employment Offices, 12,373 applications for positions and 10,135 placements made.

Vacancies reported to all offices of the Service in Nova Scotia during the fiscal year ending November 30, 1937, totalled 14,118. There were 15,234 applications for positions made, and a total of 13,492 placements effected, of which 6,819 were in regular employment and 6,673 in casual work.

A table is also given showing the expenditures, placements and cost per placement in the various provinces for the year ending March 31, 1937. It is shown on this table that Manitoba had the lowest cost per placement at $1.02 with Nova Scotia second at $1.33. The highest cost per placement was that of Ontario at $1.70; however a total of 119,120 placements were made by offices in Ontario.

Factory Inspection and Industrial Standards Act.—The report of the factory inspector shows that accidents in the factories of the province for the year resulted in three fatalities, "the lowest number of fatalities in the manufacturing establishments in the twenty-nine years of factory inspection in the Province." It is recorded that sawmills producing the largest cut in years completed the year without a fatal accident for the first time in twenty-nine years.

A total of 412 inspections and re-inspections were made during the year.

Industrial Standards Act.—The Industrial Standards Act applying to the City of Halifax and the Town of Dartmouth, came into operation on September 12, 1936, the Act being made effective by the Minister of Labour approving a schedule of wages and hours of labour for four classes of mechanics in the building trades—carpenters, plumbers and steamfitters, electrical workers and bricklayers, these schedules coming into effect at the same time as the Act.

Four employers and nine workmen were summoned to court for violation of the Act during the year reviewed by the report. Fines and unpaid wages totalling $92.40 were turned over to the Provincial Treasurer.

Legislation.—The report refers to the passing of the Nova Scotia Apprenticeship Act during the 1937 session of the Nova Scotia Legislature. Under this legislation a committee has been appointed to conduct a survey of the building trades and draft regulations for apprenticeship in these trades.

The Trade Union Act was also passed in 1937. Under this Act the Department of Labour of Nova Scotia is authorized under certain conditions to conduct plebiscites to determine whether union dues should be checked off by the employer and paid to an official of the Union. Six such plebiscites have been held; five authorized check-off of dues and one refused such authorization. Two unions arranged such collection by mutual arrangement with the employer.

Report of the Minimum Wage Board

The seventh annual report of the Minimum Wage Board, covering the administration of the Act during the fiscal year ended November 30, 1937, is included in the report of the Department of Labour.

The report states that "during the past year no special attention can be drawn to any outstanding events with regard to the administration of the Board, but the nine orders covering the various occupations and industries have remained in force. These Orders cover all classes of industry under which female employees may find employment, with the exception of domestic and farm help.

"Some progress has been made during the past year in connection with standardizing wages by the fact that many Retail Clerks' Unions have been formed throughout the Province, which assists the Board in keeping wages at a reasonable level, and will also tend to educate the employees into the ideals of the Act.

"Unfortunately we have found that there are still some employers who disregard the Minimum Wage Laws and pay wages less than that stated on the Schedule as the legal Minimum. Sometimes we find that this is done through ignorance of the law, and the Board have in the past year endeavoured to place before such employers the knowledge that the law was instituted to protect the female employees from being exploited, that arrears for wages can be collected under the law by such employees, and it is therefore very essential that the Orders of the Board be carefully studied and applied.

"Apart from this it is gratifying to be able to record that the attitude of most of the employers is one of helpful co-operation. In very few exceptions are the Board forced to exercise the penalties provided under the Act."

Inspections were made by the Board throughout the Province. All complaints received by the Board were investigated and an amount of $903.75 in arrears of wages was collected.

FIRST ANNUAL REPORT OF NEW BRUNSWICK FAIR WAGE OFFICER, 1937

THE first report covering the work of the New Brunswick Fair Wage Officer and Board from the dates of their respective appointments to the end of the fiscal year terminating October 31, 1937, has been received.

The New Brunswick Fair Wage Act (LABOUR GAZETTE, November, 1936, page 994) provided for the appointment of a Fair Wage Officer under the Minister of Health and Labour with authority to hear complaints and conduct investigations for the purpose of ascertaining the wages, hours and conditions of labour prevailing in any trade. The Board of Commissioners of Public Utilities was, by the Act, given authority to establish fair rates of wages. In March, 1937, an amendment was passed creating a Fair Wage Board of five persons (LABOUR GAZETTE, August, 1937, page 895). In August, 1937, certain regulations were made by the Lieutenant-Governor-in-Council under the authority of the Act (LABOUR GAZETTE, September, 1937, page 991).

Industrial Complaints and Adjustments.—The Fair Wage Officer reports that complaints involving 1,007 employees were investigated and settled by him during the period under review. It is stated that a large number of other complaints were also heard; the above number of employees were involved in cases where a final settlement was reached between employers and employees. In addition, complaints involving 323 employees were submitted and finally dealt with by the Fair Wage Board. The total number of employees involved in complaints which were adjusted was 1,330.

Industrial Disputes.—The report states that strikes involving 2,215 employees were settled finally by the Board, and in addition, one strike involving 150 employees was settled without reference to the Board. One strike involving 1,200 employees remained unterminated at October 31, 1937.

Pay-Roll Examinations.—Prior to October 31, 1936, payrolls covering 5,463 employees were examined. For the year ending October 31, 1937, payrolls involving 10,492 employees were examined in order to facilitate the work of the Fair Wage Board.

General Statement.—Referring to the work of the Fair Wage Officer and Board in general, the report states that: "The maintenance and enforcement of fair labour conditions calls for minute inquiries in relation to many types of industry. The work involves numerous conferences with employers and employees. It requires close contact with workers, an intimate knowledge of local economic and business conditions and a minute examination of the accounting methods adopted by employers. Through action already taken substantial improvements in labour conditions throughout the Province have been brought about."

Forest Operations Commission—Investigations.—Operating under the Forest Operations Commission, the Fair Wage Officer carried on numerous investigations into working conditions and rates of wages in the lumbering industry, a steady improvement in wages in this particular field being reported.

In 1935, the report states that the wages of men engaged in forest operations was set by the Commission at $27 per month and board per individual operation. In 1936, the average wage was set at $31 per month with a $27 minimum wage. In 1937, the average wage for each operation was set at $40 per month with a $34 minimum.

In 1936, the minimum wage for stream driving was set at $2 per day with board while the rate of wage for booming and sorting was 20 cents per hour without board. In 1937, the rate of wage for stream driving was set at an average of $3 per day with board while the wage for booming and sorting was 28 cents per hour without board (when board was furnished the amount charged not to exceed 50 cents per day).

Complaints covering 29 operators and involving 142 workers were investigated by the Fair Wage Officer. In this connection, payrolls were audited for 11 operations in respect of which complaints involving 66 workers had been received, and compliance with the regulations was found. In addition, the Officer secured voluntary adjustments of complaints covering 14 operations involving 48 workers. Orders from the Commission were necessary to dispose of complaints concerning 3 operations and affecting 27 employees.

REPORT OF COMMITTEE ON HOLIDAYS WITH PAY IN GREAT BRITAIN

In March 1937, the Minister of Labour (Great Britain) appointed a committee under the chairmanship of Lord Amulree "to investigate the extent to which holidays with pay are given to employed workers and the possibility of extending the provision of such holidays by statutory enactment or otherwise and to make recommendations." The Committee invited evidence (in writing) from all persons and bodies interested in the subject. In the October 1937 issue of the Labour Gazette (page 1105) a review will be found of the evidence taken before the Committee at three of its early sittings. On page 370 of the April 1938 issue of the Labour Gazette reference is made to a report appearing in the British *Ministry of Labour Gazette* in which particulars were given concerning the payment of wages for annual holidays as provided in collective agreements between organizations of employers and workpeople in Great Britain.

The British *Ministry of Labour Gazette* for May contains a review of the Committee's unanimous report and recommendations. The following information has been extracted from that publication:—

The introduction to the report gives an account of the proceedings which have taken place in Parliament on the subject, the development of holidays with pay and holidays in general, and the position in other countries. In Part I the Committee make an examination of the available information with regard to the extent to which holidays with pay are given to employed workpeople, and estimate that some 7¾ millions, or a little over 40 per cent, of the total of the 18½ million persons in the employment field who are either manual workers, or non-manual workers not in receipt of more than £250 a year, are already provided with annual consecutive holidays with pay in some form.

In Part II of the report the Committee set out the arguments for and against legislation making it compulsory for all employers to provide holidays with pay and for and against a contributory scheme. Another question discussed in the report is, whether it should be permissible to take other paid employment during a paid holiday. The view is taken that employment in an occupation other than that in which a person normally earns his living might be permitted.

In Part III the Committee describe the nature of the problem as it emerges, and set out their conclusions. They state that they found little lack of understanding of the value of holidays with pay as a social measure, but the arguments directed against a statute rest upon considerations which are less obvious and less generally appreciated concerning industrial relations and collective bargaining. The differences in the terms and conditions of employment in various industries are so great that any attempt to apply at once to all industries and trades one uniform rule would be likely to produce serious difficulties. Flexibility is the keynote to success, and collective bargaining should be left to settle as wide a sphere of the matters at issue as can be arranged. Legislation in regard to holidays with pay would be intervention by Parliament in one particular item of remuneration; and whatever was momentarily achieved by statute would have to be re-determined in its financial aspect in the ordinary wage negotiations in individual industries, except in so far as it was possible for workpeople to enjoy a greater proportion of the earnings of individual industries and to the extent to which productivity as a whole was increasing. It is pointed out that the case for a general enactment, imposing holidays with pay at once, rests on its financial side primarily on the assumption that industry as a whole has more to give to workpeople than the amount at present received in wages. For a fortnight's holiday with pay extra remuneration might have to be available up to the extent of four per cent of the wages bill, but this extra charge would fall unequally owing to the great variation in wages costs in relation to costs of production in different industries.

Social Aspect of Holidays

Reference is made to the notion that holidays with pay should be regarded as a social matter; that it be removed from the sphere of wage negotiations and accepted as a right to which an employee is successfully entitled by being employed. The Committee agree that if this were accepted there would be less likelihood of friction, and that over the whole of industry the cost of providing a week's holiday with pay is relatively so small as to make it absorbable over a period under rising trade conditions, without industrial dislocation, if a period of re-adjustment were allowed. The acceptance of the principle would, however, involve a measure of sacrifice, varying according to different industries, by the parties in industry other than labour; and it is a question how far the conditions necessary for such a step exist. The Committee did not find any general acceptance of the principle

among employers, except in industries where the proportion of wages costs to total costs of production is small.

The Committee conclude that the time is opportune for more active steps to encourage the taking of holidays and that for the enjoyment of holidays it is necessary that money should be available to the employee *at the time of the holiday period.* In cases where payment for holidays is inherent in the wages at present agreed upon, although holidays with pay are not actually given, and those wages are not susceptible of increase, the problem is one of re-arranging the wage payments so that they are spread over the holiday period as well as the period of work. It is suggested that industry should be able largely to solve the question on a voluntary basis if allowed a probationary period. The Committee refer to the danger of hasty legislation and the possibility of industrial dislocation and reduced employment resulting from any action taken on this matter which would not leave industry the oportunity to adjust itself. They also point out that time should be available to organize holidays in a better manner than at present.

Recommendations

The recommendations of the Committee relate to employees covered by the compulsory State insurance schemes, and are as follows: They strongly recommend that, in industries where holidays with pay are not already provided, an annual holiday with pay consisting of at least as many days as there are in a working week should be established without undue delay as part of the terms of the contract of employment. Every possible effort should be made to deal with the matter by voluntary arrangement, and a probationary period of two to three years is proposed before the introduction of general legislation.

In industries where employment may be with many employers in the course of the year it may be necessary to introduce a card system so that the various employers can contribute to the employees' holiday. It is recommended that where such a scheme is agreed upon the cost of administration should be borne by the State and any legislation necessary to enable such schemes to operate should be introduced at an early date.

Trade Boards and Agricultural Wages Committees, and any other statutory bodies which may be set up for the regulation of minimum rates of wages, should be empowered to consider and determine whether the provision of a holiday with pay should be granted. Domestic staff in full time employment should be entitled to two weeks' holiday with pay where the service has been for a year or more in one household. Legislation for these matters should be introduced at an early date.

The Committee recommended that during the Parliamentary Session of 1940-41, legislation should be passed making provision for holidays with pay in industry generally. The precise nature of the legislation will depend upon the progress made by that date. In any such legislation the terms and conditions of holidays with pay should be left to the parties concerned; if necessary, arbitrators might be appointed by the parties concerned, or failing that, the Minister should refer the matter to a tribunal nominated by him. Any employer employing only one employee should not be subject to the general legislation. Nothing in any compulsory scheme should adversely affect any existing more favourable provisions for holidays with pay.

The Ministry of Labour should give every encouragement for the spreading over of holidays, and education authorities should try to arrange school holidays to fit in with industrial holidays. A branch of the Ministry of Labour should be set up to supervise the application and observance of the provisions of holidays with pay, to stimulate the "staggering" of holidays and to encourage the provision of better accommodation.

The Committee's report stated that it would aid the spreading of the holiday months if the date of the Easter bank holiday were to be fixed. The position would be eased if the Easter bank holiday were taken on the first or second Monday after the beginning of the Summer Time, or if the Easter Act, 1928, which sought to fix Easter as the first Sunday after the second Saturday in April, were to become operative.

REPORT OF BRITISH MINISTRY OF LABOUR FOR 1937

THE annual report of the British Ministry of Labour, outlining the work carried on during 1937, was published recently. As reviewed in the May issue of the British *Ministry of Labour Gazette,* its main sections deal respectively with employment, and unemployment insurance; training and instructional centres; and welfare schemes for the unemployed; industrial relations; work of the employment agencies; etc.

Employment.—In a general review of the state of employment during the year, it is

stated that the year 1937 repeated, in its three main features, the experience of 1936. There was a large expansion of the numbers available for employment; a large increase occurred in the numbers actually in employment, which reached the highest total yet recorded; and a considerable reduction took place in the average amount of unemployment. Excluding juveniles under 16 years of age, and persons insured under the agricultural scheme, the total number of insured persons in the industrial field reached a total of 13,400,000, an increase of 350,000 over the year 1936. The increase was particularly marked in the case of boys and girls aged 16-17. The average level of the numbers in employment during the year was considerably over half-a-million higher than in 1936. The average level of unemployment was over a quarter-million less than in 1936, and the average rate of unemployment fell from 12·9 per cent in 1936 to 10·6 per cent in 1937, this percentage being the lowest annual average recorded since 1929.

The Report gives separate figures relating to agricultural workers; a total of 663,000 persons aged 16-64 were insured under the agricultural unemployment insurance scheme, and their rate of unemployment, which averaged 4½ per cent, compared very favourably with that in other branches of industry.

The Special Areas shared in the general improvement in employment, accounting for 99,000 out of a total increase of 689,000 insured persons in employment between June, 1936, and June, 1937. At 31st December, 1937, the commitments of the Special Areas Commissioners were £13,644,000 in England and Wales, and £3,355,000 in Scotland.

The Work of the Exchanges as Employment Agencies.—The exchanges continued to experience difficulty in meeting the demands of employers for certain types of skilled workers owing to the lack of qualified applicants on the registers, but the proportion of employers' requirements which were met during the year diminished only slightly. The number of vacancies notified in 1937 was 3,140,024, an increase of 37,266 over the previous year, while the number of vacancies filled increased by 765 to 2,624,978. The latter total represents 83·6 per cent of the vacancies notified, compared with a corresponding percentage of 84·6 in 1936. The increases in the number of vacancies notified and filled were smaller than those in 1936, due mainly to the more regular employment conditions.

Training and Instructional Centres, and Welfare Schemes for the Unemployed.—The number of places available at Government Training Centres increased during the year from 6,255 to 7,603. Two new centres were opened at Southampton and Leeds. Four centres, with a total of over 2,000 places, were reserved for soldiers under the scheme, which came into force in November, for training serving soldiers during the last six months of their colour service. During the year 16,000 men were admitted to the centres, and, out of 10,761 men who completed training in 1937, 10,424 entered employment.

Twenty-four residential Instruction Centres were open at the end of 1937, with accommodation for 4,500 men; in addition 8 summer camps were held in 1937. Nearly 21,000 men were admitted to instructional courses at these centres (including camps) during the year.

Assistance by various other means was rendered in training unemployed workers, either by the provision of special courses (e.g., for hotel workers and domestic servants) or by grants to outside institutions engaged in such work. For the financial year 1937-38 a grant of £110,000 was made to the National Council of Social Service towards the cost of occupational courses for the unemployed provided by the Council.

Boys and Girls.—During the year there was an improvement in juvenile employment in practically all areas and an increase in the number of areas affected by a shortage of juvenile labour. Post-war changes in the birth rate caused a further rise of 91,000 in the estimated number of boys and girls aged 14-17 available for employment but in the 14-15 age group there was a decline of 56,000. The average monthly live register of unemployed juveniles under 18 years of age was 83,549 (40,105 boys and 43,444 girls), or 22,366 less than in 1936.

Unemployment Insurance and Unemployment Assistance.—In an appendix to the Report a list is given of the Regulations and Orders relating to Unemployment Insurance and of Acts and Rules relating to Unemployment Assistance passed or made during 1937.

During the year private gardeners numbering over 100,000 persons were brought within the scope of the agricultural scheme, and steps were taken which extended unemployment insurance to various additional classes under both schemes as from 4th April, 1938.

The "waiting period" for the receipt of benefit was reduced from 6 days to 3 days, and the provisions governing the grant of "additional days" to claimants with good employment records were made more generous, both alterations operating under the general scheme.

As regards the finance of the Unemployment Insurance Schemes, in 1937 the income on the general account was £64,967,000, being £740,000 less than 1936. The decrease was

due to the operation throughout the year of the reduced rates of contribution introduced in July, 1936, though the effect of this was offset by increases due to (1) growth of insured population, (2) decline in unemployment and (3) income from investments. Expenditure totalled £43,565,000 compared with £48,180,000 in 1936. The decrease is mainly due to the decline in unemployment. The receipts of the Agricultural Scheme totalled £1,878,000 and the expenditure £700,000. The report covers the first complete year for persons insured under the original agricultural scheme.

Industrial Relations (Conciliation and Arbitration).—The Report states that the continued improvement in the industrial position and the rising cost of living again stimulated widespread movements for higher wages and improved conditions of employment. Some of the negotiations tested the existing joint machinery to the full; but the considerable adjustments effected by agreement, and the few instances of breakdown, testified to the effectiveness of the constitutional methods of settlement based on agreements between employers' and workpeople's organizations.

In the retail distributive trades, joint committees, representing organizations of employers and workpeople, were set up to formulate proposals for regulation of wages and working conditions.

The question of legislation as a means of enforcing wage standards received considerable attention, as a result of the success of the experiment in the cotton manufacturing industry and of the Report of the Committee on the Regulation of Wages and Conditions in the Road Haulage Industry.

The Report reviews the position of industrial relations in 1937 with regard to holidays with pay, hours of work agreements, conditions in the baking trade, revised wages of cotton weavers, conditions in the road haulage industry, the fair wages clause in government contracts, courts of inquiry, the Railway Staff National Tribunal, Whitley Councils, the Industrial Court and the Civil Service Arbitration Tribunal.

The Industrial Court issued 20 awards during the year and the Civil Service Arbitration Tribunal, 15. In addition, six cases were referred by the Department to single arbitrators; and officers of the Department were directly associated with 66 conciliation settlements of disputes, of which 56 were industrial, and ten were cases under the Road Traffic Acts.

Elimination of "Redundant" Cotton Mills in Great Britain

The first annual report of the Spindles Board (Great Britain) established under the Cotton Spinning Industry Act, 1936, has been issued recently. The purpose for which this Board was appointed "was to purchase and to put out of use cotton spinning mills and machinery in order to reduce the redundancy existing in the spinning section of the cotton industry."

In carrying out this objective the Board was given no pre-emptive rights and all purchases were to be the result of voluntary negotiation. The method of procedure was explained in the Board's report as follows:

"To provide funds for the losses inevitable upon transactions of this kind and also for our general expenses we were required to impose a levy upon the owners of all cotton spinning mills in Great Britain coming within the Act and, as our purchases were to be concentrated within two (or three) years whereas the levy was to be spread over a period up to 15 years, we were given powers to borrow money by the issue of debenture stock, the whole of which was to be redeemed within the period during which levy could be imposed. To enable us to commence our operations forthwith and to borrow money before any levy could be collected or the proceeds of such levy be accurately estimated, the Government gave certain financial guarantees which enabled the Bankers Industrial Development Company Limited to obtain from a number of Banks an undertaking to lend to us up to two million pounds at a low rate of interest."

In its conclusions the Board expressed the necessity for elimination of idle mills as follows:

"The greater part of our purchases has consisted of stopped mills. We would point out that the scheme we have to administer is only one step towards putting the cotton spinning industry into a satisfactory condition and that should a point be reached at which the majority of mills now running can be operated at a profit the tendency would have been for some of the stopped mills to be restarted and, by a disproportionate increase in productive capacity, to weaken the market and to prevent concentration of production in a smaller number of units. As the industry advanced further along the road to prosperity the process of reopening more and more mills would have acted as a constant drag on its progress. If this was to be avoided it was necessary that idle mills should be cleared out of the way so that there should be no lurking menace left which might interfere with the progress of the industry's prosperity at a later stage.

SURVEY OF WORLD SOCIAL-ECONOMIC SITUATION

Annual Report of Director of International Labour Office

MR. Harold Butler, Director of the International Labour Office, has sent to all the Governments of States Members his annual Report to the Twenty-fourth Session of the International Labour Conference.

In it he notes, first of all, that the summer of the year 1937 "marked the summit of the 'boom of the thirties.'" The indices of world industrial production exceeded the figures for 1929, "whose fabulous prosperity had become a distant mirage." The decline in world unemployment, the increase in international trade and all other indices show a similar trend. That "the boom of the thirties" should have reached such considerable dimensions in spite of all the political obstacles in its way is "a remarkable testimony alike to the tenacious optimism of humanity and to the unfathomed possibilities of economic expansion which lie at its door."

This advance has not, however, been evenly distributed among the principal industrial countries: certain of them benefited considerably, while others hardly emerged from the shades of depression. Moreover, the boom itself had always led a suspect existence, because of the rôle played in it by the "mad race in armaments." It is impossible to estimate accurately how far the wave of industrial and commercial activity was due to the abnormal activity of war industries, as information is scanty. Mr. Butler adds:

"What is certain, however, is that genuine prosperity might have been more abundant and its prospects of endurance greater, had not an excessive portion of the national wealth of almost every country been diverted to war equipment."

The Director of the International Labour Office then shows that, in spite of all the national experiments, no matter how successful, a high standard of living cannot be realized by national effort alone.

"Peace as well as prosperity is dependent in large part on international trade. For countries with a large and rich territory at their disposal, trade with other nations is none the less necessary to maintain their standard of life or to raise it still further."

But, as the charts in the Report show, 1937 "was not a year of unalloyed prosperity." And "if the record were carried into the first few months of 1938 the turn in the economic tide would be still more clearly shown." Among the untoward developments which became evident in the spring and summer of last year, the Director notes, in certain countries: a decline on the stock exchanges; a rise in wholesale prices, involving an increase in the cost of living; and a fall in the prices of a number of raw materials, which had been forced to unduly high levels by speculation. Nevertheless, despite a sharp recession in industrial activity in the United States, and a marked reduction in its imports from other countries, the effects on the rest of the world have thus far been comparatively slight. Therefore, from a purely economic point of view, Mr. Butler believes that there would seem to be no obvious reason for pessimism.

Menace of War

However, at the end of this chapter of his Report, which he has headed "Prosperity regained—and lost?", he says that it would be foolish to regard the present situation with any kind of optimism.

"Indeed, by some readers of this Report, the cheerful passages describing the remarkable economic and social achievements of the past few years and the hopeful projects for a better future may be suspected of bitter irony. With war blazing in the Far East and in Spain, with Europe once more an armed camp, with the fear of war obsessing the public mind everywhere, all thoughts and plans of social progress may well seem more appropriate to some other planet. No secret of intense warlike preparations is made in a large number of countries. Progressively the whole national life and the activity of every individual is being subordinated to the requirements of the State in the event of conflict. Every country which feels itself menaced and insecure is perforce driven along the same road. Individual freedom and economic expansion are more and more cramped and distorted by the over-riding necessity of national preparedness. What was last year a darkening shadow now threatens to blot out the light from the whole earth. As will be seen in subsequent chapters, war is already invading the social field. It has already blocked some of the main avenues of advance, and may soon begin to sap the social edifice which this generation has raised. Should another general war break out, a total collapse is practically certain."

After his survey of the general situation, which affords ample evidence of the considerable degree of prosperity which has now been regained, the Director of the International Labour Office sums up the "social balance" of the past year, which gives a sense of positive achievement.

Improvement in Wages

"Judged by the first and most important test, the state of employment, there is no doubt that in most countries the industrial worker was in a far better position in 1937 than at any time since 1929. The index compiled by the International Labour Office for the world as a whole shows that unem-

ployment was just above the 1929 level." Except in Germany, the general increase of prosperity has brought with it a general improvement in wages. The development and the extension of social insurance are successfully continuing. Other signs of progress are found in the wider definitions of decent housing and nutrition for workers.

"If it were possible," says Mr. Butler, "to isolate social phenomena and to consider them in complete abstraction from the economic and political conditions by which they are largely determined, it would be possible to say that on the whole considerable strides have been made in the last few years. Unfortunately, under existing economic and political circumstances the advances made cannot be regarded as secure or permanent. Only when suitable political and economic conditions are restored can they be properly consolidated. For it cannot be too often repeated that without real economic prosperity no lasting social progress is possible and that without real peace between nations, economic prosperity is largely illusory and precarious."

Maintenance of Employment

In his analysis of employment, the director considered it reassuring that the discussion of measures to maintain the volume of employment in times of depression has continued to attract a great deal of attention. He also regarded as significant that, in spite of the high level of prosperity which the country now enjoys, the Government of Sweden has continued its systematic effort to frame plans for meeting the next depression . . . . In this respect, the director observes:

"In view of the success achieved by the Swedish Government in dealing with the last depression, this endeavour to prepare in good time for meeting any further recession is a matter of great general interest. So far, no other country has taken similar measures on a comprehensive scale, but it can hardly be denied that one of the principal lessons of the recent slump has been the value of public expenditure wisely applied as a means of reviving business activity. It is therefore particularly timely that the International Labour Organization should have made a first step towards establishing international co-operation in the matter of public works. In accordance with the recommendations and the resolution adopted by last year's Conference, the Governing Body has decided to set up an International Public Works Committee. Governments have now been consulted as to their willingness to participate in a preliminary meeting of the Committee and to supply information concerning public works in accordance with a uniform plan to be drawn up by the Committee. Favourable replies have already been received from South Africa, Belgium, Canada, Czechoslovakia, Egypt, Estonia, France, Great Britain, Luxemburg, Norway, Poland, Rumania, Sweden, Switzerland, the United States and Yugoslavia."

Progress of Unemployment Insurance

Dealing with the progress made in providing against the effects of future depressions, the director notes that "unemployment insurance continues to make steady headway in the world." He outlined this progress in various countries as follows:

"In the United States the Social Security program has reached the stage of practical fulfilment. Every State in the Union together with Alaska, Hawaii and the District of Columbia now has an unemployment compensation scheme in force. In Wisconsin payments had already begun in 1937. In 29 States benefit payments are due to commence during the present year and in 21 others they will commence in 1939. It must not be forgotten that to all intents and purposes the United States system consists of 51 separate schemes, many of them covering a territory as extensive as one of the larger European countries. The initial work of organization both in the Social Security Board at Washington and in the various States has been enormous, and the difficulties have not yet been fully overcome. But in spite of all the initial difficulties in its path this gigantic social enterprise is being steadily carried through to success.

"In South Africa an Act providing for unemployment insurance in certain industries came into force on January 1, 1938. In Australia the Commonwealth Government invited an expert from the British Ministry of Labour (Mr. G. H. Ince) to help them in preparing an unemployment insurance scheme for the Commonwealth. Negotiations have been taking place with respresentatives of the States with a view to putting his recommendations into effect. In Belgium Mr. Henri Fuss, Royal Commissioner for the Study of the Unemployment Problem, has presented two reports on the subject and has prepared a Bill which is now under consideration by the Government.

"In Canada the Dominion Government has proposed an amendment to the British North America Act which would bring unemployment insurance within Dominion jurisdiction and has asked the provinces for their observations on it. Six of the nine provinces agreed immediately, but three provinces—Alberta, New Brunswick and Quebec—have raised serious objections. In preparing its scheme the Dominion Government called upon the International Labour Office for assistance. Mr. D. C. Tait was accordingly sent to Canada and took part in the preparation of a Bill for submission to Parliament as soon as the constitutional question is settled.

"In Norway a Bill providing for compulsory unemployment insurance was presented to the Storting in March, 1937, but does not appear to have been adopted. In Great Britain the scope of the scheme has been slightly widened by bringing in groups of workers who had previously been excluded."

Hours of Labour

The important question of the reduction of hours of work is the subject of a special chapter in the Report of the Director of the International Labour Office. It is well known that the generalization of this reform is one of the chief items on the agenda of this year's International Labour Conference, which will have before it a particularly complete documentation on the question. Mr. Butler shows how the reduction of hours of work,

which began as an emergency measure to combat the disastrous social consequences of the slump, has now come to be regarded as the next phase in the evolution of social progress.

In actual fact, he remarks, there has not been as overwhelming a landslide towards the 40-hour week as there was towards the 48-hour week in 1919. Indeed, in 1937 the tendency was towards extending rather than curtailing the actual number of hours worked. Hours of work have been lengthened in countries actually at war and also in certain countries where armament or rearmament is being driven forward at high pressure. Thus "hours of work have been lengthened in two countries actually at war—Japan and Spain" . . . and longer hours have also been resorted to "in countries where preparedness for war now overshadows all other considerations."

The Director of the International Labour Office also shows the essential characteristics of the application of the 40-hour week in the countries which have adopted this measure, and pays particular attention to the "French experience."

The conclusion is clear from this survey that the tendency towards shorter hours continues, though checked through certain transitory circumstances. The problem remains, and its solution will be more urgent than ever when the armaments race inevitably slows down.

Progress of I. L. O.

In the next part of his Report, Mr. Butler deals more directly with the activity and progress of the International Labour Organization.

"It would be idle to deny," he writes, "that the developments of the past two years have caused a good deal of disaffection towards international political institutions among those of short sight and little faith. The reversion to purely nationalistic modes of thinking in the realm of politics might have been expected to produce a similar decline of international co-operation in the social and economic spheres. Yet it may be said with some confidence that despite the departure of Italy, regrettable though it be, there are no signs of weakening in the International Labour Organization. Its stock stands high. Its membership is as representative and powerful as it was five years ago. In every one of the five continents its reputation and its influence are as great now as then."

Re-Distribution of Economic Power

The Director of the International Labour Office draws attention to an important change in the history of the International Labour Organization which the events of the last five years clearly denote. This is, that it is more and more evident that there has been a redistribution of economic power in the world. Europe has lost part of its former economic preponderance to extra-European countries. This shifting balance of power has been progressively reflected in the constitution and activities of the International Labour Organization. Its centre of gravity is slowly being displaced. Mr. Butler stresses, in particular, the growing importance of the Far East from the industrial point of view and the new problems continually arising therefrom. Such developments open larger horizons to the Organization, and are calculated to quicken rather than slacken its rhythm. "A new period of intense and varied activity is opening out before the Organization," concludes Mr. Butler.

"Its purview is no longer confined to the technical problems of industrial regulation, which it inherited from the International Association for Labour Legislation. Its horizon embraces all those wider questions which are inherent in the vast problems of stabilizing employment and lifting the standard of life to more civilized levels everywhere. These problems are squarely attributed to the jurisdiction of the Organization by its Constitution. They are of the essence of its existence. In the future its work may not be cast in the same conventional moulds. Its Constitution may have to be adapted to meet new circumstances as they arise. Its centre of gravity will become more world-wide as time goes on. It may some day acquire the universality which it has never yet entirely achieved. But whatever its vicissitudes, its future is assured as long as civilization based on the economic dependence between nations and a common aspiration to improve the lot of the great masses of mankind endures."

"Discussion of Industrial Accidents and Diseases" is the title of a bulletin (No. 17) published by the United States Department of Labor, Division of Labor Standards. The bulletin constitutes a report of the proceedings of the 1937 convention of the International Association of Industrial Accident Boards and Commissions, and may be obtained from the Superintendent of Documents, Washington, D.C., the price being 25 cents per copy.

The United States Security Board has issued an *"Analysis of State Unemployment Compensation Laws"* as at January 1, 1937. The analysis contains only the most significant provisions of State Unemployment Compensation laws as interpreted by rules and regulations made by the State agencies administering them. It includes applicable provisions from other State labour laws, such as those dealing with public employment offices and the administration of labour legislation.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, APRIL, 1938

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on May 1 was 10,551, the employees on their payrolls numbering 1,024,702 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for April was 1,917, having an aggregate membership of 220,696 persons, 12·8 per cent of whom were without employment on May 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of May, 1938, As Reported by Employers

Data tabulated by the Dominion Bureau of Statistics from 10,551 firms showed a considerable increase in the employment they afforded at the beginning of May, their staffs aggregating 1,024,702 persons, or 23,500 more than in the preceding month. Reflecting this advance, the crude index, based on the 1926 average as 100, rose from 105·0 at April 1 to 107·4 at the date under review, when it was higher than at May 1 in any other year since 1930. The general expansion reported at the latest date was not so pronounced as that noted at the same date in 1937, but rather exceeded the average gain recorded at May 1 in the years since 1928, so that the index, when corrected for seasonal influences, rose slightly from 111·2 in the preceding month to 111·5 at the beginning of May.

The unadjusted indexes at May 1 in recent years are as follows:—1938, 107·4; 1937, 106·3; 1936, 99·5; 1935, 95·2; 1934, 92·0; 1933, 77·6; 1932, 87·5; 1931, 102·2; 1930, 111·4; 1929, 116·2; 1928, 106·8; and 1927, 101·8.

Manufacturing as a whole reported a small, contra-seasonal decline at the date under review, mainly in pulp and paper, textile, tobacco and iron and steel plants. On the other hand, the food, lumber, chemical, clay, glass and stone, oil refining, electric light and power, non-ferrous metal and some other divisions indicated decided improvement. Logging and coal-mining showed seasonal curtailment, that in the former being on a large scale. No general change occurred in communications, while services, trade, transportation and construction afforded considerably more employment, the gains exceeding the average at May 1 in earlier years of the record. The fact that the date of the enquiry fell at the week-end no doubt accounted for part of the substantial advance in trade.

A brief review of the situation at May 1, 1937, shows that the 10,089 firms then co- month. With the exception of logging and compared with 979,319 in the preceding month. With the ex ception of logging and coal-mining, practically all industrial groups had then reported substantial improvement.

Employment by Economic Areas.

Heightened activity was reported in each of the five economic areas, the gains since the preceding month ranging from 0·3 per cent in Ontario to 4·8 per cent in British Columbia. In Quebec, the level of employment was higher than at May 1 in any other year for which data are available; in the Maritime Provinces, Ontario and British Columbia, industrial activity was rather lower than at that date in 1937, but greater than at May 1 in any of the preceding six years, while the index for the Prairies was slightly below that at the beginning of May in 1937 or 1936, but higher than in 1932-1935.

Maritime Provinces.—Employment in the Maritime Provinces showed an advance which exceeded the average gain at May 1 in pre-

ceding years since 1920, but was smaller than that noted in the early spring of 1937. The index, at 107·3, was over three points lower than at May 1 of last year, but was higher than at the same date in the period 1931-1936. Seven hundred and sixty-two firms reported 78,210 employees, or 2,618 more than in their last return. Activity was curtailed in pulp and paper and iron and steel plants and in transportation and railway construction and maintenance, the losses in the last two being seasonal. On the other hand, fish-preserving and chemical factories, logging, trade, building and highway construction showed improvement.

food, beverage, chemical, iron and steel, non-ferrous metal and some other factories being largely offset by losses in the leather, pulp and paper, textile and tobacco divisions. Logging camps continued to release considerable numbers of men, and the mining of non-metallic minerals was also rather slacker. On the other hand, transportation, construction, services and trade afforded more employment, the gains in transportation and construction being pronounced. Employment was brisker than at the beginning of May of last year, when 2,409 firms had reported 292,764 employees, or 8,515 more than in the preceding month.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Quebec.—A favourable movement was indicated in Quebec, according to 2,540 employers of 314,201 men and women as against 299,732 in the preceding month; this increase of 14,469 was larger than that noted at May 1, 1937, also exceeding the average gain at the same date in the last seventeen years. Little change on the whole took place in manufacturing, additions to staffs in lumber,

Ontario.—The general trend was moderately upward in Ontario, but the indicated increase was decidedly less-than-average, according to the experience of the years since 1920. Curtailment was noted in manufacturing, logging and mining, while there were gains in transportation, construction and trade. In the manufacturing group, there was improvement in lumber, food, electric current, chemical,

clay, glass and stone and some other classes, but pulp and paper, textile, tobacco and iron and steel plants reported considerable declines. The working forces of the 4,645 co-operating establishments included 428,351 men and women, compared with 427,019 at April 1. Employment at May 1, 1937, had shown an advance of over two per cent and the index then, at 111·2, was slightly higher than at the latest date, when it stood at 109·9. The 4,466 employers from which information was tabulated for the same date in 1937 had reported a combined staff of 432,624.

Prairie Provinces.—Manufacturing, transportation, construction and trade showed heightened activity, the greatest additions being in railway construction; in the group of factory employment, a substantial part of the increase took place in the oil-refining, clay, glass and stone and food divisions. On the other hand, coal-mining and logging were seasonally slacker. Statements were compiled from 1,506 firms in the Prairie Provinces whose working forces rose from 113,630 persons at the beginning of April to 116,450 at May 1. This advance was not so pronounced as that recorded at the same date in 1937, and was also smaller than the average gain noted at the beginning of May in the years since 1920. The index, standing at 91·5, was slightly lower than that of 93·2 at the corresponding date of last year; statistics had then been received from 1,453 establishments with 118,731 employees.

British Columbia.—The situation in British Columbia showed improvement at the beginning of May, but this was on a scale below the average as indicated in the experience of the last seventeen years. The index stood at 102·8, compared with 103·4 at May 1, 1937; these indexes were higher than at the same date in other years since 1930. An aggregate payroll of 87,490 persons was reported by the 1,098 employers furnishing data, who had 85,229 on their staffs at April 1, 1938. Logging, mining, transportation, railway construction and maintenance, trade and

May 1	107·4	107·3	112·6	109·9	91·5	102·8
Relative Weight of Employment by Economic Areas as at May 1, 1938	100·0	7·6	30·7	41·8	11·4	8·5

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas, to the total number of all employees reported in Canada by the firms making returns at the date under review.

manufacturing showed improvement; within the last-named, the greatest gains took place in lumber factories. For May 1, 1937, 1,064 employers had reported 87,540 workers, as compared with 82,542 in the preceding month.

Table I gives index numbers by economic areas.

Employment by Cities

Improvement was shown in seven of the eight cities for which separate tabulations are made; firms in Quebec City, Montreal, Toronto, Ottawa, Hamilton, Winnipeg and Vancouver reported heightened activity, while no general change occurred in Windsor. The largest gains were in Montreal. A comparison with the figures for last year shows a higher level of employment in Montreal, Quebec and Vancouver, while in the remaining centres the situation at May 1, 1938, was not so favourable as at that date in 1937.

Montreal.—Manufacturing, transportation, construction, services and trade recorded advances in Montreal, those in the two groups first-named being extensive. Within the manufacturing division, considerable additions to staffs were made in food and iron and steel factories. The 1,459 co-operating employers reported 157,510 persons on their payrolls, compared with 151,567 at April 1. This increase exceeded the average gain at the beginning of May in preceding years for which statistics are available. The level of employment was higher than at May 1, 1937, when the general expansion indicated by 1,395 establishments had been somewhat more pronounced; they then employed 151,781 men and women.

Quebec.—Statements were tabulated from 179 firms with 13,887 employees, as against 13,428 at April 1. Most of the improvement took place in shipping and construction, but services and trade were also more active, while manufacturing on the whole was quieter. The increase involved rather fewer workers than that recorded at the corresponding date in 1937, when the index was, however, some six points lower. The 176 employers furnish-

Relative Weight of Employment by Cities as at May 1, 1938	15·4	1·4	13·0	1·3	3·3	2·0	3·8	3·3

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

59089—5½

ing data had then had 13,033 workers on their payrolls.

Toronto.—Transportation, construction and maintenance and trade reported increases in personnel in Toronto, while there was a falling-off in manufacturing; in this division, vegetable food, textile and iron and steel plants were slacker. According to information furnished by 1,581 concerns in Toronto, their staffs aggregated 132,737 persons, as compared with 132,323 at April 1. This increase was smaller than that indicated at May 1 of last year, and was also below the average gain at the same date in the sixteen previous years for which data for Toronto are available. Employment was in slightly less volume than at the beginning of May last year, when statistics had been received from 1,524 establishments employing 133,499 assistants, or 1,991 more than in the preceding month; the index then stood at 107·4, compared with 106·3 at the latest date.

Ottawa.—Construction, manufacturing and trade registered moderate improvement in Ottawa; 200 employers reported payrolls aggregating 13,581, compared with 13,362 in the preceding month. The general increase in this city was on a smaller scale than that noted at the beginning of May in 1937, and the index then stood at 106·6, compared with 103·0 at the date under review. For the former, 198 firms had made returns, showing staffs numbering 13,982, or 610 more than at April 1, 1937.

Hamilton.—A combined working force of 34,282 was employed by the 297 co-operating establishments, as against 33,755 at April 1. Manufacturing was brisker, and trade, transportation, construction and services also showed some improvement. Industrial activity in Hamilton was at a rather lower level than in the same month of last year; a greater advance had then been indicated by 290 employers, who reported 36,085 persons on their paylists.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES.

(AVERAGE CALENDAR YEAR 1926=100)

—	All Industries	Manf.	Log.	Min.	Comm.	Trans.	Constr.	Serv.	Trade
May 1, 1921	85·1	86·8	90·1	90·9	88·6	86·8	56·9	82·1	93·5
May 1, 1922	84·3	85·5	66·8	94·4	86·3	91·1	62·0	79·9	89·4
May 1, 1923	92·5	97·9	86·2	101·1	85·7	93·9	62·3	81·1	91·0

Relative Weight of Employment by Industries as at May 1, 1938	100·0	54·9	2·7	6·7	2·1	9·9	10·3	2·7	10·7

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Windsor.—No change on the whole took place in Windsor. Returns for May 1 were tabulated from 187 firms with 20,329 workers, compared with 20,331 in the preceding month. Additions to their payrolls had been recorded by the 177 industries reporting at May 1, 1937, when they employed 20,878 men and women. Employment was then at a rather higher level, the index standing at 152·9, as compared with 148·9 at the date under review.

Winnipeg.—Manufacturing, construction and trade showed heightened activity in Winnipeg, where the 490 co-operating employers had a staff of 39,353 persons, compared with 38,500 at April 1. Employment was in less volume than at the same date of last year, when a similar advance had been noted in the 481 establishments for which information had been furnished; their personnel had included 40,079 men and women.

Vancouver.—The number employed in manufacturing declined in Vancouver, the loss being mainly in lumber factories; trade and transportation were rather brisker, while other industries showed little general change. According to data received from 460 firms, they had an aggregate working force of 34,312 employees, compared with 33,891 at April 1. The index was fractionally higher than at the beginning of May, 1937, when a slightly smaller advance had been reported in the payrolls of the 442 co-operating business men, whose staffs had numbered 34,065.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—There was a slowing-up in activity in manufacturing at May 1, when 6,082 establishments reported a staff of 562,733 persons compared with 563,859 in the preceding month. The record for past years shows that factory employment has usually increased at May 1, so that the small recession

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	[1]Relative Weight	May 1 1938	April 1 1938	May 1 1937	May 1 1936	May 1 1935	May 1 1934

[1] For explanation of term "Relative Weight", see footnote to Table III.

at the latest date is contraseasonal in character, The crude index showed a slight falling-off from 110·8 at April 1 to 110·6 at the beginning of May, while the seasonally-adjusted index declined from 111·7 at the former to 109·8 at the latter date, when it was also lower than that of 113·0 at May 1, 1937.

The crude index numbers at May 1 in recent years are as follows: 1938, 110·6; 1937, 113·8; 1936, 102·7; 1935, 95·6; 1934, 90·2; 1933, 76·8; 1932, 85·8; 1931, 100·7; 1930, 112·4; 1929, 119·8; 1928, 109·0 and 1927, 103·9.

Considerable improvement was noted at May 1, 1938, in lumber, animal and vegetable food, beverage, chemical, clay, glass and stone, electric light and power, electrical apparatus, non-ferrous metal, mineral product and miscellaneous manufacturing plants. On the other hand, pulp and paper, textiles, tobacco and iron and steel showed decided curtailment. The losses in the textile and tobacco industries were seasonal, although they were larger than has been usual in the last seventeen years.

For May 1, 1937, information had been compiled from 5,894 manufacturing establishments, employing 577,413 persons, an increase of 15,242 over their April 1 payrolls. The most marked gains had then occurred in the lumber, iron and steel, textile, food and pulp and paper divisions.

Animal Products, Edible.—Increases in employment were noted in fish-preserving plants and dairies; the improvement was not so extensive as that reported at May 1, 1937, when the index was just over one point higher. Statements were tabulated from 308 firms in this group, employing 24,029 persons, or 627 more than at the beginning of April. There was expansion in four of the five economic areas, British Columbia being the exception; the largest gains were in the Maritime Provinces.

Fur and Fur Products.—The fur division showed heightened activity, according to the 64 co-operating manufacturers, who had 1,993 workers, compared with 1,926 at April 1; employment was not quite so active as at the same date of last year, when a larger increase had been indicated.

Leather and Products.—The leather industries showed some curtailment, according to 300 establishments with 22,193 employees, a reduction of 149 from their staffs in the preceding month. The loss, which occurred mainly in Quebec, compared unfavourably with the small gain noted at May 1, 1937; the index then was several points higher.

Lumber and Products.—Seasonal improvement on a moderate scale was recorded in this group, particularly in sawmills. Data were received from 891 employers of 41,183 men and women, as against 39,551 in the preceding month. There were general additions to staffs, those in Ontario and British Columbia being greatest. A much larger increase, on the whole, had been registered at May 1, 1937, and the index then was above its level at the beginning of May of the present year.

Plant Products, Edible.—The production of vegetable foods showed an advance, chiefly in sugar and syrup and fruit and vegetable canneries. The improvement was, on the whole, rather more pronounced than that indicated by the firms co-operating at May 1, 1937, when the index stood at 103·7, or a few points lower than that of 107·4 at the beginning of May this year. Statements were compiled from 503 plants, whose payrolls aggregated 32,532, as compared with 31,886 at April 1. The additions to staffs were made chiefly in Quebec and Ontario.

Pulp and Paper Products.—Curtailment was noted in these industries, in which employment was in smaller volume than at the same date in 1937, when improvement had been reported. The decrease at May 1, 1938, took place mainly in pulp and paper mills, but the paper products group was also rather quieter. The working forces of the 618 co-operating establishments aggregated 62,833, as against 64,294 in their last report. The largest losses were in New Brunswick, Quebec and Ontario.

Rubber Products.—Employment in rubber factories showed little general change at May 1, 1938, when the index was rather lower than at the beginning of May in 1937. Returns were tabulated from 52 manufacturers employing 12,555 workers, or practically the same number as at April 1, 1938.

Textile Products.—The trend of employment was generally downward in this group at the beginning of May, according to statistics from 1,136 manufacturers having 105,882 men and women on their payrolls, compared with 107,725 in the preceding month. Woollen, silk, knitting and garment and personal furnishing factories were slacker. The situation at the same date of last year had shown improvement over the month before; the May 1, 1937, index stood at 128·8, compared with 122·3 at the date under review.

Beverages.—Data were received from 140 plants in this group employing 8,584 persons, or 173 more than in the preceding month. This advance took place chiefly in Quebec. Activity was at a higher level than at the same date in 1937.

Tobacco.—Important seasonal curtailment was reported in tobacco factories at the first

of May; 46 establishments had a combined paylist of 8,327 workers, compared with 9,965 at April 1. Most of the loss occurred in Ontario. The index was fractionally lower than at the beginning of May of last year, when a smaller decline had been noted.

Chemicals and Allied Products.—Employment in chemical and allied products showed a further increase; this occurred mainly in Nova Scotia, New Brunswick, Quebec and Ontario. Information was compiled from 285 manufacturers, whose staffs included 18,591 employees, as against 17,981 in April. The gain approximated that of May 1 a year ago, when the index was many points lower.

Clay, Glass and Stone Products.—Building material factories in all provinces indicated seasonal improvement, but this resulted in the employment of a smaller number of additional workers than that reported at the beginning of May last year; the index was then some seven points higher. The 208 co-operating firms had 9,145 employees at May 1, 1938, as against 8,593 in the preceding month.

Electric Light and Power.—Improvement was recorded at the date under review in electric current plants, in which employment was brisker than in the spring of 1937. Statements were received from 98 companies employing 15,386 workers, an increase of 331 over their April 1 forces.

Electrical Apparatus.—Employment, on the whole, advanced moderately in electrical appliance works, according to data furnished by 126 establishments which had 18,528 employees. Larger additions to staffs had been registered at May 1, 1937, when the index was slightly higher.

Iron and Steel Products.—The rolling mill, machinery, automobile, agricultural implement and some other groups reported lowered activity at May 1, while the boiler, engine and tank, heating appliance and certain other industries were rather busier. The movement was upward in Quebec, but retrogressive in the Maritime Provinces and Ontario. Returns were tabulated from 882 manufacturers with 135,831 operatives, as compared with 137,583 in the preceding month. General improvement had been indicated at the beginning of May of last year, and the situation was then more favourable.

Non-Ferrous Metal Products.—Non-ferrous metal products showed heightened employment, according to statistics from 178 firms with a working force of 24,989 persons, or 235 more than at April 1. Most of the advance took place in the base metal industries. Expansion had also been recorded in this group in the same month in 1937, when the index number was several points lower.

Mineral Products.—Oil-refineries and other plants classed in this division reported increased activity; the gain in personnel was larger than that which occurred at May 1 of a year ago, when the index number was decidedly lower. Reports were received from 102 manufacturers, whose payrolls included 13,113 persons, as compared with 12,519 in the preceding month. The greatest gains were in Ontario and the Prairie Provinces.

Logging.

The seasonal losses indicated at May 1 were on a smaller scale than those reported at the same date in 1937, but exceeded the average for May 1 in the last seventeen years; increases in the Maritime Provinces and British Columbia were more than offset by reductions in the other provinces, those in Quebec being particularly large. The 383 co-operating firms employed 28,137 men, or 5,011 fewer than at April 1. The index, at 97·5 was some eleven points higher than at the beginning of May in 1937, and was also higher than at May 1 in most other years of the record.

Mining.

Coal.—Employment in coal-mining showed a seasonal contraction; this was smaller than that noted in the same month of last year, when the index was slightly lower than at May 1, 1938. Data were received from 103 operators with 23,188 employees, as compared with 24,087 in the preceding month. The decline took place mainly in the coal-fields in Alberta, but there were also losses in the Maritime Provinces.

Metallic Ores.—There was a moderate contraction in metallic ore mines, chiefly in Ontario. An aggregate working force of 37,390 persons was employed by the 209 co-operating firms, who had 37,558 in their last report. An advance had been indicated at the beginning of May a year ago, but activity then was not so great as at the date under review, when it reached the maximum recorded at May 1 in the years since 1920.

Non-metallic Minerals (other than Coal).—Employment in this group showed a seasonal gain· 102 employers enlarged their payrolls by 342 workers to 8,286 at the beginning of May. The index was lower than at May 1, 1937, when the indicated improvement had been on a larger scale.

Communications.

No change on the whole was noted in communications, in which the level of employment was practically the same as at the corresponding date of last year. The co-operating branches and companies reported

a combined personnel of 22,037 men and women, of whom 16,868 earned their livelihood on telephones.

Transportation.

Street Railways and Cartage.—Improvement was shown in local transportation at May 1, when the 252 firms from whom information was received, reported 25,766 employees, or 697 more than in the preceding month. The index was over three points lower than at the same date in 1937, although a smaller gain had then been noted. Ontario registered most of the advance recorded at May 1, 1938, but the tendency was generally favourable except in the Maritime Provinces.

Steam Railways.—Steam railway operation afforded less employment in the Maritime Provinces, while elsewhere heightened activity was shown. Statements were received from 99 employers in this division, whose payrolls increased from 57,417 persons at April 1 to 57,576 at the beginning of May. A much greater gain had been noted at May 1, 1937, when the index was between two and three points higher.

Shipping and Stevedoring.—A combined staff of 17,658 men, as compared with 11,969 in the preceding month, was reported by the 118 firms furnishing statistics in the water transportation group. This seasonal improvement exceeded that noted at the same date last year, and the index then was some seven points lower. Reductions in the Maritime Provinces were more than offset by increases in Quebec, Ontario and British Columbia.

Construction and Maintenance.

Building.—Employment in building construction showed seasonal expansion, and was slightly more active than at May 1, 1937. The working forces of the 774 co-operating contractors aggregated 19,276 persons, as against 18,072 at the beginning of April. The trend was favourable in all provinces except British Columbia.

Highway.—Work on roads and highways increased at the beginning of May; 16,841 men were taken on by the 384 employers making returns, who had 61,086 on their staffs. There were gains in four of the five economic areas. British Columbia being the exception. A much smaller advance had been recorded at the same date last year, when highway construction did not provide employment for so many men as in the spring of the present year.

Railway.—Thirty-nine companies and divisional superintendents in this group employed 24,764 workers, as against 23,026 in their last report. There were increases in Quebec and the Western Provinces, that in Alberta being most pronounced. Expansion involving many more workers had been noted at the beginning of May a year ago; the index number then was over three points higher than at the date under review.

Services.

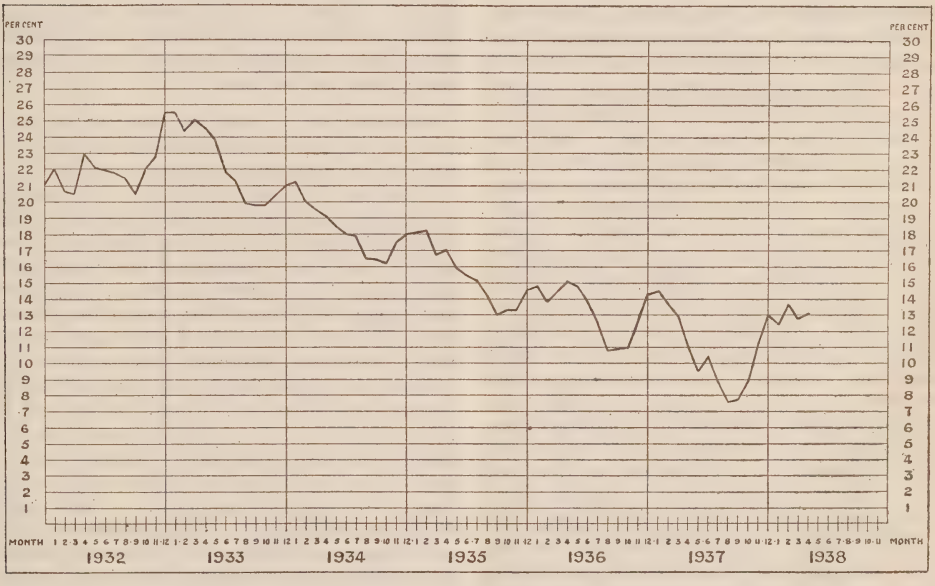
The service group showed considerably heightened activity, according to statements from 487 establishments employing 27,321 persons, as against 26,854 in their last report. Gains were made in laundries and dry-cleaning plants and in hotels and restaurants. Employment was brisker than at May 1 of 1937.

Trade.

Continued additions to personnel were shown in wholesale and retail trade; 1,434 trading establishments enlarged their forces by 3,569 persons to 109,484 at the date under review. The increase in the group as a whole exceeded the average for May 1 in the years, 1921-1937; this was probably due in part to the fact the date of the enquiry fell at the week-end. The index was higher than at the beginning of May in any other year of the record.

TABLES

The accompanying tables give index numbers of employment by economic areas, leading cities and industries. The column headed "relative weight," shows the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at May 1, 1938.



(2) Unemployment in Trade Unions at the close of April, 1938

The term unemployment, as used in the following report, has reference to involuntary idleness due to economic causes. Persons engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Unemployment at the close of April as manifest by the reports tabulated from 1,917

local trade unions involving membership of 220,696 persons showed a minor increase, the percentage of idleness standing at 13·1 as compared with a percentage of 12·8 in March. Retarded activity on a small scale was also apparent from April of last year when 11·1 per cent of the members reported were without work. Quietness in the garment trades, particularly in Ontario, was quite a contributing factor in the adverse tendency noted from March, and in coal mining also, less favourable conditions obtained. In Quebec, however, the manufacturing industries and building and construction trades combined in effecting a better employment level than in March, and in Manitoba and Nova Scotia some improvement was evident. The Alberta coal mines, however, were responsible for the noteworthy drop in activity reported in that province from March, while in New Brunswick the steam railway division and the iron and steel trades showed some falling off in work afforded. Curtailment of activity on a small scale was recorded from Saskatchewan and British Columbia. The Ontario recession was almost entirely due to between season dullness in the garment trades, a large number of trades and industries in this province, however, showing a better level of employment. When compared with the returns for April, 1937, Ontario and British Columbia unions registered the most pronounced declines in employment during the month under survey, due, to a great extent, in the former province to inactivity in the garment trades, while in the latter province the manufacturing industries, particularly the wood products division, were the dominant factors in the unfavourable situation noted, though in both of these provinces building and construction and transportation also showed some employment cessation. New Brunswick unions reflected moderate losses in activity, and in Manitoba, Saskatchewan and Alberta some lessening in the employment volume available was recorded. The improvement registered from Nova Scotia was rather noteworthy, the coal mines affording a considerably greater volume of work than in April, 1937, and in Quebec there was some slight gain.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

A separate compilation is made each month of unemployment affecting local trade union members in the largest city in each province, with the exception of Prince Edward Island. Losses in work accorded of noteworthy degree were reflected by Halifax members during April from the previous month, and in Toronto and Regina there was some falling off in employment. The situation in Saint John, Montreal and Winnipeg, however, was slightly better than in March, and in Edmonton and Vancouver an upward tendency was manifest though the variations were merely nominal. Compared with the returns for April last year, Vancouver members suffered pronounced curtailment in employment during the month reviewed and more moderate recessions were

evident in Halifax, Toronto and Regina. Winnipeg and Edmonton unions also showed retarded activity on a small scale. In Montreal, unemployment was maintained at exactly the same level as in April a year ago. Conditions in Saint John, however, were fractionally improved.

Accompanying this article is a chart which shows the trend of unemployment by months from January, 1932, to date. The projection of the curve during April was slightly upward from that of the previous month, an indication of a greater prevalence of unemployment. The course pursued by the curve was contrary to that of the corresponding month of last year when the tendency was in a downward direction, and at the close of the month reviewed the level attained was somewhat above that of April, 1937.

Some slowing up in industrial activity was reflected in the manufacturing industries during April from both the preceding month and April, 1937, unemployment standing at 13·9 per cent as compared with percentages of 11·4 in March and 10·6 in April, 1937. The percentage for the month under survey was based on the reports received from 534 labour organizations, with a total of 81,389 members, 11,281 of whom were idle on the last day of the month. Responsibility for the less-favourable conditions shown from March rested chiefly with the garment trades which suffered extensive seasonal recessions in activity, mainly in Ontario. Contributing declines of much lesser magnitude, however, occurred among wood, jewellery, textile and carpet, and cigar and tobacco workers, bakers and confectioners, papermakers, meat cutters and butchers, and metal polishers. On the contrary, employment for hat, cap and glove, leather and glass workers increased substantially from March, and general labourers showed noteworthy expansion. Gains of minor importance were apparent among iron and steel and brewery workers, and printing tradesmen. In contrast with the returns for April, 1937, garment workers, as in the previous comparison, showed curtailment of employment involving the greatest number of members, though noteworthy increases in slackness were apparent among woodworkers, bakers and confectioners, meat cutters and butchers, and metal polishers. The situation also declined for papermakers, iron and steel, textile and carpet, hat, cap and glove and leather workers. These recessions were, however, counteracted in part by the gains evident among fur, glass, brewery and jewellery workers, general labourers, printing tradesmen and cigar and tobacco workers.

Coal miners were quieter during April than in the previous month according to the returns received from 53 unions with an aggregate of 20,099 members. Of these, 2,690 were idle on the last day of the month, a percentage of 13·4 in comparison with 7·6 per cent of inactivity in March. A higher level of employment was, however, noted from April last year when 16·2 per cent of the members reported were without work. The Alberta mines were largely responsible for the drop in employment noted in coal mining as a whole from March, due in a number of cases to mine closings for the summer months, while in Nova Scotia activity was but nominally restricted. British Columbia members, however, showed a slight rise in available employment. Compared with the returns for April, 1937, a much better volume of work was afforded British Columbia miners during the month reviewed, and in Nova Scotia the gains recorded were noteworthy. Losses in employment on a small scale, however, were reported from Alberta. Short time work also, was prevalent among the miners during April.

Seasonal activity was apparent in the building and construction trades at the close of April to a noteworthy degree, the 221 associations making returns with a membership numbering 23,889 persons showing that 8,044, or a percentage of 33·7, were idle on the last day of the month contrasted with a percentage of 40·8 in March. Painters, decorators and paper hangers, and carpenters and joiners were decidedly busier than in March, and a much improved situation was manifest by bricklayers, masons and plasterers, and plumbers and steam fitters. Increases in activity of minor importance were evident among bridge and structural iron workers, electrical workers, and tile layers, lathers and roofers. Some falling off in employment, however, was registered by granite and stone cutters and the tendency was slightly less favourable among hod carriers and building labourers and steam shovelmen. The level of employment in the building and construction trades as a whole, however, was somewhat below that of April last year when 30·8 per cent of idleness was recorded, hod carriers and building labourers, steam shovelmen, and tile layers, lathers and roofers showing large percentage increases in unemployment. Bricklayers, masons and plasterers, and painters, decorators and paper hangers also suffered substantial losses in work afforded, and among electrical workers more moderate recessions occurred. Among carpenters and joiners the change from April a year ago was very slight though tending adversely. Granite and stone cutters, on the other hand, showed decided recovery from April a year ago, and the situation for plumbers and steam fitters was considerably improved. Increases

in activity on a much smaller scale were apparent among bridge and structural iron workers.

Conditions in the transportation industries were slightly better during April than in the preceding month, the 850 organizations from which reports were tabulated involving 65,110 members indicating that 5,345, or a percentage of 8·2, were idle on the last day of the month

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919	3·1	2·0	3·4	2·7	2·1	3·2	2·0	7·9	3·4

Feb., 1938	4·6	5·9	19·0	12·8	10·6	9·4	8·8	17·3	13·7
Mar., 1938	4·0	6·1	16·9	11·6	11·8	10·5	13·0	14·6	12·8
April, 1938	3·6	9·2	14·5	13·6	9·9	11·8	18·1	15·6	13·1

contrasted with 9·0 per cent in March. Curtailment of activity on a small scale, however, was manifest from April a year ago when unemployment stood at 6·6 per cent. The steam railway division, which included over 78 per cent of the entire group membership reported, showed a slight gain in employment from March, and was the determining factor in the improvement indicated in the transportation industries as a whole, though some slight advancement was apparent among teamsters and chauffeurs. In navigation, however, moderate declines in activity were evident, street and electric railway employees showing an unchanged situation from March. Navigation workers, however, reported a much higher level of employment than in April last year, and nominal gains were recorded by street and electric railway employees. This improvement, however, was more than offset by the recessions indicated in the steam railway division and among teamsters and chauffeurs.

Retail shop clerks were busily engaged during April as in both the previous month and April last year according to the reports received from 4 associations covering a membership of 1,595 persons.

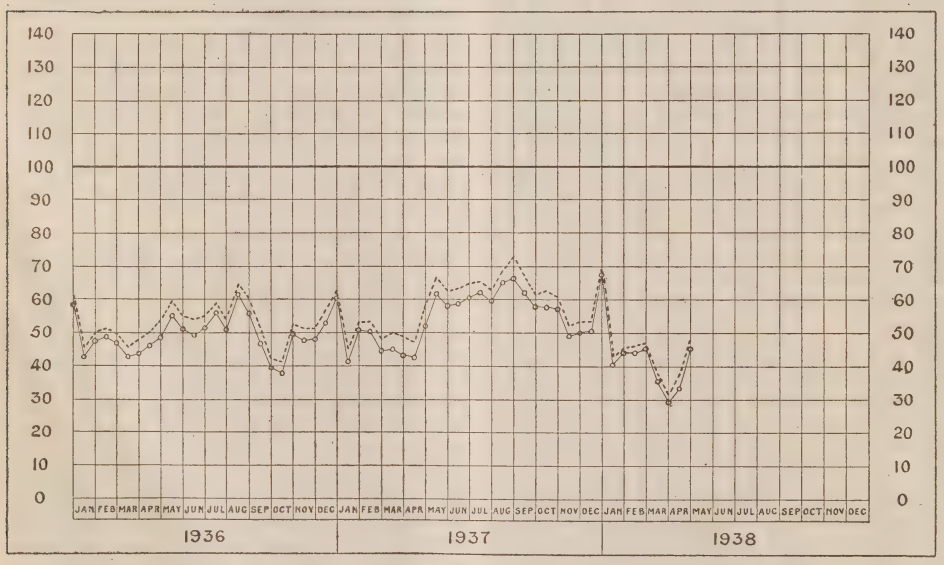
From civic employees 83 locals made returns during April with a total of 9,598 members, 83 of whom were idle on the last day of the month, a percentage of 0·9 compared with 1·3 per cent in March. The trend of activity was also more favourable than in April, 1937, when 1·6 per cent of the members reported were out of work.

In the miscellaneous group of trades fractional improvement only was reflected during April over the preceding month, unemployment standing at 7·4 per cent as compared with a percentage of 8·3 in March. The April percentage was based on the returns tabulated from 141 labour organizations with a membership aggregate of 10,864 persons, 803 of whom were without work on the last day of the month. Moderate increases in activity were reflected by unclassified workers from March, while gains of less than one per cent were noted among hotel and restaurant, and theatre and stage employees and stationary engineers and firemen. Barbers alone showed retarded employment on a small scale. The situation changed very slightly in the miscellaneous group of trades from April last year, though the tendency was favourable, the percentage of unemployment standing at 7·6. In this comparison, hotel and restaurant employees and stationary engineers and firemen showed an upward trend of activity during April this year, which was largely offset by the recessions evident among barbers, unclassified workers and theatre and stage employees.

The fishing industry continued to make impressive gains during April, 0·5 per cent of the members only being out of work as compared with a percentage of 16·3 in March. More favourable conditions also prevailed than in April last year when 3·2 per cent of unemployment was recorded. Making returns for April were 3 unions of fishermen with a total of 555 members.

The 590 members reported in the lumbering and logging industry at the close of April showed that 27 were out of work at the end of the month, a percentage of 4·6 in contrast with 4·3 per cent in March. Curtailment of activity on a small scale was also apparent from April, 1937, when 2·3 per cent of the members recorded were without employment.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1937, inclusive, and also the percentages of unemployment by provinces for April of each year from 1919 to 1935, inclusive, and for each month from April, 1936, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.



(3) Employment Office Reports for April, 1938

The volume of business transacted by the offices of the Employment Service of Canada during April, 1938, as indicated by the average daily placements effected, showed an increase of 14 per cent over that of the previous month, but a loss of over 8 per cent from April a year ago. Noteworthy gains over March were recorded in services and farming, augmented by others of minor proportions in mining and manufacturing, but these were largely offset by declines in construction and maintenance, logging, trade and transportation, the largest of which was in construction and maintenance. In comparison with April, 1937, decreases were reported in all industrial divisions, the most important being in logging, construction and maintenance, farming, manufacturing and services; the declines recorded in the remaining groups, transportation, trade and mining, being quite small.

The accompanying chart shows the trend of employment from January, 1936, to date, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for employment registered at the offices of the Service throughout Canada, computations being made semi-monthly. As may be seen from the graph, the curves of vacancies and placements in relation to applications followed a marked upward course throughout April, but at the close of the month the level of vacancies was nearly 10 points and that of placements over 6 points below the corre-

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ———— Vacancies - - - - - - - - - Placements o—o—o—o—o—o—o

sponding levels recorded at the end of the same month a year ago. The ratio of vacancies to each 100 applications was 38·0 and 48·2 during the first and the second half of April, respectively, in contrast with ratios of 47·0 and 58·1 during the corresponding periods of 1937. The ratios of placements to each 100 applications during the periods under review were 33·4 and 45·5, as compared with 42·5 and 51·9 during April, 1937.

The average number of vacancies reported daily to the offices of the Service throughout Canada was 1,045, as compared with 898 in the previous month and with 1,161 in April a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,444 as compared with 2,599 in March, 1938, and with 2,223 in April last year.

The average number of placements made daily by the offices of the Service during April, 1938, was 954, of which 627 were in regular employment and 327 in work of one week's duration or less, as compared with a total daily average of 837 during the preceding month. Placements in April last year averaged 1,042 daily, consisting of 701 placements in regular and 341 in casual employment.

During the month of April, 1938, offices of the Service referred 24,080 persons to vacancies and effected a total of 22,889 placements. Of these, the placements in regular employment were 15,036, of which 10,726 were of men and 4,310 of women, while placements in casual work totalled 7,853. The number of vacancies reported by employers was 14,454 for men and 10,618 for women, a total of 25,072, while applications for work numbered 58,638, of which 42,664 were from men and 15,974 from women. Reports for March, 1938, showed 24,243 positions available, 70,150 applications made and 22,595 placements effected, while in April, 1937, there were recorded 30,168 vacancies, 57,778 applications for work and 27,089 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1928, to date:—

Year	Placements		
	Regular	Casual	Totals
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938 (4 months)	65,149	30,929	96,078

Nova Scotia

During the month of April positions offered through Employment Offices in Nova Scotia were over 32 per cent higher than in the preceding month and over 18 per cent above the corresponding month of last year. There was an increase also in placements of 32 per cent when compared with March and of over 22 per cent in comparison with April 1937. The largest increases in placements over April of last year were in services, mining, farming and construction and maintenance, although gains were reported in all other groups except manufacturing and logging and in these the declines were small. Placements by industrial divisions included logging, 65; farming, 67; mining, 60; construction and maintenance, 299 and services, 625, of which 463 were of household workers. There were 242 men and 130 women placed in regular employment.

New Brunswick

There was an increase of over 2 per cent in the number of positions offered through Employment Offices in New Brunswick during April when compared with the preceding month and of nearly 18 per cent in comparison with the corresponding month of last year. Placements were nearly 3 per cent higher than in March and 19 per cent above April, 1937. There was a large increase in placements under construction and maintenance when compared with April of last year and a moderate loss in services. The changes in all other groups were nominal only. There were 230 placements under construction and maintenance and 666 in services; of the latter 524 were of household workers. During the month 48 men and 98 women were placed in regular employment.

Quebec

Opportunities for employment as indicated by orders received at Employment Offices in the Province of Quebec during April, were nearly 6 per cent higher than in both the preceding month and the corresponding month of last year. There was an increase also in placements of over one per cent when compared with March and of nearly 14 per cent in comparison with April, 1937. The increase in placements over April of last year was due to a substantial gain in construction and maintenance made up largely of placements on relief projects. The only other changes of importance were declines in manufacturing, logging and services. Placements by industrial divisions included manufacturing, 326; logging, 687; construction and maintenance, 2,952; trade, 100 and services, 2,418, of which 2,172 were of household workers.

*199 Placements effected by offices since closed.

Placements in regular employment numbered 4,065 of men and 1,415 of women.

ONTARIO

Orders received at Employment Offices in Ontario during April called for 11 per cent more workers than in the preceding month, but nearly 28 per cent less than during the corresponding month of last year. There was an increase of nearly 10 per cent in placements when compared with March, but a decrease of over 25 per cent in comparison with April, 1937. All industrial divisions participated in the declines in placements from April of last year, the most important decrease being in construction and maintenance followed by smaller losses in manufacturing, logging, services, farming and transportation. Industrial divisions in which most of the placements were effected during the month were manufacturing, 404; logging, 564; farming, 1,378; transportation, 103; construction and maintnenance, 1,090; trade, 231 and services, 3,803, of which 2,459 were of household workers. There were 3,266 men and 1,319 women placed in regular employment during the month.

MANITOBA

The demand for workers, as indicated by orders received at Employment Offices in Manitoba during April, was nearly 16 per cent less than in the preceding month and over 2 per cent below the corresponding month of last year. There was a decrease also in placements of over 16 per cent when compared with March and of nearly one per cent in comparison with April, 1937. There was a large increase in services when comparing placements for the month under review with April of last year, but this gain was almost entirely offset by declines in logging and farming. Losses were reported in all other groups, but they were quite small. Placements by industrial divisions included logging, 49; farming, 578; construction and maintenance, 79 and services, 811, of which 683 were of household workers. There were 712 men and 305 women placed in regular employment.

SASKATCHEWAN

Employment opportunities, as indicated by orders received at Employment Offices in Saskatchewan during April, were over 57 per cent better than in the preceding month, but nearly 36 per cent less favourable than during the corresponding month of last year. Placements were nearly 69 per cent higher than in March, but nearly 36 per cent lower than in April, 1937. Except for a nominal increase in transportation, there were fewer placements in all industrial divisions than during April of last year, the most important losses being in farming, services and construction and maintenance. There were 852 placements in farming and 590 in services; of the latter 489 were of household workers. Regular placements numbered 837 of men and 374 of women.

ALBERTA

Employment offices in Alberta were notified of over 31 per cent more vacancies in April than in the preceding month, but over 7 per cent less than during the corresponding month of last year. Placements were over 26 per cent higher than in March, but 12 per cent below April, 1937. With the exception of small increases in services and transportation, all industrial groups showed declines in placements when compared with April a year ago. None, however, was large, except the decrease in the highway division of construction and maintenance. Placements by industrial divisions included manufacturing, 61; farming, 835; transportation, 60; construction and maintenance, 271 and services, 652, of which 489 were of household workers. There were 1,004 men and 454 women placed in regular employment during the month.

BRITISH COLUMBIA

During April, positions offered through Employment Offices in British Columbia were over 48 per cent less than in the preceding month and 52 per cent below the corresponding month of last year. Slightly lower percentages of loss were reported in placements under both comparisons. All industrial divisions participated in the decrease in placements from April, 1937, the most important declines being in construction and maintenance, logging and services, with smaller losses in farming, mining, manufacturing and trade. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 50; logging, 58; farming, 126; construction and maintenance, 654 and services, 654, of which 456 were of household workers. During the month 552 men and 215 women were placed in regular employment.

Movement of Labour

During the month of April, 1938, the offices of the Employment Service of Canada made 15,036 placements in regular employment, 8,220 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 684 were granted the Employment Service reduced transportation rate, 569 going to centres within the same province as the despatching office and 115 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the

offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

Quebec transfers at the reduced rate during April were effected by the Hull office, which was instrumental in the despatch of 100 bushmen to Pembroke. Business transacted by Ontario offices during April included the issue of 440 certificates, all provincial. Receiving their certificates at Port Arthur 295 bush workers, 4 hotel employees, 3 sawmill labourers, 2 mine workers, one electrician and one construction labourer proceeded to various centres in the Port Arthur zone. For employment within their respective zones also, the Sudbury office transferred 105 bush workers and the Fort William office 20 bush workers, 2 construction workers and one bricklayer. Shipped from Peterborough one mining engineer went to Sudbury, while from Toronto one deckhand was destined to the Fort William zone. In addition, there was a labourer movement during April under the Dominion-Provincial Youth Training Plan of 3 forestry trainees and one miner for Northern Ontario points. In Manitoba 34 persons took advantage of the Employment Service reduced rate during April, 19 of whom journeyed to provincial situations and 15 outside the province. All of these were granted their certificates at the Winnipeg office. The transfers within the province were all to points in the Winnipeg zone and included 16 farm hands, one farm domestic, one miner and one gardener. Of the persons proceeding to other provinces the Port Arthur zone received 8 bush workers and 2 cooks; the Regina zone 3 farm hands and one farm domestic, and the Estevan zone one farm hand. Saskatchewan transfers at the reduced rate during April were 2 in number, the Saskatoon office assisting in the despatch of one farm hand within the territory covered by that office, and of one farm hand to Prince Albert. Offices in Alberta during April issued 104 certificates for reduced transportation, all to provincial centres. On certificates secured at Edmonton 44 steamship company employees, 17 farm hands, one farm domestic, 10 sawmill workers, 7 oil refinery workers, 6 hotel workers, 5 domestic workers, 4 mine employees, one store clerk and one labourer were conveyed to various sections of the Edmonton zone, and one farm hand each to the Calgary and Lethbridge zones. From Calgary 4 farm hands were transferred to employment within the same zone and one farm hand and one farm domestic to the Edmonton zone. Vouchers of transportation were issued in British Columbia during April to 4 persons going to employment at provincial centres. From Prince Rupert 2 mine workers and from Vancouver one housekeeper were carried to points within their respective zones, the New Westminster office despatching one miner to Kamloops.

Of the 684 persons who were granted certificates at the Employment Service reduced transportation rate during April, 301 were conveyed by the Canadian National Railways, 371 by the Canadian Pacific Railway, 9 by the Northern Alberta Railway and 3 by the Temiskaming and Northern Ontario Railway.

(4) Building Permits Issued in Canada During April, 1938

The Dominion Bureau of Statistics tabulated returns from 58 cities which granted permits for construction work valued at $4,879,867 during April, as compared with $3,556,567 in the preceding month, and $6,106,693 in the same month of last year. There was, therefore, an increase of $1,323,300 or 37.2 per cent as compared with March, but in the comparison with April, 1937, there was a decrease of $1,226,826, or 20·1 per cent.

The estimated value of the construction authorized in the first four months of the present year was $12,644,492; this was considerably lower than the aggregate of $16,634,685 reported in the period January-April, 1937, and was also less than in 1935, but was higher than in the same months of the years 1936, 1934 or 1933. The cumulative total for the first four months in each of the last seven years has been very much smaller than in any earlier year of the record. The wholesale prices of building materials have been rather lower in 1938 than in the same period of 1937, and were also below the average for the years, 1920-1937, but they were higher than in the first four months of the years, 1931-1936.

Some 50 cities furnished detailed statistics for April, 1938, showing that they had issued more than 555 permits for dwellings valued at approximately $1,800,000, and for over 2,500 other buildings, estimated to cost almost $3,000,000. In March, authority was given for the erection of about 375 dwellings and 1,700 other buildings, valued at approximately $1,110,000 and $2,200,000, respectively.

Prince Edward Island, New Brunswick, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia recorded increases in the value of the building represented by the permits issued during April as compared with the preceding month, the greatest gain of $856,188 or 557·7 per cent taking place in Alberta. In Nova Scotia and Quebec there were in this comparison declines of $27,779

or 15·1 per cent and $79,966, or 8·7 per cent, respectively.

As compared with April, 1937, there were increases in Prince Edward Island and Alberta, the latter showing the considerable gain of $751,170 or 290·5 per cent. In this comparison, the remaining provinces reported declines, of which those of $571,209 or 40·4 per cent in Quebec, and $1,073,570 or 39.5 per cent in Ontario were greatest.

Of the four largest cities, Montreal and Toronto registered decreases in the building authorized during April as compared with the preceding month, and also as compared with April, 1937. In Winnipeg and Vancouver, the value was higher than in March, 1938, but lower than in April of last year. Of the other centres, Charlottetown, New Glasgow, Fredericton, Quebec, Shawinigan Falls, Westmount, Galt, Niagara Falls, Oshawa, Ottawa, Peterborough, Stratford, St. Thomas, Sarnia, Welland, Riverside, Moose Jaw, Regina, Calgary, Edmonton and Prince Rupert reported increases in the value of the permits issued as compared with March, 1938, and also with April, 1937.

The following table gives the value of the building authorized by 58 cities during April and in the first four months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first four months of the same years are also given, (1926=100).

Year	Value of permits issued in April	Value of permits issued in first four months	Indexes of value of permits issued in first four months (1926=100)	Average indexes of wholesale prices of building materials in first four months (1926=100)

As already stated, the aggregate for the first four months of this year was decidedly lower than in the same period of 1937, and was also smaller than in 1935, but it exceeded the total for 1933, 1934 or 1936. The index numbers of wholesale prices of building materials in 1938 were lower than in the months January-April in 1937, but were rather higher than in preceding years since 1930.

The table on page 677 gives the value of the building permits issued by 58 cities during April and March, 1938, and April 1937. The 35 cities for which records are available since 1910 are marked thus "x".

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF MAY, 1938

Reports of the Superintendents of the Employment Service

THE employment situation at the end of May, 1938, was reported by the Superintendents of the Employment Service of Canada to be as follows:—

Farmers in the Maritime Provinces were busily engaged with ploughing and planting. In the West Pictou district 300 acres of peas were planted, an increase of nearly 100 acres over last year when an average of one ton of peas per acre was obtained. As an experiment, several acres of corn also were planted for canning purposes. The peak of the lobster fishing season had passed, with the catch somewhat below average in some localities, but halibut, salmon, herring, cod, mackerel, haddock, shad and gaspereaux were plentiful. Logging was confined chiefly to the cutting and peeling of pulpwood and mills were busy sawing lumber and barrel stock. Coal mines in the New Glasgow area operated from 2 to 5 days, while those in Cape Breton and vicinity worked from 4 to 6 days. Conditions, generally, were good in manufacturing, with no idleness reported from the iron and steel group. A number of new buildings were under way and a considerable amount of remodelling was being done. Highway maintenance and construction likewise continued. Transportation by rail, water and motor, both passenger and freight, was heavy. Trade, wholesale and retail, was rather dull. In the women's division experienced domestic help remained scarce.

Other than in the district around Montreal, there were few calls for farm help. Seasonal slackness also prevailed in logging. In many sections river driving was practically completed, this being due in some quarters to the shortage of water in the secondary streams, so that a great number of logs could not be driven to their destination. Mining was quiet, except at Sherbrooke, where increased employment in this industry was registered. Manufacturing centres reported as follows: Hull—matches paper and toy plants working at full capacity, dairies likewise busier; Montreal—metal and textile industries unchanged, clothing slacker, boots and shoes fairly active; Quebec—boots and shoes quiet; Sherbrooke—iron and steel plants showed decreased employment, but cotton, woollen and silk mills were busy; Three Rivers— all plants operating below their regular schedule; La Tuque—pulp mills on short time, but sash and door factories active; Matane—small industries operating at full capacity; Rouyn—some concerns on short time. In building construction improvement was noted, the chief progress being in the erection of private dwellings, as no public works program had yet been inaugurated. Construction of the St. Maurice power dam was suspended, owing to high waters, however, it was expected many men would find work there during the summer. Road construction continued. Navigation had opened and transportation by rail, water and motor was heavy. Trade showed a decline in some centres, due to the closing down of some local industries and the resulting unemployment. In the women's division a shortage of domestics was reported and an ever increasing demand for such help was recorded at the offices.

With seeding operations about completed in Ontario, the call for farm hands decreased, thus, transient and local help in most districts was sufficient to meet all extra casual demands, such as the blocking and hoeing of sugar beets, the gathering of strawberries and the planting of the tobacco crop. Pulp cutting was about the only activity in logging, but sawmills had opened and afforded employment to a number of men, most of whom had been former employees. Mines, except at Port Arthur, were quiet. Manufacturing remained practically unchanged, the majority of concerns running on short time and with reduced staffs, with no immediate prospect of improvement. Further curtailment of activity also occurred in the auto industry and several hundreds of men were laid off for an indefinite period. Highway construction was progressing favourably and building construction, although slow, was slightly better; a number of skilled tradesmen, however, was still unemployed. There was no demand for railway workers, a recession in rail traffic having necessitated a temporary lay-off of these employees, many of whom were in the

car repair and round house departments. In the women's division the call remained steady for all classes of day, house, hotel and restaurant workers and in many cases exceeded the supply of experienced applicants available.

Seeding in the Prairie Provinces was practically finished, with a consequent decline in farm placements. Crop conditions appeared more favourable, except in the Peace River district, where rain was badly needed. Mining was slack, outside of development work on the new mines at Rosedale, Sask. Logging, likewise was quiet, a handicap in this industry in the Edmonton zone being low water, which prevented logs reaching the mills. Manufacturing was practically unchanged and there were no calls for additional help. Building construction showed little activity, the majority of permits issued being for repairs and alterations. Little highway construction was under way, but some section hands were placed with the Canadian Pacific Railway Co. at Moose Jaw. Trade was fair. A number of requests was received for female domestic, though vacancies calling for household help on farms were somewhat difficult to fill. Experienced city help, too, was hard to procure.

Very few enquiries were listed for farm help in British Columbia and little orchard work was being carried on. Logging was slack and there was no demand for loggers or sawmill labourers. A continued dry spell was increasing the fire hazard and the lumber market was poor. Mining, likewise, was quiet, although much interest was being taken in the Mining Training scheme. Factories at Nelson were working full-time. Building construction was fairly active and painters and plumbers reported improvement, the Home Improvement Plan having given a decided impetus to the building and reconstruction of small homes. General repair work, also, was good. A number of men were requisitioned to fight forest fires in the vicinity of Prince George and some transients were taken off trains there for that purpose. Shipping and longshoring was good at New Westminster and Prince Rupert, but quiet at Vancouver. Shipyards were fairly busy at Prince Rupert and very active at Victoria. Trade was dull. A slight increase was recorded in hotel orders in the women's department, but all applicants were not suitable for the positions offered. Registrations also, were being received at Victoria for berry pickers.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, May 1938, summarized the employment situation as follows:—

Employment at April 4 showed little change, on the whole, as compared with March 14. There was an improvement between these two dates in the building industry. The tailoring trade, motor vehicle, cycle and aircraft manufacture, furniture manufacture, the distributive trades, hotel and boarding house service and agriculture. On the other hand employment declined in coal mining and in the iron and steel, cotton, hosiery, and textile bleaching, printing and dyeing industries.

It is estimated that at April 4, 1938, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,390,000. This was 10,000 more than at March 14, 1938. On a comparable basis there was a decrease of about 130,000 as compared with April 19, 1937.

Among persons, aged 16-64, insured under the general scheme of unemployment insurance (including the special schemes for the banking and insurance industries), the percentage unemployed in Great Britain and Northern Ireland at April 4, 1938, was 12·9, the same as at March 14, 1938. For persons aged 16-64 insured under the agricultural scheme the percentages were 5·7 at April 4, 1938, and 6·4 at March 14, 1938. For both schemes combined the percentage unemployed at April 4, 1938, was 12·5 as compared with 12·6 at March 14, 1938. On a comparable basis, there was an increase at April 4, 1938, as compared with April 19, 1937, of about 2·7 in the percentage unemployed among persons within the general scheme, and of about 2·5 among persons within the agricultural scheme. For the two schemes combined there was an increase of about 2·7 between these dates.

At April 4, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,321,061 wholly unemployed, 358,278 temporarily stopped, and 68,425 normally in casual employment, making a total of 1,747,764; this was 1,217 less than at March 14, 1938. On a comparable basis there was an increase of about 342,000 as compared with April 19, 1937.

The total of 1,747,764 persons on the registers at April 4, 1938, included 993,036 persons with claims admitted for insurance benefit, 545,792 with applications authorized for unemployment allowances, 54,615 persons with

applications for insurance benefit or unemployment allowances under consideration, and 154,321 other persons, of whom 31,598 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at April 4, 1938, was 1,842,115, as compared with 1,844,583 at March 14, 1938. On a comparable basis there was an increase at April 4, 1938, of about 366,000 as compared with April 19, 1937.

United States

According to a press release dated May 20 issued by Miss Frances Perkins, United States Secretary of Labor, there was a small seasonal increase of about 70,000 in employment in non-agricultural industries in April. Retail trade and construction activity increased seasonally, offsetting marked declines in factory and mining employment. Miss Perkins stated that "Ordinarily, about 400,000 employees are taken on during April as seasonal industrial activity increases."

The following paragraphs taken from the official press release indicate the employment situation in the United States was as follows:

Since April of last year there has been a reduction of more than 2,500,000 in the number of people on the pay-rolls of private industry and of public agencies engaged in regular government activities, exclusive of WPA and other Federal and State emergency projects. Since last autumn, when the marked decline in industrial activity began, it is estimated that approximately 3,000,000 people have been laid off.

Factory employment continued to decline in April, in contrast with the slight seasonal gains of recent years. The decline of 2·6 per cent since mid-March indicates the release of approximately 180,000 wage earners from their jobs. Weekly wage disbursements fell by 3·8 per cent, or about $5,600,000. As compared with last year at this time, the level of factory employment was down by 22 per cent and pay-rolls by 33 per cent. It is estimated that there were approximately 1,900,000 fewer wage earners in factories than in April, 1937, and that their weekly pay-rolls were $70,000,000 smaller.

The more pronounced decrease in pay-rolls than in employment from March to April reflected further curtailment in plant operating time in many industries, as well as the observance of Good Friday during the mid-month reporting pay period. A somewhat larger number of wage-rate reductions was reported than in previous months. Wage rates of more than 40,000 factory workers in 36 industries reporting to the Bureau of Labor Statistics were affected by rate reductions, chiefly in brass, shoe, and cotton factories.

Most manufacturing industries reduced their working forces. Of the 89 industries which regularly report to the Bureau of Labor Statistics, 71 had fewer employees in mid-April than in mid-March. As in earlier months, the durable goods industries as a group reported a larger decline in employment (3·2 per cent) than the non-durable goods industries (2·1 per cent). Considerable numbers of workers were laid off by the machinery industries, railroad repair shops, and steel and automobile plants, although pay-rolls in the steel and automobile plants were about the same as in mid-March. Reductions in employment in cotton textiles and in certain clothing industries were partly seasonal. Employment gains were reported by some of the building supply industries, such as brick and cement, and in the manufacture of foods.

Railroads laid off about 15,000 men, although employment usually increases in April. About 45,000 coal miners lost their jobs as demand for coal declined. Public utilities reported little change in employment.

Employment increased during the month in private building construction and in quarries. These gains, although smaller than usual for April, provided considerable additional employment. Employment also increased seasonally on Federal construction projects and on State road work.

The most important employment increase during the month was in retail trade, where approximately 160,000 workers were taken on to handle Easter and spring buying, which reached a peak in mid-April. This expansion in employment, amounting to nearly 11 per cent for stores selling general merchandise, was delayed this year because of the late date of Easter. Taking the spring season as a whole, the gain in retail employment has been somewhat smaller than usual. Wholesale firms continued to reduce their forces slightly.

Reports from the various states indicate quite general reduction in employment, which was most marked in important manufacturing states where heavy industry is concentrated. Preliminary reports show reductions of 4·4 per cent in Michigan, 2·4 per cent in Pennsylvania and Indiana, 1·9 per cent in Ohio, and about 1 per cent in Massachusetts and New Jersey. California reported an increase of 2·2 per cent as canneries and retail stores took on additional employees. In the District of Columbia, a gain in retail trade accounted largely for an employment expansion of 4·5 per cent in April.

As employment in private industry either declined or failed to show the customary seasonal increase in April, the federal works projects continued to take on more people. In the month of April as a whole, preliminary reports indicate an addition of 200,000 workers on projects operated by the Works Progress Administration, including projects of the National Youth Administration and Student Aid. Monthly pay-rolls of these agencies were $12,300,000 larger than in March.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government, supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for buildings and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract

for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

Works of Construction, Remodelling, Repair or Demolition

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

DEPARTMENT OF NATIONAL DEFENCE

Supply and laying of a 6-inch cast iron water main from water tanks to permanent huts at Valcartier, P.Q. Name of contractor, Mr. M. Lonergan, Quebec, P.Q. Date of contract, May 5, 1938. Amount of contract, $6,700.00. A fair wages schedule was inserted in the contract for the work of laying the main, as follows:—

	Per hour
Pipe layers (C. I. Pipe)	$0 55
Plumbers and steamfitters	0 65
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Drivers, team and wagon	0 65
Drivers	0 40
Labourers	0 40

Construction of a boat shelter at the R.C.A.F. Station at Dartmouth, N.S. Name of contractors, Fundy Construction Co., Ltd., Halifax, N.S. Date of contract, May 18, 1938. Amount of contract, $6,289.00. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Boatmen (rowboat)	0 40
Carpenters	0 60
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Driver, horse and cart	0 55
Driver	0 40
Electricians	0 80
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Pile driver engineer	0 65
Pile driver labourers	0 40
Pile driver firemen	0 45
Plumbers and steamfitters	0 75
Watchman	0 35

Construction of a barrack block at the Royal Canadian Air Force Station, Dartmouth, N.S. Name of contractors, Fundy Construction Co., Ltd., Halifax, N.S. Date of contract, May 13, 1938. Amount of contract, $145,812.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 45
Carpenters	0 60
Cement finisher	0 60
Cement and concrete mixer operator:	
Steam	0 65
Gas or Elec.	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Compressor Operators, gas. or elec.	0 50
Engineers, operating steam:	
Single or double drum	0 65
Engineers on steel erection	0 75
Firemen, stationary	0 45
Hoist Operators, gas. or elec.	0 50
Labourers	0 40
Machinists	0 70
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Painters and glaziers	0 55
Roofers, felt and gravel	0 45
Rodmen, reinforced steel	0 50
Sheet metal workers	0 70
Structural steel workers	0 75
Watchman	0 35

Completion of No. 11 married quarters at the R.C.A.F. Station, Rockcliffe, Ont. Name of contractor, Mr. Ovide Bouvier, Ottawa, Ont. Date of contract, May 25, 1938. Amount of contract, $4,728.00. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Carpenter	$0 85
Electricians	0 75
Labourers	0 45
Motor truck driver	0 50
Motor truck driver and truck:	
1 to 2 tons	1 45
Painters and glaziers	0 65
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 40

Construction of an addition to the single officers' quarters at the R.C.A.F. Station, Rockcliffe, Ontario. Name of contractors, Messrs. G. A. Crain and Sons, Ottawa, Ont. Date of contract, May 20, 1938. Amount of contract, $27,126.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 70
Blacksmiths	0 70
Blacksmiths' helpers	0 50
Brick and hollow tile layers	0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters	0 80
Cement and concrete mixer operator:	
Steam	0 70
Gas or electric	0 55
Compressor operators: gas. or electric	0 50
Cement finisher	0 60
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Drivers	0 45
Engineers, operating, steam: Single or double drum	0 70
Engineers, on steel erection	0 80
Electricians (inside wiremen)	0 75
Firemen, stationary	0 50
Hoist operators: gas. or electric	0 50
Labourers	0 45
Lathers, metal	0 70
Lathers, wood	0 65
Machinists	0 70
Motor truck driver	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
4 tons	2 50
5 tons	3 00
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 90
Roofers, felt and gravel	0 50
Rodmen, reinforced steel	0 50
Sheet metal workers	0 82
Shovel operators—gas	0 90
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Stonecutters	0 80
Structural steel workers	0 80
Tilesetters	0 90
Tilesetters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 40

Construction of Hangars Nos. 5 and 6 at the R.C.A.F. Station, Jericho Beach, Vancouver, B.C. Name of contractors, Northern Construction Company and J. W. Stewart Ltd., Vancouver, B.C. Date of contract, May 25, 1938. Amount of contract, $248,700.00. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 75
Blacksmiths	0 75
Blacksmiths' helpers	0 50
Brick and hollow tile layers	1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Compressor operators—gas. or electric	0 60
Carpenters	0 90
Cement finishers	0 90
Cement and concrete mixer operator—	
Steam	0 90
Gas or electric	0 60
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	1 00
Engineers, operating, steam—Single or double drum	0 90
Engineers on steel erection	1 12½
Electricians	1 00
Firemen, stationary	0 50
Hoist operators (gas. or electric)	0 60
Labourers	0 45
Lathers, metal	1 00
Lathers, wood	0 75

	Per hour
Machinists	0 75
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
4 tons	2 50
5 tons	3 00
Ornamental iron workers	1 00
Painters and glaziers	0 80
Plasterers	1 00
Plasterers' helpers (mixing and tempering material)	0 62½
Plumbers and steamfitters	1 00
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Pile driver foreman	1 25
Pile driver engineer	1 12½
Pile driver bridgemen	1 00
Pile driver men	1 00
Pile driver labourers	0 45
Pile driver fireman	0 68¾
Roofers, felt and gravel	0 50
Rodmen, reinforced steel	0 72½
Sheet metal workers	1 00
Shovel operators—gas	1 12½
Steam shovel engineers	1 12½
Steam shovel cranemen	0 90
Steam shovel firemen	0 74⅛
Stonecutters	1 00
Structural steel workers	1 12½
Tile setters, ornamental	1 12½
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 45

Installation of a new water main at the Citadel at Quebec, P.Q. Name of contractor, Mr. J. A. Auclair, Monument Giffard, P.Q. Date of contract, May 27, 1938. Amount of contract, approximately $7,600.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Pipe layers (C. I. Pipe)	$0 50
Plumbers and steamfitters	0 65
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Drivers, team and wagon	0 65
Drivers	0 40
Labourers	0 40

Construction of a gun-testing butt for the Royal Canadian Air Force, Calgary, Alta. Name of contractor, J. J. McCaffrey, Calgary, Alta. Date of contract, May 30, 1938. Amount of contract, $4,258.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 85
Blacksmiths	0 70
Blacksmiths' helpers	0 50
Carpenters and joiners	0 75
Cement and concrete mixer operator:	
Steam	0 65
Gas or electric	0 45
Cement finisher	0 60
Driver, horse and cart	0 60
Driver, team and wagon	0 75
Drivers	0 45
Electricians (inside wiremen)	0 90
Labourers	0 45

Sheet metal workers	0 80
Watchman	0 40

Construction of an addition to the Armoury at Rimouski, P.Q. Name of contractor, Mr. Alphonse Bellavance, Rimouski, P.Q. Date of contract, May 27, 1938. Amount of contract, $22,895.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 50
Blacksmiths' helpers	0 35
Carpenters	0 50
Cement-finisher	0 50
Cement and concrete mixer operator:	
Steam	0 55
Gas or electric	0 40
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Drivers	0 30
Compressor operators, gas. or electric	0 40
Engineers, operating steam—Single or double drum	0 55
Engineers on steel erection	0 75
Fireman—stationary	0 35
Hoist operators—gas. or electric	0 40
Labourers	0 30
Machinists	0 55
Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
5 tons	2 85
Painters and glaziers	0 50
Roofers, felt and gravel	0 35
Rodmen—reinforced steel	0 40
Sheet metal workers	0 55
Structural steel workers	0 75
Watchman	0 25

Construction of a Dormitory for single officers at the Royal Canadian Corps of Signals Depot, Barriefield, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, May 28, 1938. Amount of contract, $57,279.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 70
Blacksmiths	0 65
Brick and hollow tile layers	0 95
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters	0 80
Cement and concrete mixer operator:	
Steam	0 65
Gas or electric	0 50
Compressor operator—gas or electric	0 50
Cement finishers	0 95
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Engineers, operating steam—	
Single or double drum	0 65
Three or more drums	0 75
Electricians (inside wiremen)	0 75
Firemen—stationary	0 45
Hoist operators—gas. or electric	0 50

	Per hour
Engineers on steel erection	0 80
Labourers	0 40
Lathers, metal	0 70
Lathers, wood	0 70
Machinists	0 70
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Ornamental iron workers	0 60
Painters and glaziers	0 70
Plasterers	0 95
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 80
Roofers, felt and gravel	0 45
Rodmen—reinforced steel	0 50
Sheet metal workers	0 75
Shovel operators—gas	0 90
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Structural steel workers	0 80
Tilesetters—ornamental	0 95
Tilesetters' helpers (all men assigned to help tradesmen)	0 45
Welders on steel erection	0 80
Watchman	0 35

NATIONAL HARBOURS BOARD

Reconstruction of Market Slip bulkhead at Saint John, N.B. Name of contractors, the Stewart Construction Co., Ltd., Sherbrooke, P.Q. Date of contract, April 25, 1938. Amount of contract, $17,233.10. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Brick and hollow tile layers	0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Boatmen (rowboat)	0 40
Carpenters and joiners	0 60
Cement finishers	0 60
Cement and concrete mixer operators: gas or electric	0 50
Compressor operators: gas or electric	0 50
Drivers	0 40
Driver, team and wagon	0 75
Drill runners	0 50

Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
Ornamental iron workers	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 35
Painters and glaziers	0 50
Plumbers and steamfitters	0 55
Roofers, felt and gravel	0 35
Stonemasons	0 70
Stonemasons' helpers (mixing and tempering mortar)	0 35
Stonecutters	0 60
Structural steel workers	0 75
Sheet metal workers	0 55
Terrazzo layers	0 70
Terrazzo finishers and helpers	0 55
Terrazzo labourers	0 35
Welders on steel erection	0 75
Watchman	0 25

Construction of an Airport at North Bay, Ont. Name of contractors, Tomlinson Construction Co., Ltd., Toronto, Ont. Date of contract, May 19, 1938. Amount of contract, approximately $146,119. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 45
Blacksmiths	0 60
Blacksmiths' helpers	0 45
Carpenters	0 70
Compressor operators—gasoline or electric	0 50
Drag line operators—steam	0 90
Firemen	0 60
Oilers	0 50
Drivers	0 40
Driver, team and wagon	0 75
Drill runners	0 50
Labourers	0 40
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Powdermen	0 50
Road grader operators (horse-drawn)	0 45
Road grader operators (gasoline)	0 50
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Firemen	0 55
Shovel operators—gasoline	0 90
Tractor operators	0 50
Watchmen	0 35

Construction of runways, taxi strips and roads at the Airport at Kapuskasing, Ont. Name of contractors, McNamara Construction Co., Ltd., Toronto, Ont. Date of contract, May 27, 1938. Amount of contract, approximately $24,322.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt finishers	$0 50
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Compressor operators—gasoline or electric	0 45
Driver, team and wagon	0 65
Driver	0 35
Motor truck driver	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
5 tons	2 90
Road grader operator—horse-drawn	0 40
Road grader operator—horse drawn, including team	0 70
Road grader operator—gasoline	0 45
Power shovel operators—gasoline	0 90
Tractor operators	0 45
Power roller operators, steam and gasoline	0 65
Operators of bituminous penetration equipment	0 45
Labourers	0 35
Watchman	0 30

DEPARTMENT OF TRANSPORT

Erection of a power line at Airport, Porquis Junction, Ontario. Name of contractor, Mr. W. H. Durrell, New Liskeard, Ont. Date of contract, May 4, 1938. Amount of contract, $11,170. A fair wages schedule was included in the contract as follows:—

	Per hour
Labourers	$0 40
Linemen (power line erection)	0 80
Electricians	0 70
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Tractor drivers	0 50

Construction of an intermediate aerodrome at Earlton Junction, Ont. Name of contractors, Caswell Construction Co., Kirkland Lake, Ont. Date of contract, May 11, 1938. Amount of contract, approximately $48,674.35. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 40
Blacksmiths	0 55
Cement finishers	0 55
Drivers, team and wagon	0 65
Drivers	0 35
Labourers	0 35
Road grader operators (gasoline)	0 45
Shovel operators (gasoline)	0 90
Tractor operators	0 45
Road roller operators (steam)	0 65
Road roller operators (gasoline)	0 65

Erection of a Radio Range Station at North Bay, Ont. Name of contractor, Mr. J. H. Marceau, North Bay, Ont. Date of contract, May 19, 1938. Amount of contract, $13,700. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Concrete mixer operators (gasoline or electric)	0 50
Driver, team and wagon	0.75
Driver	0 40
Electricians	0 70

Construction and installation of interior fittings in the public building at Bobcaygeon, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, May 13, 1938. Amount of contract, $792.

Construction and installation of interior fittings in the public building at Havelock, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, May 13, 1938. Amount of contract, $717.

Construction and installation of interior fittings in the public building at Nipigon, Ont. Name of contractors, The Office Specialty Mfg. Co., Ltd. Date of contract, May 5, 1938. Amount of contract, $747.

Construction and installation of interior fittings in the public building at Trenton, N.S. Name of contractors, The Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, May 5, 1938. Amount of contract, $858.

SPECIAL CONTRACTS

Manufacture, Overhaul and Reconditioning of Aircraft

NOTE.—The labour conditions applicable to contracts under the above heading are identical with those for building and construction work, except that one scale of minimum wage rates has been approved for all works of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces) and another scale for all such works in Western Canada (Manitoba, Saskatchewan, Alberta and British Columbia). It is provided in these contracts that working hours shall not exceed 48 per week.

DEPARTMENT OF NATIONAL DEFENCE

Manufacture of Fleet aircraft spares. Name of contractors, Fleet Aircraft Ltd., Fort Erie, Ont. Date of contract, May 13, 1938. Amount of contract, $10,726.26. A fair wages schedule was included in the contract as follows:—

	Per hour
Engine assembly—	
Fitter (A.E.)	$0 60
Fitters' helper (A.E.)	0 40
Machinist	0 65
Machinist's helper	0 40
Machine operators	0 50
Sandblasters	0 55
Labourers	0 35
Air frame construction and assembly—	
Fitter (A.F.)	0 60
Fitter's helper (A.F.)	0 40
Machinist	0 65
Machinist's helper	0 40
Machine operator	0 50
Woodworker (joiner)	0 60
Woodworker's helper	0 40
Welder	0 60
Welder's helper	0 40
Electrician	0 65
Electrician's helper	0 40
Painter and doper	0 55
Painter and doper's helper	0 40
Fabric worker—female	0 40
Fabric worker's helper	0 30
Upholsterer	0 55
Upholsterer's helper	0 40
Sandblaster	0 55
Labourer	0 35
Erector	0 60
Erector's helper	0 40
Sheet metal worker	0 60
Sheet metal worker's helper	0 40
Riveters	0 50
Riveter's helpers	0 40

	Per hour
Apprentices to fitters, machinists, and sheet metal workers only—(16 to 21 years of age)—	
1st year	0 20
2nd year	0 25
3rd year	0 35

NOTE.—Only one helper to be employed to each journeyman.

No more than one apprentice to be employed to each five journeymen.

Manufacture of fabric spares for the upkeep and maintenance of Fleet aircraft. Name of contractors, Fleet Aircraft Ltd., Fort Erie, Ont. Date of contract, May 3, 1938. Amount of contract, $7,459.06. The preceding fair wages schedule was also included in this contract.

Additional work on four Northrop "Delta" aeroplanes. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, May 5, 1938. Amount of contract, $13,567.32. The preceding fair wages schedule was also included in this contract.

Manufacture of spare parts for Avro 626 aircraft. Name of contractors, Ottawa Car Manufacturing Co., Ltd., Ottawa. Date of contract, May 2, 1938. Amount of contract, $19,949. The preceding fair wages schedule was also included in this contract.

Manufacture of spare parts for Atlas aircraft. Name of contractors, The Ottawa Car Mfg. Co., Ltd. Ottawa, Ont. Date of contract, May 14, 1938. Amount of contract, $6,336.21. The preceding fair wages schedule was also included in this contract.

Manufacture of four Lysander II aircraft. Name of contractors, The National Steel Car Corporation Ltd., Hamilton, Ont. Date of contract, May 9, 1938. Amount of contract, cost-plus. The preceding fair wages schedule was also included in this contract.

Manufacture of twelve Lysander Mark II aircraft. Name of contractors, The National Steel Car Corporation Ltd., Hamilton, Ont. Date of contract, May 6, 1938. Amount of contract, $390,000. The preceding fair wages schedule was also included in this contract.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Textiles and Clothing

MONTREAL, ST. GREGOIRE DE MONTMORENCY, MAGOG, SHERBROOKE, DRUMMONDVILLE AND VALLEYFIELD, QUEBEC.—Dominion Textile Company, Limited, Drummondville Cotton Company, Montreal Cottons Limited and La Fédération Nationale Catholique du Textile, Inc., and the local National Catholic Unions of Textile Workers and representatives of the employees not affiliated with the union.

The agreements cover four mills at Montreal, one at St. Gregoire de Montmorency, two at Magog, one at Sherbrooke, one at Drummondville and two at Valleyfield.

Eleven separate agreements were made, all in effect from December 27, 1937, to run to September 3, 1938, unless terminated by prior notice on May 28, 1938. The agreements were so terminated May 28, 1938. The wages, hours, etc., however, have been continued in effect, until September 3, 1938, by an order of the provincial Fair Wage Board, outlined elsewhere in this issue.

The agreements had provided for joint plant committees and a central collective committee for all plants under the agreements, to deal with disputes, grievances, etc.

Construction: Building and Structures

WINNIPEG, MANITOBA.—General Contractors Section of the Winnipeg Builders Exchange and the Bricklayers and Masons International Union, No. 1, of Manitoba.

Agreement to be in effect from May 1, 1938, to April 30, 1939.

The foreman must be a union member.

Hours: 8 per day, 4 on Saturdays, a 44 hour week, to be worked between 8 a.m. and 5 p.m. from Monday to Friday and 8 a.m. to noon on Saturday. During the months of July and August, no work on Saturdays except necessary work. When more than one shift is worked in a day, these hours may be changed, and when consecutive shifts are worked, 7½ hours to constitute a day's work.

Overtime: Time and one half to 10 p.m.; after 10 p.m. and all work on Saturday afternoons, Sundays and four specified holidays, double time.

Wages for bricklayers and masons, $1.10 per hour. Foremen to be paid 10 cents per hour extra where three or more union members are employed.

Men hired in Winnipeg and sent from Winnipeg to jobs out of town to have their transportation paid to and from the job and 15 cents per hour extra.

The union not to allow its members to contract or sub-contract for an amount over $200 (material included) except in case of basements or chimneys.

Any dispute between the parties to be referred to a joint arbitration committee whose decision will be binding on both parties.

FORT WILLIAM, ONTARIO.—Canadian National Railways and their employees engaged in handling rail and water freight (Checkers and Coopers).

Schedule to be in effect from May 1, 1938, until either party gives 30 days' notice of change.

This agreement amends that made October 1, 1936 and summarized in the LABOUR GAZETTE, January, 1937, by amending the wage rates.

Hourly wage rates for day work: checkers and assistant stevedores 56 cents, sealers and coopers 51 cents, porters 49 cents, crane operators 74 cents. Hourly wages for night work: 2 cents per hour higher than for day work.

FORT WILLIAM, ONTARIO—Western Stevedore Company (Canadian Pacific Railway Company) and their employees engaged in handling rail and water freight (Checkers and Coopers).

Schedule to be in effect from May 1, 1938, until either party gives 30 days' notice of change.

This agreement amends that made October 1, 1936, and summarized in the LABOUR GAZETTE, January, 1937, by amending the wage rates:

Hourly wage rates for day work: stevedores 61 cents; checkers, sealers and assistant stevedores, 56 cents; coopers 51 cents; porters 49 cents; crane operators 74 cents.

Service: Recreational

Correction

VANCOUVER AND OTHER CENTRES IN BRITISH COLUMBIA.—Moving Picture Machine Operators.

The number of the Vancouver local of the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators was shown in the statement as to an agreement on page 577 of the LABOUR GAZETTE for May as 168, whereas the correct number is 348.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Bakers, Sherbrooke (amendment)
Shoe Workers, Province of Quebec (amendment)
Millinery Industry, Montreal (amendment)
Building Trades, Quebec
Plumbers and Tinsmiths, Three Rivers (amendment)
Building Trades, Sherbrooke, Drummondville
Building Trades, Joliette
Coal handlers, Montreal
Retail Store and Hotel Workers, Donnacona
Garage and Service Station Employees, Quebec
Garage and Service Station Employees, Montreal
Shoe Repairers, Montreal
Tavern Employees, Quebec
Barbers, Farnham, Cowansville, Bedford and Sweetsburg
Barbers and Hairdressers, Three Rivers (amendment)
Barbers and Hairdressers, Victoriaville (amendment)
Barbers and Hairdressers, Rouyn and Noranda (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are noted in an article to be found elsewhere in this issue.

ONTARIO

Hard Furniture Industry, Province of Ontario
Bricklayers and Stonemasons, Windsor
Plumbers and Steamfitters, Windsor
Building Labourers, Windsor
Carpenters, Windsor

SASKATCHEWAN

Painters, Regina

ALBERTA

Honey Producing Industry, Coaldale, Taber and Vauxhall zone
Bakers, Edmonton
Lathers, Edmonton

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May issue of the LABOUR GAZETTE, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification

of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published, and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette*. Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting building trades in the Quebec, Sherbrooke and Joliette districts, coal handlers at Montreal, retail store and hotel employees at Donnacona, garage and service station employees at Quebec and Montreal, shoe repairers at Montreal, tavern employees at Quebec and barbers at Farnham, Cowansville, Bedford and Sweetsburg; the amendment by Orders in Council of agreements affecting the shoe manufacturing industry throughout the province, the millinery industry in the Montreal district, building trades at Quebec, plumbers and tinsmith roofers at Three Rivers, barbers and hairdressers at Three Rivers, Victoriaville, Rouyn and Noranda; the cancellation by Order in Council of the agreement affecting bakers at Sherbrooke. Requests for the extension of new agreements were published in the following issues of the *Quebec Official Gazette:* barbers and men's hairdressers at Montreal in the issue of May 7; printing trades at Quebec, grocery and butcher shop employees at Sherbrooke in the issue of May 14; fur workers at Quebec, taxi drivers at Three Rivers, and cleaners and dyers at Montreal in the issue of May 21. Requests for amendments to Orders in Council already in effect were published in the following issues: longshoremen at Sorel and barbers and hairdressers at Rouyn and Noranda in the issue of May 7, barbers and hairdressers at Quebec in the issue of May 21. In addition, Orders in Council were published in the May 14 issue approving the constitution and by-laws of certain joint committees and of the requiring of competency certificates in certain trades which are also noted below.

Manufacturing: Vegetable Foods

Bakers, Sherbrooke.—An Order in Council, approved May 7, and published in the *Quebec Official Gazette,* May 14, repeals the Order in Council which made an agreement obligatory in the baking trade at Sherbrooke from February 15, 1935 (Labour Gazette, March, 1935, page 238)

Manufacturing: Boots and Shoes

Shoe Workers, Province of Quebec.—An Order in Council, dated April 27, and published in the *Quebec Official Gazette,* May 7, amends the previous Orders in Council for this industry (Labour Gazette, March, 1938, page 335) by correcting the names of the unions who are parties to the agreement to read "La Fédération Nationale du Cuir et de la Chaussure du Canada, Incorporée and the Boot and Shoe Workers Union," and by making certain minor changes in the classification of work.

Manufacturing: Textiles and Clothing

Millinery Industry, Montreal.—An Order in Council approved April 28 and published in the *Quebec Official Gazette,* May 7, corrects the previous Order in Council for this industry, which correction does not affect the summaries given in the Labour Gazette, August, 1935, page 732, March, 1936, page 275, and June, 1937, page 695.

Construction: Buildings and Structures

BUILDING TRADES, QUEBEC.—An Order in Council, approved May 6, and published in the *Quebec Official Gazette,* May 14, amends the previous Orders in Council for these trades (LABOUR GAZETTE, June, 1937, page 692, December, page 1387, and January, 1938, page 103) by giving the interpretation of the ten mile radius from the limits of the city of Quebec and Levis which comprised Zone I. The ten miles is interpreted to be the distance on the roads, and if only part of a municipality is within this ten mile limit, the whole municipality is considered to be in Zone III. This amendment was made retroactive to May 22, 1937.

BUILDING TRADES, QUEBEC.—An Order in Council, approved May 7 and published in the *Quebec Official Gazette,* May 14, makes obligatory the terms of a new agreement between L'Association des Constructeurs de Québec, Inc. (The Builders' Association of Quebec, Inc.) and Le Conseil des Métiers de la Construction des Syndicats Catholiques Nationaux de Québec (The Building Trades Council of the National Catholic Unions of Quebec, Incorporated) and the separate National Catholic Unions for the following trades: bricklayers and masons, plasterers, carpenters and joiners, painters, plumbers and electricians, tinsmith-roofers, stationary engineers, labourers.

The Order in Council is to be in effect from May 1, 1938, to April 30, 1939, and thereafter from year to year, subject to notice by either party to the agreement.

The territorial jurisdiction comprises the judicial districts of Quebec and the counties of Beauce, Dorchester, Megantic, Bellechasse, Montmagny, L'Islet, Kamouraska, Temiscouata, Rivière du Loup and Rimouski. This territory is divided into three zones: zone I comprises the city of Quebec, the town of Levis and the municipalities of Lauzon, Bienville, St. Romuald, Charny, St. David, Pintendre, Sillery, Ste. Foy, Cap Rouge, Ancienne Lorette, Loretteville, Charlesbourg, Charlesbourg West, Notre Dame des Laurentides, Quebec West, Petite Rivière, St. Michel Archange, Giffard, Beauport, Beauportville, St. Louis de Courville, St. Grégoire, Boischatel and l'Ange Gardien; zone II, the town of Thetford Mines and the municipality of Black Lake; zone III the remaining territorial jurisdiction.

Hours: 8 per day between 7 a.m. and 6 p.m., a 48-hour week. Where double shift system is in force, however, any 8 hours to constitute a day's work. (The 8-hour day and 48-hour week was provided for by an Order in Council under the Act respecting the limiting of working hours as noted in the LABOUR GAZETTE, July, 1936, page 609.)

Overtime: any work done outside the regular hours, to be paid at time and a half till midnight and double time from midnight to 7 a.m. No work on Sundays and holy days of obligation nor on two other holidays except in case of necessity, for which double time will be paid.

MINIMUM HOURLY WAGE RATES

Adjusters in ornamental iron and bronze	0 40	0 40	0 34
Helpers in ornamental iron and bronze	0 30	0 30	0 25

* If an employee who usually lives in zone I is hired for work in zone II or zone III, he must be paid the zone I rate; and in the cases of plumbers, electricians, tinsmith-roofers and painters, transportation and board to be paid if these trades go to work outside Quebec City, unless the contractor drives these men to work and return each day.

The above rates are the same as those in effect under the Order in Council last year except for increases of 5 cents per hour in wages of plumbers, steamfitters, electricians, tinsmith-roofers in zone II and increases of 5 cents for painters, joint pointers, cement finishers and tile, marble and terrazzo setters in zone II and for metal lathers in zone III; a decrease of 5 cents for tile, marble and terrazzo setters in zone III and ½ of one cent for ornamental iron and bronze mechanics and helpers in zone III.

Apprentices to be registered with the joint committee. The proportionate number of apprentices to journeymen allowed varies with the different trades: for plasterers, bricklayers, masons and painters, one apprentice allowed to ten journeymen or fraction there-

of; for carpenters, tinsmith-roofers, electricians, plumbers and steamfitters, one apprentice allowed to each five journeymen or fraction thereof; for tile marble, terrazzo and cement layers, one apprentice for each six journeymen or fraction thereof; in the iron and ornamental bronze industry, one to each five journeymen but at least one apprentice allowed to each workshop and on every works even if less than five journeymen. The length of apprenticeship varies from three to four years.

Hourly wages for apprentices: for apprentice bricklayers, masons and plasterers, 20 cents during first year, 35 cents during second year and 50 cents during third year; for apprentice carpenters, painters, tile setters, marble setters, terrazzo setters and cement layers, 15 cents during first year, 20 cents during second year and 25 cents during third year; for apprentice plumbers and steamfitters, electricians and tinsmith-roofers, 15 cents during first year, 20 cents second year, 25 cents third year and 30 cents fourth year; ornamental iron and bronze workers, 12 cents during first year, 18 cents second year, 25 cents third year and 32 cents fourth year.

Maintenance men employed in the maintenance of public buildings or in industrial or commercial establishments, if permanently employed and paid by the month or week, may work 48 hours per week without any daily limitation of hours. Weekly wages for qualified workmen: $21 in city of Quebec, and in Levis, Bienville and Lauzon, $18 in the rest of the district. Weekly wages for labourers: $15 in city of Quebec and in Levis, Bienville and Lauzon, $14 in the rest of the district. The employer may charge employees a maximum of $3 per month for room and 20 cents per meal where such employees live in the establishment.

PLUMBERS AND TINSMITH ROOFERS, THREE RIVERS.—An Order in Council approved May 7, and published in the *Quebec Official Gazette*, May 14, amends the previous Order in Council for these trades (LABOUR GAZETTE, January, page 103) by adding the name of one additional contractor to the parties to the agreement.

BUILDING TRADES, SHERBROOKE, DRUMMONDVILLE, ETC.—An Order in Council, approved May 7, and published in the *Quebec Official Gazette*, May 14, makes obligatory the terms of an agreement between L'Association des Constructeurs des Cantons de l'Est (The Association of Builders of the Eastern Townships) and L'Association des Maîtres-Plombiers de Sherbrooke (The Association of Master Plumbers of Sherbrooke) on the one part and Le Conseil Central des Syndicats Catholiques et Nationaux de Sherbrooke, Inc. (The Central Council of National Catholic Unions of Sherbrooke, Inc.), Le Syndicat National Catholique des Métiers de la Construction de Drummondville (The National Catholic Union of Building Trades of Drummondville) and Le Syndicat Catholique et National des Manoeuvres de Drummondville, Inc. (The National Catholic Union of Labourers, Drummondville, Inc.) on the other part.

The Order in Council is to be in effect from May 1, 1938, to April 30, 1939, and thereafter from year to year, subject to notice.

The industrial jurisdiction, in addition to the construction, repair, maintenance and demolishing of buildings, includes such work also on roads, aqueducts, sewers, canals, tunnels, bridges, sustaining walls, airports, landing grounds, levelling and earthwork, electrical installations, electrical transmission lines, plumbing and heating systems and any other work of this nature.

The territorial jurisdiction comprises the Eastern Townships district consisting of the counties of Sherbrooke, Compton, Frontenac, Stanstead, Shefford, Brome, Missisquoi, Richmond, Wolfe, Drummond. It is divided into three zones: zone I, the city of Sherbrooke and within five miles of the limits; zone II, the towns of Granby, Magog, Asbestos and Drummondville and within five miles of their limits; zone III the rest of the territory.

Hours: 8 per day, between 8 a.m. and 5 p.m., except during the months of December and January, and 48 hours per week. Contractors may establish the two or three shift system, with a maximum of 8 hours per shift.

Overtime for all classes of work, time and one half; work on Sundays and holidays for pipe mechanics, tinsmith roofers and electricians, time and one half; work on Sundays and holidays for all other classes of work, double time.

Minimum weekly wage rates for night watchmen for a maximum week of 72 hours for Zone 1, $15; Zone II, $14; and Zone III, $12.50.

*Carpenters and joiners in the towns of Magog and Granby, 50 cents.

† In the town of Drummondville and within five miles of its limits, 90 cents per hour for contractors and 60 cents for journeymen.

‡ Or $30 per week.

These rates are in many cases 5 or 10 cents higher than in the previous agreement, in others unchanged. Only in the rural section are there any reductions, namely one of 5 cents for carpenters and painters.

Foremen who have supervision of a gang to be paid 10 cents per hour more than the minimum rate for their trade.

Journeymen who are handicapped by age or infirmity may be paid a lower wage rate if such rate is allowed by the board of examiners of the joint committee.

For work outside the place where the employee lives, transportation and board to be paid by the employer.

If an employee boards with the employer, a maximum charge of $1 per week per room and of 25 cents per meal may be made to the employee.

Apprentices, who must begin their apprenticeship between the ages of 16 and 25, must be registered with the joint committee who shall keep a complete record of their employment. The period of apprenticeship is for 48 months of work. Allowance is made for study at an industrial or trade school if such study carried on concurrently with the work.

One apprentice allowed for each five journeymen or fraction thereof in the bricklaying, plastering, masonry, carpentering and painting trades.

Wages for apprentices: for the trades of bricklayer, mason, plasterer, marble and tile setters and terrazzo layers, 30 per cent of journeymen's rate during first year, 45 per cent during second year, 60 per cent during third year and 75 per cent during fourth year; for the trades of carpenter and joiner, painter and paper-hanger, 50 per cent of journeymen's minimum rate during first year with an increase of 5 cents per hour each additional year of apprenticeship; for the trade of electrician, 20 cents per hour during first year, 25 cents second year, 30 cents third year and 35 cents fourth year; for the trades of pipe mechanic and tinsmith roofer, 20 cents during first year, 25 cents during second and third year, and 30 cents during fourth year.

Maintenance employees may work 48 hours per week without any daily limitation of hours, with overtime to be paid at regular hourly rates noted in the above table. Maintenance men employed in churches, colleges, convents, hospitals and charitable institutions, to be paid the following minimum weekly rates: for journeymen, $20 in zone I, $18 in zone II and $16 in zone III; for labourers, $15.40 in zone I, $13.40 in zone II and $12 in zone III. Maintenance men employed in office or public buildings, apartment buildings or residences of any kind, hotels, factories, manufacturing establishments and stores to be paid the following minimum weekly rates: for journeymen, $22 in zone I, $20 in zone II and $18 in zone III; for labourers, $17.60 in zone I, $15.40 in zone II and $13.40 in zone III. Maintenance men may be charged a maximum rate of $3 per month per room and 25 cents per meal, if the employee boards in the establishment.

Building contracts signed before the adoption of this Order in Council are governed by the previous Orders in Council (LABOUR GAZETTE, March, 1936, page 273 and October, 1937, page 1159).

BUILDING TRADES, JOLIETTE.—An Order in Council, approved May 7, and published in the *Quebec Official Gazette*, May 14, makes obligatory the terms of an agreement between certain contractors and L'Association des Ouvriers de Joliette (The Workers' Association of Joliette).

The Order in Council is to be in effect from April 1, 1938, to March 31, 1939, and thereafter from year to year, subject to notice.

The industrial jurisdiction includes the building, repairing, maintenance and demolishing of buildings.

The territorial jurisdiction comprises the counties of Joliette, Berthier and Montcalm, divided into two zones: zone I consists of municipalities of a population of 4,000 or more and also includes all contracts of over $2,000 in the rest of the district; zone II consists of municipalities of a population of less than 4,000 for contracts not exceeding $2,000.

Any workman holding a certificate of competency from the board of examiners of the joint committee will be considered a journeyman.

Hours: 8 per day between 7 a.m. and 6 p.m. a 48 hour week (as established by the Order in Council under the Act relating to the limitation of working hours noted in the (LABOUR GAZETTE, July, 1936, page 609).) When special and urgent work cannot be done during regular hours, it may be done at any time and with a permit from the joint committee and may be done at regular rates: this exemption, however, does not apply to plumbers, steamfitters and pipe mechanics.

Overtime: all work outside regular hours, time and one half; double time for work on Sundays and holidays.

MINIMUM WAGES PER HOUR

Trades	Zone I	Zone II
Bricklayers	$0 60	$0 50
Masons (stone) including the cutters on the work	0 60	0 50
Plasterers	0 60	0 50

Structural iron workers	0 60	0 60
Ornamental iron workers	0 55	0 55
Tinsmiths-roofers:		
Contractors (personal services)	0 65	0 60
Journeymen	0 50	0 50

Trades	Zone I	Zone II
Plumbers and steamfitters:		
Contractors (personal services)	0 65	0 60
Journeymen	0 50	0 50

(These rates are in some cases unchanged, but in most cases increases of 5 cents per hour over the previous rates.)

Journeymen handicapped by age or infirmity may, after investigation and permit from board of examiners of the joint committee, work for a lesser rate set by such board, but in no case may the number of such workmen under such a permit be more than one for every ten qualified journeymen or fraction thereof.

Apprentices must be registered with the joint committee, and except if permitted by the joint committee to begin later must be between 16 and 25 years of age when beginning apprenticeship; the joint committee to have a complete record of the apprentices' employment. In the trades of bricklayer, mason, plasterer, carpenter-joiner and painters, one apprentice allowed for each five journeymen or fraction thereof; for the trades of plumbers, steamfitters and tinsmiths, one apprentice per journeyman. At the end of the apprenticeship period the apprentice to take an examination before the board of examiners.

Minimum hourly wages for apprentices: apprentice carpenters-joiners in zone I, 20 cents during first year, 25 cents second year, 30 cents third year, 40 cents fourth year, apprentice carpenters-joiners in zone II, 5 cents per hour less than in zone I; apprentice painters in zone I, 15 cents during first year, 20 cents second year, 25 cents third year and 30 cents fourth year, in zone II 5 cents less than in zone I; apprentice electricians, 15 cents first year, 20 cents second year and 25 cents third year in both zones, 35 cents fourth year in zone I and 30 cents in zone II: apprentice tinsmith roofers and plumbers and steamfitters 15 cents first year, 25 cents second year and 35 cents third year in both zones.

Maintenance men employed in churches, convents, colleges, hospitals, charitable institutions, etc., and in office and public buildings, hotels, factories, etc., to be paid a minimum of $18 per week if qualified journeymen and $12 if labourers. They are limited to 48 hours per week. Any overtime, except overtime required in case of emergency for the protection of the property, to be paid at hourly rate specified above for the trade. Employers may charge a maximum of $3 per month per room rent and 25 cents per meal to maintenance employees who room and board in the establishment.

Contracts granted and signed before the adoption of this Order in Council are governed by the previous Order in Council for these trades (LABOUR GAZETTE, June, 1936, page 547, and December, 1937, page 1387).

Transportation and Public Utilities: Water Transportation

COAL HANDLERS, MONTREAL.—An Order in Council approved May 11, and published in the *Quebec Official Gazette*, May 21, makes obligatory the terms of an agreement between the Dominion Coal Company, Limited, the St. Lawrence Stevedoring Company, Limited and the Scotch Anthracite Coal Company, Limited and l'Union Nationale des Déchargeurs de Charbon (The National Union of Coal Unloaders).

The Order in Council is to be in effect from May 21, 1938, to December 31, 1938 and thereafter from year to year, subject to notice.

Wages for coal handlers engaged in trimming and handling of coal in bulk cargoes in vessels: for all work performed between 7 a.m. and 6 p.m., 92 cents per hour; for all work from 6 p.m. to midnight, $1.02 per hour; for all work between midnight and 7 a.m., $1.12 per hour; any such workers called after 11 p.m. will have a minimum of three hours' work. There shall be one hour off for meals on both the day and night shift.

Wages per hour for workers engaged in the handling, moving, piling and storing of coal or bulk cargoes on the docks and yards contiguous to the discharging plants used for the loading or unloading of vessels and in such work as is incidental to such dock and yard operations: chief mechanic, 60 cents; boiler mechanic, 50 cents; mechanics, 45 cents; mechanics' helpers, 42½ cents; repair men (iron), 45 cents; helpers, 40 cents; repair men (wood), 50 cents; helpers, 42½ cents; truck drivers, 40 cents; crane runners (electric or gasoline engines) 56⅔ cents; crane runners (steam), 48 cents; crane runners (Diesel engine), 48 cents; crane firemen, 44 cents; crane helpers, 40 cents; haulage engineers, 49 cents; riggers, 42 cents; "barber-green" runners, 40 cents; trestle men, 40 cents; firemen and oilers in towers, 44 cents; screening house general crew, 40 cents; screening house oilers, 42½ cents; screening house foreman, 46¾ cents; tunnel crew, 42½ cents; barge men, 40 cents; chief electricians, 65 cents; electricians' helpers, 42½ cents; checkers and store-keepers, 42½ cents; all other general labour in yard, 40 cents. For dock and yard workers, the day shift is from 7 a.m. to 6 p.m., and the night shift from 6 p.m. to 7 a.m. with one hour off for meals in each case. Any dock or yard worker working longer than the day shift or night shift to be paid time and one-half for such additional time, except that firemen and oilers may work up to 12 hours in a day at their regular rate in the case of a ship being in port.

All workers covered by this agreement to be paid double time for work on Sundays and four specified holidays.

Employees who are below normal physical fitness may be granted permission by the joint committee to work at lower wage rates.

Trade

RETAIL STORE AND HOTEL WORKERS, DONNACONA.—An Order in Council approved April 28, and published in the *Quebec Official Gazette*, May 7, makes obligatory the terms of an agreement between Le Syndicat des Employeurs et Artisans de Donnacona, section commerciale (The Union of Employers and Artisans of Donnacona, commercial section) and Le Syndicat des Employés de Donnacona, section commercial (The Union of Employees of Donnacona, commercial section).

The Order in Council is to be in effect from May 7, 1938, to May 1, 1939, but may be repealed after 60 days' notice by one of the parties if both agree to such repeal.

The industrial jurisdiction includes any individual or firm which sells or delivers any merchandise, and includes hotels, restaurants, drug stores in addition to other stores. Office employees are also included with the exception of those working in the pulp and paper industry.

Hours for all employees except office employees and hotel employees: 60 per week for male employees and 54 for female employees. Closing time for stores to be at 6 p.m. from Monday to Thursday inclusive except day before a holiday, with no work on Sundays or holidays. Hours for office employees: 40 per week. Employees of restaurants, drug stores and tobacco stores to be entitled to a weekly holiday of 24 hours.

Overtime: time and one half.

Vacation: each employee to be entitled to one week's vacation during summer after one year's service and to two weeks' vacation after two or more years' service, which the employer may pay for or not as he so decides.

Minimum weekly wages for all except office and hotel employees: for male employees—from $6 per week for beginners with no experience, with an increase of $1 per week for each six months of experience to a minimum of $12 after three years' experience; for female employees—from $6 per week for beginners with no experience, with an increase of 50 cents per week for each six months of experience to a minimum of $8 per week after two year's experience. Minimum hourly wages for office employees: 15 cents. Minimum monthly wages for hotel employees which must be paid in addition to providing full board, room and laundry: female cooks $25, female cooks' helpers $20, room girls, $20, table girls $16.

Service: Custom and Repair

GARAGE AND SERVICE STATION EMPLOYEES, QUEBEC.—An Order in Council, approved May 13 and published in the *Quebec Official Gazette*,[1] May 28, makes obligatory the terms of an agreement between L'Association des Marchands Détaillants du Canada, Québec section (The Retail Merchants Association of Canada, Quebec section) and Le Syndicat Catholique des Employés de Garage de Québec (The Catholic Union of Garage Employees of Quebec).

The Order in Council is to be in effect from May 13, 1938, to November 12, 1938, and will be renewed automatically for further six-month periods, providing neither party gives notice of change.

The contracting parties agree to recognize the open shop.

The industrial jurisdiction includes all garages, shops where motor vehicles or their parts are repaired, maintained or demolished, and garages storing automobiles, gasoline stations, battery service shops, etc. (The garage of the Municipality of Quebec for which wage rates have already been set by arbitration is not included in the Order in Council.) Workers in garages located in commercial or industrial establishments and apartment houses or those offering their services in public places, private garages or parking grounds are also included.

The territorial jurisdiction includes the counties of Quebec, Lévis, Montmorency, Portneuf, Beauce, Lotbinière, Dorchester, Bellechasse and Montmagny, divided into two zones: zone I, the cities of Quebec and Levis and within 10 miles of their limits; zone II the rest of the territorial jurisdiction.

Hours in garages, repair shops, etc.: 9 per day, 54 per week, except for men of the "replacing parts department." The day hours to be between 7 a.m. and 6 p.m., the evening hours between 6 p.m. and 11 p.m. and the night hours between 11 p.m. and 7 a.m. For work in evening hours 10 per cent over day wage rates to be paid; for work during night hours, 50 per cent over day rates to be paid, except where double shift is being worked when the shift from 6 p.m. to 3.30 a.m. will be paid at 10 per cent above regular rates.

Hours in auto storage stations, gasoline stations, etc.: 60 per week of six working days. In station open day and night, the work will be in two shifts, the day shift 60 hours per week the night shift 72 hours per week.

Any employee required to work less than a regular day to be entitled to at least four hours' pay. If called to work for a certain hour and required to wait to be given work, waiting time to be paid for.

No work on Sundays, holydays of obligation and two other holidays except for sale of gasoline and oil, necessary repairing of inner tubes and storing of automobiles. Any employee working on Sunday is entitled to a complete holiday during the week.

Wages rates in zone I for day hours: man in charge of replacing parts $25 per week; mechanic, fitter, machinist, electrician, body man, wheelwright, blacksmith, welder, 45 cents per hour; painter, glazier, upholstery maker, battery man, 40 cents; oiler and vulcanizer 35 cents, non-qualified help 30 cents; apprentices from 15 cents during first year to 30 cents during fourth year; service men, gas sellers, washermen, etc., 25 cents until November 12, 1938, and 27 cents thereafter, except for beginners who may be paid 20 cents per hour during first year.

Wages or rates by contract in zone I: in the garages in zone I employers (customers) giving a contract for work must pay the employer in this trade or the employee not less than $1 per hour between 7 a.m. and 6 p.m., $1.10 between 6 p.m. and 11 p.m. and $1.50 between 11 p.m. and 7 a.m., $1 for greasing a car, $1 for washing a car, 50 cents for repairing an inner tube including the removing and replacing of it.

Wage rates in zone II for day hours: in garages, etc., for qualified workmen, namely, mechanics, fitters, machinists, electricians, body men, wheelwrights, blacksmiths, welders, painters, glaziers, upholstery makers, battery men, oilers and vulcanizers, 30 cents per hour; assistants 25 cents; in gasoline stations, etc., 10 cents during first year, 15 cents second year, 20 cents third year and 25 cents thereafter, except if qualified tradesmen when they must be paid the rate for garages.

Wages or rates by contract in zone II: employers (customers) giving a contract for a job must pay the employer in this trade or the employee not less than 65 cents per hour between 7 a.m. and 11 p.m. and 75 cents between 11 p.m. and 7 a.m., 75 cents for greasing an automobile, 50 cents for washing an automobile, 35 cents for repairing an inner tube, including the removing and replacing.

Any tips received by employees to be kept by them and may not be considered a part of wages.

Apprentices limited in zone I to one apprentice to five journeymen or fraction thereof in garages

and one apprentice to two servicemen in service stations.

Apprentices to qualified tradesmen to be paid: in zone I, 15 cents per hour during first year, 20 cents second year, 25 cents third year and 30 cents fourth year: in zone II, 5 cents per hour less than in zone I in each of the four years.

Uniforms required to be furnished by the employer.

GARAGE AND SERVICE STATION EMPLOYEES, MONTREAL.—An Order in Council, approved May 13 and published in the *Quebec Official Gazette*, May 21, makes obligatory the terms of an agreement between La Section de l'Automobile du district de Montréal de l'Association des Marchands Détaillants du Canada (The Retail Merchants Association of Canada, Automobile Section of Montreal) and le Syndicat de l'Auto Voiture (the Automobile Workers' Union).

The Order in Council is to be in effect from May 13, 1938, to August 1, 1939, and thereafter from year to year, subject to notice by either of the contracting parties.

The territorial jurisdiction comprises the Island of Montreal and Ile Jésus and within 35 miles of their limits, and is divided into two zones: zone I, the Island of Montreal, Ile Jésus and within ten miles of their limits; zone II, all the municipalities situated in whole or in part within a radius of 25 miles from the limits of zone I.

The industrial jurisdiction comprises garages and gasoline stations and includes employees working in garages situated or operated by commercial or industrial establishments and apartment houses, even for personal purposes or offering their services in public places, private garages or on parking grounds.

Hours: for journeymen and journeymen's apprentices, 9 per day, 54 per week. Hours for other employees, 60 per week of six days, and if there be a night shift, 72 hours divided in six days may be worked by the night shift, with overtime for such other employees to be paid at time and one half. For journeymen and their apprentices, the day hours shall be between 7 a.m. and 6 p.m., the evening hours from 6 p.m. to 11 p.m. during which evening hours the wage rate will be 10 per cent above regular rates, the night hours from 11 p.m. to 7 a.m., during which night hours the wage rate will be 50 per cent above the regular rate. In case of a double shift, however, work between 6 p.m. and 3.30 a.m. will be 10 per cent above regular rates and work from 3.30 a.m. to 7 a.m. at 50 per cent above regular rates.

Every employee to be entitled to a complete 24 hours of rest each week. Except for service men and night watchmen, no employee to work on Sunday, Christmas Day or New Year's Day.

Except where employer guarantees a minimum number of at least 30 hours' work in six days, any workmen called to work for less than a regular day to be entitled to at least four hours' wages. If called for a certain hour and obliged to wait, he shall be paid for such waiting time.

Minimum hourly wage rates for day work in zone I: journeymen, wheelwrights, electricians, blacksmiths, machinists, mechanics, carpenters, painters, duco polishers—50 cents for first class and 45 cents for second class and 40 cents for third class journeymen, 30 cents for wax polishers; journeymen body men, upholsterers, radiator repairmen and welders—60 cents for first class, 50 cents for second class and 40 cents for third class; service men 25 cents, night watchman 25 cents.

Minimum hourly wage rates for apprentices for day work in zone I: apprentices of any class except service men, 10 cents per hour during first six months, 15 cents second six months, 20 cents second year, 25 cents third year; apprentice service men 15 cents first year, 20 cents second year.

Minimum hourly wage rates for work after 6 p.m. are higher as noted above under the clauses relating to hours.

Minimum rates which a customer giving a contract for a job must pay to the garage employer or the employee in zone I: between 7 a.m. and 6 p.m., $1.25 per hour for body, upholstery, welding, painting or radiator work, $1 per hour for any other repairing work, $1 each for motor vehicle greasing and $1 each for motor vehicle washing. After 6 p.m. these rates to be higher as provided above under the clauses relating to hours. In any contract or hiring of work the rate for any of these trades to be calculated and charged to the customers on this basis and according to these rates.

Minimum wage rates and prices for contract work in zone II are 15 per cent lower than for zone I.

Any chauffeur working as a service man to be paid 40 cents per hour when required to drive a car which is hired on an hourly basis.

Any tips received are the property of the employee and must not be considered a part of wages.

Half the cost of uniforms to be paid by the employer and half by the employee.

Not more than one apprentice allowed to each two journeymen or service men, except where there is only one journeyman when one apprentice may be employed.

SHOE REPAIRERS, MONTREAL.—An Order in Council, approved May 7, and published in the *Quebec Official Gazette*, May 14, makes obligatory the terms of an agreement between the Montreal and Provincial Shoe Repairers Association, Inc., le Syndicat des Maîtres-Cordonniers de Montréal (the Union of Master Shoe Makers of Montreal), the National Shoe Repairers Protective Association, Inc., and the Montreal and District Shoe Repairers Employees' Union.

The Order in Council is to be in effect from May 14, 1938, to July 31, 1939, and thereafter from year to year subject to any of the parties giving notice to the Department of Labour by April 30 of any year.

The territorial jurisdiction includes the Island of Montreal and such shops within ten miles of the Island of Montreal as solicit or obtain the greater part of their orders from the citizens of the Island of Montreal.

Hours: 58 per week, which may only be worked between 8 a.m. and 7 a.m. on Monday to Thursday inclusive, 8 a.m. and 9 p.m. on Friday and 8 a.m. and 11 p.m. on Saturday or the day before a holiday. (The hours under the previous agreement were 64 per week, as noted in the LABOUR GAZETTE, August, 1937, page 922.)

Overtime: any hours over 58 in any week to be paid at proportionate rates. Overtime after regular closing time may be done only in urgent

cases and with permit from the joint committee but must in no case exceed two hours in any day or six hours in any week.

Wages per week for qualified workmen (with at least three years' experience as an apprentice or workman): first class workers who work on the bench and on the stitcher $21, first class bench workers not working on stitcher $18, other experienced workmen and including experienced workmen working on second hand shoes $16. During the winter months from January 1 to March 31, these rates may be $3 per week less except that workmen employed in second hand repair shops shall in no case receive less than $16. (The rates under the previous agreement were $15 and $12 per week except in winter months when they were $10 and $9.)

Wages per week for apprentices: $6 during first year, $8 second year, $10 third year (which is no change from the previous agreement). In the months from January 1, to March 31, these rates may be $3 per week less.

The number of apprentices limited to one apprentice to three journeymen or fraction thereof.

A schedule of minimum prices to be charged customers is included in the agreement.

The board of examiners appointed by the joint committee has the right to grant a workman or apprentice a higher or lower standard of competency and place him in one of the categories of workers.

Service: Personal and Domestic

TAVERN EMPLOYEES, QUEBEC.—An Order in Council approved May 7, and published in the *Quebec Official Gazette*, May 14, makes obligatory the terms of an agreement between l'Association des Taverniers de la Cité de Québec et du District, Inc. (The Association of Tavern Keepers of the City of Quebec and District) and Le Syndicat Catholique des Employés de Tavernes de la Cité de Québec (The Catholic Union of Tavern Employees of the city of Quebec).

The Order in Council is to be in effect from May 14, 1938, to May 1, 1939, and thereafter from year to year subject to notice.

The agreement covers employees of establishments selling beer to be consumed on the premises, in the city of Quebec.

Hours: 60 per week.

Overtime: Time and one quarter.

Minimum weekly wage rates: barman $18, waiter (with one year experience or more) $16, beginners $12 during first three months, $14 for following nine months. Extra employees to be paid 30 cents per hour for first 20 hours work in the week and 26 cents for any hours over 20 in the week, with a minimum of two hours' pay for each call to work. Any tips received are the property of the employee and may not be considered a part of wages.

Uniforms and the laundering of them to be paid by the employer.

No employee may be accepted if he is less than 20 years of age.

If the employer furnishes room and board he may charge the employee $1.50 per week per room and 20 cents per meal.

BARBERS AT FARNHAM, COWANSVILLE, BEDFORD AND SWEETSBURG.—An Order in Council, approved May 13, and published in the *Quebec Official Gazette*, May 21, makes obligatory the terms of an agreement between Le Syndicat des Maîtres-Barbiers du Comté de Missisquoi, Incorporé (The Union of Master Barbers of the County of Missisquoi, Incorporated) and Le Syndicat des Employés Barbiers du Comté de Missisquoi, Incorporé (The Union of Employed Barbers of the County of Missisquoi, Incorporated).

The Order in Council is to be in effect from May 21, 1938, to May 20, 1941, and shall be automatically renewed unless either party gives notice of change 60 days before the expiration date.

The territorial jurisdiction comprises the municipalities of Farnham, Cowansville, Bedford and Sweetsburg.

The hours during which barber shops may be open in each municipality is stated, in all cases opening at 8 a.m., with closing time varying but not later than 8 or 8.30 p.m. on three nights a week, at 12 or 12.30 noon on one day a week and later hours specified for Friday and Saturday closing time.

Minimum weekly wages for regular employees: $14 per week plus 50 per cent of all receipts over $20 taken in by the employee in any week. Extra employees to be paid 25 cents per hour plus 50 per cent of all receipts in excess of $5 made by the employee in the day. For barbers working by the job, a price schedule is included for each piece of work. Employees handicapped by age or infirmity may have their wage scale revised by the joint committee.

Apprentices to be paid from $2 per week during first six months to $12 during second half of third year, with one apprentice allowed in a shop with two regular employees and two apprentices if four or more regular employees.

BARBERS AND HAIRDRESSERS, THREE RIVERS AND DISTRICT.—An Order in Council, approved May 7, and published in the *Quebec Official Gazette*, May 14, amends the previous orders in Council for these trades (LABOUR GAZETTE, October, 1937, page 1158, and February, 1938, page 215).

The territorial jurisdiction includes the towns of Three Rivers, Cap-de-la-Madeleine, Louiseville, Shawinigan, Grand' Mère and La Tuque and within 10 miles from their limits.

Wage rates for male barbers and hairdressers are increased. They now are $15 per week plus 50 per cent of receipts exceeding $22 made by the employee or $20 per week without commission (formerly $15 plus 50 per cent of receipts in excess of $25 or $18 per week without commission). The wages for female hairdressers are increased from $12.50 to $14 per week.

Increases were also made in certain of the prices to be charged for the different operations.

BARBERS AND HAIRDRESSERS, VICTORIAVILLE.—An Order in Council approved April 28, and published in the *Quebec Official Gazette*, May 7, amends in a minor matter the previous Order in Council for this industry (LABOUR GAZETTE, February, page 215) which does not alter the summary as given in the LABOUR GAZETTE.

Barbers and Hairdressers, Rouyn and Noranda.—An Order in Council, approved April 28, and published in the *Quebec Official Gazette,* May 7, amends the previous Order in Council for these trades (Labour Gazette, November, 1935, page 1063) by adding prices which must be charged for each operation in a beauty parlour with the provision that any work performed at home must be paid at double rate. It is now also provided that no appointments be given for work after 8 p.m. in beauty parlours and that during the months of June to September inclusive beauty parlours close at noon on Wednesdays.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the May 14 issue of the *Quebec Official Gazette:*

Bakers and Deliverymen, Three Rivers

Lithography, Province of Quebec

Printing Trades, Montreal

Building Trades, Hull (amendment)

Building Trades, Lake St. John District (amendment).

Certificate of Competency

The certificate of competency was made obligatory by Order in Council as noted in the *Quebec Official Gazette,* May 14, for the following trades:

Building Trades, Victoriaville.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan, and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers or employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, and June, 1937, page 640; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507.

INDUSTRIAL STANDARDS ACT OF ONTARIO

Manufacturing: Miscellaneous Wood Products

Hard Furniture Industry, Province of Ontario.—An Order in Council, dated May 10, and published in *The Ontario Gazette,* May 21, makes binding a schedule of wages and hours in the hard furniture industry throughout the province of Ontario.

The Order in Council is to be in effect from May 31, 1938, to March 31, 1939.

The terms of the schedule are similar to the one previously in effect and summarized in the Labour Gazette, April, 1937, page 457.

Regular hours are unchanged at 47 per week. Minimum wage rates vary from 32 cents per hour for unskilled employees in one zone to 49 cents for skilled employees in the other zone. The exception to these rates is a class (not to exceed 20 per cent of total employees) for employees beginning work under 21 years of age who may be paid rates of 18 to 27 cents during first four years of employment.

Construction: Buildings and Structures

Bricklayers and Stonemasons, Windsor.—An Order in Council, dated May 10, and published in *The Ontario Gazette,* May 14, makes

binding the terms of a schedule of wages and hours in the bricklaying and stonemasonry industry in the city of Windsor and adjacent suburban area.

The Order in Council is to be in effect from April 1, 1938, to March 31, 1939.

The terms are similar to the one previously in effect and summarized in the LABOUR GAZETTE, June, 1937, page 696. The regular wage remains at $1.15 per hour, with a 40 hour week.

PLUMBERS AND STEAMFITTERS, WINDSOR.—An Order in Council, dated May 10 and published in *The Ontario Gazette*, May 14, makes binding the terms of a schedule of wages and hours in the plumbing and heating industry in the city of Windsor and the adjacent suburban area.

The Order in Council is to be in effect from May 24, 1938, to March 1, 1939.

Hours: 8 per day, to be worked between 8 a.m. and 5 p.m., from Mondays to Fridays inclusive, a 40 hour week. Whenever work is being carried on in two or more shifts, the employees on the night shifts to work 7 hours per shift but will be paid for 8 hours. Work on Saturday before noon which is required for the protection of life or property and the setting of sleeves and inserts may be done at regular wage rate.

Overtime permitted only with permit from the Advisory Committee. For any work done outside of regular hours as noted above, time and one half, except work on new construction done after midnight from Monday to Friday inclusive and after 5 p.m. on Saturdays which shall be at double time. Any work on Sundays or on six specified holidays, double time.

Minimum wage rate: $1.15 per hour. (This is an increase of 15 cents per hour over the rate in the previous schedule.) A special minimum rate of wages may be established by the Advisory Committee for handicapped workers.

BUILDING LABOURERS, WINDSOR.—An Order in Council, dated May 10, and published in *The Ontario Gazette*, May 14, makes binding a schedule of wages and hours for common labourers in the construction industry in the city of Windsor and adjacent suburban areas.

The Order in Council is to be in effect from May 24, 1938, "during pleasure."

Minimum wage rate: 55 cents per hour (an increase of 5 cents per hour over the rate in the previous schedule). A special minimum rate of wages may be established by the advisory committee for any handicapped person.

Overtime: any work done on Sunday or on six specified holidays to be paid at 82½ cents per hour.

CARPENTERS, WINDSOR.—An Order in Council, dated May 10, and published in *The Ontario Gazette*, May 21, makes binding the terms of a schedule of wages and hours for carpenters in the city of Windsor and adjacent suburban area.

The Order in Council is to be in effect from April 1, 1938, to March 31, 1939.

The terms of the schedule are similar to the previous one which was summarized in the LABOUR GAZETTE, June, 1937, page 697, providing for a 40 hour week, a wage rate of $1 per hour for regular hours, $1.14 for work on night shifts, and double time for all overtime work on Sundays and holidays.

Service: Personal and Domestic

Schedules of wages and hours for barbers at Windsor, Petrolia, Forest zone, Prescott, Cardinal, etc., Sarnia, Arnprior, Renfrew, Brockville, and St. Marys have also recently been made binding and will be summarized in the next issue of the LABOUR GAZETTE.

INDUSTRIAL STANDARDS ACT OF SASKATCHEWAN

Construction: Buildings and Structures

PAINTERS, REGINA.—An Order in Council, dated January 8 and published in the January 31 issue of the *Saskatchewan Gazette* makes binding the terms of an agreement between the Regina employers of the painting, decorating and paperhanging industry and the employees of that industry in the city of Regina and within five miles of it.

The Order in Council is to be in effect from February 1, 1938, to January 31, 1939.

Hours: 8 per day, 4 on Saturday, a 44 hour week.

Overtime: time and one quarter for first two hours, time and one half thereafter: work on Sundays and five specified holidays, double time.

Minimum hourly wage rate for painters, paperhangers and decorators 65 cents; spray painting 85 cents. A special minimum rate may be established by the advisory board for any handicapped person.

No apprentice may be employed without the approval of the advisory board.

Service: Personal and Domestic

Schedules of wages and hours for barbers at Moose Jaw, Regina, Saskatoon and Prince Albert and for beauty parlours at Moose Jaw have also recently been made binding and will be summarized in the next issue of the LABOUR GAZETTE.

INDUSTRIAL STANDARDS ACT OF ALBERTA

Agriculture

HONEY PRODUCING INDUSTRY, COALDALE, TABER, AND VAUXHALL ZONE.—An Order in Council, dated May 3 and published in the *Alberta Gazette,* May 14, makes obligatory the terms of a schedule of wages and hours in the honey producing industry in a number of townships (near Lethbridge) in which are situated the towns of Coaldale, Taber and Vauxhall.

The Order in Council is to be in effect from May 24, 1938, to March 1, 1939.

Hours for male employees, 9 per day: for female employees, 8 per day, which may be extended to 9 hours providing not more than 48 hours are worked in a week. If an employee is called to work for less than half a shift, he will be paid for the half shift.

Overtime to be paid for at regular hourly rates or it may be offset by allowing regular time off for the same number of hours during the season. Work on Sundays or holidays to be paid at regular hourly rates.

Minimum wages per shift: for field work, men with less than one year's experience $2.50, men with more than one year's experience $2.70; for extraction work (including packing and shipping), men with less than one year's experience $2.25, men with more than one year's experience $2.70, women with less than one year's experience $2.00, women with more than one year's experience $2.25, boys and girls (over 16 and under 21 years) $1.80. Minimum wages for monthly employees to be paid in addition to board and room: men with less than one year's experience $30, men with a year or more experience $50.

Bonus: provided the selling price of honey is not less than 8 cents per pound at shipping point, bonuses of from 10 to 20 per cent to be paid to every employee if the average production per hive is over a certain amount, such percentages to be computed on the total season's earnings of each employee.

Manufacturing: Vegetable Products

BAKERS, EDMONTON.—An Order in Council, published in *The Alberta Gazette,* May 31, makes binding a schedule of wages and hours in the baking industry in the Edmonton district.

The Order in Council is to be in effect from June 10, 1938, to September 10, 1938.

The terms are similar to those of the previous schedule which was summarized in the LABOUR GAZETTE, June, 1937, page 697, with this exception:

The hours for male employees (inside) continue at 54 hours per week, but a new provision limits the hours for female employees (inside) to 48 per week.

Construction: Buildings and Structures

LATHERS, EDMONTON DISTRICT.—An Order in Council, dated May 3 and published in *The Alberta Gazette,* May 14, makes binding a schedule of wages and hours for lathers in a zone which includes the city of Edmonton and a section of this northern part of the province which extends across the province and includes the towns of Edson and Jasper and all towns and villages south of Edson on the coal branch of the Canadian National Railways.

The Order in Council is to be in effect from May 24, 1938, to May 23, 1939.

The terms of the schedule are similar to those in effect under the previous schedule which was summarized in the LABOUR GAZETTE, May 1937, page 579, and September, page 1038. Regular hours continue at 44 per week, with wage rates at $3.75 per thousand for wood lath; for patch work, 75 cents per hour for first class lathers, 50 to 70 cents for second class lathers; for nailed-on metal and metal patchwork, plasterboard, gyprock, etc., 75 cents per hour for first class lather, 50 cents for second class; for metal furring and tied-on lath work and attached ceilings, 90 cents for first class and 70 cents for second class.

Extension of Health Insurance in Great Britain

Plans under which medical services provided at present under national health insurance would be extended to an additional 18,000,000 to 20,000,000 people have been announced by the British Medical Association.

The association's national plan for a co-ordinated health policy also convisages a vast increase in the scope of the services provided. Its proposals, briefly, are as follows:

Inclusion of every member of every family within an income limit of £250 ($1,250) a year in the health insurance system;

Extension of the system to provide the services not only of a family doctor, but of every type of medical consultant and specialist, as the needs of the patient might require, including full dental and opthalmic services and maternity services.

PRICES, RETAIL AND WHOLESALE IN CANADA, MAY, 1938

Cost of living, prices of staple articles, and index numbers

THE movement in prices during the month was downward, the cost per week of a family budget of staple foods, fuel and lighting, and rent in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being lower than in the previous month. In the former the decline was due to the lower cost of foods which more than offset a slight increase in rent and in the latter the decline was due mainly to lower prices of grains, milled products and non-ferrous metals.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.50 at the beginning of May as compared with $8.69 for April. The decrease was due in large part to a decline in the price of butter, creamery being more than 6 cents per pound lower than at the beginning of April. There was also a substantial decline in the price of eggs while flour, potatoes and sugar were slightly lower. Prices of beef, mutton, pork, and bacon were higher than in April. Comparative figures showing the cost of this list of foods for certain previous dates are $8.58 for May, 1937; $7.82 for May, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.17 for May, 1930. Including the cost of fuel and rent with that of foods the total budget cost $17.36 at the beginning of May; $17.50 for April; $17.28 for May, 1937; $16.36 for May, 1936; $15.41 for June, 1933 (the low point in recent years); $21.49 for May, 1930; $20.57 for May, 1922; $26.92 for July, 1920 (the post war peak); and $14.21 for May, 1914. Rent was slightly higher in the average, increases being reported from several cities. Fuel was practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of 1926 as 100 was unchanged during the last half of the month following the decline week by week since the first week in April. The figures are 80·3 for the two weeks ended May 27 as compared with 81·5 for the week ended April 29 and 83·3 for that ended April 8. Comparative figures for certain previous dates on a monthly basis are 82·3 for April, 1938; 85·1 for May, 1937; 71·9 for May, 1936; 63·5 for February, 1933 (the low point in recent years); 93·4 for May, 1929; 98·5 for May, 1922; 164·3 for May, 1920 (the post war peak); and 64·2 for May, 1914. Of the eight principal groups of commodities in the classification according to chief component materials the Animal Products group and the Non-Metallic Mineral Products group were fractionally higher at the end of the month under review than at the beginning and the Chemical Products group was unchanged. The five remaining groups were lower, the principal changes being in the Non-Ferrous Metals Products group because of decreased prices for copper, lead and zinc; and the Vegetable Products group mainly because of lower prices for grains, milled products and raw rubber. The price of raw rubber was only about 50 per cent of that in May, 1937, while the price of copper was down 33 per cent in the same comparison. The index number of the prices of live stock was 10 per cent higher than in May, 1937.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of May of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rate for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, in-

(Continued on page 710)

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures, as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended May 27, 1938, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 702)

cludes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group

each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1938*

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

Retail Prices

Meat prices again averaged higher. In beef sirloin steak was up from an average of 25·9 cents per pound in April to 26·9 cents in May and prime rib roast from 19·1 cents per pound to 20 cents. Fresh pork was up from 23·6 cents per pound in April to 24·3 in May and breakfast bacon from 35·1 cents per pound to 36 ecnts. The price of eggs was lower in nearly all localities, the Dominion average for fresh grades being 25·9 cents in May as compared with 29 cents in April. Butter prices were generally lower, creamery being down from 39·7 cents per pound in April to 33·3 cents in May. The price in May, 1937, was 30·8 cents per pound and in May, 1936, 26·8 cents. Flour was down in the average from 4·4 cents per pound to 4·3 cents. The Dominion average price of potatoes was 87 cents per 90 pounds as compared with 90 cents in April and $1·70 in May, 1937. Granulated sugar was fractionally lower at 6·5 cents per pound. Lower prices for United States anthracite coal were reported from several cities and the average price was down from $14·52 per ton in April to $14·38 in May.

Following are the prices per ton reported for Welsh coal, "cobbles" and "French nut": Halifax, $15.50; Charlottetown, $14; Moncton, $16; Saint John, $15 and $14; Quebec, $13.50; Three Rivers, $15 and $14; Sherbrooke, $14.75; St. Hyacinthe, $14.50; Montreal, $14.25 and $14.50; Ottawa, $16; Kingston, $15; Belleville, $15.50; Peterborough, $16.75; Oshawa, $15; Toronto, $15; St. Catharines, $15; Hamilton, $14.50 and $14; Brantford, $16.25; Galt, $16; St. Thomas, $16; Cobalt, $19; Timmins, $18.50; Port Arthur, $17.25; Fort William, $17.25; Winnipeg, $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, wholesale and retail prices in Great Britain and several of the principal commercial and industrial countries appeared in the April issue of LABOUR GAZETTE.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number on the base 1930 = 100, was 103·1 for April as compared with 104·1 for March, a decrease of 1·0 per cent for the month. The index of food prices declined 0·4 per cent and the index of prices of industrial materials and manufactures declined 1·2 per cent. The fall of 1·0 per cent in the general index in April followed declines of 1·6 and 1·8 per cent respectively in March and February. As compared with the general index for April, 1937, which stood at 108·9, this year's index showed a decline of 5·4 per cent.

The *Statist* index number on the base 1867-1877 = 100, was 93·5 at the end of April as compared with 94·2 at the end of March, a decrease of 0·7 per cent for the month. The index of prices of foodstuffs declined 0·3 per cent while the "all materials" index declined 0·9 per cent. As compared with the same date last year the general index for the end of April showed a decline of 10·7 per cent.

COST OF LIVING.—The Ministry of Labour's index number on the base July, 1914 = 100, was 156 at the first of May as compared with 154 at the first of April. The index for food prices was 139 as compared with 137 at the first of April, the increase being due to increases in the price of eggs, butter, potatoes and bacon.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914 = 100, was 619 for April showing no change from the figure for the previous month. The index for food prices increased 1·0 per cent while the index of prices of industrial materials decreased by a similar amount. The index based on gold currency, 1914 = 100, was also unchanged from the previous month at 58.

COST OF LIVING.—The official index number of the expenditure of a workingman's family of four persons at Paris, on the base 1914 = 100, was 688 for the first quarter of 1938, an increase of 4·6 per cent over the figure for the previous quarter. The index of food prices rose from 684 to 727 or 6·3 per cent during the same quarter.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office on the base 1913 = 100, was 105·6 for April as compared with 105·8 for March. The prices of agricultural products increased 0·1 per cent, manufactured goods were unchanged, while semi-manufactured goods decreased 0·5 per cent.

COST OF LIVING.—The official index number on the base 1913-1914 = 100, was 125·6 for April as compared with 125·5 for March. Clothing prices and food prices increased 0·4 per cent and 1·0 per cent respectively. The index of heat and lighting materials declined 0·2 per cent, while those for rent and sundries each declined 0·1 per cent.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July 1914 = 100, was 103 for February as compared with 104 for January. The index of prices of all foods was 102 as compared with 107 for the previous month while the index for non-foods was unchanged at 103.

COST OF LIVING.—The official index number of the working class cost of living at Bombay on the base July, 1933, to June, 1934 = 100, was 107 for March. This index has not shown any change since October, 1937, when it was 108.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number on the base 1926 = 100, was 79·7 for March as compared with 79·8 for February, a decrease of 0·1 per cent for the month, continuing a downward movement which began last August. Six of the ten major commodity groups declined during the month. The decreases ranged from 0·3 per cent for housefurnishing goods to 1·2 per cent for hides and leather products. Farm products and building materials advanced fractionally and foods and metals and metal products showed no change from the February figures.

COST OF LIVING.—The index number of the Bureau of Labour Statistics on the base 1913 = 100, was 144·5 on March 15, 1938, as compared with 147·3 on December 15, 1937, a decrease of 1·2 per cent for the quarter. Food prices declined 4·9 per cent during the quarter, furniture 2·3 per cent, clothing 1·4 per cent and sundries 0·1 per cent. Fuel and light and housing increased 0·7 per cent and 0·1 per cent respectively.

The index number of the Industrial Conference Board on the base 1923 = 100, was 86·8 for April as compared with 86·7 for March. An increase of 1·0 per cent in the price of foods was offset by fractional decreases in all the other groups making up the index.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Conviction under Ontario Industrial Standards Act Confirmed

On March 17, Mr. Justice Middleton of the High Court of Justice on an appeal by the accused by way of a stated case upheld the conviction of a barber who had been fined $10 and costs or five days in jail for contravening the schedule of wages for the barbering industry under the Industrial Standards Act. The Act as amended in 1937 provides that such a schedule may, "with the approval of the Board, fix the minimum charge which an employer or employee may contract for or accept for any service." The defendant had given a haircut for less than 40 cents, the price fixed for adults.

In January last, the defendant was charged with a similar offence and acquitted on the ground that since the charge was against him as an employer and the Act required that were an employer was convicted he must be ordered to pay the full amount of unpaid wages, the section could not apply to the defendant who operated a one-chair shop. (Labour Gazette, February, 1938, p. 231.)

In this case, the accused was charged as an employee and the defence put forward three arguments. The first point was that if an offence was committed, it was an offence under the schedule and not under the Act and the Summary Convictions Act would not apply. This argument was held to fail since the wording of the Act makes it a violation of the Act for a person to contravene the provisions of a schedule.

As to the second argument that the Minister has power to approve only schedules of "wages, hours and days of labour" and not one fixing minimum charges, the Court rejected it since another section of the Act authorizes a conference of employers and employees to submit, for the Minister's approval, a schedule of minimum charges and the Interpretation Act directs that "every Act shall be deemed remedial . . . and shall accordingly receive such fair, large and liberal construction and interpretation as will best ensure the attainment of the object of the Act . . . according to the true intent, meaning and spirit thereof," which in this case is to make it possible for barbers to earn sufficient money to maintain a decent standard of living.

The third argument had to do with the inclusion in the barbers' schedule of a clause prohibiting a barber giving a customer a premium although the Act gave no authority for such a provision. Mr. Justice Middleton held that even if this particular clause was *ultra vires* the whole schedule was not therefore bad. *Rex v. Burdick,* 1938, Ontario Weekly Notes 169.

Claim of Maintenance Man for Wages under Collective Agreement in Quebec Dismissed

In the Superior Court in the District of Sherbrooke on April 1, Mr. Justice Verret dismissed with costs a claim for wages alleged due under the collective labour agreement for the building industry in Sherbrooke which had been legalized under the Collective Labour Agreements Act. The plaintiff claimed that he had been paid merely at a labourer's rate and that he should have been paid at the rate for painters fixed in the agreement. It was brought out, however, that, when hired, he had falsely stated that he was not the holder of a certificate of competence as a painter and that he was not a member of a trade union. He was accordingly hired at a monthly rate of $40 with free lodging for himself and his wife in the apartment house with the upkeep of which he was charged. According to the terms of the contract, the plaintiff was free in his spare time to engage in other work but if he was absent more than a week, he was to pay rent at the rate of $10 a month. The Court rejected the claim on the ground that the plaintiff had been hired in good faith on false statements made by himself and a contract is binding on the parties and, moreover, the defendant company is not engaged in the building industry but merely keeps in repair the building which it manages as an apartment house and is not, therefore, subject to the Act. *Perrault v. Le Parthenon,* (1938), 76 Rapports Judiciaires de Québec, Cour Supérieure, 110.

Collective Agreement held not to apply to Office Building of Agricultural Society

An action to compel the defendant company to pay the wages provided for the building industry in a collective agreement was dismissed with costs by Mr. Justice Cousineau of the Superior Court of Montreal. Under the Collective Labour Agreements Act, an agreement had been made binding in the industry in the area in question. The Act provides, however, that agreements made binding under the Act are not to apply to the agricultural industry and the building was erected for an agricultural society.

Acting in good faith, the defendant had ascertained before commencement of the work that the joint committee charged with the enforcement of the agreement considered the exception would apply in this case. The plaintiff, a bricklayer, was employed by the defendant company on the construction of the head office of l'Institut Agricole Belge au Canada at Oka at the rate of 45 cents an hour, the rate

fixed in the collective agreement for the trade in that district being 70 cents and $1.05 for overtime.

The Court held that although the officers of the Institute are business men who do not derive their incomes from farming, the main office of the Institute was meant for use in the agricultural industry, and therefore a building to house it fell within the exception to the Collective Labour Agreements Act. It was considered immaterial that the plaintiff was hired by a contractor and not by the society itself. *Berthelet v. Cie Générale d'Entreprises Auxibel*, May 9, 1938.

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 38] JULY, 1938 [NUMBER 7

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada at the beginning of June showed decided expansion, according to data tabulated by the Dominion Bureau of Statistics from 10,632 firms, each employing a minimum of 15 persons, the data being representative of all industries except agriculture, fishing, hunting and highly specialized business. The reporting firms had 1,068,620 employees at June 1, as compared with 1,025.285 in the preceding month. This gain approximated the average increase recorded from May to June in the years, 1921-1937, and rather exceeded the average advance at June 1 in the last nine years, upon whose experience the factors for seasonal correction have been calculated. Accordingly, the seasonally-adjusted index rose slightly, standing at 111·9 at the latest date, compared with 111·5 at the first of May, 1938. The unadjusted index also stood at 111·9, compared with 107·4 in the preceding month, while at June 1 in recent years of the record the indexes are as follows:—1937, 114·3; 1936, 102·0; 1935, 97·6; 1934, 96·6; 1933, 80·7; 1932, 89·1; 1931, 103·6; 1930, 116·5; 1929, 122·2; 1928, 113·8; and 1927, 107·2, The 1926 average is taken as 100 in calculating these index numbers.

Unemployment in Trade Unions.—At the beginning of June, 1938, reports were furnished to the Department of Labour by 1,896 local trade unions with an aggregate of 220,005 members, 29,130 or 13·2 per cent of whom were unemployed, compared with percentages of 13·1 at the beginning of May and 9·5 at the beginning of June, 1937.

Employment Office Reports.—Reports received during May, 1938, from the offices of the Employment Service of Canada showed a gain over April, 1938, in the volume of business transacted, as indicated by the average daily placements, but a decline from that of the corresponding month a year ago, construction and maintenance and services being the industrial divisions mainly responsible for the increase under the first comparison and logging and construction and maintenance for the loss under the second. Vacancies in May, 1938, numbered 29,033, applications 58,674 and placements in regular and casual employment 27,063.

Prices.—In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was $17.43 at the beginning of June as compared with $17.36 for May, a slight decline in the cost of fuel being more than offset by an advance in food and rent. Comparative figures for earlier dates are $17.20 for June, 1937; $16.33 for June, 1936; $15.41 for June, 1933 (the low point in recent years); and $21.44 for June, 1930. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was little changed during June and was 79·9 for the week ended July 1 as compared with 80·3 for the week ended May 27. The decline most of which occurred during the last week of the month was due mainly to lower prices for grains, flour and raw sugar. On a monthly basis the index number was 80·3 for May; 84·6 for June, 1937; 72·3 for June, 1936; 63·5 for February, 1933 (the low point in recent years); and 93·4 for June, 1929.

Business Statistics.—The latest information available reflecting industrial conditions in Canada is given in the table on page 716. The index of the physical volume of business was slightly lower in May than in April but higher than in the two preceding months. It was 9 per cent lower than in May, 1937, but about 3 per cent higher than in May, 1936. The index of mineral production was considerably lower than in April but higher than in any other month since November, 1937. It was higher also than in May, 1937. After correction where necessary for seasonal variation the decrease in this group in May as compared with the previous month was due to lower exports of copper and asbestos as well as to lower shipments of silver and gold and to smaller imports of bauxite. The index

*Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended July 1, 1938.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending June 25, 1938, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending June 18, May 21 and April 23, 1938; June 19, May 22 and April 24, 1937. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

of the volume of manufacturing was slightly higher than in April, the volume of foodstuffs and of iron and steel being greater. The index of the volume of construction was lower than in the previous month and lower also than in May, 1937. Electric power output, imports and exports were also lower in both these comparisons, while car loadings were slightly higher than in April, 1938, but lower than in May, 1937. Information available for June shows wholesale prices, the number of cars of revenue freight and gross earnings of the Canadian National Railways to be lower both as compared with May, 1938 and with June, 1937. The value of contracts awarded and the index number of employment showed advance over the previous month but were lower than in June, 1937.

Strikes and Lockouts.—The number of strikes and lockouts during June was 19, involving 2,366 workers with a time loss of 12,216 man working days, as compared with 15 disputes, involving 2,054 workers and a time loss of 11,727 days. The principal disputes during June involved hosiery factory workers at Hamilton, Ont., lime plant workers at Blubber Bay, B.C., shoe factory workers at Galt, Ont., and sawmill workers at Fort Frances and at Timmins, Ont. In May the strike at Fort Frances, Ont., and a strike of silk factory workers at Louiseville, P.Q., caused most of the time loss. In June, 1937, the number of disputes was 41, almost the highest in many years, involving 7,531 workers with a time loss of 60,322 days. Of the nineteen disputes recorded in June, 1938, fourteen were recorded as terminated, four resulting in favour of the employers concerned, five in favour of the workers involved and compromise settlements being reached in five cases. Five disputes, involving approximately 425 workers, were recorded as unterminated at the end of the month. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

Reports were received in the Department of Labour recently from Boards of Conciliation and Investigation in connection with two disputes, one involving the Canadian Press and its mechanics and automatic printer operators and the other involving various coal operators in the Minto district, N.B., and their employees. Four applications for boards were received, two of which were subsequently withdrawn, adjustments having been effected through direct negotiations. Settlements were also reached through the mediation of the Department in two other disputes in which the employees had applied for boards, and the applications were likewise withdrawn. A full account of recent proceedings under the Act commences on page 724. This issue also contains a summary of proceedings under the Act since its enactment in 1907, and during the fiscal year 1937-38.

Statistics of Material Aid Recipients

A continuing reduction in numbers receiving unemployment aid is shown in early figures from the national registration for May. These statistics released on July 12 by the Hon. Norman McL. Rogers, Minister of Labour, showed that 154,000 fully employable persons were receiving non-agricultural material aid in May, 1938. This was a decrease of about 28 per cent from May, 1937, when the number was 214,618. In comparison with the total for April, 1938, a decrease of 8·7 per cent was indicated. Seventy-two per cent of the total of fully employable persons on aid were reported from the 51 cities of over 10,000 population distributing aid.

The decrease shown in these preliminary figures commenced in April, gathering momentum in May. Lowering the winter peak reached this year in March, the decrease was of considerably greater proportions in May than in April.

When totals of all those in receipt of non-agricultural material aid in May were compared with the corresponding month of 1937, a decrease of 21·5 per cent was shown. The total number (including totally unemployable, partially employable and fully employable, together with all dependents of family heads) was estimated to be 579,000 in May, 1938. This was a decrease of 8·4 per cent from April, 1938.

A total of 85,000 farmers (resident farm operators), who, together with their dependents, accounted for a farm population of 382,000 across the country, were reported as receiving agricultural material aid for subsistence. This was a decrease of 2·5 per cent from April, 1938, but an increase of over 27 per cent over May, 1937. Of this Dominion total, 330,000 were in the Province of Saskatchewan, reflecting the effects of the drought situation in that province in 1937. While the Saskatchewan total showed a drop of 1·8 per cent from the previous month, it still showed an increase of nearly 90 per cent from May, 1937.

The preliminary grand total of all classes of persons on material and agricultural aid in May this year was 961,000, a decrease of

6·2 per cent from April and of 7·4 per cent from May, 1937, although persons on agricultural aid included in this grand total had increased by over 27 per cent in the year.

Comparison of Provincial Workmen's Compensation Legislation

The pamphlet on workmen's compensation legislation in Canada, which was issued in pamphlet form by this Department in July, 1937, has been revised recently to include amendments to provincial laws in 1938. In all the provinces there is a state system of collective liability, and there has been an increasing tendency towards uniformity of such legislation in recent years.

Only the main points of the provincial legislation are covered in the analysis. The scale according to which compensation is paid under these laws is set out in tabular form. A summary is given of the provisions of the conventions and recommendations of the International Labour Conference on workmen's compensation for industrial accidents and diseases, and for equality of treatment for national and foreign workers in the matter of such compensation. A comparison is thus made possible between the standards adopted by the Conference and the Canadian statutes.

Income Tax Exemption on Corporation Contributions to Employees' Pension Funds

The Budget provisions as presented to Parliament on June 16 by Hon. Chas. A. Dunning, Minister of Finance, contained an amendment to the Income War Tax Act whereby Canadian companies will be allowed a deduction in respect of lump sum contributions to employees' pension funds covering past years' services of employees, such deductions to be spread forward over a ten-year period.

Referring to this tax change, Hon. Mr. Dunning stated that "the Government hopes that this concession will encourage the present tendency in industry to create pension funds for employees."

Subsequently, the Minister moved the following resolution amending the Income War Tax Act.

"That lump sum payments made in Canada, which sever the funds permanently from the assets of the payor company, for the establishment of superannuation or pension fund plans with a view to providing benefits for employees in respect of past years' services, shall be allowed as a deduction to the extent of one-tenth of such lump sum payments in each of ten successive years, commencing the year in which the payment is made; provided that in the case of superannuation or pension fund plans heretofore established by lump sum payments the said deduction shall commence in the year 1938 and continue thereafter until ten years shall have elapsed from the date of the initial payment."

Re-Organization of Quebec Workmen's Compensation Commission

Changes in the personnel of the Quebec Workmen's Compensation Commission were announced by the Hon. Maurice Duplessis, premier of the province, on July 7. The new appointees are Messrs. Paul Drouin of Quebec, J. L. Labreche, of Montreal; and James N. Doyle, of Lachine, who succeed Messrs. Robert Taschereau, K.C., and O. Sharpe, of Montreal, and Simon Lapointe, of Quebec.

According to the announcement as contained in the Canadian Press, the premier stated that the new appointments were the first step in reorganization of workmen's compensation in Quebec and still to be decided were formation of a medical revision board and appointment of an administrator for the collective compensation funds.

In the news report, the premier referred to the fact that the position of financial administrator had been established under a measure adopted at the last session of the Legislature (LABOUR GAZETTE, May, 1938, pages 504-5) to facilitate the work of the Commission which formerly had "to protect the collective fund and at the same time decide compensation cases."

The premier was further reported as stating that the government was studying two projects for establishment of the medical body and had not yet decided if a permanent board would be set to study all appeals from commission decisions or if a panel would be named from which individual boards might be chosen for each case.

Hon. Peter Heenan appointed Ontario Minister of Labour

On June 14, Hon. Mitchell F. Hepburn, Premier of Ontario, announced that Hon. Peter Heenan, Minister of Lands and Forests, would assume the labour portfolio vacated by the death of the Hon. M. McBride (LABOUR GAZETTE, June, 1938, page 603).

Hon. Peter Heenan was first elected to the Ontario Legislature in 1919 and was re-elected by acclamation in 1923. He resigned his seat in 1925 and was elected to the House of Commons. In September, 1926, on re-election to the Dominion Parliament, Hon. Mr. Heenan was appointed Minister of Labour, a portfolio which he held until 1930. He continued to

sit as a Member of Parliament until he resigned in July, 1934, to become Ontario Minister of Lands and Forests. Mr. Heenan was re-elected to the Ontario Legislature in 1937 and continues to hold the portfolio of Minister of Lands and Forests.

Legislation establishing hours and wages standards in U.S.A.

In the Labour Gazette for August, 1937 (page 838) and for June, 1937 (page 598) reference was made to the introduction of the Black-Connery Bills in the United States Congress which provided for the establishment by centralized federal authority of minimum wage and maximum hour standards in practically all sections of inter-state commerce.

This proposed legislation met with opposition in transit at various stages, particularly as "to the propriety of federal control of wages and hours"; and also in the matter of regional advantages or disadvantages.

Finally, a new Bill—the Fair Labour Standards Act—was introduced, and upon a unanimous report of the joint conference of sixteen members of the Senate and the House of Representatives it was passed on June 14.

The new Act differs materially from either of the previous Bills being less rigid than the House Bill and more flexible than the Senate Bill. It limits the rigid provisions in the former regarding wages to a minimum of 25 cents per hour for the first year, and 30 cents per hour for the second year, and limits the flexibility of the latter Bill by making changes between 30 cents and 40 cents dependent upon their not curtailing employment or giving competitive advantage to any industry.

The administrative provisions of the new Act also differ from both the Bills referred to. The House Bill provided for administration by the Secretary of Labor while the Senate would have placed it under a quasi-judicial Board. The new Act, however, places the administration under an administrator assisted by industry committees having the power to investigate and make recommendations as to the wages to be paid above the fixed minimum.

In broad terms, the new measure as summarized in the *Washington Review*, of June 17 will:

Apply to concerns engaging in interstate commerce and to concerns producing goods for interstate commerce.

Require such concerns to pay minimum wages of not less than 25 cents an hour for the first year, 30 cents an hour for the next six years, and 40 cents an hour thereafter, but at any time after the measure becomes operative special rates may be prescribed by the Administrator for particular fields of business upon the recommendation of industry committees.

Authorize the Administrator to appoint industry committees to recommend the minimum wages for particular fields of business, these rates to be between 25 cents and 40 cents an hour for the first year and between 30 cents and 40 cents an hour thereafter and, when approved by the Administrator, to apply to all concerns within the designated classification of the industry or subdivision thereof.

Require concerns subject to the measure to observe a maximum work-week of 44 hours for the first year, 42 hours for the second year, and 40 hours thereafter.

Permit all employees of such concerns to work longer than the specified maximum work-week on payment of overtime compensation at the rate of at least one and one-half times their regular rate.

Prohibit regular employment of children under 16 by concerns subject to the bill and of persons between the ages of 16 and 18 in occupations held by the chief of the Children's Bureau to be hazardous or detrimental to their health or well-being.

Prohibit movement in interstate commerce of goods produced by employees under conditions not conforming to the applicable requirements respecting wages, hours, and child labour.

Create a wage and hour division in the Department of Labor, this to be under the direction of an Administrator who, in addition to his power to prescribe variable wage rates upon the recommendation of industry committees, would be authorized to prescribe wages for learners and handicapped workers at rates lower than the applicable minimum and to make investigations for the purpose of determining compliance with the measure.

Become operative 120 days after enactment, but industry committees could be appointed at any time after enactment.

None of the provisions of the Act apply to government employees. There are certain classes of employees also exempted from the wages and hours provisions, while others are exempted from the maximum hours provisions only.

Exempted in the first group all employees engaged in all branches of agriculture, employees of retail or service establishments engaged in inter-state commerce, employees or urban and suburban transit companies, etc.

Exemptions from the maximum hours provisions include employees of carriers subject to the Interstate Commerce Act, and employees engaged in the processing of milk and dairy products, and in the processing of sugar beet and sugar cane.

Report on discrimination in employment of middle aged

Reference has been made in the Labour Gazette to the legislative action in the United States against discrimination of workers in employment on account of age. In the issue of June, 1937, page 753, a summary was given not only of the Massachusetts Act (also referred to in the issue of November, 1937, page 1199) but to a reso-

lution passed by the Legislature of New York State creating Joint Legislative Committee to "investigate and study the nature and effect of any economic conditions or statutory provisions which might tend to produce an unfair, inequitable or unlawful discrimination against those men and women who have reached the age of forty or thereabouts in obtaining and retaining gainful and livable employment in public service and private industry."

This Committee has made its preliminary report (Legislative Document No. 75) which was transmitted to the Legislature of the State of New York.

In the preface to its report the Commitee, emphasizing the magnitude of the problem and the short time allotted for its study, stated that it had confined its preliminary investigation to the industrial areas of the State.

As a result of its preliminary study, it reported "three important facts, viz—1st, that discrimination was much more widespread than was first believed; 2nd, that discrimination was practised in virtually all of our industrial areas; 3rd, that the employers themselves brought out for the record several reasons why this situation existed."

As the investigation developed the Committee reached the conclusion "that the middle-aged person has practically no control over this situation except in the case of highly unionized industries; that the problem rests almost entirely in the hands of industry, and that industry itself in co-operation with labour and the various agencies of government should make an intelligent and sincere effort to solve it." It was believed, however, "that industry should be given every opportunity to solve the problem before the pressure of public opinion forces the adoption of measures which might tend to restrict and upset business and thereby create more unemployment among the middle aged than now exists."

In the course of its investigation, the Committee discovered twenty-one alleged reasons for discrimination in the employment of older persons. Many of these alleged reasons are closely related and overlapping, and the Committee discusses each in detail, making certain recommendations under some. But the Committee has been unable to formulate "the long-term program that should be eventually adopted because of the complexity of the problem and the limited time allowed for its study."

The Committee also found that "it is impossible to study the problems of middle aged in industry without considering the problems of youth, and in fact, the whole unemployment situation. Likewise it is impossible to consider the economic phases involved without thought of the social ones. It being a national problem as well as State, it is difficult to divorce one from the other."

In its conclusions, the Committee refers to the Massachusetts Act, forbidding discrimination, and considered that "should it be outstandingly successful over a period of time, it would then behoove the Legislature to give most careful consideration to the advisability of a similar Act in New York State."

Minimum Wage for Beauty Culturists in States of New York and Illinois

On June 11, Mr. Elmer F. Andrews, Industrial Commissioner of New York State, issued Directory Order No. 2 establishing a minimum wage of $16.50 for a 45-hour week in the beauty-culture occupation in that State. The order also provides that overtime be paid at the rate of time and one-half for each hour or fraction thereof between 45 and 48 hours, and double time for any time worked above 48 hours.

Part-time workers are to receive a minimum wage of $4 per day of eight hours or less. If they work more than three days in any one week they shall become full-time workers and shall be entitled to the minimum weekly wage of $16.50. Maids are to be paid $15 for 45 hours.

The order, which is to become effective on August 1, will affect some 16,000 women working as beauticians in 8,000 beauty and barber shops. Its issuance follows public hearings on the recommendations of the Beauty Shop Wage Board held recently in Buffalo, Syracuse and New York City. At these hearings, representatives of employers, workers, and the public strongly urged the immediate establishment of a minimum wage for beauty culturists as a means not only of realizing decent wages, but also of stabilizing the industry.

In Illinois a mandatory order establishes a $16.50 minimum wage for registered beauty culturists and manicurists and for the desk clerks and shop managers in these establishments. It sets a $10 a week minimum rate for apprentices during the first year of training and $12.50 a week during the second. There is a $15 a week minimum for maids. Cleaning women are to receive not less than 30 cents an hour.

Hours and Holidays provisions in Western Australian legislation

The quarterly issue of the *Western Australian Industrial Gazette*, published by the Department of Labour, for the period ending December 31, 1937, gives in detail the amendments and new sections of the Factories and Shops Act 1920-32.

Among the numerous amendments are those providing for limitation of hours, and holidays with pay. As a consequence of the amending section in regard to hours, the working period in factories and shops is limited to 44 hours per week for women and 48 for men, subject to the limitation of overtime for women and boys.

The section requiring the payment of 1 shilling tea money to women and boys employed at overtime in a factory was amended to provide an increase of 6d. for such purpose.

Another amendment provides that all employees in a factory shall be entitled to eight specified holidays on full pay each year; formerly only boys under sixteen years of age and women were entitled to these holidays. In factories, also, the weekly half holiday is now extended to men where formerly it only applied to women and boys.

The Governor in Council is given powers, not contained in the former Act, to make special regulations in respect to any manufacture plant, process or description of manual labour used in factories and deemed to be dangerous or injurious to health or dangerous to life or limb.

That part of the Act dealing with hair dressing establishments contained a new section which prohibits a hairdresser from teaching the trade or business to any person, other than an apprentice bound for at least two years, on the premises in which the business of a hairdresser is carried on. This, it was stated, should tend to eliminate the exploitation of fee-paying pupils in ladies' hairdressing.

Simplified Working Hours Regulations in France

The proposals of the French Government for simplifying, in the interests of national economic recovery, the procedure by which industrial and commercial undertakings are enabled to have recourse to overtime, in order to recover time lost owing to interruptions of work and to deal with unusual pressure of work, have been embodied in a Government decree dated May 24, 1938, which was drawn up after consultation with the Standing Committee of the National Economic Council.

The following paragraphs from the *British Ministry of Labour Gazette* for June, summarize the new provisions as follows:

Where, in an undertaking, time is lost owing to collective interruptions of work, other than those due to labour disputes, the time lost may be made up by extensions of working time during the succeeding twelve months, provided that the interruptions and the method to be adopted for recovering the lost time are notified to the Labour Inspector in advance or, in the case of unforeseen interruptions, immediately afterwards. The effect of this provision of the Decree is to introduce the principle of the yearly unit of 2,000 working hours (i.e., the equivalent of 50 weeks each of 40 working hours) in place of a rigid observance of the weekly unit of 40 working hours.

Permission to work overtime of prescribed amount during periods of unusual pressure of business, which, under the regulations hitherto in force, had to be applied for by the undertakings individually, may now be granted in respect of any branch of industry, either for the country as a whole or for a locality, provided that the extra work cannot be dealt with during normal working hours by the existing staff augmented by the engagement of suitable unemployed workers. The permission is to be granted by the Minister of Labour after consultation with the organizations of employers and workers concerned.

The extended working time permissible under the Decree may not be distributed uniformly throughout the year, and may not, as a rule, exceed the normal working time by more than one hour a day or more than eight hours a week. Employers who avail themselves of the provisions of the Decree may not discharge their regular workers, on account of shortage of work, during the month following the working of extended hours, and must grant priority of engagement to such workers, if discharged after that period, should additional workers of the same occupation be required during a further period of six months. Failure to observe the foregoing conditions will entail the suspension, for not more than one year, of the facilities provided by the Decree. Deviations from the conditions, may, however, be authorized by the Minister of Labour in respect of given industries or given undertakings. In the event of acute and prolonged unemployment in any occupation, the provisions of the Decree may be suspended as regards the occupation affected.

New Director and Deputy Director of I. L. O.

At its 84th session held in Geneva from May 31-June 4, the Governing Body of the International Labour office appointed Mr. John G. Winant, Assistant Director, to the post of Director in place of Mr. Harold Butler, when the latter's resignation takes effect at the end of the present year (The resignation of Mr. Butler was recorded in the May 1938 issue of the LABOUR GAZETTE at page 478). The Governing Body also agreed that the post of Deputy Director should be restored, and the appointment of Mr. E. J. Phelan to the position was announced. Biographical sketches of both appointees as released by the International Labour Office are as follows:

Mr. John G. Winant

John Gilbert Winant, who has just been appointed Director of the International Labour Office was named an Assistant Director of the Office in April, 1935. However, at the request of President Roosevelt he returned to the United States in October of the same year to accept the chairmanship of the newly-created Social Security Board. After his resignation from the Social Security Board late in 1936 he again returned to Geneva as an Assistant Director of the International Labour Office.

Born in New York City, 23rd February, 1889, Mr. Winant attended St. Paul's School in Concord, New Hampshire, and Princeton University. He holds the degree M.A. from Dartmouth and Princeton Universities, and LL.D. from the University of New Hampshire and Knox and Oberlin Colleges.

In 1917, and again in 1923 Mr. Winant served as a Member of the New Hampshire State Assembly; and in 1921, as a Member of the New Hampshire State Senate. In 1924 he was elected Governor of New Hampshire; and his re-election in 1930 broke the one-term precedent for the Governorship that had existed in New Hampshire for more than 100 years. At the expiration of his second term in 1932, he was elected for a third time.

During the World War, Mr. Winant served as a captain with the American Expeditionary Force in France. His services as Chairman of the Textile Inquiry Board during the textile strikes of 1934 won him wide recognition in the United States, as did the services he rendered as Chairman of the Social Security Board in 1935-36.

When the World Textile Conference was held in Washington in April, 1937, Mr. Winant was chosen Chairman of the Conference.

He is Vice-President of the National Playground and Recreation Association of America; Director of the National Tuberculosis Association; Trustee of the International Y.M.C.A. College; and a member of the New England Council of the Boy Scouts of America. He is also a former President of the National Consumers' League.

Mr. Edward Phelan

Mr. Edward Joseph Phelan, former Assistant Director of the International Labour Office, who has been appointed Deputy Director, was born at Waterford, Ireland, in 1888.

He took his B.A. and M.Sc. at the University of Liverpool, and entered the Civil Service, where he became chief investigator at the Board of Trade and then at the Ministry of Labour. During the war he was a member of the British Foreign Office Mission to Russia.

At the Peace Conference in 1919 Mr. Phelan was Secretary of the Labour Section of the British Delegation, and thus has been closely associated from the very first with development of the International Labour Organization. He was successively deputy-secretary of the Organizing Committee of the first International Labour Conference, and principal secretary of that Conference when it met at Washington. On the creation of the International Labour Office in 1920, the late Albert Thomas named Mr. Phelan Chief of the Diplomatic Division; and since 1933 he has been an Assistant Director of the I.L.O.

He is the author of "Yes and Albert Thomas," and of many articles on international problems, such as: "Labour Proposals Before the Peace Conference"; "Unemployment as an international problem"; "The United States and the International Labour Organization"; and "The New International Civil Service."

Twenty-fourth session of the International Labour Conference

Elsewhere in this issue a complete report is given of the proceedings of the twenty-fourth session of the International Labour Conference held at Geneva, Switzerland, from June 2 to 22.

The agenda of the Conference comprised six subjects, five being for preliminary consideration only and will come up for discussion next year. In addition, the Conference has before it for consideration various reports on the functioning of conventions adopted at previous sessions; standing orders and procedure; and a number of draft resolutions on various subjects submitted by members of the Conference.

The Conference adopted a draft convention on statistics of hours and wages in the prin-

cipal mining and manufacturing industries (including building and construction) and in agriculture. This draft convention was completed by the adoption of three Resolutions, viz: (1) concerning statistics of wages and hours of work in agriculture; (2) concerning statistics of real wages; and (3) concerning supplementary statistics of wages and hours of work.

The Conference also adopted certain "conclusions" embodied in reports of committees which contained lists of points on which governments will be consulted before the questions involved are decided at next year's session. These pertained to technical and vocational education and apprenticeship; generalization of the reduction of hours of work; regulation of hours of drivers of motor vehicles, etc. The texts of the Draft Convention and Resolutions, etc., are included in the article reviewing the proceedings of the Conference.

Seniority Principle in Employment Relations

"The Seniority Principle in Employment Relations" is the title of a preliminary study (Report No. 53) recently published by the Industrial Relations Section of Princeton University.

In a foreword to the bulletin, Mr. J. Douglas Brown, the Director of the Industrial Relations Section, considers that the fundamentals for a sound industrial relations policy "resolves itself into an effort to balance security and incentive in affording a better life for all," and continues:

"No practical problem of industrial relations involves more closely this essential need of balance than that of seniority. The application of the seniority principle in time of lay-off is intended to afford security to employees of longer service. But when the same principle is permitted to govern promotions as well, an important limitation is placed on the effectiveness of promotion as a reward and stimulus of incentive. If incentive suffers, both management and labour have less to share. Both employers and trade unions have too much at stake to accept the policy of seniority in promotions without counting the possible costs in productivity and wages."

The subject is discussed under such chapter headings as "Company Employment Policies," "Seniority Provisions in Employee Association Agreements," and "Seniority Provisions in Trade Union Agreements."

In conclusion, the following observations are made:

Seniority is assuming an increasingly important role in the determination of lay-offs, re-employment and promotions. A majority of recent trade agreements, with the exception of those in the clothing industry, contain some provisions for the recognition of seniority rights. These provisions vary from a general acceptance of the seniority principle in employment relations to a strict application of the rule in both promotions and lay-offs. The present trend, however, is apparently in the direction of a more rigid application of seniority. Some companies not operating under trade union agreements have followed this trend by defining their policies regarding lay-offs and promotions and outlining definite seniority rules.

Many problems arise when seniority becomes the controlling factor in lay-offs, re-employment and promotions. In the first place, definite rules are necessary for the administration of seniority covering the following problems:

(*a*) The basis of seniority—by department, plant, occupation, or geographical division.
(*b*) The treatment of men and women employees—whether under separate seniority rosters or in one inclusive list.
(*c*) The treatment of married women.
(*d*) The period of probation before seniority is effective.
(*e*) The period of lay-off during which seniority is still effective.
(*f*) The inclusion of supervisory positions in the seniority provisions.
(*g*) The demotion of supervisory employees to production jobs during slack periods.

Such problems as these must be decided before seniority can be administered. Other problems which eventually arise are the treatment of workers who are permanently displaced by technological improvements or reorganization of the company and the treatment of older workers.

A report of the Committee on the Consumers' Co-operative Movement made by the Montreal Junior Board of Trade has recently been received. The report is "concerned chiefly with the economic aims and achievements of the (Consumers' Co-operative) Movement and does not deal to any extent with the sociological or moral aspects of the subject."

The Committee recommended that "in Canada careful consideration be given to passing a Federal Statute so that co-operatives may be subject to uniform laws throughout the country."

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

DURING the month of June four applications for the establishment of Boards of Conciliation and Investigation under the terms of the Industrial Disputes Investigation Act were received in the Department of Labour as follows:—

(1) From 30 drivers and mechanics in the employ of Mahoney & Rich, Limited, Ottawa, Ontario. Shortly after the application was received the dispute was settled through direct negotiations and the application was withdrawn.

(2) From 20 employees of the Adams Cartage and Storage Company, Toronto, Ontario, being truck drivers, warehousemen, checkers, loaders, mechanics and helpers.

(3) From 12 employees of the Weaver Cartage Company, Toronto, Ontario, being truck drivers, warehousemen, checkers, loaders, mechanics and helpers.

(4) From 17 employees of the Marks Transport Company, Brantford, Ontario, being truck drivers, warehousemen, checkers, loaders, mechanics and helpers. The application was subsequently withdrawn, the dispute having been settled by direct negotiations.

In each of these four cases the cause of the dispute was stated to be the employees' desire to negotiate an agreement respecting wages, hours and working conditions.

Board Established

A Board of Conciliation and Investigation was established by the Minister of Labour on June 13 to deal with a dispute between the Lethbridge Collieries, Limited, and its employees being members of District 18, United Mine Workers of America. Members of the Board were appointed as follows: Honourable Mr. Justice Harry W. Lunney, of Calgary, chairman, nominated jointly by the other Board members, Mr. John W. Davidson, of Lethbridge, nominated by the company, and Mr. Patrick Conroy, of Calgary, nominated by the men. The dispute relates to wages and certain working conditions, approximately 500 employees being directly affected (LABOUR GAZETTE, June, 1938, page 608).

Settlements Effected

The application for a Board received from the red cap messengers in the employ of the Toronto Terminals Railway Company, being members of Canadian Red Cap Messengers Federal Union No. 134 (LABOUR GAZETTE, June, 1938, page 608), was withdrawn on June 18, a settlement of the dispute having been effected through the mediation of officers of the Department of Labour.

An agreement was also concluded, effective June 16, between the Canadian Pacific Railway Company and various classes of its employees at the Britt Coal Dock, Britt, Ont., as a result of conferences brought about through the instrumentality of the Department of Labour. Board procedure was accordingly rendered unnecessary. The employees concerned in this dispute were clam tower operators, land, hoist or crane firemen, hatchmen, cable car trippers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (LABOUR GAZETTE, June, 1938, page 608).

Report of Board in Dispute Between The Canadian Press and Certain of Its Employees

A unanimous report was submitted to the Minister of Labour on June 25 by the Board of Conciliation and Investigation established to deal with a dispute between The Canadian Press and its mechanics and automatic printer telegraph operators, members of Canadian Press System Division No. 52, Commercial Telegraphers' Union. The personnel of the Board was as follows: Professor Norman MacKenzie, of Toronto University, chairman, appointed on the joint recommendation of the other Board members, Messrs. W. Rupert Davies, of Kingston, Ontario, nominated by the employer, and Leonard James Ryan, of Toronto, nominated by the employees.

Seventeen sessions of the Board were held in Toronto between May 30 and June 23. One of the preliminary matters discussed by the Board was the question of the negotiation of an agreement between the employer and the union. As it proved impossible to reach agreement on this, it was waived for the period of the present agreement without prejudice to any future negotiations.

The other points in dispute were:—

(1) the right of the employees to organize and to join a union of their own choice;

(2) the right of the employees to bargain collectively with their employer through the union of their choice;

(3) the negotiation of an agreement between the employer and the employees which would cover wages, hours, conditions of work, seniority and other matters usually dealt with in such agreements;

(4) the employees to be covered by such an agreement; and

(5) the duration of and time at which such an agreement would become effective.

The Board, after hearing evidence from the parties at considerable length, directed its efforts to the drafting of an agreement, in consultation with the parties, covering all of the points in issue. This agreement, which the Board believed to be fair and satisfactory, was accepted by the representatives of the parties "on the understanding that upon its termination or revision, and without prejudice, any matter in it, or any other matter of interest to either of the parties, shall be the subject of full and frank discussion with respect to their inclusion in any subsequent agreement." The agreement was signed before the Board and becomes effective August 1, 1938, subject to the approval of the Board of Directors of The Canadian Press at its next meeting.

Report of Board in Dispute Between Various Coal Operators in the Minto District, New Brunswick, and Their Employees

The Board of Conciliation and Investigation established in December to deal with a dispute between various coal operators in the Minto district, New Brunswick, and their coal miners being members of District 26, United Mine Workers of America, submitted a unanimous report to the Minister of Labour on July 7. The employers concerned in this dispute were as follows: The Minto Coal Company Limited, Newcastle Coal Company, North Minto Slope and Tweedie Mine, Miramichi Lumber Company Limited, Welton and Henderson Limited, W. Benton Evans (Rothwell Mine) and Avon Coal Company Limited. At the time the application for a Board was made it was stated that 925 men were directly affected by the dispute, the cause of which was the companies' refusal to bargain collectively with the representatives of the employees or to recognize the right of the men to belong to the United Mine Workers of America; also the employees' request for increased wages and strict enforcement of the 8-hour day.

The personnel of the Board was as follows: Mr. H. O. McInerney, K.C., of Saint John, chairman, appointed on the joint recommendation of the other two members, Mr. Harold B. Colwell, of Fredericton, appointed by the Minister of Labour in the absence of a recommendation from the employers, and Mr. John S. MacKinnon, of Saint John, nominated by the employees.

The text of the report follows.

REPORT OF BOARD

To the Honourable Norman McL. Rogers, M.P., Minister of Labour, Ottawa.

SIR,—A Board of Conciliation and Investigation under the Industrial Disputes Act was established on December 15, 1937, consisting of H. O. McInerney, Chairman, Harold B. Colwell and James A. Whitebone. On the fourteenth day of February, 1938, Mr. Whitebone resigned, and Mr. John S. MacKinnon was appointed in his stead.

On the third day of January last the Board proceeded to Minto, and on the following day visited some of the mines and a number of houses occupied by striking miners, conversing with miners and their families. We found the houses, some of them very small, comfortably warm, a few almost unbearably hot. Some were clean and sufficiently furnished, others anything but clean and sparsely furnished. Cleanliness, of course, depends largely on the housewife. In some instances all one needed to do was to glance at her in order to understand the filthy conditions of her house. We found a man and wife and four small children in a shack big enough for one fair sized room, but divided so as to provide a tiny bedroom with two cots, on one of which the parents slept, the other was occupied by the four children. Whilst it is true that some of the miners occupy such shacks only for the winter, returning to their native place, often not far away, for the summer months, we are convinced that such shacks should not be rented to miners with a family. They are altogether unsuitable for more than two people, and not specially suited even to a man and wife. The rental is about eighteen cents a week, deducted from the miner's pay. Somewhat better houses across the road, bigger and refreshingly clean, rent for seventy-four cents a week—these consist of four rooms. Other houses, considered a little better, rent considerably higher. None of these company houses has water service. Considering the proximity of the houses and outside conveniences, with no sewerage service of any kind, it is remarkable that epidemics have not been frequent. Many of the miners own their own houses, or rent from others than mine operators. Though about four

thousand people live in the Minto district (the mines are widely scattered and so are the different groups of houses, except in the village), the only water service is provided by artesian or dug wells. There is no sewerage system, there is no hospital service. There are two doctors, and one or two married women, with training, attend to the nursing requirements of the community. Some years ago a small hospital was established. The mine operators say that the miners would not support it, and consequently it could not be maintained, and was discontinued. It is unfortunate that there is not a hospital at Minto. A few of the mines have fair first aid stations, others are not so good, and some have none at all. When the roads are open, an injured man may be moved quickly to hospital at Fredericton or Moncton, but when roads are closed to motor traffic in winter, if a man is injured after the train leaves Minto in the early morning, a special train must be engaged or the injured man must wait until next day to be removed to a hospital. Last spring in a case of a serious injury the patients were removed to Chipman, some fifteen miles away, and from there transported by special train to Hardwood Ridge and thence by a fast freight train to Moncton. The religious requirements of the community are well met. Apart from this, however, the one institution that commands respect is an excellent consolidated school recently built. The Board visited it, finding it well staffed, the pupils neatly dressed and apparently healthy and rugged. We were surprised to find that raw milk is very little used by the miners and their families. Canned milk is used almost entirely.

At about noon of January 5 the Board called upon the principal operators, assembled in the office of Mr. Evans, operator of the Rothwell mine. At first they flatly refused to meet representatives of the miners. At the insistence of the Board, however, they finally agreed to meet at Fredericton, where a meeting took place between the Board, the operators, and Messrs. Morrison and Barrett of Glace Bay, N.S., President of District 26, U.M.W., and International Board member, United Mine Workers of America, respectively, and Mr. W. S. Walker, Secretary of the Local Union. This meeting was held in the Corporation Committee Room of the Legislative Building. The discussion occupied a full day.

Hearing of evidence was set for January 11 and was begun on that date in the Appeal Court Room at Fredericton. The Board is greatly indebted to the Honourable the Attorney General, Hon. Dr. J. B. McNair, and to the Registrar of the Court, Mr. H. Lester Smith, for their kindness in providing us with such fine accommodation. Following such first meeting in the Committee Room, and before the first hearing, the miners returned to work, or at least as many of them as could be taken back. At the present time there are only about forty of the thousand or more miners who were on strike who have not been given work. That these forty odd men have not been taken on may be due, to some extent, to reluctance to engage leaders in the strike, but it is more probably due to the limited operation of the mines consequent on a present low market for Minto coal. We found on our last visit that one of the most productive mines was only working one day a week, and we were told by the operator of the smallest of the mines, the Newcastle, that there had been a large operating loss in April last. Evidence given before the Board at a meeting in Saint John on the 24th day of June, instant, by Mr. John S. Henderson was to the effect that the condition of the mines, due to lack of business, is the worst that he has known in his twenty-seven years' experience there.

The hearings at Fredericton, which began on January 11 last, were continued on January 12 and 13, and thence adjourned to January 18 at Saint John, where, through the courtesy of Mr. W. A. Ross, County Secretary, hearings were held in the Municipal Chamber on January 18, 19, 20, 21 and 22; February 15, 16, 17, 18 and 19. In addition to hearing submissions by the employers and the operators, the Board heard twenty-one (21) witnesses for the employees and twenty-four (24) for the operators.

There were numerous exhibits admitted. Financial statements and cost sheets of the operators were submitted; evidence was given concerning them and the representatives of the employees cross-examined each operator on his statement and cost sheets.

Complaints of Employees

The application for the establishment of a Board of Conciliation and Investigation signed by "D. W. Morrison, President, U. M. W. of A.," and by "Alexander A. McKay, Sec. Treas., U. M. W. of A.," sets out the "Nature and cause of dispute, including any claims or demands by either party upon the other, to which exception is taken," as follows:—

"(1) Refusal of Employers to bargain collectively with the representatives of the Employees.
(2) Claims of employees for an increase in wages.
(3) Claims of employees for the strict enforcement of the eight hour day.
(4) Refusal of Employers to recognize the right of the employees to belong to The United Mine Workers of America."

The complaints as so defined were precisely referred to this Board. The Board was also requested by the Honourable The Minister of Labour to enquire into working and living conditions in the Minto mining field. A great deal of the evidence submitted and the Board's own investigation were directed to the living and working conditions and to wages.

Recognition of U. M. W. of A.

Much of the evidence was as to the recognition or non-recognition of the United Mine Workers of America.

It is obvious from the above four heads of complaint that recognition of the United Mine Workers of America, which, from the first, with the "check off," were declared by the representatives of the employees to be the main points in dispute, were neither claimed in the application, nor referred to this Board. Neither recognition of The United Mine Workers of America, nor the "check off" was really an issue. Notwithstanding, the Board did endeavour during the hearings to ascertain the viewpoint of the employers and employees respectively and the reasons for such respective view points. We found that the representatives of the employees and the witnesses called by them were unanimously for recognition and "check off"; the former mainly on the ground that the United Mine Workers of America is the only organization in the Minto field capable of successfully protecting the interests of employees, because of numbers, influence and financial resources, and because of the great majority of employees in that field being members of the United Mine Workers of America and desiring its recognition. As to the "check off," it was contended by the representatives of the employees that this method of union dues being deducted from the pay of the employees by the employers and paid over to the proper union officials is the only known means of maintaining the union; leaving the payment of dues to the individual members results in large defaults.

The employers, on the other hand, contended that they could not recognize the United Mine Workers of America, because the district officers are all Nova Scotians whose interests lie with Nova Scotia mines which are in direct competition with Minto Mines; because so much of the monthly dues of one dollar, goes out of the Province; namely, fifty cents (50c.) to Washington headquarters, and thirty cents (30c.) to Nova Scotia headquarters of District No. 26, leaving only twenty cents (20c.) for local union purposes; because local unions, called by representatives of the union, and we believe with some reason, "Company Unions" are, especially since the passing by the New Brunswick Legislature of an Act respecting Labour and Industrial Relations, and the regulations of the New Brunswick Mining Act, sufficient to protect the interests of Employees; and lastly, because of what employers believe to be detrimental C.I.O. influence in the U. M. W. of A. There was also suggested a Communistic tendency, largely growing out of C.I.O. influence. To support this suggestion there was submitted a copy of "The Clarion Weekly" bearing date October 16, 1937, in which Lenin, Stalin and Dimitroff are featured, and in which there is a plea in bold type as follows: "We believe the Clarion Weekly deserves the wholehearted support, morally and financially of all progressive, liberty-loving Canadians."

"Signed: Executive Officers District 26, United Mine Workers of America; Silby Barrett, International Board Member; D. W. Morrison, President; Angus McEachern, Vice-President; Alex A. McKay, Secretary-treasurer."

There could not be said to be any other evidence of the alleged trend to communism. On the other hand, the constitution of United Mine Workers of America, which was received in evidence, provides, pp. 48 and 49, that any member accepting membership in the communist party shall be expelled from the United Mine Workers of America.

At one session of the Board the representatives of the employees agreed to abandon the demand for the "check off" should the employers consent to recognize the United Mine Workers of America. This, however, the employers all declined to do.

It will be readily recognized that there is a vast difference between recognition of the United Mines Workers of America and complaint No. 4, viz: Refusal of employers to recognize the right of the employees to belong to the United Mine Workers of America. The latter right could not in recent times, at any rate, be denied, and most certainly cannot now be denied in this province. The men may "belong" to any union. "The right of employers and employees to organize for any lawful purpose is hereby recognized," Sec. 5, Part 2, "An Act Respecting Labour and Industrial Relations," N.B. This we feel disposes of complaint No. 4. The men are, as they should be, free to join any union, including the United Mine Workers of America. The statute does not compel recognition of any one union to the exclusion of others, nor does it compel collective bargaining with officials of any union as such. By Section 6, Part 2, of the above Act: "It shall be lawful for employees to bargain collectively with their employers and to conduct such bargain-

ing through representatives of employees duly elected by a majority vote of the employees affected."

By Section 7 of such Part 2, it is declared unlawful for employers to make it a condition of employment, or to continue any such then existing condition, which tends to restrain any employee or employer from exercising his right under this Act."

Local Unions

This Act, as the Board views it, would not, when applied, regard the Minto district as a whole, but each mine as a unit. The result is, that if there existed, as there does exist at the Miramichi, Newcastle and Rothwell mines, individual unions, called respectively, the Miramichi, Newcastle and Rothwell unions, all formed since the beginning of the Minto strike, and these comprised, as we believe they do in those mines, a majority of the miners, their vote would be a majority vote and their representatives would be the ones to bargain with their respective employers not, for instance, the representatives, say of all three unions, with any single employer.

We are bound to say, however, that whatever may be advanced for such local unions we are convinced that they were organized if not by, at any rate, on behalf of the employers and that they are not sufficiently strong, numerically or financially, properly to advance the cause of the men. For instance, we had reason to conclude on our last visit to Minto that the Newcastle union is not really functioning. The dues are low and the membership, whilst constituting a large majority of the men employed in those mines, is small. Should a strike become necessary in the interests of the men we feel that it could not be supported for any length of time. Not that we are advocating strikes. The best labour men are opposed to them except as a last resort. But that last resort may be the only one left to the men. At the same time we cannot recommend, first because we were not asked to and, secondly because we are not authorized to, compulsory recognition of the United Mines Workers of America.

Complaint No. 1—Collective Bargaining

Further as to complaint No. 1, we find no evidence that, down to the time of the strike, employers refused to bargain collectively with representatives of the employees, excepting with representatives of the United Mine Workers of America. And there can be no doubt that there was what is tantamount to refusal to bargain with them. The employers would have nothing to do with the United Mine Workers. Perhaps if there had been a little more diplomacy used by the employers just before the strike that instrument so damaging to employers and men alike might not have been used. We think that the officials of the United Mine Workers of America did make honest endeavour to meet the employers but were not successful. Of course, recognition would likely have been the issue at such a meeting and the employers, being adamant in refusing this, a conference might well have failed. We do feel, however, that there should have been a conference. The men were surely not to blame for its not having taken place.

Complaint No. 2—Wage Increase

As to complaint No. 2, viz: "Claims of employees for an increase in wages."

Most of the witnesses on both sides thought their wages should be higher. With this the operators agree, but say they are unable to grant any increase. Indeed information reached the Board that very recently one operator gave his men the option of decreased time or decreased wages. The evidence of one operator at a special meeting of the Board on June 24th instant, and of the Financial Secretary of Local 7409, U. M. W. of A. at Minto, confirmed this, and also that, with the consent of said Financial Secretary, lower wages were accepted by the men concerned (said to be a small number) because of alleged special conditions. This operator has since advised us by letter that even with such reduction the men so reduced receive ten cents per ton more than they had received before the strike and that his other employees receive twenty cents more per ton than they had received before the strike. One of the bigger mines was, as already remarked, at the time of our last visit, operating only one day a week. All the mines are operating on short time. The summer season is the slack season at Minto. But the present season is unusually poor and the wages are low, especially considering the dangerous and difficult work which miners have to do. The men receive considerably less than they did in 1929. According to Report No. 20, "Wages and Hours of Labour," issued by the Department of Labour, Canada, with the exception of Saskatchewan in some few instances, the men at Minto mines in the year 1936 were paid less than mining men in any other part of Canada, very much less than the men who are similarly employed in Nova Scotia, Alberta and British Columbia.

The strike did not help matters. It necessarily resulted in a considerable loss, and for this the men must suffer with the operators. Perhaps this is as good a place as any

to say that there should not have been a strike at Minto last year. There was just no excuse for it. But it happened and the loss to all concerned was heavy. Subject to what has already been said, both the operators and the leaders of the men must share the blame and both the operators and the men have suffered by reason of the strike.

From the evidence submitted to us, we are convinced that for the past few years, the Minto mines have been making very little if any, money. Indeed some of the mines have been operating at a loss. Many employees recognized this and would not demand higher wages. The representatives of the employees did not press this demand after they had heard the evidence. They do contend, however, and the Board is inclined to agree, that the situation is in some measure due to the operators themselves.

Operators' Lack of Co-operation

Though the operators are organized into an association, there does not seem to be any real co-operation among them. They did not give the Board the impression of their having full confidence in one another. There is no central selling agency. Each operator seems to be his own salesman. And there has undoubtedly been price cutting. Very lately, one operator quoted coal at a price lower than the prevailing Minto price, and the price agreed upon by the operators; which, in all conscience, was low enough. The evil consequences of such tactics is, necessarily,—lower wages. Disunion seems to prevail at Minto, and obviously, it does not work satisfactorily for either the operators or their employees.

High Cost of Operating

Whilst this lack of co-operation, contributing to the low price of Minto coal, and possibly to the limited market, is undoubtedly a factor, it is not by any means the controlling factor. The cost of operation is high, because of the thinness of the seam. The coal has a considerable sulphur content. But there is ample evidence that Minto coal is used for commercial and domestic purposes, and is suitable for use on locomotives. The Board feels that, in the interest of the operators, and the thousand to twelve hundred men normally employed in the Minto industry, not to speak of those in other businesses and industries both at Minto and elsewhere in the Province, whether as employers or employees, the consumption of Minto coal by Public corporations should be much greater than it has been. That the price paid by the railways for instance, is inadequate, is beyond question. And this price pretty well regulates the prices elsewhere. But if the tonnage taken by the railways for use by them in this Province were increased to any appreciable extent, the industry might be made a paying one. Increased business should mean increased wages. Competition with Minto comes mainly from Nova Scotia mines where the industry is better organized and where the seams are much thicker. Coal there can accordingly be mined more cheaply than at Minto. It consequently finds a readier market. There was evidence that a Nova Scotia government assisted mine delivered coal to a Company just out of Saint John at a price less than the cost of Minto coal f.o.b. cars, at Minto. This is a condition which, as between these two Provinces, should not prevail. Were the Nova Scotia mine an unaided mine, the case would be entirely different. A strange feature is that, according to "Coal Statistics for Canada," the average price per short ton of coal at the Nova Scotia mine in question is higher than that prevailing at New Brunswick mines, except in case of slack coal, where the Nova Scotia coal has only a small fractional advantage.

C. N. R. and Minto Coal

Where the consumer is a public corporation, such as the Canadian National Railways, there seems to be just ground for complaint that the coal used by the Canadian National Railways in New Brunswick is not New Brunswick coal. True, some of it is; in 1936, roughly; one hundred and one thousand eight hundred and nineteen (101,819) tons. In the same year, the Canadian National Railways used in New Brunswick one hundred and nineteen thousand (119,000) tons of Nova Scotia coal. In a word, it used in this Province, during 1936, over seventeen thousand tons more of Nova Scotia coal than of New Brunswick coal. In 1937, the Canadian National Railways used in New Brunswick within a few hundred tons of twice as much Nova Scotia coal as New Brunswick coal. (The Minto strike was probably to some extent responsible for New Brunswick's low tonnage in 1937), whereas in neither year was one pound of New Brunswick coal used by the Canadian National Railways in Nova Scotia.

So that whilst this Board does not share the fears of the Minto Operators as to danger to them from Nova Scotia influence in labour matters there is some excuse for their wariness.

The above figures are taken from the evidence of Mr. R. C. Vaughan on April 27, last, before the House of Commons Committee on Railways and Shipping.

Mr. Vaughan said, at page 66 of Minutes of Proceedings and Evidence, No. 2:

Mr. Vaughan: "There have been complaints from some of the mines in New Brunswick that we are not buying sufficient coal from their mines, but five of those mines are located on the line of the Canadian Pacific Railway and only two on our line. Naturally we prefer to buy our coal from mines on our own line, although we do buy quite a little coal from mines on the Canadian Pacific Railway in New Brunswick. As a matter of fact notwithstanding that most of these mines are located on the C.P.R. in New Brunswick, I think we use more of their coal than the C.P.R. uses."

"In connection with these figures I should like to make an explanation: The New Brunswick mines were on strike for about three months from about the beginning of October last year and the strike was not settled until January. So they lost quite a substantial tonnage of coal."

Why not then, purchase some coal from the mines situated on the Canadian National Railways line for use in Nova Scotia, as well as from Nova Scotia mines on Canadian National Railways lines for use in New Brunswick? And why not some for use in Ontario?

The matter of price can scarcely enter into it, as, though the Committee was not informed as to the Nova Scotia price, we have the New Brunswick price. Mr. Vaughan said at page 67: "In connection with the coal we produce ourselves and the cost of the coal in Nova Scotia, there is an average difference of $2.50 in the price."—Mr. Heaps: "per ton?" Mr. Vaughan: "Yes."

Government Assistance

As to government assistance, that given in subvention and freight rates to Minto coal is almost infinitesmal as compared to that given to Nova Scotia coal. The increase in freight rate assistance to Nova Scotia and New Brunswick coal 1933 to 1936 inclusive is reflected in the increase of shipments of railway coal from Nova Scotia and New Brunswick in those years namely: Nova Scotia coal 171 per cent, New Brunswick coal 7 per cent.

Surely there is need for some revision. And when it is made, it should, we admit, be made permanent by legislation, and not as subject to change, as it is now, by order in council.

We realize that freight rates are sensitive, and not to be lightly interfered with. Instead, the purchase by public and publicly controlled or owned bodies, of New Brunswick coal for use in New Brunswick would be preferable. That, we feel, would go far to improve the situation of employers and employees alike.

Complaint No. 3—The Eight Hour Day

As to complaint No. 3, for the strict enforcement of the eight hour day. This, as well as working conditions generally, is covered by the New Brunswick Mining Act and amendments, including those passed at the 1938 session of the legislature. The mining inspector has increased authority thereunder, but he must have support.

There have been in the past, violations of the eight hour day—possibly there still are; but we feel they are infrequent. The men themselves, in an effort to earn more money, are apt to be willing violators.

Likewise, they sometimes make it difficult to enforce other regulations intended for their benefit, such as some we have suggested, and which have been complied with by the foreman.

Safety devices are often not to the liking of the men. They must be protected against themselves, and are apt to rebel. We found, for instance, that explosives and detonators are carried in separate containers, only in rare instances. This notwithstanding the imperative obligation of the Mining Act so to carry them.

Whether, when suitable containers are supplied, they will be charged to the men by rental or otherwise, remains to be seen.

It is the view of the Board that they should not be so charged. It seems a hardship that the men should be charged for picks, sharpening of picks, (when not shapened by the miners themselves), rubber suits, boots and hats, where these latter are necessary by reason of wet places. The men have little enough for food and clothing for themselves and their families, after deductions for explosives, fuses, detonators, headlamp rental, house rental, coal and trucking, without being compelled to pay for protective clothing rendered necessary in the few instances where they are required, by the condition of the places to which they are assigned.

The Operators say, if these articles were supplied free, they would not be cared for in the same way as when the men have to pay for them; which, whilst probably true, scarcely justifies the practice.

Summary

We recommend (though aware that some of these recommendations cannot be directly implemented by Dominion authority):

1. That a small hospital should be established at Minto. This can scracely be done, however, without Dominion and Provincial Government assistance.

2. That First Aid Equipment should be standardized, insisted upon, and inspected regularly by the Deputy Mining Inspector. Except at two mines, first aid equipment is lamentably lacking.

3. That Housing conditions should be improved. We feel that Public Health Officials should give immediate and periodic attention to conditions in the Minto mining field.

4. That safety devices, such as shaft gates, separate containers for explosives and detonators, drain coverings, self closing air doors; a bell, in addition to a light, warning of approaching boxes; and, in some cases, better means of ventilation, should be provided and much more rigidly insisted upon.

5. That tools (except handles), rubber suits and rubber boots where required, and headlamps should be supplied by the Operators free of charge to employees.

6. That inspection of coal at the mine head should be stricter. At one mine we found this inspection and grading satisfactory, but feel that generally, better graded coal would find a better market.

7. That there should be a central selling agency established by the Minto Operators.

8. That the Dominion and Provincial Governments endeavour to use more New Brunswick coal in this Province, and to see that more is used by Public Corporations and institutions in New Brunswick.

9. That Canadian National Railways should not only use more New Brunswick coal in New Brunswick, but that the price paid per ton should be higher than it has been. Minto is not asking and does not require governmental charity, but public purchasing departments might well give it a fair share of public business, and at a more equitable price than has obtained. The result of their keeping down the price reflects itself in the low price paid by other consumers, and in the wages of the miners.

All of which is respectfully submited.

Dated at Saint John this fifth day of July, A.D. 1938.

(Signed) H. D. McInerney, Chairman, Minto Board.

(Signed) John S. MacKinnon, Member of Board.

(Signed) Harold B. Colwell, Member of Board.

Annual Report on Mining in Quebec in 1936

According to the annual report of the Quebec Bureau of Mines for the calendar year 1936 which has just been received, an all-time record in the value of mineral production was reached in that year. The value of mineral production was $49,755,985 or 27 per cent higher than in 1935 when the value of production was $39,141,734 and 7 per cent above the previous peak of $46,454,820 attained in 1929.

Employment.—The number of men employed in the mining industry of the Province during 1936 reached a new high figure of 17,646, an increase of 14 per cent compared with the previous year.

The total number of working days for all employees was 3,978,740 which is equivalent to the work of 13,262 men each employed for 300 days, the "standard" year adopted by the Bureau of Mines for statistical purposes.

Wages.—Wages paid to workmen in the mines and quarries of the Province amounted to $13,970,672 as compared with $11,136,456 in 1935. Workmen in mines received $11,868,497 and those in quarries $2,102,175 which figures compare respectively with $8,978,308 and $2,158,148 in 1935. Including both mines and quarries, the average wage earned by a 300-day workman was $1,053, compared with $983 in 1935.

Accidents.—Accidents to employees in all mines, quarries, and annexed plants caused 19 deaths and 915 injuries of over seven days' disability. For the total number of accidents, the rate per thousand workers on the 300-day basis was 70·4. In mines, proper, the report states, the rate was higher in 1936 than in 1935 but in quarries it was substantially the same as in the previous year.

Of the 19 fatal accidents, only one occurred in the quarries group, and two in annexed plants. "Fall of person" ranked first among the causes of fatalities in and about the mines. "Handling of explosives" and "haulage" were second as a cause, each accounting for three deaths. Fatal accidents occurring in the course of blasting have headed the list for the two preceding years, the report states.

The report also outlines the accident prevention activities carried on in the Province by associations and companies.

SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

THE tables presented below summarize proceedings under the Industrial Disputes Investigation Act for the fiscal year ending March 31, 1938, and from March 22, 1907, to March 31, 1938.

The proceedings under the Act during the fiscal year 1937-1938 include three cases in which proceedings had taken place during the preceding year. On March 31, 1938, results were still pending in connection with five applications.

I.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1937, TO MARCH 31, 1938

Industries affected	Number of applications for Boards	Number of Boards established	Number of strikes not averted or ended

* Including five cases carried over from preceding year.
† Three boards dealt with two, three and five applications, respectively.

In the annual report on the operation of the Factories Act in the United Provinces, India, during the year 1936, weekly hours of work in nine factories in the non-seasonal category were reported as being not more than 42, and in 48 factories they were above 42 but not more than 48 hours. The weekly hours of 266 factories were above 48.

In the category of seasonal factories, the weekly hours of 15 factories were not more than 48 and in 15 factories they were above 48 but not more than 54 hours. The weekly hours of 160 factories were above 54. It is stated in the report that the majority of factories worked to the full limits permitted under the Act.

Technical Progress and Unemployment by Emil Lederer, is the title of a report published by the International Labour Office in its series of studies and reports of employment and unemployment.

The study analyses the effects of technical progress on the labour market and on the dynamic economic system and is a sequel to a theoretical analysis published by the same author in 1931. The report is divided into eight chapters under the following headings: Various forms of technical progress; The Concept of Technological Unemployment; Increasing and Diminishing Returns; The Equilibrium of the Labour Market; Effects of Technical Progress on the Economic System in general and on the Labour and Capital markets in particular; Elasticity of Modern Monetary Systems and its Implications; Technical Improvements and the Business Cycle; The Special Case of Capital-Saving Technical Improvements.

In a summary at the beginning of the report, the author states that "The purpose of this book is to study the phenomenon of technical progress in its various forms and effects, especially in its effects on unemployment and on the formation of capital."

CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM APRIL 1, 1938, TO JUNE 30, 1938

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation Officer are at Ottawa.

The following statement covers the more important conciliation matters dealt with during the period April 1, 1938, to June 30, 1938. (An article covering the period October 1, 1937, to March 31, 1938, appeared in the Labour Gazette, April, 1938, page 375.)

Crews of Whaling Vessels, Victoria, B.C.—Details of a dispute involving the Consolidated Whaling Corporation, Limited, Victoria, B.C., and the Inland Boatmen's Union of the Pacific which remained unterminated at the end of March were given in the April, 1938, issue of the Labour Gazette at page 377. This case concerned the renewal of an agreement in which union recognition was a factor. While willing to continue the same wages and conditions as prevailed in 1937, the company had refused to sign an agreement with any union though it did not object to union membership on the part of its employees. The company proceeded to engage a crew for its supply ship *Gray* which were not members of the Inland Boatmen's Union. A departmental conciliation officer visited the company president at Seattle who promised to confer with his local officials in Victoria, and notify the department of any decision. Under date of April 7 the Department was advised that the 1937 agreement of the Inland Boatmen's Union with the Consolidated Whaling Corporation, Limited, was then in operation on the Company's whalers and the tender *Gray*, and that the crew on the *Gray* had been replaced by members of this union.

Shipyard Workers, Saint John, N.B.—In the April issue of the Labour Gazette an account was given of mediation carried on by a departmental officer in connection with a wage dispute between the Saint John Dry Dock Company, Limited, Saint John, N.B., and various groups of its employees. The efforts of the mediator resulted in a settlement with all groups with the exception of the machinists who, at the end of March, were still insisting upon a larger increase in wages than that accepted by the other groups, and on union recognition, which points the employers would not concede. Early in April, however, representatives of the machinists signed an agreement which granted union recognition and provided a wage increase identical to that granted to the other employees.

Cartage Service Employees, Drummondville, St. Hyacinthe, Montreal, P.Q., Brantford, Guelph and London, Ont.—In February, the President of the Canadian Brotherhood of Railway Employees advised the Department of Labour that the General Manager of what is known as the Pick-up and Delivery Service of the Canadian National Railways, who is also General Manager of the Canadian National Express Company, declined to negotiate, in respect to wages and working conditions, with the general committee representing the employees in this service on the ground that the committee were not employees of the P. and D. Service, notwithstanding the fact that the employees had authorized the committee in question to represent them in negotiations. Following an exchange of correspondence between the Department of Labour and the General Manager a conference took place in the offices of the Department at Ottawa, and subsequently the matter was discussed with the President of the Canadian Brotherhood of Railway Employees, of which organization the majority of the employees affected were members. As a consequence it was arranged that a committee drawn from the P. and D. Service in Montreal would negotiate with the General Manager, and the conferences which followed resulted in a settlement, an agreement being signed on June 29.

STEVEDORES, CHECKERS, SEALERS, ETC., PORT ARTHUR AND FORT WILLIAM, ONT.—On March 12, 1938, an application for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was received in the Department of Labour on behalf of approximately 300 stevedores, checkers, sealers, coopers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employed by the Canadian National Railways at Port Arthur, Ontario. On the same date an application was received as well from the same classes of workers, stated to number 600, employed by the Western Stevedore Company, Fort William, Ontario. The disputes in both instances related to the employees' request for increased wages and changed working conditions. The applications indicated that no negotiations had taken place between the parties immediately concerned, and efforts were made by officers of the Department to bring about proper negotiations for the purpose of solving the issue, if at all possible, without the necessity of Board procedure. Early in May, however, there being no indication that definite arrangements had been made by the employing Companies for conferences to this end it was decided to proceed with the establishment of a Board. In the telegrams advising the Companies of the establishment of the Board their attention was drawn to the fact that the Department had taken action looking to a joint conference between the interested parties in the hope that a direct settlement could be effected before the Board was finally constituted. Negotiations followed, and as a consequence a direct settlement was made.

COAL MINERS, DRUMHELLER DISTRICT, ALTA.—On April 4, 1938, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with differences between certain coal mine (lignite) operators in the Drumheller district and their employees, members of District No. 18, United Mine Workers of America. The application (which was submitted on behalf of the operators concerned, namely, the Alberta Block Coal Company, Ltd., the Atlas Coal Company, Ltd., the Brilliant Coal Company, Ltd., the Elgin Coal Company, Limited, the Empire Collieries, Limited, the Hy-Grade Coal Company, Ltd., the Maple Leaf Minerals, Ltd., the Midland Coal Mining Company, Limited, the Monarch Coal Mining Company, Limited, the Murray Collieries, Limited, the Newcastle Coal Company, Limited, the Red Deer Valley Coal Company, Ltd., the Rosedale Collieries, Limited, the Star Mines, Ltd., and the Western Gem and Jewel Collieries, Limited) stated that negotiations respecting wages and working conditions had not resulted in an agreement. The miners had requested, among other things, a 20 per cent wage increase and shorter working hours, and the operators had countered with a proposal for a 10 per cent reduction in wages and the maintenance of the 8-hour day then in effect. Officers of the Department of Labour had assisted in the negotiations prior to the making of the Board application, and their proposals with respect to a number of clauses had been accepted by both parties. These officers continued to mediate but as an agreement could not be reached on certain important clauses and as neither side would recede from its position in regard to wages a Board was established on April 14. The application stated that 2,500 miners were affected by this dispute.

COAL MINERS, ALBERTA AND SOUTHEASTERN BRITISH COLUMBIA.—On April 5, 1938, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between various coal mining companies, members of the Western Canada Bituminous Coal Operators' Association and coal miners, members of District No. 18, United Mine Workers of America. This association is composed of the following coal companies operating in Alberta and southeastern British Columbia: the Crow's Nest Pass Coal Company, Ltd., at Fernie and Michel, B.C., the Mohawk Bituminous Mines, Ltd., at Bellevue, Alta., the West Canadian Collieries, Ltd., at Bellevue and Greenhill, Alta., the Hillcrest Collieries, Ltd., at Hillcrest, Alta., the Canmore Mines, Ltd., at Canmore, Alta., the Brazeau Collieries, Ltd., at Nordegg, Alta., the Cadomin Coal Company, Ltd., at Cadomin, Alta., the Luscar Collieries, Ltd., at Luscar, Alta., and the Mountain Park Coal Company, Ltd., at Mountain Park, Alta. The application, which was made jointly by the employers and the miners, stated that the dispute arose out of the termination, on March 31, 1938, of the existing wage agreement and the failure of the parties thereto to agree on certain terms of a new contract covering all mines. It was stated that 2,600 miners were affected by the dispute. The employees' principal requests were for an upward revision of 20 per cent in all datal and contract rates and for shorter working hours, while the employers, on the other hand, proposed a reduction of 10 per cent in all rates with no change in the hours of work. Conciliation officers of the Department of Labour, upon being advised of the failure of negotiations between the parties directly in-

volved, submitted proposals regarding certain general clauses of the new contract upon which no agreement had been reached. They were unable, however, to bring about a satisfactory settlement in respect to the general clauses of the agreement and as neither side would make any concession in regard to wage rates a Board was established on April 14.

Automotive Transport Workers, Ottawa, and Toronto, Ont.—On April 20, 1938, a representative of the employees of Motorways, Limited, operating between Ottawa and Toronto, advised the Department of Labour that negotiations with this Company respecting wages and hours were deadlocked and that unless a satisfactory solution of the dispute could be found an application would be made for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The majority of the employees, numbering approximately 60, were stated to be members of the Automotive Section of the Canadian Brotherhood of Railway Employees. Following this advice, a conference was held in the offices of the department at Ottawa with officials of the company, and it was learned that these officials were unwilling to sign the proposed agreement or to make any concessions whatever. An application for the establishment of a Board of Conciliation and Investigation was filed with the Department on April 29. Following this a further conference took place with the manager of the company, who questioned the right of the applicants to make this application on the ground that they did not represent the majority of the employees affected. At the end of June this particular point was being investigated.

Red Cap Messengers, Toronto, Ont.—In the latter part of April the secretary of the Canadian Red Cap Messengers' Federal Union No. 134 advised the Department of Labour that the management of the Toronto Terminals Railway Company had not complied with the union's request for a meeting to discuss the employment conditions of the messengers, and it was intimated that an application would be made for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. Joint conferences, arranged through the conciliation service of the Department of Labour, progressed favourably until June 1 when negotiations were broken off, the company refusing to make concessions in regard to wages and such related matters as overtime and holidays with pay. A formal application for the establishment of a Board of Conciliation and Investigation to deal with the dispute was received in the Department on June 4, but further mediation by the departmental officer resulted in a satisfactory temporary adjustment of the issue, and the Board application was withdrawn on June 18. Seventy-seven employees were said to be directly affected by this dispute.

Automotive Transport Workers, Ottawa, Ont.—Early in May the President of the Canadian Brotherhood of Railway Employees requested the assistance of the Department of Labour in bringing about a conference with officials of six automotive transport companies operating out of Ottawa, namely, the Taggart Service, Limited, the Ottawa Transportation Company, the Alexander Transport, the Duncan Transport, the Jackson Building Storage Company, Limited, and the Shepard Service, to discuss an agreement respecting wages and working conditions covering certain of their employees, members of the above mentioned Brotherhood. It was stated that efforts on the part of the Brotherhood to negotiate an agreement had not been successful and it was intimated that if the matter were not settled applications would be made for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act. On May 27 officials of the Department of Labour discussed the matter with representatives of the Companies mentioned, and on June 2 a further conference took place, participated in by officials of the Brotherhood. It was agreed that the representatives of these Companies would approach certain other interested employers and that any further negotiations should take place between the parties directly affected.

Automotive Transport Workers, Ottawa, Ont.—On May 11, 1938, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute regarding wages and hours of employment between the United Delivery, Limited, Ottawa, and its truck drivers and helpers, members of the Automotive Section, Canadian Brotherhood of Railway Employees. Subsequently departmental officers conferred with the manager of the company with a view to finding a basis of settlement, and later on a joint conference was held in the offices of the Department for the same purpose. The manager undertook to give further consideration to the matters at issue, but later on he informed the Department that the proposals which had been made on behalf of the employees were unacceptable to the company, and at the same time he challenged the right of the applicants to make this application on the ground that they did not represent the

majority of his employees in these classifications. At the end of June this latter phase of the dispute was the subject of investigation. Twenty-three employees were stated to be affected by this dispute.

RAILWAY EMPLOYEES, BRITT, ONT.—On May 26, 1938, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act from clam tower operators, riggers, land hoist or crane operators, clam firemen, power house firemen, land hoist or crane fireman, hatchmen, cable car trippers, trestlemen and coal handlers, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employed by the Canadian Pacific Railway Company at the Britt Coal Dock, Britt, Ont. The application stated that 70 employees were directly affected, and 100 indirectly. It was further stated that an agreement had been reached with the employers as to working conditions but that the matter of wages for these classes remained unsettled. A departmental officer interviewed representatives of the workmen and officials of the Railway Company, and as a result of his mediation a settlement was reached and an agreement signed on June 16.

MACHINISTS, OTTAWA, ONT.—In the latter part of May the Grand Lodge Representative of the International Association of Machinists advised the Department of Labour that he had been unable to negotiate an agreement respecting wages and working conditions of machinists, members of that Organization, employed in three machine shops in the City of Ottawa, namely, the Alexander Fleck Company, Limited, the Victoria Foundry Company, Limited, and the McMullen Perkins Company, Limited, and he requested the assistance of the Department in bringing about a joint conference. On June 3 officials of these Companies called at the offices of the Department of Labour and discussed the matter. Their view was that there were other firms in the city which should be included in any agreement reached, and they agreed to make the necessary contacts to this end. At the end of June the matter was still before the Department.

STEEL WORKERS, TORONTO, ONT.—In the latter part of May an official of the Steel Workers' Organizing Committee, Amalgamated Association of Iron, Steel and Tin Workers, complained to the Minister of Labour that the management of the International Metal Industries, Limited, Toronto, Ont., was discriminating against certain of their steel workers, members of this Association. It was stated that a number of employees had been dismissed, allegedly because of their union affiliation, and request was made that an officer of the Department should visit Toronto for the purpose of bringing about a settlement. It was stated in the communication that officials of the Ontario Department of Labour had been unable to adjust the difficulty. On June 20 officers of the federal Department of Labour, in co-operation with an officer of the Provincial Department of Labour, conferred, in Toronto, with the manager of the Company. The manager's attitude was that no discrimination or intimidation had been practised by the Company and that the men, who allegedly had been dismissed because of their union activities, were actually laid off to reduce staff and included both union and non-union employees. It was ascertained that of the 11 men who had been laid off, 8 had since been taken back, and the manager stated that the remaining three would be re-employed if and when conditions warranted.

STREET RAILWAY EMPLOYEES, OTTAWA, ONT.—At the request of a committee representing employees of the Ottawa Electric Railway Company, members of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, a conference was held in the Department of Labour on June 1st relating to the employees' request for improved working conditions and increased wages, it being stated that negotiations with the Company to this end had reached a deadlock. A few days later the situation was discussed with officials of the Company, and at the end of June the matter was still under consideration.

SEAMEN, CORNWALL, ONT.—On the morning of June 5 trouble developed at Cornwall involving the crews of the ss. *Damia*, then in the locks at that point, and the ss. *Red Cloud*, as a result of which traffic in the canal was completely blocked. A departmental officer at once proceeded to Cornwall, where he learned that the trouble was due to action taken by members of the Canadian Seamen's Union on the alleged ground that members of this Union were being discriminated against contrary to an undertaking given by the owners of these boats in Toronto on April 17, 1938, which had settled strikes which had occurred on certain ships at that time. On June 4 three members of the crew of the ss. *Red Cloud* had been discharged at Montreal, allegedly because of their union affiliation, and the following day the crews of these two ships were removed, allegedly by force, while the *Damia* was in the locks at Cornwall and the *Red Cloud* waiting to enter. Steps

were taken by the Department of Transport to permit traffic to proceed, and as a result of negotiations carried on by the concillation branch of the Department of Labour it was agreed that the Minister of Labour should institute an investigation into the allegations made. Mr. E. McG. Quirk, Eastern Representative of the Department of Labour at Montreal, was appointed a Commissioner for this purpose. The agreement provided, on the part of the Companies involved, namely, the Mohawk Navigation Company, Limited, the Inland Lines, Limited, and the North American Transports, Limited, for the reinstatement of the three members of the crew of the ss. *Red Cloud* should the investigation show that they had been wrongfully discharged, that no discrimination would be shown against union members, and for the rectification, so far as might be possible, of any injustices done to members of the crews. The Canadian Seamen's Union, on its part, agreed that officials and members of the Union would not discriminate against the ships of these Companies and would not intimidate or coerce any members of the ships' crews who were members of some other union or of no union.

Mothers' Allowances and Child Welfare in Nova Scotia and Saskatchewan

Nova Scotia

The eighth annual report of the Director administering The Mothers' Allowances Act of Nova Scotia summarizes the activities and expenditures under that legislation during the fiscal year ending November 30, 1937, and also contains a statement of an estimate of the amount required for the operation of the Act during the ensuing year.

The total amount paid in Mothers' Allowances during the period reviewed by the report was $389,211.92, this amount being paid to 1,260 families with 3,682 dependent children under sixteen years of age. Compared with the six previous years, the record indicates successive increases both in families assisted and allowances paid in the year previous, there being $363,981 expended in assisting 1,222 families with 3,630 dependants. The average monthly amount paid to each family has also increased from $28.69 in the fiscal year 1935-36 to $29.61 in the year reviewed by the present report. The Director attributed this increase to the increased cost of living.

Commenting on the increasing number of beneficiaries the Director's report states that: "There is undoubtedly a growing tendency on the part of all widows left with young children to apply for assistance under the Mothers' Allowances Act. It seems to be taken for granted by almost every one that widows, simply because they are widows, are entitled to this public assistance."

The statistical tables included in the report show that the total number of applicants during the year under review was 268, of whom 75 were found to be ineligible for allowance, while 193 were approved. These 193 new beneficiaries had 630 children, the average number of dependent children per family being 3·26. The number of children over 16 years of age in the new families was 467, their total reported monthly earnings being $1,843.60 of which $424.80 was contributed towards the support of their families.

Saskatchewan

According to the annual report of the Saskatchewan Bureau of Child Protection for the fiscal year 1936-37, there were 2,067 widows being assisted by the Mothers' Allowance Branch during April, 1937, the cost of allowances being $40,584. The total cost for the fiscal year was $484,068. The average paid by way of allowance was $13.63, and 7,768 children under sixteen years of age received an average allowance of $5.20.

The report also outlines some of the difficulties encountered in administering the mothers' allowances section of the Child Welfare Act.

Other features of the report include particulars of the work of provincial Children's Aid Societies.

Report on Workmen's Compensation in Great Britain

The Home Office (Great Britain) has published a report by the Departmental Committee on certain questions arising under Workmen's Compensation Acts.

Part I of the report deals comprehensively with miner's nystagmus—its causes, incidence, possibility of elimination, effects of existing procedure, etc.—and concludes with a series of recommendations.

Part II reviews general medical procedure in regard to claims for compensation.

Part III deals with the question of agreements for lump sum settlement.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1938

THE following table shows the number of disputes, workers involved and time loss for June, 1938, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*June, 1938	19	2,366	12,216
*May, 1938	15	2,054	11,727
June, 1937	41	7,531	60,322

*Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of disputes, as well as the number of workers involved and the time loss, in June was slightly higher than in May but very much lower than in June, 1937, and none of the disputes caused very great time loss. The principal disputes were strikes of sawmill workers at Fort Frances, Ont., and at Timmins, Ont., shoe factory workers at Galt, Ont., hosiery workers at Hamilton, Ont., and lime plant workers at Blubber Bay, B.C. In May most of the time loss was due to the strike of sawmill workers at Fort Frances and a strike of silk factory workers at Louiseville, P.Q. In June, 1937, the principal disputes involved coal miners at Stellarton, N.S., gold miners in the Cariboo District, B.C., and tannery employees at Toronto, Ont.

Three disputes, involving 589 workers, were carried over from May, and sixteen disputes commenced during June. Of these nineteen disputes, fourteen were terminated during the month, four resulting in favour of the employers concerned, five in favour of the workers involved, with compromise settlements in five cases. At the end of June, therefore, there were five disputes recorded as strikes or lockouts, namely: bakery employees, Hamilton, Ont., shoe factory workers, Galt, Ont., hosiery factory workers, Hamilton, Ont., lime plant workers, Blubber Bay, B.C., and restaurant employees, Toronto, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to eight such disputes, namely: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; coastwise longshoremen, Vancouver, B.C., November 23, 1936, one employer; meat packing employees, Vancouver, B.C., December 29, 1936, one employer; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; cotton dress factory workers, Montreal, P.Q., November 25, 1937, one employer; dress factory workers (cutters), Toronto, Ont., January 21, 1938, three employers; and shoe factory workers, Perth, Ont., January 6, 1938. This last dispute was reported in the LABOUR GAZETTE for March, 1938, as terminated on February 5 but is now reported by the union not to have been settled or declared off.

The disputes involving dress cutters employed by one firm in Toronto, Ont., commenced January 26, 1938, and carried in the above list for some time, is reported by the union to have been called off on June 13 and has consequently been removed from the list. The disputes involving fur factory workers in Toronto, commencing in one establishment on March 4, 1938, and in another on March 17, 1938, are reported by the union to have terminated on June 20 and June 16 respectively and have also been removed from the above list.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A dispute involving thirty-five workers in one mine at Reserve, N.S., for one day, June 7, has been reported but apparently there was no time loss as the mine could not be operated that day owing to a fall of rock. It was stated that the mine is to be closed, being worked out and no longer safe, and certain employees were laid off. A settlement was reached between the management and the mine committee.

A cessation of work in one mine at Glace Bay, N.S., on June 7 has been reported owing to the failure of the union committee and the management to agree on a local contract for a colliery, being an old mine reopened and to be operated electrically. The management

shut down the operations pending a settlement as to a local contract. The men in an adjoining colliery refused to handle the coal from the new development until an agreement had been reached.

When two sawmill operating companies at Port Alberni, B.C., laid off numbers of employees on June 7, stating that owing to a falling off in demand for lumber the men were not needed, the International Woodworkers' Association alleged that the men were locked out for union activity and applied to the British Columbia Minister of Labour for a Board under the provincial Conciliation and Arbitration Act. It was reported that the Minister stated that a Board would be established when an application in accordance with the terms of the Act was received on behalf of fifty-one per cent of the employees.

A dispute between the Canadian Seamen's Union and three shipping companies as to the employment of union members, arising out of the terms of settlement of a strike on the Great Lakes in April (LABOUR GAZETTE, May, 1938, page 488), resulted in an interruption to traffic at Cornwall, Ont., on June 5. This dispute and arrangements for its settlement are outlined in the article on conciliation in this issue on page 736.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to June

SAWMILL WORKERS, FORT FRANCES, ONT.—Conciliation by an official of the Ontario Department of Labour resulted in a settlement on June 6 of this strike which commenced on April 15. The union had sought a renewal of the expiring agreement with an increase in wages but the employer proposed a decrease of seven per cent. The union then proposed to renew the agreement without change and, on this being refused, the men creased work. The agreement was renewed with wage reductions for various classes of about two per cent, the change in the minimum rate being from 43 cents per hour to 42½ cents.

SAWMILL WORKERS, TIMMINS, ONT.—As stated in the LABOUR GAZETTE for June, this strike for a new agreement with an increase in wages was settled on June 6. As a result of conciliation by the Ontario Department of Labour an increase of 10 cents per day was secured by the higher paid classes while the minimum rate was raised from $2.75 per day of ten hours to $3.25.

Disputes Commencing During June

COAL MINERS, NEW WATERFORD, N.S.—Employees in one mine ceased work for one day, June 7, when two surface employees were replaced by two underground workers. It was arranged that no underground employees would be given surface work when surface men were available and work was resumed.

CLOTHING FACTORY WORKERS (LEATHER JACKETS), WINNIPEG, MAN.—Employees in one establishment ceased work from June 14 to June 16 to secure recognition of the United Garment Workers of America and were successful.

SHOE FACTORY WORKERS, GALT, ONT.—Employees in one establishment ceased work on June 22 when the management refused to reinstate certain workers dismissed on refusing to operate certain machines. The strikers were members of the Canadian Shoe Workers' Union and Allied Crafts. It appears that a new system of work and piece rate payment had been introduced and employees alleged that earnings would be reduced. The mayor brought about a meeting of the management with a committee of the employees on June 29 but a settlement was not reached.

HOSIERY FACTORY WORKERS, HAMILTON, ONT.—Employees in one establishment ceased work on June 1 when the management refused to sign an agreement as to wages. The dispute arose as a result of the introduction of the forty-eight hour week under an order of the Ontario Industry and Labour Board (LABOUR GAZETTE, March, 1938, page 292). As the hours in this establishment were fifty to sixty the management proposed certain wage increases and a production bonus system to compensate workers for any reduction in earnings. The employees were members of the Canadian Full Fashioned Hosiery Workers' Union affiliated with the All-Canadian Congress of Labour and desired a written agreement with a committee of employees covering wage rates and working conditions. The employees stated that wages had been reduced steeply since 1929 and that a ten per cent increase was desired. The workers' representatives on June 3 informed the Minister of Labour that the employees wished the dispute referred to a Board under the Industrial Disputes Investigation Act and would resume work and accept the findings of the Board if the employer would also agree. The Department placed this proposal before the management, but it was not agreed to. The management met a committee of the strikers on June 6 and June 8, but the employees refused to accept the terms offered. The Ontario Department of Labour was also asked to deal with the dispute. At the end of the month a settlement had not been reached. Early in July it was reported that the dispute had been terminated when a seven per cent increase in wages was given with other concessions.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1938*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to June, 1938.				
MANUFACTURING—				
Vegetable Foods—				
Bakery employees (bakers and helpers), Hamilton, Ont.	1	4	100	Commenced May 27, 1938; against reduction in wages and for renewal of union agreement; unterminated.
Miscellaneous Wood Products—				
Sawmill workers, Fort Frances, Ont.	1	385	1,925	Commenced April 15, 1938; against reduction in wages and for renewal of agreement; terminated June 6, 1938; conciliation (provincial); compromise.
Sawmill workers, Timmins, Ont.	3	200	1,000	Commenced May 31, 1938; for increased wages; terminated June 6, 1938; conciliation (provincial); compromise.
(b) Strikes and Lockouts commencing during June, 1938.				
MINING, ETC.—				
Coal miners, New Waterford, N.S.	1	900	900	Commenced June 7; against transfer of employees involving laying off of two workers; terminated June 7; negotiations; in favour of workers.
MANUFACTURING—				
Fur, Leather, Etc.—				
Clothing factory workers (leather jackets), Winnipeg, Man.	1	14	28	Commenced June 14; for union agreement; terminated June 15; negotiations; in favour of workers.
Boots and Shoes—				
Shoe factory workers, Galt, Ont.	1	125	1,000	Commenced June 22; against discharge of workers following introduction of new system; unterminated.
Textiles, Clothing, Etc.—				
Hosiery factory workers, Hamilton, Ont.	1	118	2,700	Commenced June 1; for wage agreement and against bonus system; unterminated.
Miscellaneous Wood Products—				
Sawmill workers, Val D'Amour, N.B.	1	13	20	Commenced June 3; for increased wages and reduced hours; terminated June 4; negotiations; in favour of employer.
Non-Metallic Mineral Products—				
Lime plant workers, Blubber Bay, B.C.	1	111	2,500	Commenced June 2; *re* application of Conciliation Board award; unterminated.
Brick plant workers, Winnipeg, Man.	1	58	58	Commenced June 27; against discharge of workers alleged to be for union activity and for increased wages and recognition of union; terminated June 27; negotiations; compromise.
Metal Products—				
Crane men (car plant), Trenton, N.S.	1	33†	33	Commenced June 8; for increased wages; terminated June 8; return of workers; in favour of employer.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1938*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during June, 1938—*Concluded*				
Miscellaneous—				
Matting factory workers, Toronto, Ont.	1	16	120	Commenced June 14; for increase in wages and union recognition; terminated June 22; negotiations and conciliation (provincial); in favour of workers.
CONSTRUCTION—				
Highway—				
Truck drivers, Charlottetown-Montague Highway, P.E.I.	1	67	200	Commenced June 8; for payment by tonnage instead of by hour; terminated June 10; negotiations; in favour of workers.
TRANSPORTATION AND PUBLIC UTILITIES—				
Other—				
Cold storage plant employees, Winnipeg, Man.	1	12	72	Commenced June 17; *re* seniority; terminated June 23; negotiations; in favour of employer.
Cold storage plant employees, Winnipeg, Man.	1	80	80	Commenced June 21; against discharge of workers and for wage increases; terminated June 21; negotiations; workers reinstated; compromise.
TRADE—				
Milk wagon drivers, Toronto, Ont.	1	6	6	Commenced June 11; against changes in conditions under new management; terminated June 11; replacement of workers; in favour of employer.
Retail store employees, Vancouver, B.C.	9	9	54	Alleged lockout of union employees; commenced June 13; terminated June 18; negotiations; union agreement secured; in favour of workers.
SERVICE—				
Custom and Repair—				
Garage mechanics, Ottawa, Ont.	80	150	450	Commenced June 6; for union agreement with increased wages and reduced hours; terminated June 8; conciliation (provincial); compromise.
Business and Personal—				
Restaurant employees, Toronto, Ont.	3	65	970	Commenced June 15; discharge of workers alleged to be for union activity; unterminated.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.
†900 workers indirectly affected.

SAWMILL WORKERS, VAL D'AMOUR, N.B.—The refusal of the demand of the workers in one establishment, members of the New Brunswick Farmer-Labor Union, for an increase in wages and reduction in hours from ten per day to nine, was followed by the closing of the plant on June 3 at noon. On the following day as a result of negotiations with the union the workers agreed to resume work. It was also reported that wage rates were to be discussed later.

LIME PLANT WORKERS, BLUBBER BAY, B.C.—A number of the employees in one establishment ceased work on June 2 demanding the reinstatement of union employees, not em-

ployed since a strike from March 7 to March 11, 1938 (LABOUR GAZETTE, April, 1938, pp. 381 and 382). This dispute had been referred to a Board under the Industrial Conciliation and Arbitration Act and the employing company agreed to accept the award of the Board. Those employees who were members of the International Woodworkers' Association, British Columbia Coast District Council, disputed the employer's application of the award as to the reinstatement of certain union employees and made certain other demands. The Board had recommended also that the employer and employees should agree to set up committees of union and non-union employees and the union objected to this. The plant continued to operate with non-union workers and at the end of the month a settlement had not been reported.

CRANE MEN (CAR PLANT), TRENTON, N.S.—The crane operators and chasers in one establishment ceased work on June 8, their demands for an increase in wages not having been accepted. The cessation made it necessary to close down the plant, affecting 900 employees indirectly. The committee of the union, the Amalgamated Association of Iron, Steel and Tin Workers of America, had met the management and it was pointed out that wage increases had been given in 1937 and the contracts of the company were based on this scale. The stoppage by the crane men was pronounced an outlaw strike by the union executive which succeeded in getting them back to work on the next working day.

On June 1 the same men had ceased work for two hours, making the same demands, which were taken up with the management by the union committee.

MATTING FACTORY EMPLOYEES, TORONTO, ONT.—A number of employees in one establishment producing mats, etc., from discarded automobile tires ceased work on June 14 following the dismissal of five workers who had sought to have the employees organized as members of the United Rubber Workers of America to secure increases in wages. It was claimed that earnings were from $3 to $11 per week and averaged $5.30 for fifty hours. The union requested the intervention of the Minister of Labour, who advised taking up the matter with the Ontario authorities who had jurisdiction over wages and also instructed the Toronto representative of the Department to give any assistance possible in settling the dispute. On June 22 as a result of conciliation by the Ontario Department of Labour negotiations between the management and the union resulted in the establishment of a minimum rate of $7.50 per week with increases to $10 for most of the workers, improvements in working conditions and recognition of the union to deal with all disputes and grievances. The dismissed employees were to be reinstated.

RETAIL STORE EMPLOYEES, VANCOUVER, B.C.—Nine employees of one company operating several chain stores in Vancouver were dismissed on June 13 on the grounds of unsatisfactory service. These men had joined the Retail Clerks' International Protective Association and as a result of negotiations between the union and the management most of them were reinstated on June 18 and an agreement with the union was made.

GARAGE EMPLOYEES, OTTAWA, ONT.—A number of workers in the larger garages ceased work on June 6 when the employers refused to negotiate agreements with the National Garage Workers' Union. As a result of conciliation by the Ontario Department of Labour it was arranged that the garage operators and representatives of the workers would be called together by the Department of Labour to draw up and agree upon a schedule of wage rates and hours of work to be submitted to the Ontario Minister of Labour for approval and extension to all garage employers and workers in the city by order-in-council under the Industrial Standards Act. Work was resumed on June 9.

RESTAURANT WORKERS, TORONTO, ONT.—A number of employees in three restaurants operated by one company ceased work on June 15 demanding reinstatement of five union workers. The management stated they had been laid off as a result of a revision in working hours and that all employees were free to belong to a union. The Hotel and Restaurant Employees' International Alliance requested conciliation by the Dominion and Provincial Departments of Labour but the management refused. At the end of the month a settlement had not been reported.

An auditor to probe charges made by various United Mine Workers local unions in District 26 of alleged undue delay in payment of compensation claims, will be appointed by Minister of Mines Michael Dwyer, according to a Canadian Press report.

The investigation will be carried on to see if the charges made were correct and if so to discover where the responsibility for the alleged condition rested.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. The anual review containing a table summarizing the principal statistics as to strikes and lockouts in Great Britain and other countries appeared on pages 272-278 of the March issue.

Great Britain and Northern Ireland

The number of disputes beginning in May, 1938, was 74, and 26 were still in progress from the previous month, making a total of 100 in progress during the period, involving 26,800 workers with a resultant time loss of 185,000 man working days.

Of the 74 disputes beginning in May, 11 arose out of demands for advances in wages, 3 out of proposed wage reductions, and 15 on other wage questions; 5 on questions as to working hours; 22 on questions respecting the employment of particular classes or persons; 9 over questions respecting working conditions; and 9 on questions of trade union principle.

During May final settlements were reached in 60 disputes. Of these 14 were settled in favour of the workers; 23 in favour of the employers; and 23 resulted in a compromise. In the case of 12 other disputes work was resumed pending negotiations.

No settlement has yet ben reported of the strike of 2,600 coal miners at a colliery in Kent reported in the June issue of the LABOUR GAZETTE, which began May 1 in protest against the dismissal of 226 fellow workers.

Australia

The number of disputes reported as being in progress during the fourth quarter of 1937 was 74. The number of workers directly and indirectly involved was 18,548 with a resultant time loss of 123,423 man working days. The number of establishments which were involved was 103 and the estimated loss in wages was £117,452.

Belgium

The Ministry of Labour and Social Welfare has recently published a report dealing with strikes in Belgium during 1937 which records that there were 209 strikes in progress during 1937. involving 81,544 workers and indirectly affecting 2,928. The resultant time loss is not reported.

The analysis by causes shows that 107 strikes involving 31,382 workers arose out of questions concerning wages, while 61 strikes involving 40,359 workers arose out of questions concerning working hours.

Strikes in the mining industry numbered 110, involving 58,774 workers. The construction industry had 22 strikes, involving 4,882 workers; the metal industry had 20 strikes involving 3,707 workers; the textile industry also had 20 strikes involving 2,685 workers, while there were 14 strikes in the transportation industry involving 4,021 workers. While there were only 5 strikes in the quarrying industry, 5,142 workers were involved.

Analyses of results show that the workers were successful in 98 strikes and unsuccessful in 56; 33 disputes ended in compromise. In the case of 20 so-called "strikes of protest," lasting three days or less, the results are not given, nor are the results of two sympathetic strikes recorded.

Netherlands

The Central Statistical Bureau of the Netherlands has recently issued a report dealing with strikes in 1937 which shows that there were 95 strikes in progress (of which 89 began during the year), involving 4,900 workers and resulting in a time loss of 32,200 man working days.

The metallurgic industry suffered the greatest time loss—9,900 man days—followed by the building industry with 7,100, and transportation with 5,300 man working days. Demands for wage increases caused two-thirds of these strikes. Of interest is the fact that one-quarter of the strikes were caused by demands for holidays with pay. One-third of all the strikes, irrespective of cause, concerned the refusal of employers to accept or apply a collective agreement.

A little more than one-third of these disputes ended in compromise settlements, but these involved 71 per cent of the workers on strike.

Jamaica

Press despatches of June 11 report conditions practically normal again throughout Jamaica after a month of strikes and riots, particularly at sugar plantations, though some minor disputes were not yet terminated. The riots caused the loss of eleven lives, many persons were injured, and numerous arrests were made. The island was still being patrolled at points considered dangerous by soldiers and armed police.

The longshoremen's strike referred to in the LABOUR GAZETTE for June ended May 28, work

being resumed as the result of intervention by the Labour Conciliation Board. Those working on the wharves are to get 20 cents and those on board ship 22 cents per hour. The strikers had demanded 25 cents per hour as a minimum wage.

British Guiana

According to June press despatches more than 1,000 native workers employed by the largest sugar plantations in the country were on strike for higher wages. The situation was reported as growing more serious, telephone lines having been cut, bread vans looted, and a manager's home raided. Additional police were rushed over roads blocked by hundreds of natives. No word has been received of a settlement except that the Labour Commissioner was proceeding to the locality to intervene in an endeavour to terminate the dispute between the estate owners and the labourers.

Mexico

A general strike unauthorized by the union leaders began June 11 throughout the state of Puebla in sympathy with workers of an important textile mill, on strike to enforce reinstatement of a group of workers laid off because of an alleged dearth of orders for the firm's products. The general stoppage spread to many shops and factories after local power plants ceased to operate. No further information is available at present regarding this dispute.

Preliminary estimates of strikes in April, 1938, which, as the Bureau of Labour statistics points out, are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 235 strikes as beginning during the month, which with 130 unterminated at the end of March made a total of 365 in progress during the month. The number of workers involved in these disputes was 77,000 and the resulting time loss was 725,000 man working days. The comparable figures for March, 1938, show that there were 326 strikes in progress involving 98,000 workers with a time loss of 895,000 man working days.

United States

On June 2, 1,400 truck drivers employed by 35 bakeries in Pennsylvania ceased work demanding seniority rights, a closed union shop and union labels on all wrappers. The strike was called by the A. F. of L. Bakery Drivers' Union. The dispute came to an end about June 11 when an offer of seniority rights only was accepted by the union.

The National Maritime Union, affiliate of the C.I.O., called a so-called "sit down" strike of between 1,500 and 2,000 seamen on 30 to 40 ships in New York harbour on June 2 as a protest against labour policies of rival A. F. of L. unions. At the request of the president of the American Steamship Owners' Association, that ships be permitted to sail, the strike was called off after being in effect nine hours.

On June 22, at New Orleans, 800 C.I.O. truck workers stopped work on refusal of ten employers to confer with union leaders on wage and hour demands. Police raided union headquarters twice, arresting a total of 110 persons on charges of obstructing all truck movements. The C.I.O. protested the mass arrests to the federal Justice Department, which promised protection if violation of civil rights was proven. On July 2 the truck drivers were joined by 600 taxi drivers for the same cause—refusal of employer to deal with union representative.

The 1,600 performers and workers of Ringling Bros., Barnum and Bailey circus went on strike June 22, refusing to accept a 25 per cent reduction in wages, claimed necessary to continue operations. The strike was ordered by the executive secretary of the American Federation of Actors. On June 26 preparations got under way to move prematurely to winter quarters in Florida following an agreement between the union and circus manager, which assured the employees contract wages until equipment was stored in Florida.

Replies of Local Governments in India on Sickness Insurance

Bulletin No. 63 of Indian Industries and Labour (Government of India, Department of Industries and Labour) deals with sickness insurance. As stated in the introduction, that portion of the Report of the Royal Commission on Labour in India (LABOUR GAZETTE, September, 1931, page 983) which discusses the provision for workers during sickness, is set out in the first six pages. The views of the Commission were carefully considered by the Government of India, in consultation with the Standing Advisory Committee of the Indian Legislature attached to the Industries and Labour Department, and Provincial Governments were addressed in a circular letter of April 30, 1935. They were asked to report on the feasibility of the statistical enquiry contemplated by the Royal Commission, a matter on which the Government of India expressed grave doubts, and, alternatively, on the possibility of building on the actual experience gained in the operation of small experimental schemes. The replies of Local Governments and of selected associations are now published in this bulletin for information.

WORKMEN'S COMPENSATION IN NOVA SCOTIA AND BRITISH COLUMBIA, 1937

Reports of Provincial Workmen's Compensation Boards

THE reports for 1937 of the Workmen's Compensation Board of Nova Scotia and of the Workmen's Compensation Board of British Columbia, have recently been received.

Nova Scotia

The annual report of the Workmen's Compensation Board of Nova Scotia for the calendar year 1937 again records an increase in the total number of all kinds of accidents as compared with the previous year. The total number of accidents of all kinds reported to the Board in 1937 was 12,404, compared with 10,881 in 1936, an increase of 1,523. The total cost of all accidents for 1937 under Part I of the Act, as far as could be estimated at the time of publication of the report, was nearly $1,623,077, which amount is exclusive of administration expenses and cost of safety associations.

The provisional statement of income and expenditure for 1937 indicates that $115,608.43 was paid for medical aid to all classes, compared with $104,813.06 expended on this account in 1936. The sum of $9,678.29 was expended on safety associations. Administration costs during 1937 amounted to $113,286.83 compared with $104,141.69 in 1936.

For industries under Part I of the Act the total income for the year 1937, actual and estimated, amounted to $1,641,135.55, and the estimated expenditure for the same period was $1,746,042.12, showing a deficit for the year's operations of $104,906.57. The gross surplus brought forward from previous years was $371,908.28, leaving a gross surplus at December 31, 1937, of $267,001.71, less $174,000 for bad and doubtful accounts, or a net surplus of $93,001.71.

The 12,404 accidents reported to the Board for the year 1937 are classified as follows: fatal accidents, dependency established and compensation commenced, 46; fatal accidents burial expenses paid, no dependents, 7; fatal accidents reported, pending adjustment, 4; fatal accidents, claim non-compensable or disallowed, 3; accidents causing permanent partial disability, 218; accidents causing total disability for seven days or over, 8,210; accidents where medical aid only was paid, 2,440; accidents pending adjustment, no payments, 574; accidents not compensable, other than fatal, 902.

During the year reviewed by the report, 8,210 workmen injured and wholly disabled for seven days and upwards were paid compensation at the end of the year, the persons receiving compensation for 1937 and previous years in the form of a monthly pension were as follows: widows, 638; children under sixteen, 693; dependent mothers, 60; dependent fathers, 17; other dependents, 12; and workmen disabled for life partially or wholly, 1,146.

The average rate of assessment levied on payrolls under Part I since the commencement of the Act has been $1.97 per hundred dollars of payroll, the rate varying from year to year. The average rate for 1936 was $2.47 and the average rate for 1937 was $2.60.

The provisional statement of income and expenditure by classes to December 31, 1937, shows that mining held first position in so far as revenue accrued from assessments and also disbursements was concerned. Total income (actual and estimated) for the year, from assessments on the mining industry was $833,047.81, while the total expenditure for the industry was $825,334.12. Of this amount $137,542.65 was for compensation paid other than pensions; $130,759.41 was transferred to reserves for pension awards, $465,904.99 was for compensation estimated outstanding, the balance being for this industry's proportion for medical aid, safety associations and administration.

Summary of Twenty-one Years' Administration.—During the twenty-one years from the beginning of 1917 to the end of 1937, accidents in the industries within the jurisdiction of the Board to the number of 161,272 were reported. During that time 1,702 workmen were fatally injured.

The amount actually paid to workmen or their dependents and for medical aid during the twenty-one years period was $16,728,402.44, and the amount required at the end of 1937 for the purpose of paying life and other pensions and compensation to disabled workmen and for medical aid was $8,450,557.53.

The total compensation paid or payable to workmen and their dependents and for medical aid for the twenty-one years amounts to $25,178,959.97. The amount does not, however, represent the entire cost of the accidents for the twenty-one year period, as the administration expense and cost of safety associations are not included.

There were 944 widows to whom pensions were awarded for life or until remarriage, 2,151 children under sixteen years of age were awarded monthly pensions while under that age, dependent mothers and fathers to the number of 465 were awarded compensation; 35 members of the family other than widows, children and parents, but who were wholly or partly dependent upon the earnings of deceased workmen at the time of their respective deaths, received benefits, and life pensions or lump sums were awarded to 5,685 workmen who were disabled, either wholly or partially.

Prior to January 1, 1920, medical aid was not furnished to injured workmen except in special cases. Since that date injured workmen have been entitled to free medical aid for thirty days from date of disability and during the eighteen years that have elapsed the cost for medical aid was $1,756,982.01. In the mining and iron and steel classes the greater portion of medical aid in connection with those classes is furnished under medical aid schemes and consequently is not furnished by the Board.

The report also gives complete statistics for 1936 dealing with accidents by classes, months of occurrence of compensated accidents, time losses, average wage and age, nature of industries, causes of accidents, etc.

British Columbia

Continued improvement in employment and industrial conditions is indicated in the twenty-first annual report of the British Columbia Workmen's Compensation Board. "Payrolls for 1937" the report states "based on estimates from employers are over 60 per cent higher than the pay-roll for 1933 or about 87 per cent of the peak year 1929."

The extent of industrial recovery is also indicated by the growth in the number of firms employing labour under the Workmen's Compensation Act. Although 1,044 operators discontinued operations in 1937, the number of new firms recording operations was 1,121; one hundred and seventy other operators resumed business in 1937; and operators to the number of 96 who were not required to protect their workmen under the Act covered them optionally. The net increase in the number of firms in 1937 compared with 1936 was 283.

Accidents and Claims.—There was an increase in the number of accidents reported in 1937 as compared with the previous year. Accidents reported during each of the past ten years were as follows: 32,793 in 1928; 36,750 in 1929; 33,285 in 1930; 25,877 in 1931; 19,101 in 1932; 18,274 in 1933; 22,354 in 1934; 26,280 in 1935; 29,677 in 1936; and 35,005 in 1937. Fatal accidents for the same period were as follows: 251 in 1928; 253 in 1929; 277 in 1930; 126 in 1931; 106 in 1932; 97 in 1933; 116 in 1934; 146 in 1935; 168 in 1936; and 181 in 1937. Minor injuries which were treated with first aid only and which did not necessitate time-loss or medical attention are not included in the above figures. Claims disposed of in 1937, and in which time-loss compensation was paid, originated in the various kinds of industries as follows: Lumber industry, 46 per cent; general manufacturing and delivery classes, 11 per cent; metal-mining, 11 per cent; construction 6 per cent; coal-mining, 5 per cent; navigation, 5 per cent; railroading groups, 4 per cent; and all other classes, 12 per cent.

The fatal cases arose as follows: Lumber industry 44 per cent; metal-mining, 15 per cent; railroading groups, 13 per cent; construction work, 8 per cent; coal-mining, 6 per cent; general manufacturing and delivery classes, 3 per cent; and all other classes, 11 per cent.

The nationality given by injured workmen in their applications for compensation indicated that 67 per cent of those injured were of British or Canadian nationality and 48 per cent were shown as married. Two hundred and sixty-five women were amongst those injured.

Summary of Twenty-one Years' Administration.—As a result of accidents which have occurred during the past twenty-one years, there were filed under the Act 528,943 claims, or an average of 25,188 per year. Four thousand one hundred and thirty-six of those accidents proved fatal, an average of 197 per year. The pension list at the end of 1937 with respect to those fatal accidents includes 960 widows, 858 children, 119 dependent mothers, 30 dependent fathers, and 13 other dependents.

During the past twenty-one years 12,452 workmen met with accidents which resulted in permanent total or permanent partial disablement. One thousand nine hundred and eighty-seven of those workmen were in receipt of pensions at the end of the last calendar year.

At the end of 1937 there was a total of 3,967 pensioners on the pension list. In addition, there are at any one time throughout the year approximately 2,000 workmen in receipt of time-loss compensation for temporarily disabling injuries. The total number of pensioners and persons in receipt of time-loss compensation, and their dependents, is between 12,000 and 15,000 persons.

Revenue and Disbursements.—Revenue for 1937 totalled $6,921,217.91 of which $5,316,937 represented collections made during 1937 from the following sources: From employers, assessments and interest $3,767,262.42; from employers, medical aid, $476,449.42 from employers, silicosis $256,520.73; from workmen, medical aid dues, $280,709.50; from interest on investments, $465,370.73; from appreciation on investments sold $30,281.69; and transferred to Contingent Fund, $40,342.51.

Disbursements made during 1937 included $1,544,775.83 in compensation to workmen; $684,115.66 for medical aid, that is physician's fees, hospital expenses, drugs, etc. From the reserve account, $1,228,069.26 was paid in pensions during 1937; while $451,469.55 was invested for pensions and $216,468.94 was set aside as cash available for pensions. Silicosis pensions paid during 1937 amounted to $8,499.19.

Accident Prevention.—Referring to accident prevention activities the report states that: "Increased activity in the lumber industry brought with it an increase in the number of workmen meeting with fatal and permanently disabling accidents in that industry. However, it is worthy of note that in the last decade there has been a marked decrease in the number of fatal accidents in the logging industry per unit of log cut. Two full-time safety inspectors devote their attention to checking equipment and working-places in the lumber industry. Eight inspectors employed under the 'Boiler Inspection Act' check the machinery in each plant visited and give written instructions for improving safety conditions where necessary. Four inspectors appointed under the 'Electrical Energy Inspection Act' devote themselves to safety in their particular field. One full-time inspector is employed to curtail the hazards in building construction. In addition to the foregoing, two factory inspectors are engaged in inspection and safety-work in certain factories and in connection with freight and passenger elevators.....

"The human element continues to be so large a factor in the solution of the accident problem in industry that a continuous program of education in safety was carried out. This was done through accident-prevention committees working in co-operation with the management and with our safety inspectors, and through addresses by Board members and inspectors."

Silicosis.—Referring to the amendments to the Workmen's Compensation Act and to the Metalliferous Mines Regulation Act passed in November 1936 respecting silicosis it is reported that: "X-ray examinations of the chest were carried out with respect to 5,486 workmen employed in the metalliferous-mining industry and exposed to dust containing silica. Of that number, 212 were found to have silicosis at various stages of development. In the majority of cases the silicosis was not of a disabling nature. In ninety-nine cases the chest condition due to silicosis or tuberculosis was such that further exposure to mine-dust was deemed inadvisable. In twenty-three cases it was found that the workmen became disabled since January 1, 1936, by silicosis within the scope of the Act and were entitled to compensation. Two cases proved fatal during the year. Ten claims were incomplete as to proofs at the end of the year.

"An important result of the silicosis legislation has been the detection of tubercular infections amongst workmen. This precludes such workmen from work underground which would expose their fellow-workmen to the dangers of infection and themselves to the danger of silicosis.

"To further the curtailment of uncomplicated silicosis and silicosis complicated with tuberculosis, a mining engineer with special training in dust-control and ventilation was secured to make an examination of dust conditions in the metalliferous mines of the Province and correct where possible the ventilation. As a result of his investigations it is believed that there will be a reduction in chest-diseases amongst metal miners in the Province."

Tabular statistics are also given in the report showing industries in which accidents occur, workmen's wage loss, average length of disability, average daily wage at the time of accident, sex, conjugal state, etc.

Loans made under the Dominion Housing Act reached a new high in June, the Department of Finance announced recently. Providing housing for 590 families, the loans amounted to $2,096,713, compared with $913,127 loaned to 227 families in June last year.

Since the Fall of 1935 $19,400,000 had been loaned to 4,839 families under the Act, the Dominion Government participating to the extent of 25 per cent and the banks and lending organizations loaning the rest. The average loan was $4,019.

The number of loans made in each province in June with the amounts follow: Ontario, 1,308, $9,181,991; British Columbia, 640, $2,506,893; Quebec, 608, $5,239,315; Nova Scotia, 358, $1,572,983; New Brunswick, 84, $378,967; Manitoba, 75, $504,734; Prince Edward Island, 10, $54,034; Saskatchewan, 2, $8,200; Alberta none.

60859—3½

LABOUR LEGISLATION IN NOVA SCOTIA IN 1938

THE Nova Scotia Legislature, during its session from March 1 to April 14, 1938, revised and consolidated the Workmen's Compensation Act and made amendments in the statutes concerning coal mines, old age pensions, teachers' pensions and credit unions.

Workmen's Compensation

The Workmen's Compensation Act, 1938, is chiefly a consolidation of the law but certain amendments are made. Formerly, compensation was not paid for an injury disabling a workman for only seven days but it is now provided that where a permanent partial disability results from an accident the Workmen's Compensation Board may pay compensation even if the workman is not disabled for seven days from earning full wages at his former job. The amount is in the discretion of the Board. The Board is not to pay any account for medical aid for injuries received after the enactment of the Act unless the application for payment is made within a year. Travelling salesmen are now within the scope of Part I of the Act.

New conditions are laid down for determining the average earnings on which compensation for disability is based. In 1937, the maximum earnings that could be reckoned was raised from $1,200 to $1,500, the increase taking effect on January 1, 1938. It is now stipulated that where, owing to the short period of employment by the employer or the casual nature of the employment or the terms of it, it is impracticable to compute the rate of remuneration, regard may be had to the average weekly or monthly amount which, during the previous twelve months, was earned by a workman engaged in the same class of work for the same employer or for another employer in the same locality. Where an employee works for two different employers, his average earnings are computed on the basis of what he would probably have been earning if he had worked solely for the employer for whom he was working at the time of the accident. "Employment by the same employer" is defined to mean employment by the same employer in the grade in which the workman was employed at the time of the accident uninterrupted by absence from work due to illness or any other unavoidable cause. Where the employer was accustomed to pay the workman a sum covering any special expenses, this amount is not to be reckoned as part of the employee's earnings at the time of the accident. Finally, it is provided that in any case where it seems more equitable the Board may award compensation on the basis of the workman's earnings at the time of the accident.

The power of the Board to estimate the amount of the pay-roll of any employer who refuses or neglects to submit a pay-roll statement to the Board for assessment purposes is extended to apply to cases where an employee of an incorporated company receives the whole or part of his salary in the form of profit on shares held by him in the company and the pay-roll statement does not include what the Board considers to be a reasonable sum for the earnings of such employee. The Board may make such addition to the actual pay-roll as it deems just and reasonable to represent the earnings of such employee.

Coal Mines

The Coal Mines Regulation Act was amended to ensure a greater degree of safety. It is also provided that any person holding a certificate of competency as manager, underground manager or overman under the Act is entitled to be considered as the holder of a certificate of all positions junior to that of the certificate held and not only of a mine examiner as formerly provided.

Safety provisions include the regulation of the use of electrically driven machines for coal cutting, boring, loading or conveying. No such machine may be operated when the methane (fire damp) content in the general body of the ventilating current passing the motor exceeds 1¼ per cent. Every fire or flame whether caused by spontaneous combustion, flamed shot, electrical short circuit or other cause, must be reported to the official in charge and no repairs may be instituted without authority from the mine manager. A full report of the occurrence must be submitted by the manager in writing to the deputy inspector.

In using explosives the Act requires that before any shot is fired all mining must be removed and sufficient time allowed for the dust to settle. An amendment permits the Inspector of Mines to make exceptions to this rule. Multiple firings are now permitted where a mining or shearing cut separates adjacent shots, whereas formerly all shots had to be single except in rock tunnels and shaft sinking.

The maximum amount of combustible matter permitted in the dust mixture in any mine where the floor, roof and sides are not treated with water or are not naturally wet and which, on the recommendation of the deputy in-

spector, must be treated with incombustible dust has been reduced from 50 per cent to 35 per cent. Additional methods are laid down for testing the amount of combustible matter in the dust mixture where carbonates are present.

The section requiring a prosecution against any owner, agent, manager, overman or mine examiner to be instituted only by the inspector or with the consent in writing of the Minister or by some appointee of the Minister or by some person employed in the mine concerned has been amended to extend it to prosecution of any person and to give to the Minister, instead of the inspector, the sole right to prosecute or permit the prosecution of any person who, without a manager's certificate, directs or controls or interferes in any way with the operations of a mine.

Old Age Pensions

An Act of 1934 respecting regulations made under the Nova Scotia Old Age Pensions Act validated the regulations made by order in council on November 25, 1933. An amendment of 1938, which is to be construed as if enacted immediately after the 1934 statute, enables the Governor in Council to repeal any of these regulations or to make amendments, not inconsistent with the Old Age Pensions Act, which are deemed expedient to carry out the provisions of the Act or of any agreement between the Federal and Provincial Governments under the Old Age Pensions Act.

Teachers' Pensions

An amendment in the Nova Scotia Teachers' Pension Act, 1928, provides that any teacher who has reached the age of 50 years but who has not taught for at least twenty years may give notice that he does not wish to qualify for the pension payable after 30 or 35 years' service and thereafter the 8 per cent deduction for superannuation shall not be made from the annual amount due him as long as he teaches.

Credit Unions

An amendment in the Credit Union Societies Act made retroactive to November 15, 1932, the day following the coming into force of the Act, enables a credit union to become a member of the Nova Scotia Credit Union League and to invest up to 25 per cent of its capital in the deposit receipts of the league as well as in the paid up shares of building and loan associations, other credit unions and legal investments authorized by law for trust funds in Nova Scotia.

Miscellaneous

The Embalmers' and Funeral Directors' Act enables the board which grants licences to make regulations for a system of apprenticeship in the practice of embalming.

An Act relating to Contracts for the Purchase of Goods upon an Instalment Payment Plan requires every dealer in the province who sells or hires any goods or merchandise under a conditional sale to be licensed by the Attorney General. Provision is made for cancelling licences, for annual returns to the Minister and for the appointment of inspectors.

Bills Not Passed

A Bill to amend the Registered Barbers' Act, 1937, which was not passed, would have authorized the Nova Scotia Barbers' Association to establish minimum charges for service and minimum rates of wages for all employed barbers in the same manner as provided by the Industrial Standards Acts in Ontario, Saskatchewan and Alberta. The Industrial Standards Act in Nova Scotia applies only to the building trades in Halifax and Dartmouth. Minimum prices and wages under the Bill were only to be made obligatory upon obtaining the approval of a sufficient number of persons carrying on the business of a barber in Nova Scotia who were not members of the association.

Another Bill which received only first reading would have enabled the City of Halifax to establish standards to which all houses would have to conform. The Bill provided that where owners were unable to pay for repairs to dwellings, the cost would be financed by the City Council by means of a loan to the owner, the interest not to exceed 5 per cent and the city to have a first lien on the property.

Group Purchase of Medical Care by Industrial Employees is the title of a report issued by the Industrial Relations Section, Department of Economics and Social Institutions, Princeton University.

The report contains an analysis of a limited number of plans for the group purchase of medical care by industrial employees and is based on material collected by the Industrial Relations Section during the past two years. The report is divided into five main sections with a Foreword and Selected Bibliography. The main sections are entitled: The Problem of Medical Care; Developments in General Medical Care Within Industry; Attitude of Organized Medicine Toward Group Purchase Plans; Representative Plans for Group Purchase of Medical Care; and Summary and Conclusions.

RECENT REGULATIONS UNDER PROVINCIAL LEGISLATION

NEW regulations in Alberta fix minimum wage rates for boys delivering merchandise and prescribe the first aid appliances and equipment that must be maintained by employers according to the size of their establishments. In Ontario, the regulations governing projectionists in moving picture theatres have been revised.

Alberta Male Minimum Wage Act

Two Orders of the Board of Industrial Relations were approved by orders in council on April 22. Order 1B exempts from Order 1 (LABOUR GAZETTE, 1937, p. 1100) fixing minimum wages for all male employees in the province, with certain exceptions, boys under 18 years of age engaged in delivery of merchandise from retail stores on foot or bicycle.

By Order No. 1C, minimum rates are established for such boys. Those under 16 must be paid not less than $7.50 a week when engaged for a week or more, 17 cents an hour if hired by the day and 20 cents when hired by the hour. For those over 16 and under 18 years of age, the minimum rate is $9.50 per week when the employment is by the week or longer, 18 cents an hour if they are engaged by the day and 22½ cents an hour if employment is by the hour. No boy may be paid for less than four hours.

Alberta Workmen's Compensation Act

The Workmen's Compensation Board made new regulations concerning first aid appliances and services on June 20. Five classes of first-aid equipment are described and the employers or officers in charge of workmen are required to provide the class specified for their establishments.

Pocket first-aid kits as described in the regulations must be carried by all pit, fire, timber and driver bosses in underground mines, foremen engaged in logging or sawmill operations, truck drivers transporting workmen and all other officials in charge of workmen at any point where it is inconvenient to secure first-aid treatment otherwise. Minimum first-aid kits and a stretcher must be provided where less than 10 workmen are employed or by every employer operating a railway, logging railway or tramway, on every train and at any place where there is a gang of less than 10 men or by every employer operating a tug-boat, fish-packer or other vessel with a crew of not more than 10 and making trips of not more than 24 hours' duration.

Standard first-aid kits must be carried by employers of from 10 to 50 workmen and placed in charge of some suitable person and be available to injured workmen during all working hours. Every employer of 15 or more workmen employed in a place five miles or more from a doctor or hospital must have at all times about such place of employment a person possessing a certificate in first-aid work. Medium first-aid kits must be provided by employers of more than 50 and less than 100 workmen. Such kits are to be in charge of a person with a first-aid certificate whose services are available during all working hours.

Every employer of 50 or more workmen employed at a place more than five miles from the hospital and every employer of 100 or more workmen at any place must have available means of transportation to convey injured workmen to the nearest place where medical attention and hospital accommodation are available. He must provide at the place of employment an emergency first-aid room used for no other purpose in charge of a person with a first-aid certificate. A graduate nurse must be in charge of first-aid work where more than 200 workmen are employed.

Employers are required to provide proper care and attention for injured workmen and where necessary, immediate transportation to the nearest doctor or hospital or both where appropriate treatment is available. Torridaire Hot Pads are required to be provided at all mines where the working face is more than one-half mile from the entrance to the mine. All the equipment specified is to be supplied at the expense of the employer. When any employer fails or neglects to supply such appliances or service, the Board may instal them and charge the cost to the employer. For every contravention of the regulations, the assessment rate of the employer concerned is to be increased by one-half of one per cent in addition to any penalty or other liability to which he may be subject.

Ontario Theatres and Cinematographs Act

An order in council of June 15, 1938, approves new regulations under this Act. Two classes of projectionists are now provided for instead of four, qualified projectionists and apprentices. Every projection room must be in charge of a qualified projectionist and an apprentice may be employed to assist him.

The earlier regulations required two Grade "A" projectionists where two or more projec-

tors were installed and where the seating capacity was 1,750 or more, with two men of the lower grades being allowed in smaller theatres. The new regulations stipulate that every theatre equipped with more than one projector must employ two qualified projectionists if it has a capacity of 1,000 or more and if the capacity is less than 1,000, one man must be qualified and the second may be an apprentice.

A qualified projectionist must be at least 21 years of age and an apprentice not less than 18. The former must have served an apprenticeship of not less than 12 months, have passed the third, second and first-class examinations and have undergone a practical test. Provision is made for recognizing licences granted in another country or province. A qualified projectionist's licence may be granted to a person who has not passed the first-class examination but has the other qualifications and he may have charge of a projector for two years but no longer unless he has a special permit from the inspector.

EMPLOYEES' WELFARE PLANS OF CANADIAN COMPANIES

RECENTLY there have been received particulars regarding employees' welfare plans for a number of Canadian companies. The plans summarized below include those of the Maritime Telegraph and Telephone Company, Limited; Canadian Johns-Manville Company; Dominion Foundries and Steel, Limited, and Canadian Industries Limited.

The Maritime Telegraph and Telephone Company, Limited

Bulletins detailing employees welfare plans of the Maritime Telegraph and Telephone Company Limited set forth: (1) Regulations and plan for employees' disability benefits and death benefits; and (2) Regulations and plan for employees' pensions.

Employees' Pension Fund

The object of the pension fund plan is stated to be for the purpose of paying definite pensions to its employees when they are retired from the service. According to the regulations under the plan, the company undertakes to establish and maintain a fund to be known as the "Employees' Pension Fund" to be administered by Trustees free from the control of the company.

The pension fund is made up of the capital sum now to the credit of the Employees' Benefit Fund which was transferred with the consent of the Committee, and the Company agrees to contribute to the capital of the fund monthly a sum not to exceed three per centum (3 per cent) of the total payroll. It is also provided that the expenses of the trustees in administering the fund will be borne by the company.

Pensions are payable to any male employee who has reached the age of 60 years and whose term of employment has been twenty or more years and any female employee who has reached the age of 55 years with a term of employment of twenty or more years. Employees may at their own request, or at the discretion of the Board, be retired from active service and granted a pension.

Any employee whose term of employment has been thirty or more years or any male employee who has reached the age of 55 years and whose term of employment has been twenty-five or more years or any female employee who has reached the age of fifty years and whose term of employment has been twenty-five or more years, may at the discretion of the Trustees and with the approval of the Board be retired from active service and granted a pension.

Provision is also made for the retirement on account of sickness (other than accidental injury) of employees with fifteen years service or more.

The annual pension allowance for each employee retired with a pension on account of age is computed as follows: "For each six months of his term of employment three-quarters of one per centum (¾ of 1 per cent) of his average annual pay during the ten years next preceding retirement; provided however that the Trustees may, at their discretion, base such pension upon the average annual pay of the ten consecutive years of service during which the retired employee was paid the highest rate of wages."

It is stipulated that the minimum pension for male and female employees who have attained the retirement age shall be $360 per annum provided however, that "no pension shall exceed a sum equal to 80 per cent of the average annual pay as computed above."

In the case of employees retired on account of illness, a minimum pension of $240 per annum for male employees and $180 for female employees is provided.

Provisions are also made in the plan for the suspension of pension; assignment; notice of qualification; and pension during period of disability benefits, etc.

EMPLOYEES BENEFIT FUND

In addition to the pensions fund, the company maintains an "Employees Benefit Fund" for the payment of definite amounts to its employees of two or more years' standing when they are disabled by sickness, or to their dependent relatives (if any) in the event of death of employees from sickness or injury (other than by accidental injury arising out of and in the course of employment).

The Fund is administered by a committee of four members appointed by the Board of Directors of the Company.

Sickness Disability Benefits.—The regulations regarding sickness disability benefits provide for a graded scale as follows:

2	years'	employment,	full	pay	
3	"	"	"		
4	"	"	"		
5	"	"	"		
6	"	"	"		
7	"	"	"		
8	"	"	"		
9	"	"	"		
10	years and over	"	"		

4	weeks;	half	pay	9 weeks
5	"	"		13 "
6	"	"		17 "
7	"	"		21 "
8	"	"		25 "
9	"	"		29 "
10	"	"		33 "
11	"	"		37 "
13	"	"		39 "

"Full pay" and "half pay" is based "on the number of hours per week constituting the employee's normal service under his contract of hiring, not including overtime, and shall be computed at the employee's rate of pay at the time the disability began, provided, however, that the benefits shall at no time exceed the pay which the employee would receive based on his rate of pay and the general schedule of hours per week constituting a full week's service at the time the disability began, and further provided, that if the employee's compensation is ordinarily computed on other than a time basis, the employee's average compensation (not including compensation for overtime) for so much of the preceding three months as he has been in the service of the Company, may be taken as determining the rate of pay, provided the rate thus computed is not less than the employee's time rate. If any change in the rate of pay of an employee occurs during any period of disability, the benefits shall change accordingly.

Sickness Disability Benefits begin on the eighth calendar day of absence on account of disability, "provided, however, that if an employee has received Sickness Disability Benefits for any period and is again absent on account of sickness within two weeks after the termination of such period, any benefits on account of such further sickness shall begin on the first day of absence instead of on the eighth day.

"Successive periods of sickness disability shall be counted together as one period in computing the period during which the employee shall be entitled to benefits, except that any sickness occurring after an employee has been continuously engaged in the performance of a duty for thirteen weeks, shall be considered as a new sickness and not part of any disability which preceded such period of thirteen weeks.

Employees shall not be entitled to receive Sickness Disability Benefits for time for which any wages are paid them by the Company or while receiving compensation for accident from the Workmen's Compensation Board.

The regulations also stipulate certain conditions as regards notification, reporting, and treatment.

Death Benefits.—In event of the death of an employee resulting from sickness, death benefits are payable to the employee's beneficiaries (provided the employee has been five or more years in employment) on the following scale:

5	years'	employment,	6	months'	full pay
6	"	"	7	"	
7	"	"	8	"	
8	"	"	9	"	
9	"	"	10	"	
10	"	"	12	"	

(No death benefit is to be calculated on a higher rate of pay than $2,000 per year).

The death benefit is to be paid only to the wife (or husband) or dependent relatives. Subject to certain provisions, the benefit is paid in the following order:

First: To the wife (or husband) of the employee.

Second: If there be no wife (or husband) surviving, "then to such child or children of the employee, and such issue of any deceased child, as were dependent upon such deceased employee for their support at the time of his or her death, in equal shares, such issue of said deceased child, if any, to take equally among them the share said deceased child would have taken if living and dependent."

Third: If there be no children, then among such other dependent relitives if any.

If there are no dependent relatives, the benefit "shall lapse and the amount thereof shall remain as part of the Employees' Benefit Fund" after deducting necessary expenses incidental to the death of the employee.

Non-Industrial Sickness and Accident Plan of Canadian Johns-Manville Company

According to an announcement made recently by H. K. Sherry, vice-president in charge of operations, the hourly-paid employees of the Canadian Johns-Manville Company Limited, Asbestos, P.Q. have been

offered additional insurance protection which will provide for weekly cash benefits in the event of sickness or accidents while off duty.

Contributions to non-industrial sickness and accident insurance are graduated according to the employees' hourly earnings and will range from 7 to 20 cents. Benefits under the scheme will be from $6 to $16 a week and are payable for periods up to 13 weeks.

The company contributes to the plan by assuming the cost of all premiums in excess of the employees' contributions. It is stated in the announcement that with this new arrangement hourly-paid workers of the company who participate in the various welfare plans, will have complete life, health and accident protection both while at work and off duty. It was pointed out that the added benefits under non-industrial sickness and accident insurance were arranged in co-operation with an employees' committee and "are in line with Company policy of assisting employees in protecting themselves and their families against pay-cheque stoppages caused by physical disability over which they have no control."

Employees' Savings and Profit-Sharing Plan of Dominion Foundries and Steel, Limited

According to an article appearing in the *Dominion Foundries Illustrated News* for May, Dominion Foundries and Steel, Limited has recently inaugurated an "Employees' Savings and Profit Sharing Fund," 100 per cent of the eligible employees having already joined.

Employees who have three years continuous service to their credit are eligible, and as employees attain three years continuous service they also will be entitled to come under the scheme.

It is explained that the "fund" is a trust fund which is and will remain the property of the employees and held in trust by an appointed trustee and managed by an Advisory Committee. It is to be built up in various ways—by employees' contributions, by a share of the company's profits, through investment, and through compounding interest.

Contributions.—Each participating employee contributes three or five per cent of his earnings to the "fund," but in no case more than $150 per year. Contributions are credited to each employee and interest is to be added at regular interavls to such deposits. These savings are invested only in recognized trust fund securities or government bonds or annuities.

The company contributes an amount equal to 10 per cent of its net earnings, but not more than four times the amount of the employees' savings. The company's contribution is shared among members of the "fund" by crediting to their accounts.

It is stated that "the problem of men already old in the service of the company will be taken care of by a special fund augmenting their savings and profits in the 'fund.' This is necessary for the first few years, but as time passes and the 'fund' grows, this condition will automatically take care of itself."

Benefits under the Plan.—The "Fund" provides for life insurance for the period until an employees' equity exceeds the amount of the policy. The cost of insurance is now paid from the company contribution, not by the "fund" members as previously. In this way, the employee gains the amount of the premium he has been paying in the past.

The object of the "fund" is to obtain security for every company employee by providing for old age and protection for the employee's wife and children, gradually replacing insurance.

Amendment to Welfare Plans of Canadian Industries Limited

From time to time references have been made in the Labour Gazette to the various welfare plans of Canadian Industries Limited (Labour Gazette, August, 1936, pages 705-7 and September, 1937, pages 987-8).

Recently amended copies of the C.I.L. Vacation Plan for Pay-roll Employees and the Co-operative Savings Plan, have been received. The amended vacation plan extends the vacation period to two weeks after one year's continuous service at April 30, and employees having six months' such service become entitled to one week's vacation. Under the plan as originally adopted in 1935, pay-roll employees were given one week's vacation each year. The plan has been in effect each year since its adoption.

Under the 1937-38 Co-operative Savings Plan there were admitted to participation on June 1, 1938, those employees who had completed one year's continuous service by that date and who were otherwise eligible, since such employees would have been eligible for a new Plan starting at that date if the current one had terminated after the accustomed twelve months, had been followed by another.

REPORT OF ONTARIO DEPARTMENT OF PUBLIC WELFARE FOR FISCAL YEAR 1936-37

THE report of the Department of Public Welfare for Ontario covering the year April 1, 1936 to March 31, 1937, has recently been received. It reviews the activities of the department included among which are the administration of Old Age Pensions, Mothers' Allowances, Children's Aid, Veterans' Welfare, Industrial and Training Schools, Houses of Refuge and Orphanages.

Old Age Pensions.—According to the report made by the Old Age Pensions Commission, $12,087,177.14 was distributed to old age pensioners, the municipalities paying 10 per cent, the province 15 per cent, and the Dominion Government 75 per cent. This sum was paid to 55,950 pensioners an increase of 1,910 pensioners (exclusive of deaths, cancellations, etc.) during the period reviewed by the report.

During the fiscal year the Commission dealt with 9,019 new applications for old age pensions, of which 8,166 were granted full or part pension and 853 refused. There were also 487 reinstatements and transfers, and 6,743 cancellations through death or other causes leaving a net increase of 1,910 pensioners over the previous year. The report also points out that "in 1929, when pensions were first granted, the peak load was estimated at approximately 23,000, and to-day the number stands at 55,950." (More recent old age pensions statistics for the province were given in the June issue of the LABOUR GAZETTE, page 620).

Mothers' Allowances.—The report records a steady increase in the number of applications for mothers' allowances, although the increase was not as great as it was during the first year of the one-child family inclusion. New cases dealt with by the Mothers' Allowances Commission numbered 2,408, of which 1,007 were granted full or part allowance and 1,401 refused. There were also 1,436 cancellations leaving a total of 11,420 beneficiaries in the province.

The total amount paid out by way of allowances during the fiscal year 1936-37, was $4,582,524.61. The report of the Mothers' Allowances Commission states that "Perhaps the most notable event of the year as it affects the municipalities is the action of the government in assuming the full costs of Mothers' Allowances."

Child Welfare.—The Children's Aid Branch of the Department report that 19,769 children were dealt with in their protective work, it only being necessary to make 1,076 new commitments out of this total.

The report states that: "The effectiveness of the strong protective program is evidenced by the total of 10,701 children under direct care of the societies (not in their own homes). This figure represents a reduction from the 12,187 reported in the last annual report of the 10,701 children in direct care, 5,420 were in free care (adoption, probation, wage homes, free homes). Of those in wage homes, 1,050 were definitely earning. In addition, most of the 788 children listed under 'other societies' wards' were in free homes."

During the fiscal year, collections for the support of wards increased from $76,783.13 for the year ending March 31, 1936, to $83,-521.00 for the year ending March 31, 1937.

As usual, the report also reviews the activities of the various industrial and training schools throughout the province and the Soldiers' Aid Commission.

Promotion of Industrial Employment in New Zealand

The report of the Employment Division of the New Zealand Department of Labour covering administrative activities during the period June, 1936, to August 28, 1937, has been received. It indicates that "there has been a large reduction in the volume of unemployment since the end of 1935, 37,316 only remaining on the registers in August, 1937." Of these, it was estimated that less than 17,000 are able-bodied and available for employment.

In New Zealand the absorption of unemployed into industry proceeded in two stages, and the report deals with these as follows:—

"In the first stage, the able-bodied worker who is capable of and available for work, but unemployed, must be kept physically fit, industrially alert, and conscious of the desirability of employment for engagement in industry when it becomes available. For this reason able-bodied unemployed men have been given work on expanded public works, both national and local-body, and, where necessary, the cost of such work in excess of its reproductive value met from the Employment Promotion Fund. The labour required, however, for such relief public work is, of necessity, frequently unskilled, while its productive value may be considerably less than it would be in other occupations. For that reason the second function of the employment administration is to find work for the jobless in private industry, and attention has been paid, and continues to be paid, to industrial-employment possibilities in many industries—e.g., gold-mining, tobacco-growing, flax development, steel, and kauri-gum."

THE REGULATION OF INDUSTRIAL RELATIONS IN SOUTH AFRICA

THE Industrial Conciliation Act, 1937, of South Africa which came into effect on December 15, repeals an Act passed in 1924 after a prolonged strike in the mining industry. Prior to 1924, the Union of South Africa had made no statutory provision for the settlement of industrial disputes but in the Transvaal the Labour Disputes Act, largely similar to the Canadian Industrial Disputes Investigation Act, had been in effect since 1909.

Machinery for establishing minimum wages for women and young persons through wages boards in certain trades had been set up under the Wage Act passed by the Union Parliament in 1918. This system was replaced by the Wage Act, 1925, which provided "for the determination of conditions of labour and of wages" by a permanent Wage Board of three members, "divisions" of which, (also consisting of three members), might be appointed to enquire into conditions in any particular industry or trade. The Wage Act was not intended to be applied where employers and workpeople were organized sufficiently to make use of the machinery provided by the Industrial Conciliation Act, 1924, but if they did not avail themselves of the latter Act, minimum conditions of employment could be prescribed by the Wage Board.

In 1934, the Government appointed a Commission to enquire into the operation of the Wage Act, the Industrial Conciliation Act and the Apprenticeship Act. The first two statutes were revised in 1937 following the recommendation of the Industrial Legislation Commission (LABOUR GAZETTE, Vol. 35, December, 1935, p. 1115). The fundamental principles of the legislation remain unchanged. Employers and employed are to be encouraged to organize for self-government; where this is not done, the state can determine conditions and intervene to settle disputes.

As regards the operation of the Industrial Conciliation Act, 1924, the Commission reporting in 1935, stated:

> It can definitely be said that the principal object for which the Act was passed, that is, to bring about a better spirit between employers and employees and in this way to minimize disturbances in industry, is being achieved. It cannot, however, be said that the best possible results are being obtained. This is due to a variety of causes, such as legal defects or limitations in the Act, deliberate antagonism on the part of individual employers and inadequate inspection.
>
> Generally, by both employers and employees, the Act is judged to be good in principle. Many would like to see amendments thereto, but there are but few who desire its repeal.

The Official Year Book of South Africa, 1937, contains the following:

> The Industrial Conciliation Act, which came into operation in April, 1924, is being extensively used by industry, and the record of strikes and lock-outs since this Act came into operation has been greatly reduced. . . .

*SUMMARY OF INDUSTRIAL DISPUTES, 1906 TO 1936

Years	Number of Strikes beginning each Year	Number of Workpeople Involved	Aggregate Duration in Working Days
1906-1910	7	6 870	300,846
1911-1915	24	43,442	266,801
1916-1920	168	136,771	1,428,176
1920-1925	46	40,799	1,462,734
1925-1930	47	19,684	23,151
1931..	19	6,284	54,575
1932..	12	4,011	26,034
1933..	10	1,585	16,081
1934..	12	2,379	52,132
1935..	17	2,367	19,564
1936..	20	2,198	5,009

* In the above table the records up to 1917 are by no means complete, as returns were not then tabulated for all the strikes shown. The latter portion of the table may, however, be accepted as a fairly accurate record.

The new Acts make identical provision concerning failure to observe wage orders or agreements, the payment of arrears of wages, victimization of employees, powers of inspectors and the registration of employers. Every employer to whom an order, agreement or award applies must register with the Department of Labour and Social Welfare.

The Industrial Conciliation Act of 1937 retains the main principles of the Act of 1924 but makes some important amendments more particularly to prevent evasions and ensure adequate enforcement. The Act, like that of 1924, distinguishes between industries in which trade unions are organized and those which are unorganized and provides different machinery for the settlement of disputes in such industries. Organized industries may, by agreement, provide machinery for settling disputes and determining working conditions through industrial councils. Strikes and lock-outs are prohibited pending investigation or, if arbitration is resorted to by agreement for any cause dealt with in the award. In certain essential services, they are illegal at any time. Trade unions and employers' organizations are required to be registered and provision is made to ensure freedom of association. A collective agreement may be legalized as between the parties at their request and may be made binding also on others in the industry under certain conditions. During the currency of such an agreement, there may be no strike or lockout because of any dispute concerning a matter covered by the agreement.

Industrial councils in organized industries were formed after the promulgation of the statute of 1924 and increased from two in 1925 to 14 in 1926, 29 in 1928, 38 in 1930 and 43 in 1931. For three years, there was a steady decline until 1934 when the councils numbered 32 but in 1935 when the Industrial Legislation Commission reported there were 38. "Most of the important industries" have adopted the council system. Three councils were national in scope. Organization on a national basis is difficult, the Commission pointed out, in a country where the large centres of population are separated by long distances.

Trade Unions and Employers' Associations

To facilitate its application to organized industries and to regulate trade unions and employers' associations, the Act requires every trade union and employers' association within three months of its formation, to apply to a government officer, styled the "industrial registrar," for registration, furnishing three copies of its constitution and any further information which he may require. The Act of 1937 stipulates that if the registrar is satisfied that the organization is one primarily for the purpose of regulating relations between employers and employed or protecting or furthering the interests of the employers or employed, as the case may be, and that it has not been formed for the purpose of evading any law, he is to register it provided, however, that if he considers that an organization already registered is sufficiently representative of the whole of the interests in the area in respect of which it seeks registration or of any part of those interests, he is to refuse to register it. The registrar may invite the union or employers' organization which has been already registered to submit to him any objections it may have to the registration of any organization.

As under the 1924 Act, every registered trade union or employers' organization becomes a body corporate with the rights and liabilities of a corporation, but under the 1937 Act, no person, merely by reason of the fact that he is a member or officer of the organization, is liable for any of its obligations unless it is otherwise provided in the constitution of the organization.

The Act prescribes certain matters which must be dealt with in the constitution of every registered trade union or employers' organization and makes provision for altering the constitution and for the amalgamation and winding up of organizations. The secretary of every registered trade union or employers' organization must, within thirty days after receiving a written request from the registrar, furnish a statement showing the number of members, the number whose subscriptions are in arrears for more than three months or similar particulars in respect of any class or group of members. New powers are given to the registrar, or to any person delegated by him, for the purpose of investigating any alleged illegal actions or irregularities on the part of trade unions or employers' organizations or their officers. After making such enquiries, the registrar must report to the Minister, who may publish the whole or part of his report after submitting it to the organization concerned.

Freedom of association and the protection of persons taking part in a strike or lockout are the subject of new sections of the Act. It is declared an offence for an employer to make it a condition of employment that any employee shall not be or become a member of a trade union and proceedings in any court are prohibited against a trade union or employers' organization or against any member or officer of a union or organization for any wrongful act committed by the union or organization in furtherance of a strike or lockout but this exemption does ont apply to any criminal act or to any strike or lockout which is illegal under the Act.

Industrial Relations

As stated above, in industries in which employers and workpeople are organized, working conditions are expected to be determined by collective agreements and disputes settled by joint industrial councils. In unorganized industries, orders made under the Wage Act may regulate wages and other conditions and differences may be composed by a conciliation board. A mediator may be appointed by the Government to assist either an industrial council or conciliation board in bringing about a settlement of a dispute. Provision is made for voluntary arbitration and for compulsory arbitration in connection with certain public utilities.

It is interesting to note that the word "dispute" was not defined in the Act of 1924 and the Industrial Legislation Commission considered that it was wiser not to attempt a definition since in some circumstances it might be found too circumscribed.

Industrial Councils and Agreements

Any registered employers' organization or group of registered employers' organizations, together with any registered trade union or group of registered trade unions, may form an industrial council but the Act of 1937 stipulates that individual employers or groups

of employers may enter into an agreement with a trade union to form an industrial council only if the Minister approves and the Minister shall not approve if the groups of employers or individual employers concerned are eligible for membership in an employers' organization which is a party to a council.

An industrial council must be registered and the new Act provides that it shall thereupon have the full powers of a corporation and may require contributions to be made by the employers and employees in the industry towards its expenses. If a council applies for such assistance, the Minister may appoint some person, who may be a government officer, to act as secretary of the council. The Government may also provide clerical help. In such case, the cost may be apportioned between the government and the council.

Every industrial council is required to have its accounts audited annually and a statement transmitted to the registrar. Minutes of proceedings must be kept and a copy submitted to the inspector appointed under the Act. Unless the constitution of a council stipulates to the contrary, a two-thirds majority of the members present at a meeting is required for any decision.

The constitution of an industrial council must provide for the admission of additional employers or registered employers' organizations or trade unions as parties to the council and must lay down the procedure to be followed in dealing with any dispute in the industry within the area which the council represents. It is the statutory duty of an industrial council to endeavour, by agreements or otherwise, to prevent disputes and to settle any that may arise between employers or employers' organizations and employees or trade unions which are represented on the council and which have entered into an agreement concerning working conditions.

The parties to an industrial council may make an agreement providing for minimum rates of wages for employees or any class of employees, the minimum average rate to be paid by any employer to his employees or any class of employees, the deductions which may be made from wages, the method of calculating minimum rates or minimum average rates, the time and manner of payment of wages, the payment for piece-work at a rate not less than that for a time worker of a similar class, the regulation of piece-work, the prohibition of work on premises or at places specified, the proportion of certain classes of employees that may be employed, the prohibition of employment below a specified age, the notices to be posted by employers, the rates to be paid to persons given work by a contractor whether or not the contractor is an employer in the industry concerned, the exempting of any person from any provisions of an agreement and the conditions of such exemption, the establishment of pension, medical, unemployment, holiday, provident and other insurance funds and the levying on employers and employees of contributions for such funds, the prohibition of the payment of wages otherwise than in money, the prohibition and regulation of overtime work, the grading of employees according to principles set out in the agreement, the issue by an employer to any employee of a certificate stating the time during which the latter has been employed by him and any other particulars specified in the agreement, and, generally, any matter affecting or connected with the remuneration or other conditions of work of all employees or of any class of employees or as to any matter of mutual interest to employers and employees.

Among the matters which may be dealt with in agreements, the most important added by the Act of 1937 are the minimum average rate of wages for employees in any undertaking, industry or trade, piece-rates on the basis of time work and the regulation of payment by contractors.

If requested to do so by an industrial council, the Minister may declare, for a period fixed by him, an agreement to be binding on the employers or employers' organizations and trade unions which entered into the agreement and on the employers and employees who are members of the organizations or unions. He may specify certain provisions of the agreement which are to be binding. Further, if a council requests the Minister to declare an agreement or any of its provisions binding upon the other employers and employees engaged in the undertaking, industry or trade to which the agreement relates, the Minister may, if he deems it expedient and if he considers that the parties to the agreement are sufficiently representative of the employers and employees in the industry, declare the agreement binding on all those in the industry including any contractors and subcontractors.

The period of time for which the agreement has been legalized and made applicable to all in the industry may be extended by the Minister, on request, provided he is satisfied that the parties are still sufficiently representative of the employers and employees in the undertaking, industry or trade in the district affected.

Conciliation Boards

If a dispute arises in an industry for which no industrial council is registered, an application may be made by one party to the Minister for the establishment of a conciliation board and if the Minister considers that the applicant is sufficiently representative of the employers or employees, as the case may be, he must comply with the request but no conciliation board may be established if the dispute relates to the termination of the employment of an individual employee other than an employee engaged in a public utility service to which other sections of the Act apply, unless a matter of principle is involved. Nor may a board be established if the dispute has to do with the interpretation of the Act or any agreement or award made binding under the Act or with any other question of law.

A new provision in the statute of 1937 gives the Minister power to take the initiative in establishing a board without waiting for application to be made if the dispute is one concerning the conditions of work or the continued employment or dismissal of any person performing work connected with the supply of light, power, water or sanitary services, passenger transportation or the extinguishing of fires, if, after a preliminary inquiry, he considers that the service is likely to be endangered if the dispute is not settled.

As under the Act of 1924, a conciliation board is a bipartite body consisting of such number of persons as the Minister may determine, half appointed by the employees and half by the employers, but if within the period fixed by the Minister, which is not to be less than 14 days, or, if no time has been fixed, within not less than 30 days, an appointment has not been made, the Minister may make the appointment. Provision is made for the appointment of alternates to each representative on the board. A person employed by the Government of the Union or by a provincial government may not be a member of a conciliation board. No person who is not a member of a registered trade union or employers' organization may be appointed as a representative of such organization or as an alternate and no person, other than an officer of a registered trade union or employers' organization, who is not an employee or employer in the trade or industry concerned may be appointed to represent any employees who are not members of a registered trade union or any employers who are not members of an employers' organization. In the application of this section, any member or officer of a registered trade union which is a party to the dispute is to be deemed to be an employee and any member or officer of a registered employers' organization which is a party to the dispute and any person employed as a manager or in any other supervisory capacity by an employer who is a party to the dispute is to be deemed to be an employer. The Minister may authorize a departure from these provisions concerning the representation of parties to a dispute.

A conciliation board, like an industrial council, has power to summon witnesses, compel the production of documents, etc. Its expenses are paid from the public funds. Formerly, a conciliation board was required to report to the Minister within fourteen days but the 1937 Act stipulates one month or such longer period as the Minister may fix.

If the board is able to effect a settlement of the dispute, it may recommend that the agreement arrived at shall be made binding on the parties represented or on the parties and all other employers and employees in the undertaking, industry or trade. The Minister may accede to this request on the same conditions as apply to the legalization of an agreement made by an industrial council.

Mediation

If any industrial council or conciliation board finds itself unable to effect a settlement of a dispute it may apply to the Minister for the appointment of a mediator or the Minister may appoint a mediator on his own motion. Such person may attend and preside at the meetings of the council or board but is not entitled to vote.

Voluntary Arbitration

Except with respect to disputes between a local authority and its employees engaged in work connected with the essential services mentioned above or a dispute involving a registered trade union, the membership of which is, by its constitution, limited to employees of one or more local authorities, an industrial council or conciliation board may decide to refer any dispute to arbitration. Since both parties to a dispute are represented on the industrial council or conciliation board, as the case may be, and arbitration is resorted to by agreement, the action is a voluntary one, but once the dispute has been submitted to arbitration, the decision or award of the arbitrator or arbitrators becomes binding on the employers and employees and the organizations which are parties to the dispute for a period to be fixed in the award but which is not to be less than six months or more than 12 months. The date on which the award is to take effect is also to be fixed by the

arbitrators and it may be at an earlier or a later date whichever appears more equitable, but in no case may an award operate from an earlier date than that on which, in the opinion of the arbitrators, the dispute came into existence.

Arbitration must be by a single arbitrator or by an even number of arbitrators. Where there are two or more arbitrators, an umpire must be appointed. The appointment of a single arbitrator or of an umpire is made on a majority vote of all the employers' and employees' representatives on the industrial council or conciliation board. If more than one arbitrator is appointed, half the number must be appointed by the employees' representatives and half by the employers' representatives. Failure to appoint an arbitrator or umpire within 10 days after the decision to refer the dispute to arbitration, or within such longer period as a council or board, with the approval of the Minister, may determine, gives the Minister power to make the appointment. Assessors to act in an advisory capacity may be appointed by both sides. The decision of the majority of arbitrators is to be the decision of the arbitrators and if a majority is not agreed on any point, the umpire gives the decision.

A new section gives to the parties to a dispute certain rights of representation. If the party is an individual, he may appear in person or be represented by any other individual who is a party to the dispute or by one or more members or officers of a trade union or employers' organization which is a party to the dispute. If the party is a trade union or employers' organization, it may be represented by one or more of its members or officers or by one or more members or officers of any other trade union or employers' organization which is a party to the dispute. If all the other parties consent, any party may be represented by legal counsel or by one or more members or officers of a trade union or employers' organization which is not a party to the dispute.

The costs of arbitration, whether it be voluntary or compulsory, are, in general, borne by the parties. Where there is an industrial council, the expenses of arbitration are met from the funds of the council. Where a conciliation board was appointed, the employers and employees are respectively responsible for the fees of the arbitrators appointed by them and the fee of a single arbitrator or umpire is paid by the two parties. Where an arbitrator or umpire, however, is appointed by the Minister, he is paid out of the Consolidated Revenue Fund. All other costs of arbitration are shared equally by the two sides except that expenses incurred directly by one side must be paid by that side unless there is an agreement to the contrary.

Compulsory Arbitration

As indicated above, special provisions apply to disputes involving such essential services as the supply of light, power or water, sanitary services, passenger transportation and the extinguishing of fires. The system of compulsory arbitration in respect to these services is similar to that prescribed by the Act of 1924 as amended in 1933 and applies when any of these services are supplied by a local authority and, under certain conditions, when they are furnished by some person other than a local authority.

Where either an industrial council or a conciliation board has failed to settle a dispute between a local authority and its employees engaged in work connected with any of such services within a period of 30 days or such further period as the Minister may determine or if, before the prescribed period expires, a council or board is satisfied that it is unlikely to be able to settle such a dispute within the allotted time, it may so report to the Minister and in either case, the Act stipulates that the dispute must be referred to arbitration. If within 14 days after the prescribed period for settlement of the dispute or within 10 days after the council or board has satisfied itself that further deliberation will not result in a settlement, the council or board is unable to decide whether to refer the matter to a single arbitrator or to two or more arbitrators, the Minister is required to determine the number. After this decision has been taken, the council or board is allowed 10 days to appoint the arbitrator or arbitrators and failing any appointment, the Minister may select the arbitrator or arbitrators.

Wherever, within the area of any local authority, some person other than the local authority supplies, directly or indirectly, more than 50 per cent of his output of light, power or water in that area or more than 50 per cent of the light, power or water consumed within the area, to the local authority or to any person residing or carrying on business in the district, or partly to the local authority and partly to individuals, the provisions concerning compulsory arbitration are to apply to disputes involving workers employed by such person. However, unless the Minister directs otherwise, they are not to apply if the supply of light, power or water does not exceed 5 per cent of the employer's output. Wherever sanitary services, passenger trans-

portation or fire services are provided by any person other than a local authority, the provisions as to compulsory arbitration apply.

If a registered trade union, the membership of which is restricted to employees of any local authority or authorities, requests the Minister to apply to a dispute involving them, irrespective of the work in which they are engaged, the provisions of the Act concerning compulsory arbitration, the Minister may, by notice in the Gazette, declare such provisions to apply to all members of that trade union. Any such declaration may be revoked or amended by similar notice after consultation with the trade union concerned.

If a local authority is unable or unwilling, because of any strike or concerted action of its employees or because its powers have been usurped by any unauthorized person or persons, to continue to give any service furnished by it under any law, the Minister may, at the expense of the local authority, and after giving proper notice, take over its functions and provide the service. The Minister has similar power as regards any person other than a local authority who supplies light, power and water under the conditions outlined above.

Exemptions from Agreements or Awards

The Act of 1937 provides for the exemption of persons from all or certain provisions of an agreement or of an award which has been made applicable to them. Industrial councils are themselves given power to deal with the conditions of granting exemptions in their agreements and exemption may be given, according to the terms of the agreement, by the council or by a committee to which it has delegated this authority, but any person to whom the agreement of an industrial council applies and who is not a member of a party to the council has right of appeal to the Minister concerning any question of exemption.

Exemption from agreements arrived at by conciliation boards and made binding by the Minister and exemption from arbitration awards may be authorized by the Minister, or by an officer delegated by him, on the report of an inspector that, in his opinion, the working conditions of certain persons are substantially not less favourable to them than the conditions laid down in the agreement or award, or that any person suffers from a physical disability and can do only part of the work required of an able-bodied person, or that there are special circumstances which justify, in his own interest, the exemption of any person.

Strikes and Lockouts

A strike is defined in the Act of 1937 as the refusal or failure to continue or to resume work or the wilful retardation or obstruction of work if such action arises from a dispute regarding conditions of employment or other matters and is in pursuance of an agreement or understanding among a number of employees to induce or compel any person or persons by whom they are or have been employed to comply with any demands concerning conditions of employment or other matters. It is not a defence that the employees concerned have given proper notice of the termination of their contracts of service. The definition of lockout contains similar conditions. In each case the onus is on the party bringing about the stoppage of work to prove that any action taken was not in pursuance of an agreement or understanding to bring pressure to bear on the other party.

Little change has been made in the sections of the Act declaring strikes and lockouts illegal under certain conditions. Taking part in a strike or lockout is an offence if it occurs during the period of operation of any arbitration award or any agreement which has been made binding under the Act provided that the matter concerning the strike or lockout is dealt with in the award or agreement. A strike or lockout is forbidden also in connection with the supply of light, power, water, sanitary or fire services, or passenger transportation or if the workmen concerned are members of a registered trade union including only the employees of a local authority and if the union has requested the Minister to apply the provisions of the Act concerning compulsory arbitration.

In other disputes, a strike or lockout is illegal if there is an industrial council having jurisdiction until the matter has been considered by the council and a written report has been made to the Minister or until 30 days after the matter has been submitted to the council or such longer period as the council may fix, whichever event occurs first.

Where there is no industrial council, it is illegal to take part in a strike or lockout unless application has been made for a conciliation board and until the board has reported to the Minister or until after the expiration of a period of 30 days from the date on which the Minister approved the establishment of a board or such longer period as the board may fix, or until the Minister has refused to establish a board or has not, within 21 days after the application was made, approved or refused to approve the establishment of a board, whichever event

occurs first. Finally, it is an offence to participate in a strike or lockout if it has been decided by an industrial council or conciliation board to refer the dispute to arbitration.

A fine not exceeding £500 or imprisonment for not more than three years or both may be imposed on any person for taking part in an illegal strike or lockout.

Notice of Change in Conditions

If an employer alters, or gives notice of his intention to alter, the conditions of employment of any of his employees, they may refer the matter to the industrial council, or, if there is no council, they may apply for a conciliation board. In the latter case, the Minister has power to establish a board without regard to the conditions laid down in the Act for the setting up of a conciliation board.

Where the dispute is referred to a council or application is made for a board within 30 days after conditions were changed or notice of a change was given, the employer is required to restore the conditions existing before the change or refrain from making any alteration until the council or board has reported to the Minister or until 30 days after the reference to a council or a board or until after such longer period as the council or board may fix or as the Minister may fix in the case of the public utilities especially provided for in the Act, or until the Minister has refused to set up a board or has taken no action within 21 days after application or pending the making of an award where the matter is referred to arbitration.

These provisions as to notice of exchange in conditions of employment do not apply to the engagement, suspension, dismissal or demotion of an individual employee, the assessment of contract prices to be paid to an individual or any other matter affecting an individual employee unless the Minister considers that a principle is involved, but the word "individual" does not include a person employed in the essential services indicated above or one employed by a local authority if application for arbitration is made by the union to which the employees of the authority belong.

Enforcement

Important changes were made in the Act to ensure its proper application and to prevent evasion. The Minister has power to determine any question as to whether any person or any class of business or work is covered by an agreement or award but he must give notice of the matter and fix a time during which any industrial council or other person may make written or oral representations to him and he is required to publish his decision in the *Gazette* with full particulars. Any person who considers himself aggrieved by such a decision or by a decision of the Minister in connection with the registration of trade unions, employers' organizations or industrial councils or the establishment of a conciliation board has the right, within 30 days after the decision has become known to him, to appeal to the Supreme Court on giving security for any costs that may be incurred by the Minister in connection with the appeal. No defect in the constitution of any trade union or employers' organization or industrial council and no irregularity in the election or appointment of any representatives on an industrial council or conciliation board or of any mediator, assessor, arbitrator or umpire can invalidate the constitution or registration of the organization or any agreement or award or any act of an industrial council or conciliation board.

The Industrial Conciliation Act of 1924 declared it an offence for an employer to dismiss any employee or reduce his rate of wages or to make the conditions of employment less favourable on the ground that the employee had given information which he was required to give under the Act or information which related to the conditions of his employment or those of other employees to an industrial council or the agent of an industrial council or to a conciliation board or to a mediator or arbitrator. The new statute adds to the above reasons for victimization an employee's refusal to be party to any act of evasion by entering into an agreement to accept less remuneration than that provided in an agreement or award, or his membership in a trade union or participation, outside working hours or with the consent of the employer within working hours, in the formation or lawful activities of a trade union. The onus is on the employer to satisfy the Court where an employee has been dismissed or otherwise victimized that it was not due to any of the above causes. Moreover, in addition to any fine or imprisonment that may be imposed for victimizing an employee, the employer may be ordered to re-instate the employee concerned or to pay him compensation not exceeding £200 or may order both reinstatement and compensation. Similar provisions are contained in the Wage Act, 1937.

Where an employer is convicted of underpaying an employee, the Court must order the amount due to be paid to an officer

specified by the Court within a fixed period and it is no longer a defence that the Court is not in a position to state definitely the amount underpaid. If it appears that the workman did not agree to work for less than the minimum wage or that he made such agreement without knowing his rights, the whole of the amount underpaid must be paid to the employee. If, however, the Court finds that the workman was at fault in some measure, it may direct that any portion of the amount shall be paid to the employee or that he shall be paid not less than one-quarter of the amount.

Where an employer has been convicted of the offence of underpayment, the employee has no right of action against the employer, his only remedy being the power given to the Court to order that the whole or part of the amount be paid to him. Where a workman has stipulated for a wage above the minimum, he may sue his employer for the amount in excess of the minimum or where the employer has not been convicted of underpayment, the employee may sue if he presents to the Court a certificate from an attorney-general of the province that he declines to prosecute the employer or if the employer has been acquitted on a charge of failing to pay the fixed minimum.

In order to assist in prosecuting employers for evasions of the Act, it is now stipulated that the accused must prove that he paid the prescribed minimum wage. If the employer fails to keep records as required or falsifies them, the Court must presume that for any period during which records were not kept or for which they were falsified, the workman has been employed for the ordinary hours laid down in the agreement or award unless the employer is able to prove the contrary.

Provision is made for the appointment of inspectors with power to enter premises, call for documents, etc., and the Minister may appoint any person nominated by an industrial council as the designated agent of the council to assist it in carrying out its duties and in enforcing any agreement or award. Formerly, such agent had the same powers as an inspector appointed by the Government only with respect to the parties to an agreement but the Act of 1937 gives the agent of a council power to inspect establishments of employers who are not parties to an agreement but to whom the agreement has been extended. This change in the Act was among those recommended by the Industrial Legislation Commission.

Every employer must, within one month after an agreement or award becomes binding on him or within three months after the commencement of the Act if he is already bound, send to the inspector a statement giving information about his business, the company if any, its places of business and any other information required. A certificate of registration is then granted to the employer and no employer may carry on business after the expiration of the time permitted unless he has such a certificate.

No certificate may be issued if the employer has been convicted of underpayment and has not fully complied with an order to pay the money. Cancellation of a certificate and consequent inability to continue in business will follow failure of a registered employer to comply with an order of the Court to pay wages due. The Minister has power, however, to direct that a certificate be issued in such a case, subject to any conditions he may impose, provided that there is good cause shown for this exceptional treatment and that, if there is an industrial council in the industry, it is consulted by the Minister.

If an employer is convicted a second or subsequent time of underpaying an employee, he is liable, in addition to fine or imprisonment or both, to be ordered to surrender his certificate of registration and he is liable to imprisonment for one year if he continues in business and employs any person after the date on which his certificate was to be surrendered.

The penalties provided by both the Industrial Conciliation Act, 1937, and the Wage Act, 1937, are more severe than under the old legislation. Any employer who discriminates against an employee is liable to a maximum fine of £300 or two years' imprisonment. The maximum fine for an offence for which no other is fixed is £100 with the option of one year's imprisonment.

The New South Wales Industrial Gazette of April 30, states that under the Workmen's Compensation (Silicosis) Act 1920-36 the Minister of Labour and Industry has recently promulgated two schemes for the compensation of sufferers from the effects of silica dust. The first scheme replaces and extends the scope of that made in 1927. It applies throughout the State to workmen engaged in quarrying, cutting, dressing or excavating sandstone and working in sandstone tunnels. The other scheme is for workmen in the iron, steel, stove-making, ore milling (grinding of silica), brick, tile, bottle and glass making industries in processes involving exposure to silica dust. Both schemes provide for the constitution of committees for their administration consisting of a chairman and executive member and two members, one of whom represents the employers, and one the employees. The text of the schemes and the personnel of the committees are published elsewhere.

FIRST SESSION OF THE INTERNATIONAL PUBLIC WORKS COMMITTEE

THE new International Public Works Committe, set up by the Governing Body of the International Labour Office according to a Recommendation of the 1937 International Labour Conference, met at Geneva commencing June 27, under the Chairmanship of Mr. Carter Goodrich, United States Government delegate.

The following 25 countries were represented: Belgium, Brazil, Canada, China, Czechoslovakia, Egypt, Estonia, Finland, France, Great Britain, Greece, Hungary, Luxemburg, Mexico, Netherlands, New Zealand, Norway, Panama, Poland, Spain, Sweden, Switzerland, the Union of South Africa, the United States of America and Yugoslavia. In addition, three representatives of the Employers and three representatives of the Workers were present, as well as representatives of the Economic Committee, the Financial Committee and the Communications and Transit Organization of the League of Nations.

This meeting marks a new advance in the action of the International Labour Organization towards securing effective international collaboration in the field of public works.

The Committee first held a general discussion, during which almost all speakers referred to the progress made in their countries by the idea of using the advance planning of public works as a means of regulating the volume of employment. Although the experiments made during the recent depression had not all proved favourable, or at least as favourable as had been hoped, that might be attributed to the fact that they were often improvised. Efforts were now being made in several countries to draw up programs for a long period; these programs were well thought out and could be put into effect at the appropriate moment. The information which would be collected by the Committee would undoubtedly be of great value for the preparation of such plans.

The Committee then examined in detail the various points of the uniform plan of information, and in a resolution adopted unanimously asked the Governing Body of the International Labour Office to invite the States Members which have approved the Recommendation of the International Labour Conference to communicate to the International Labour Office the information referred to in this Recommendation "in accordance, as far as possible, with the following plan."

This plan begins with a definition of "public works":

> "For the purpose of this plan 'public works' should be understood as meaning all works undertaken by central, regional or local authorities or with the aid of subsidies or loans from such authorities or supervised by them.
>
> "In giving information under this plan Governments should indicate whether the information relates only to capital account or whether it also includes maintenance work and other kinds of work."

In a first part, the plan classifies the works according to their kind, such as roads, bridges, tunnels, railways, agricultural land reclamation, land irrigation, canals, forestry work, construction of dams for reservoirs, provision of water supplies, the construction of ports, airports, coast protection work, administrative buildings, public utilities, etc.; then according to the body responsible for carrying out the work, or subsidizing or supervising it—central, regional or local authorities, public utility undertakings,—and by bodies or individuals in receipt of a subsidy or loan granted with a view to increasing the volume of employment.

A second part of the plan indicates the kind of information to be supplied by the Governments.

They deal with the general organization of public works and on the working of national co-ordinating or directing bodies; and on the policy adopted concerning retarding or advancing public works. It would be useful if the Governments supplied information on the regional distribution of the work in regard to the incidence of unemployment.

With regard to work carried out during the period information should be given on the total cost of such work, on the methods and conditions of financing including amortization, particularly in respect of works undertaken to increase the volume of employment; on the estimated revenue from the more important works; and on the estimated number of man-days of employment on the works.

For works planned for the forthcoming period, information should be supplied on the same points in the same conditions.

Finally, information is required on the conditions of recruitment and employment (hours of work, wages, etc.), and conditions of transport and housing of the workers, given separately for normal public works and relief works.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, MAY, 1938

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on June 1 was 10,632, the employees on their pay-rolls numbering 1,068,620 persons.

(2) The Department of Labour, receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for May was 1,896, having an aggregate membership of 220,005 persons, 13·2 per cent of whom were without employment on June 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of June, 1938, as Reported by Employers

According to data tabulated by the Dominion Bureau of Statistics from 10,632 firms and branch offices throughout Canada, there was important expansion in industrial employment at the beginning of June, when the reported staffs numbered 1,068,620, compared with 1,025,285 at May 1. This gain of 43,335, or 4·2 per cent, approximated the average increase recorded from May to June in the years, 1920-1937, and rather exceeded the average increase at June 1 in the last nine years, upon whose experience the factors for seasonal correction have been calculated. Accordingly, the seasonally-adjusted index rose slightly, standing at 111·9 at the latest date, compared with 111·5 at the first of May, 1938. The unadjusted index also stood at 111·9, compared with 107·4 in the preceding month.

Very pronounced improvement had been indicated at June 1, 1937; the 10,178 employers then making returns had employed 1,087,735 men and women, an increase of 75,935 from May 1. This advance was the largest reported in any month of the record, raising the crude index from 106·3 at May 1, 1937, to 114·3 at June 1 of that year. It was then 2·4 points righer than at the beginning of June, 1938. However, the index for the latest date (111·9), was higher than at the corresponding date in any of the years, 1931-1936. The figures for June 1 in recent years of the record are as follows: 1938, 111·9; 1937, 114·3; 1936, 102·0; 1935, 97·6; 1934, 96·6; 1933, 80·7; 1932, 89·1; 1931, 103·6; 1930, 116·5; 1929, 122·2; 1928, 113·8 and 1927, 107·2. The 1926 average is taken as 100 in calculating these index numbers.

Improvement was reported at the date under review in manufacturing, especially in the food, lumber, pulp and paper, electric light and power, iron and steel and clay, glass and stone divisions. On the other hand, leather, chemical and textile plants were slacker. In the non-manufacturing industries, trade showed little change on the whole; logging camps continued to reduce their staffs, while there were important increases in mining, communications, transportation, building, highway and railway construction and maintenance and services. The expansion in construction was most noteworthy, exceeding the average gain indicated at June 1 in the years since 1920, although it was not so marked as at that date in 1937.

Employment by Economic Areas

The trend was upward in each of the five economic areas; firms in Quebec employed the greatest number of extra workers. The percentage gains over the preceding month ranged from 2·1 in British Columbia, to 6·9 in Quebec. A comparison with the data for June 1 of last year shows that the situation in Prince Edward Island was unchanged; in

Quebec, the index was substantially higher and in Alberta fractionally so, but in the remaining provinces industrial activity was at a lower level than at the same date in 1937. However, employment generally in the economic areas continued in greater volume than at the corresponding date in the preceding five or six years.

Maritime Provinces.—An increase was reported in the Maritime Provinces, according to statistics received from 790 employers with a combined working force of 81,019 persons, as compared with 78,386 at May 1. This gain, though providing employment for a considerable number of men and women, was rather below the average indicated at June 1 in the years since 1920, and was decidedly smaller than that which took place at June 1, 1937, when employment was generally brisker. Manufacturing showed heightened activity at the date under review, particularly in the iron and steel, lumber and animal food divisions; trade and construction also afforded more employment, the gains in the later being pronounced. On the other hand, logging and transportation were seasonally slacker.

The 718 firms reporting for June 1, 1937, had employed 88,034 workers, or 8,093 more than at the beginning of May of last year.

Quebec.—Improvement was indicated in most industrial groups in Quebec; construction recorded especially large increases in personnel; there were also important gains in manufacturing and transportation, with smaller advances in logging, mining and trade. Within the manufacturing division, pulp and paper, lumber and clay, glass and stone plants reported the greatest expansion; on the other hand, textiles showed seasonal curtailment, and iron and steel factories were also quieter. Statements were tabulated from 2,570 firms employing 335,996 workers at June 1, 1938, or 21,766 more than in their last monthly report. The general gain indicated by the employers making returns exceeded the average at June 1 in the years, 1921-1937, but

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calender year 1926 as 100.

was rather smaller than that recorded at the same date of last year, when the co-operating establishments, numbering 2,425, had reported 316,144 employees, as compared with 292,822 in the preceding month.

Ontario.—There were considerable increases in manufacturing, mining, transportation and construction and maintenance at June 1, 1938, together with smaller advances in logging, communications and services. Within the manufacturing division, the lumber and food divisions showed the largest additions to the pay-roll, and there were smaller gains in the pulp and paper, clay, glass and stone, beverage, electric current and other groups; on the other hand, leather, textile, chemical and iron and steel works were slacker. The staffs of the 4,668 co-operating establishments aggregated 438,579 employees at the latest date; as compared with 428,539 at May 1, this was an increase of 10,040 persons. The general index of employment stood at 112·5 at June 1, as compared with 109·9 at May 1, 1938, and 118·8 at the beginning of June in 1937, when much greater expansion had been indicated. An aggregate working force of 462,112 persons was reported by the 4,499 concerns then furnishing data.

Prairie Provinces.—Construction (especially highway and railroad construction and maintenance), transportation, communications and services showed improvement in the Prairie Provinces, while manufacturing, mining and trade reported little general change. In the group of factory employment, an upward movement in food, lumber and some other divisions was offset by curtailment in iron and steel works. Logging was seasonally slacker. The 1,502 firms whose statistics were tabulated employed 123,479 persons, as against 116,463 in the preceding month. Rather larger increases had been indicated at June 1, 1937, when the 1,459 employers making returns reported 126,395 workers, compared with 118,716 at May 1; the index then was slightly higher.

British Columbia.—An aggregate pay-roll of 89,547 was reported by the 1,102 co-operating establishments who had 87,667 employees at the beginning of May. This increase did not equal the average gain at June 1 in the years since 1920, and was much smaller than that noted at the same date in 1937. The index of employment then was seven points higher than at the first of June of the present year, when it stood at 105·1. Manufacturing recorded noteworthy improvement, that in food factories being most pronounced. Among the non-manufacturing groups, mining, transportation, construction and maintenance and services showed heightened activity. For June 1, 1937, statements had been received from 1,077 employers of 95,050 persons.

Table 1 gives index numbers by economic areas.

Employment by Cities

The trend was favourable in five of the eight cities for which separate compilations are made, Montreal, Toronto, Ottawa, Winnipeg and Vancouver showed improvement; the situation in Quebec was unchanged, while there were moderate losses in Hamilton and Windsor. Employment in Montreal and Quebec was rather brisker than at the same date of last year, but the indexes in the remaining centres were lower. Except in Ottawa, activity at June 1, 1938, was greater than at that date in 1936 and immediately preceding years; in Ottawa, the latest index was slightly lower than at June 1, 1936, but was higher than in the early summer of other years since 1931.

Montreal.—Further marked improvement was recorded in Montreal, where the 1,474 co-operating firms employed 161,781 persons, an increase of 4,314 over their May 1 staffs. Manufacturing operations declined; most of the loss occurred in textile factories, while vegetable food, clay, glass and stone and some other classes showed an upward movement. Transportation, construction and trade were also busier the advance in construction being most pronounced. The index, at 107·3, was two points higher than in June, 1937, when greater expansion had been recorded in the 1,402 establishments from which information was received, whose employees had numbered 158,020.

Quebec.—Employment in Quebec City showed no general change, small gains in transportation and construction being offset by losses in manufacturing and trade. Statements were tabulated from 179 employers having 13,899 workers, as against 13,890 in the preceding month. Improvement had been indicated at the beginning of June of a year ago, when the index was over two points lower; an aggregate of 178 firms had then reported a staff of 13,564.

Toronto.—Returns were furnished by 1,596 business houses in Toronto with 133,470 employees, compared with 133,103 at May 1. Manufacturing as a whole was rather brisker, there being moderate gains in food, clay, glass and stone, mineral products and some other groups, while textiles were seasonally slacker.

Construction afforded more employment, but there was a slight falling-off in trade. The general index was two points lower than at June 1, 1937, when statistics from 1,532 employers had indicated a combined pay-roll of 135,176 persons, or 1,709 more than at the beginning of May of last year.

Ottawa.—Heightened activity was noted in manufacturing, especially in the lumber and pulp and paper divisions, and construction and trade also showed improvement. A total working force of 14,008 men and women was recorded at June 1, 1938, by the 200 co-operating firms, who had had 13,581 on their staffs in the preceding month. At the same date of last year, 201 establishments had reported 14,838 workers, a gain of nearly 700 over their May 1 forces, while the index was then 5½ points higher than that of 106·3 at the date under review.

Hamilton.—There was a decrease in Hamilton, where data were tabulated from 297 employers who had 34,118 persons on their pay-lists, or 177 fewer than at the beginning of May. This reduction compared unfavourably with the advance made at June 1, 1937, when employment was at a higher level. Moderate curtailment was noted in trade and manufacturing, the losses in the latter occurring mainly in the iron and steel and textile divisions, while food factories were more active. The 289 concerns reporting for June 1, 1937, had employed 36,820 workers, or 758 more than in the preceding month; the index then stood at 114·2, compared with 106·6 at June 1, 1938.

Windsor.—Employment in Windsor showed a seasonal contraction at June 1, for which statistics were received from 187 firms with 19,943 employees, a decrease of 390 since the beginning of May. There was a falling-off in the iron and steel industry and in services and trade, while construction recorded some improvement. At the corresponding date of last summer, little general change had been indicated by the 178 co-operating establishments, whose staffs aggregated 20,907; employment then was more active than at the latest date, when the index stood at 146·0.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
June 1, 1921	87·7	100·4	79·5	90·4	90·5	82·8
June 1, 1922	90·3	98·1	84·0	93·5	92·2	85·7
June 1, 1923	98·5	105·5	95·4	103·1	94·8	89·1
June 1, 1924	96·4	101·0	95·3	98·1	93·4	91·7
June 1, 1925	95·6	101·3	95·9	95·6	92·4	94·5
June 1, 1926	102·2	98·7	103·7	101·4	102·8	103·5
June 1, 1927	107·2	103·5	107·5	108·1	106·5	105·5
June 1, 1928	113·8	107·2	110·7	115·5	121·5	109·9
June 1, 1929	122·2	112·5	115·9	126·2	132·4	117·5
June 1, 1930	116·5	122·4	114·5	117·8	115·8	113·3
June 1, 1931	103·6	105·2	104·3	104·2	103·3	97·9
June 1, 1932	89·1	96·4	87·8	89·9	89·3	83·7
June 1, 1933	80·7	82·8	79·3	81·6	82·7	76·2
June 1, 1934	96·6	98·4	90·9	104·4	89·5	89·1
June 1, 1935	97·6	101·6	93·8	101·6	92·2	96·6
June 1, 1936	102·0	103·4	99·8	104·7	97·7	102·2
Jan. 1, 1937	103·8	109·5	104·0	107·5	94·2	95·4
Feb. 1	104·1	107·5	106·7	108·4	91·4	91·3
Mar. 1	102·8	106·6	102·5	108·9	91·3	89·2
April 1	103·0	105·4	102·2	108·8	89·4	97·5
May 1	106·3	110·7	105·2	111·2	93·2	103·4
June 1	114·3	122·0	113·6	118·8	99·3	112·2
July 1	119·1	135·8	118·0	122·2	104·0	117·1
Aug. 1	120·0	134·3	120·8	122·2	105·6	116·9
Sept. 1	123·2	135·4	124·5	125·0	109·4	121·2
Oct. 1	125·7	134·9	127·3	130·4	107·6	117·9
Nov. 1	125·2	127·3	130·5	130·4	106·2	111·5
Dec. 1	121·6	122·5	129·6	125·8	100·5	107·5
Jan. 1, 1938	113·4	115·8	119·7	117·5	96·2	97·8
Feb. 1	110·4	112·3	114·5	116·2	91·7	96·4
Mar. 1	107·8	108·3	110·1	113·7	92·2	96·2
April 1	105·0	103·6	107·4	109·6	89·4	100·2
May 1	107·4	107·3	112·6	109·9	91·5	102·8
June 1	111·9	110·9	120·4	112·5	97·0	105·1
Relative Weight of Employment by Economic Areas as at June 1, 1938	100·0	7·6	31·4	41·0	11·6	8·4

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated areas, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Winnipeg.—A personnel of 39,892 men and women was reported by the 488 Winnipeg employers whose statistics were compiled, and who had 39,354 employees at May 1. Most of the gain took place in construction, but communications, trade and transportation also afforded more employment, while the changes in the remaining industrial groups, on the whole, were moderate. The general increase was much smaller than that noted at the beginning of June of last year, when 480 returns had been tabulated, showing a combined working force of 41,364 men and women, as against 40,066 in the preceding month. The index then stood at 96·5, compared with 92·8 at June 1, 1938.

Vancouver.—Manufacturing, especially of food products and building construction recorded gains in Vancouver; statements were tabulated from 459 employers with 34,625 workers in their employ, as compared with 34,487 at May 1, 1938. An increase on a larger scale had taken place at June 1 of a year ago, according to statistics from 446 establishments with 35,744 persons on their pay-lists, or 1,679 more than in the preceding month. Employment then was in greater volume, the index being over four points above that of 106·4 indicated at the beginning of June of this year.

Index numbers for cities are given in Table 2.

Employment by Industries

Manufacturing.—There was a seasonally upward movement in manufacturing at June 1, when statements were tabulated from 6,133 manufacturers employing 571,840 operatives, as compared with 562,869 in the preceding month; this gain of 8,971 employees raised the crude index from 110·6 at May 1 to 112·3 at the beginning of June.

The trend in employment at June 1 in the years since 1920 has almost invariably been favourable. The advance at the latest date slightly exceeded that recorded, on the average, at the same date in the last nine years, upon whose experience the factors of seasonal adjustment are computed. There was there-

June 1	107·3	103·8	106·7	106·3	106·6	146·0	92·8	106·4
Relative Weight of Employment by Cities as at June 1, 1938	15·1	1·3	12·5	1·3	3·2	1·9	3·7	3·2

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

fore a fractional increase in the seasonally-corrected index, which rose from 109·8 at May 1 to 110·2 at the date under review. However, the recent improvement was on a scale decidedly smaller than that indicated at June 1, 1937, and both the crude and the seasonally-adjusted index numbers at the latest date were lower than in the early summer of last year.

The unadjusted indexes at June 1 in recent years are as follows:—1938, 112·3; 1937, 117·9; 1936, 103·4; 1935, 98·4; 1934, 93·2; 1933, 80:0; 1932, 86·0; 1931, 99·4; 1930, 113·6; 1929, 121·2; 1928, 112·6 and 1927, 106·9.

Gains were registered at June 1, 1938, in the lumber, pulp and paper, animal and vegetable food, iron and steel, clay, glass and stone, electric current, beverage and mineral product industries. On the other hand, leather, textile and chemical works were slacker, the losses being largely seasonal in character. Working hours in a number of factories have in the last few months been reduced, a condition which in many cases is not reflected in the current employment surveys.

A brief review of the situation at June 1, 1937, shows that the 5,943 manufacturers then co-operating had reported 598,971 employees, as compared with 577,663 in the preceding month. The food, lumber, pulp and paper, iron and steel and other industries had shown improvement over May 1, 1937.

Animal Products, Edible.—There were further and more pronounced increases in the numbers employed in this group, particularly in the fish preserving division in the Maritime Provinces and British Columbia. Statistics were tabulated from 322 firms employing 26,018 persons, as compared with 24,032 in the preceding month. This advance was not so large as that reported at June 1, 1937, and the index then was three points higher.

Fur and Fur Products.—There was an upward trend in employment in fur factories, 64 of which enlarged their pay-rolls from 1,994 persons at the beginning of May to 2,186 at June 1. A smaller gain had been indicated at the same date last summer, when activity was at much the same level.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES.

(AVERAGE CALENDAR YEAR 1926=100)

——	All Industries	Manf.	Log.	Min.	Comm.	Trans.	Constr.	Serv.	Trade

June 1	111·9	112·3	93·6	153·3	84·7	84·9	114·5	135·3	131·5
Relative Weight of Employment by Industries as at June 1, 1938	100·0	53·5	2·5	6·6	2·1	9·6	12·8	2·6	10·3

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Leather and Products.—Employment in this group was further curtailed, the loss comparing unfavourably with the slight increase indicated in June of last year; the index then stood at 117·9, compared with 105·3 at the date under review. The working forces of the 300 co-operating employers totalled 21,544 persons, as against 22,194 in the preceding month. There were declines in leather factories in Quebec and Ontario.

Lumber and Products.—Continued seasonal improvement took place in lumber mills, and there were also gains in container and other wood-using plants. Returns were compiled from 896 manufacturers in the lumber group having 45,805 workers on their staffs, compared with 40,943 at the beginning of May. All provinces shared in the upward movement at June 1, that in New Brunswick, Quebec and Ontario being especially pronounced. Additions to staffs on a larger scale were made at the same date last year, and the index then was some nine points higher.

Plant Products, Edible.—Expansion was noted in this group at the beginning of June, when 1,252 persons were added to the forces of the 505 co-operating manufacturers, who had 33,786 employees. Fruit and vegetable canning, sugar, bakery and other vegetable food establishments reported improvement. The increase registered at June 1, 1937, was decidedly more extensive; the employment index was then one point above that of 111·5 at the date under review.

Pulp and Paper Products.—Pulp and paper mills showed increases in personnel, although many mills continued on reduced working time; printing and publishing houses were rather busier. The index number in the pulp and paper group as a whole stood at 105·3, compared with 111·7 at the beginning of June of last year, when the gains recorded were substantially greater. An aggregate pay-roll of 64,164 workers was reported by the 620 establishments whose statistics were compiled, and which had employed 62,839 in the preceding month.

Rubber Products.—Fifty-two rubber factories recorded a combined working force of 12,596 persons, or 41 more than in their last return. Employment was in smaller volume than at the beginning of June a year ago, when a much larger advance over the preceding month had been indicated.

Textile Products.—There was a seasonal decline in employment in textiles at the date under review, chiefly in silk and garment factories. On the other hand, woollen mills were busier. There were large losses in the textile division in Quebec and Ontario. Data were received from 1,138 firms employing 103,300 persons, as against 105,839 in the preceding month. Only a slight decrease had been reported at June 1, 1937; the index was then over nine points higher than at the date under review.

Beverages.—Activity in this group showed an advance, according to 141 employers whose staffs were raised from 8,584 in the preceding month to 8,871 at the beginning of June in the present year. Little general change had been noted at the same date of last year, when the index was many points lower.

Tobacco.—A moderate gain was indicated in the manufacture of tobacco; 46 factories employed 8,456 men and women at June 1, compared with 8,327 in their last report. The level of employment was rather higher at the latest date than at June 1 of last summer, a decline having then been reported.

Clay, Glass and Stone Products.—Further marked improvement was noted in building material plants, 212 of which employed an aggregate working force of 10,316 persons, or 1,172 more than at May 1. The index stood at 92·9; this was nearly seven points lower than that recorded at the same date last year, when a rather smaller increase had been made. Quebec and Ontario reported the bulk of the gain, in which factories producing these different kinds of building materials shared.

Chemical and Allied Products.—Statistics were tabulated from 292 chemical establishments, which provided work for 18,224 employees, as against 18,701 at the first of May. The loss occurred largely in the Maritime Provinces and Ontario. Activity in these industries was at a higher level than in the early summer of last year.

Electric Light and Power.—An advance as compared with May was shown in electric light and power plants, in which employment was in greater volume than at the same date a year ago. The 98 co-operating companies increased their staffs by 811 workers to 16,197 at the beginning of June, 1938.

Electrical Apparatus.—No general change was shown in electrical appliance factories, 126 of which reported a combined pay-roll of 18,526 at the date under review. A gain had been recorded at June 1, 1937, when employment was at a somewhat higher level.

Iron and Steel Products.—There was a moderate, contra-seasonal increase at June 1, 1938, in iron and steel; the largest additions

to staffs were in the crude, rolled and forged division. Returns were tabulated from 896 manufacturers employing 136,840 persons, compared with 136,395 at May 1. Improvement was noted in the Maritime Provinces and British Columbia. A greater advance had occurred at June 1, 1937, and the index was then several points higher.

Non-ferrous Metal Products.—These industries reported lowered employment, according to 178 firms employing 24,683 persons, compared with 24,785 in the preceding month. The decrease took place mainly in Ontario and British Columbia. Increased activity had been recorded at the beginning of June a year ago, when employment was in practically the same volume.

Mineral Products.—Continued, seasonal expansion was noted generally in this group; this was on a smaller scale than that occurring at June 1, 1937, but the index number then was rather lower. An aggregate pay-roll of 13,273 persons was reported for June 1, 1938, by the 104 co-operating employers, who had 13,113 workers at May 1.

Miscellaneous Manufacturing Industries.—Production in the manufacturing establishments listed under this heading showed an increase, 127 workers having been added to the forces of the 108 firms whose returns were tabulated, and who employed 5,767 at the beginning of June.

Logging

Employment in logging camps declined, largely in New Brunswick and the Western Provinces. Returns were received from 359 firms employing 26,996 persons, or 1,152 fewer than at May 1. A large advance had been indicated at June 1, 1937, and the index, at 109·1, was then decidedly higher than at the beginning of June in the present year, when it stood at 93·6.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	[1]Relative Weight	June 1 1938	May 1 1938	June 1 1937	June 1 1936	June 1 1935	June 1 1934	June 1 1933

[1] For explanation of term "Relative Weight", see footnote to Table III.

Mining

Coal-Mining.—Employment in eastern and western coal-fields showed slight curtailment. Statements were compiled from a total of 103 operators with 23,153 employees, or 37 fewer than at the beginning of May. The index was two points higher than at June 1, 1937, when the recorded decrease had been larger.

Metallic Ores.—A further gain was shown in metallic ore mines, mainly in Ontario and British Columbia; 214 employers enlarger their staffs from 37,389 workers at May 1, to 38,673 at the date under review. A rather greater increase had taken place at the beginning of June of last year, but the index then was lower than at June 1, 1938.

Non-Metallic Minerals (other than coal)—According to data received from 104 firms in this group, they employed 8,679 persons, or 393 more than in the preceding month. Employment was not so brisk as at the same date of last year, when larger additions to personnel had been reported by the co-operating firms.

Transportation

Street Railways and Cartage.—An increase was registered in local transportation at June 1, when 252 companies added 381 employees to their pay-rolls, bringing them to 26,150. Expansion in employment on a smaller scale had been noted at the beginning of June, 1937, but the index was then somewhat higher than at the date under review.

Steam Railways.—Improvement was indicated in steam railway operation, in which the 99 co-operating companies and branches enlarged their personnel from 57,576 in the preceding month to 58,160 at June 1. The Maritime Provinces reported seasonal reductions, while there were increases in the remaining economic areas. Employment generally was at a rather lower level than at June 1 of last year, when more extensive gains had been recorded.

Shipping and Stevedoring.—There were pronounced seasonal losses in employment in the Maritime Provinces, largely offsetting the increases elsewhere indicated. Statistics were received from 118 firms with 17,841 employees, as compared with 17,656 in the preceding month. A larger gain on the whole had been noted at June 1, 1937, but the index then stood at 93·1, compared with 97·9 at the date under review.

Communications

Improvement was indicated on telegraphs and telephones. The 85 companies and branches reporting had 22,637 men and women on their pay-lists at the beginning of June, or 600 more than at May 1. Employment was at much the same level as at the same date a year ago, when a somewhat larger gain had been indicated.

Construction and Maintenance

Building.—An aggregate staff of 22,424 was reported by the 784 contractors furnishing statistics, who had 19,223 workers at May 1. Activity increased in all provinces except British Columbia, where little general change occurred. The expansion, which was seasonal, was on a smaller scale than that indicated at June 1, 1937; building generally was then more active than at the date under review.

Highway.—The 397 highway and road contractors furnishing returns had 84,795 persons in their employ, or 23,712 more than at the beginning of May. All provinces shared in the upward movement, Quebec reporting the greatest gain. The number engaged in road work was larger than at the beginning of June, 1937, when a pronounced increase had also been indicated.

Railway.—Important advances were again registered by the track departments of the railways; forces of the 38 co-operating employers included 29,175 workers, as against 24,763 in the preceding month. This increase was not so large as noted at June 1 of last year, and employment was then in greater volume. The most noteworthy gains at the date under review were in the Prairie Provinces, but all five economic areas reported heightened activity.

Services

Hotels and restaurants showed a seasonal increase, and laundries and dry-cleaning establishments also recorded improvement. Statements were compiled from 494 firms employing 28,114 workers, as compared with 27,379 at May 1. The index, at 135·3, was six points higher than at the same date in 1937, when larger advances had been made.

Trade

Little general change was indicated in retail and wholesale trade; 1,452 establishments employed 109,983 persons, or 66 more than in their last return. Improvement in wholesale trade offset a decline in retail staffs. A pronounced increase on the whole had been noted at June 1, 1937, but the index then was the same, at 131·5.

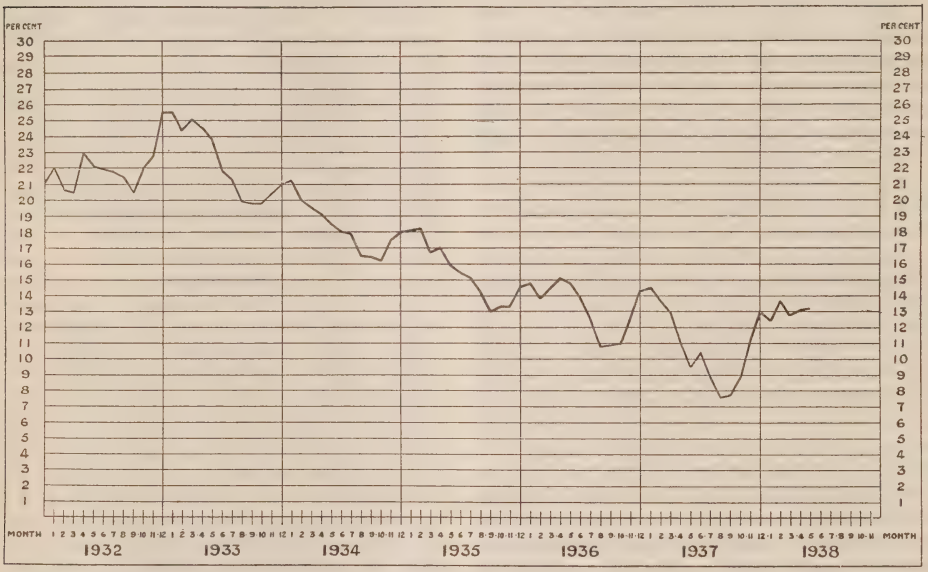
TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada at the date under review.

(2) Unemployment in Trade Unions at the Close of May, 1938

Unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons occupied at work other than their own trades or who are idle on account of illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The level of activity among local trade union members at the close of May remained almost unchanged from the preceding month, unemployment standing at 13·2 per cent as compared with a percentage of 13·1 in April. The percentage for the month under review was based on the returns received from 1,896 labour organizations with a combined membership of 220,005 persons, 29,130 of whom were out of work on the last day of the month. Conditions, however, were not so favourable as in May a year ago when 9·5 per cent of the members reported were unemployed. Quebec unions, with a drop in activity of 2·5 per cent, showed the greatest degree of change from April, the manufacturing industries, particularly the garment trades, indicating between-season losses in work afforded, though the leather, and iron and steel trades also suffered some employment cessation. In Nova Scotia and New Brunswick lesser declines were noted. On the contrary, British Columbia, Saskatchewan and Ontario unions registered gains in available work on a small scale and in Manitoba the change from April was but fractionally upward. In Alberta the percentage of idleness remained identical with that of April, minor increases and decreases in the various trades and industries acting in an offsetting manner. Compared with the returns for May, 1937, employment losses of noteworthy degree were evident among Ontario, British Columbia and New Brunswick unions during the period surveyed, the garment and iron and steel trades in Ontario being much slacker than in May last year, while in British Columbia the wood products division of the manufacturing industries showed considerable employment curtailment. In both of these provinces, however, contributing declines were manifest in building and construction and in transportation. The iron and steel trades and the steam railway division in New Brunswick accounted largely for the adverse change shown in that province. Quebec, Manitoba, Saskatchewan and Alberta unions indicated recessions of lesser degree. Nova Scotia alone reflected a more favourable employment movement, the coal mines of the province affording a considerably greater volume of work than in May, 1937.



Each month the records of unemployment among local trade union members in the largest city in each province, with the exception of Prince Edward Island, are tabulated separately. At the close of May improvement of noteworthy degree from April was registered by Halifax members and in Vancouver, Regina, Winnipeg and Saint John the trend was favourable, though the changes were quite small. The situation at Montreal and Toronto, however, reflecting dullness in the garment establishments, declined by over 4 per cent. In Edmonton also, employment subsided slightly. All cities showed a lowering in the employment volume available from May, 1937, Toronto members being especially slack during the month reviewed, while noteworthy contractions were evident among Vancouver and Montreal members. In Winnipeg and Edmonton more moderate declines occurred, Regina, Saint John and Halifax showing slight employment recessions.

From the chart, which appears with this article and shows the trend of unemployment by months from January, 1932, to date, it will be noticed that the curve at the close of May remained at approximately the same level as in April, denoting an almost stationary volume of unemployment during these two months.

The curve, however, rested at a point above that of May a year ago, showing that conditions were not so favourable during the month reviewed.

The manufacturing industries, with 534 organizations making returns at the close of May and covering a total of 81,877 members, indicated that 12,975 or a percentage of 15·8 were out of work compared with 13·9 per cent of inactivity in April. A marked falling off in employment afforded was manifest by garment, leather and hat, cap and glove workers and moderate curtailment was apparent among glass workers and meat cutters and butchers. Iron and steel, and brewery workers and paper makers also, reflected minor contractions in activity. On the other hand, fur workers were decidedly better engaged than in April and substantial gains were reported by metal polishers, wood workers and bakers and confectioners. Employment for gas workers and general labourers showed some increase and the tendency for textile and carpet, and cigar and tobacco workers, and printing tradesmen was favourable, though the variations from April were but fractional. Jewelry workers maintained the same percentage of idleness as in April. A considerably less favourable situation obtained in the manufacturing industries, as a whole, from May, 1937, when 8·2 per cent of the members reported were out of work. In this comparison the garment trades recorded severe losses in employment from May a year ago as did also wood, hat, cap and glove, and leather workers, and meat cutters and butchers. Activity in the iron and steel trades also, was substantially reduced and recessions of lesser magnitude were indicated among jewelry, and textile and carpet workers, metal polishers, bakers and confectioners and paper makers. Fur and glass workers, however, whose combined membership was rather small and hence did not materially affect the situation in the manufacturing industries as a whole, reflected large percentage increases in work afforded, and among general labourers noteworthy improvement was manifest. Brewery and cigar and tobacco workers, and printing tradesmen also showed employment advancement on a small scale.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

The situation in coal mining, as a whole, remained unchanged during May from the preceding month, 13·4 per cent of inactivity being reported for each of these months. Returns for May were compiled from 53 unions of coal miners with 20,238 members, 2,703 of whom were idle on the last day of the month. Alberta and British Columbia miners showed a slight rise in activity from April, which the curtailment evident in the Nova Scotia coal areas was just sufficient to offset. A somewhat better level of employment was apparent in coal mining from May last year, when 15·7 per cent of the members reported were out of work. In this comparison Nova

Scotia miners reflected noteworthy improvement in conditions and British Columbia a slight gain in work afforded. Some slowing up in activity, however, was apparent in Alberta. In addition to the total unemployment reported among the miners a number were shown as working at considerably reduced time.

Continued improvement in building and construction operations was reflected during May, the percentage of idleness standing at 30·9, as compared with a percentage of 33·7 in April. This was manifest by the reports tabulated from 215 associations involving 22,235 members, 6,866 of whom were unemployed on the last day of the month. Quieter conditions, however, prevailed than in May of last year when 26·4 per cent of inactivity was recorded. Viewed from a percentage basis hod carriers and building labourers, and bridge and structural iron workers showed the most outstanding changes from April, which were in a favourable direction. Among painters, decorators and paperhangers also, marked expansion was noted. The level of employment for steam shovelmen was considerably above that of April and among plumbers and steamfitters, tile layers, lathers and roofers, and electrical workers increases in activity on a smaller scale were apparent. Some falling off in employment was manifest, however, by granite and stonecutters and the situation for bricklayers, masons and plasterers, and carpenters and joiners, while tending adversely, showed but fractional variation. In making a comparison with the returns for May, 1937, granite and stonecutters, and painters, decorators and paperhangers were decidedly busier during the month under survey and hod carriers and building labourers indicated considerably better conditions. More moderate gains, however, were reflected by plumbers and steamfitters. On the contrary, steam shovelmen, bricklayers, masons and plasterers, and tile layers, lathers and roofers were much slacker than in May a year ago and carpenters and joiners recorded important losses in work available. Recessions, on a small scale, were evident among electrical workers and bridge and structural iron workers.

The transportation industries, with 837 organizations at the close of May reporting an aggregate of 65,425 members, indicated that 5,175 were without employment, a percentage of 7·9 as compared with 8·2 per cent of idleness in April. Steam railway employees, whose returns constituted nearly 78 per cent of the entire group membership reported, showed a nominal rise in work afforded from April, as did also street and electric railway employees. In the navigation division the situation improved slightly. Employment for teamsters and chauffeurs, however, was retarded by less than one per cent. Curtailment of activity on a small scale was noted in the transportation industries from May, 1937, when 5·7 per cent of the members reported were idle. In this comparison the steam railway division was almost entirely responsible for the less favourable trend shown during the month reviewed, though teamsters

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

* This table with statistics for the month of April was inadvertently omitted from the June issue, and in order to maintain the continuity of the record, it is being published in this issue together with the tabular summary for May.

60859—5

and chauffeurs indicated a fractional drop in activity. A greater volume of employment was available, however, to navigation workers and conditions for street and electric railway employees were nominally better.

The 4 unions of retail shop clerks making returns at the end of May, comprising a membership of 1,612 persons, showed that all were at work, as in both the preceding month and May, 1937.

Civic employees recorded but fractional variations in the percentages of unemployment in all three months used for comparative purposes, the 80 associations from which reports were compiled for May embracing a membership of 10,205 persons, showing that 46 or a percentage of 0·5 were out of work on the last day of the month, as compared with percentages of 0·9 in April and 0·6 in May a year ago.

In the miscellaneous group of trades there was little change in the situation during May from either the previous month or May a year ago according to reports received from 139 local unions with an aggregate membership of 10,156 persons; of these, 761 or a percentage of 7·5 were without employment, in contrast with 7·4 per cent of idleness in April and 7·7 per cent in May, 1937. Barbers were more actively engaged during May than in the previous month and conditions for stationary engineers and firemen, and theatre and stage employees were but fractionally improved. Minor contractions, however, were registered by hotel and restaurant employees and unclassified workers. When contrasted with returns for May of last year theatre and stage employees showed a rather slight increase in work afforded and barbers and stationary engineers and firemen nominal gains only. Among hotel and restaurant employees and unclassified workers there was little change from May a year ago, though the tendency was less favourable.

Fishermen were quite actively engaged in the 3 months compared, 0·8 per cent of the members reported being without work at the close of May in contrast with percentages of 0·5 in April and 0·3 in May last year. Making returns for May were 3 unions of fishermen, with a total of 630 members.

Of the 592 members reported in the lumbering and logging industry at the close of May 29 were unemployed, a percentage of 4·9 as contrasted with 4·6 per cent in April and a percentage of 1·5 in May, 1937.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1937, inclusive, and also the percentages of unemployment by provinces for May of each year from 1919 to 1935, inclusive, and for each month from May, 1936, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(NOTE.—*Table II with statistics for the month of April was inadvertently omitted from the June issue, and in order to maintain the continuity of the record it is being published in this issue, together with the tabular summary for May.*)

(3) Employment Office Reports for May, 1938

The volume of business transacted by the offices of the Employment Service of Canada during May, 1938, as indicated by the average daily placements effected, showed a gain of nearly 14 per cent over that of the previous month, but a loss of 22 per cent from that of the corresponding period a year ago. When the month under review was compared with April, 1938, construction and maintenance, services, transportation and trade recorded increased placements, the highest being in the first two groups, and farming, manufacturing, logging and mining showed declines, the largest of which was in farming. In comparison with May, 1937, decreases were registered in all industrial divisions except transportation, the loss in logging and construction and maintenance being quite marked, while the gain in transportation was not particularly outstanding.

The accompanying chart shows the trend of employment from January, 1936, to date as represented by the ratio of vacancies offered and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will be seen from the graph that the trend of the curves of vacancies and placements in relation to applications varied but little during the month, that of vacancies following a slight upward course throughout, while that of placements recorded a minor recession during the first half of the period under review, but again pursued an upward trend during the latter half. At the close of the month, however, both levels were considerably below those attained at the end of May a year ago. The ratio of vacancies to each 100 applications was 49·1 and 49·9 during the first and the second half of May, 1938, respectively, in contrast with ratios of 66·5 and 62·5 during the same periods of 1937. The ratios of placements to

each 100 applications during the month under review were 45·0 and 47·2, as compared with 61·4 and 58·1 during May last year.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during May, 1938, was 1,162, as compared with a daily average of 1,045 in the previous month and with 1,501 in May, 1937.

The average number of applications for employment received daily by the offices during the month under review was 2,347, in comparison with 2,444 in April and with 2,329 in May last year.

The average number of placements made daily by the offices of the Service during May, 1938, was 1,083, of which 689 were in regular employment and 394 in work of one week's duration or less, as compared with a total daily average of 954 in the previous month. Placements during May last year averaged 1,390 daily, consisting of 955 placements in regular and 455 in casual employment.

During the month of May, 1938, the offices of the Service referred 28,469 persons to vacancies and effected a total of 27,063 placements. Of these, the placements in regular employment were 17,220, of which 12,595 were of men and 4,625 of women, while placements in casual work numbered 9,843. The number of vacancies reported by employers was 17,865 for men and 11,168 for women, a total of 29,033, while applications for work numbered 58,674, of which 43,497 were from men and 15,177 from women workers. Reports for April, 1938, showed 25,072 positions available, 58,638 applications made and 22,889 placements effected, while in May, 1937, there were recorded 36,016 vacancies, 55,881 applications for work, and 33,351 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1928, to date:

Year	Placements		
	Regular	Casual	Totals
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938 (5 months)	82,369	40,772	123,141

60859—5½

Nova Scotia

Orders listed at employment offices in Nova Scotia during May, 1938, called for over 16 per cent more workers than in the preceding month, but over 22 per cent less than during the corresponding month of last year. There was an increase of nearly 17 per cent in placements when compared with April, but a decline of nearly 20 per cent in comparison with May, 1937. A considerable reduction in placements in the highway division of construction and maintenance from May, 1937, was mainly responsible for the decrease under this comparison. There were, however, smaller losses in manufacturing and logging. These declines were partly offset by an increase in services and minor gains in trade and farming. Placements by industrial divisions included logging 120; mining 41; construction and maintenance 304; and services 803, of which 521 were of household workers. During the month 246 men and 155 women were placed in regular employment.

New Brunswick

There was an increase of over 25 per cent in the number of positions offered through employment offices in New Brunswick during May when compared with the preceding month and a gain of over 26 per cent in comparison with the corresponding month of last year. There was an increase also in placements of over 24 per cent in comparison with April and nearly 27 per cent when compared with May, 1937. Increased placements in construction and maintenance and services accounted for the gain over May of last year for the province as a whole, as, with the exception of a small loss in logging, all other groups showed nominal changes only. Placements under construction and maintenance numbered 221 and in services 890. Of the latter, 625 were of household workers. Placements in regular employment numbered 119 of men and 91 of women.

Quebec

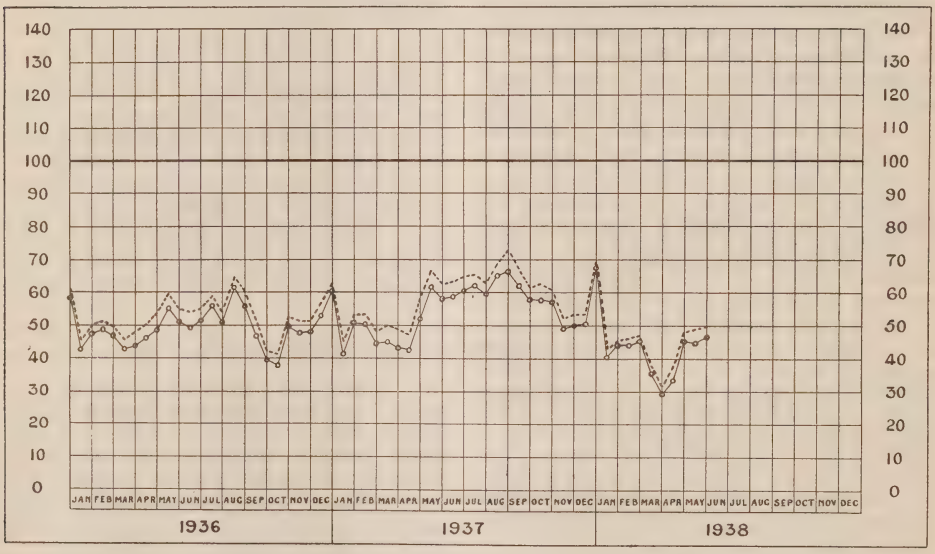
Opportunities for employment, as indicated by orders received at employment offices in the Province of Quebec, were over 20 per cent better than in the preceding month and nearly 35 per cent above the corresponding month of last year. There was an increase also in placements of over 26 per cent in comparison with April and of nearly 46 per cent when compared with May, 1937. The most noteworthy increase in placements over May of last year was in construction and maintenance, made up largely of highway

workers, although important gains were also recorded in services and transportation. There was a large decrease in bush placements and a smaller loss in manufacturing. Placements by industrial divisions included manufacturing 128; logging 398; farming 114; transportation 388; construction and maintenance 4,135; trade 126; and services 3,080, of which 2,673 were of household workers. There were 5,103 men and 1,739 women placed in regular employment.

ONTARIO

Employment opportunities, as indicated by orders received at employment offices in Ontario during May, were 23 per cent better than in the preceding month, but nearly 38 per cent below the corresponding month of last year. Placements were nearly 26 per cent higher than in April, but 36 per cent below May, 1937. All industrial divisions participated in the decline in placements from May a year ago, the most substantial losses being in logging and construction and maintenance. Other groups showing large reductions were services, manufacturing and farming. Industrial divisions in which most of the placements were effected during the month were manufacturing 412; logging 616; farming 1,034; transportation 119; construction and maintenance 2,607; trade 254; and services 4,508 of which 2,576 were of household workers. During the month 4,467 men and 1,426 women were placed in regular employment.

MANITOBA



Employment offices in Manitoba during May listed orders for nearly 6 per cent fewer workers than in the preceding month and over 10 per cent less than during the corresponding month of last year. There was a decrease also in placements of over 4 per cent when compared with April and of over 17 per cent in comparison with May, 1937. Construction and maintenance and logging showed the largest reduction in placements from May of last year, but there was a moderate gain in farming. The changes in all other groups were small. Placements by industrial divisions included logging 164; farming 324; construction and maintenance 81; and services 857, of which 691 were of household workers. There were 579 men and 264 women placed in regular employment during the month.

SASKATCHEWAN

During the month of May, 1938, positions offered through employment offices in Saskatchewan were over 15 per cent less than in

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ———— Vacancies - - - - - - - - Placements o—o—o—o—o—o

the preceding month and nearly 18 per cent below the corresponding month of last year. There was a decrease also in placements of about 18 per cent, both in comparison with April, 1938, and May, 1937. Except for small gains in construction and maintenance and mining, fewer placements were made in all groups than during May of last year, the most important declines being in services and logging. Industrial divisions in which most of the placements were effected during the month were farming 407; construction and maintenance 108 and services 660, of which 448 were of household workers. Placement in regular employment numbered 544 of men and 336 of women.

Alberta

During May, orders received by employment offices in Alberta called for over 5 per cent fewer workers than in the preceding month and were over 12 per cent below the corresponding month of last year. There was a decrease also in placements of nearly 4 per cent when compared with April and of over 13 per cent in comparison with May, 1937. A substantial decrease in the highway division of construction and maintenance accounted for the decline in placements from May of last year, as, although there were increases in all other groups, not any were large and combined only equalled about half of the loss mentioned above. Placements by industrial divisions included manufacturing 60; farming 539; transportation 107; construction and maintenance 410 and services 613, of which 407 were of household workers. There were 970 men and 362 women placed in regular employment.

British Columbia

The demand for workers, as indicated by orders received at employment offices in British Columbia during May, was nearly 29 per cent better than in the preceding month, but over 56 per cent below the corresponding month of last year. There was an increase of 26 per cent in placements when compared with April, but a decline of over 56 per cent when compared with May, 1937. The substantial decrease in placements from May of last year was mainly due to losses in construction and maintenance and logging, although fewer placements were reported in all other groups. Placements by industrial divisions included manufacturing 57; farming 114; construction and maintenance 1,102 and services 634, of which 464 were of household workers. During the month 567 men and 252 women were placed in regular employment.

Movement of Labour

During the month of May, 1938, the offices of the Employment Service of Canada effected 17,220 placements in regular employment, 8,169 of which were of persons for whom the employment located was outside the immediate vicinity of the offices at which they were registered. Of the latter, 757 were granted the Employment Service reduced transportation rate, 731 of whom travelled to centres within the same province as the despatching office and 26 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to journey to distant employment for which no workers are available locally.

In Quebec during May the Hull office granted a certificate to a bushman destined to the Pembroke zone. Ontario offices issued 538 certificates for reduced transportation during May, 537 of which were provincial and one interprovincial. The latter was granted at the Toronto office to a mine clerk proceeding to Val d'Or. Provincially from Port Arthur 469 bush workers, 26 construction workers ,6 mine employees and one highway foreman were despatched to various sections within the same zone, while from Sudbury 14 bush workers and from Fort William 4 construction workers, 2 bush workers, one stationary engineer and one tractor operator proceeded to employment within their respective zones. To the Sudbury zone also, one sawyer was shipped from North Bay. On a certificate secured at Toronto one highway construction labourer was conveyed to Peterborough. The labour movement in Ontario under the Dominion-Provincial Youth Training Plan included the issue of 11 reduced rate certificates to students desiring to register for training courses at various provincial points. The Winnipeg office was responsible for the 31 transfers at the reduced rate effected in Manitoba during May, 8 of which were within the province and 23 outside. The Winnipeg zone was the destination of all persons travelling at the reduced rate to provincial employment, among whom were 5 farm hands, one farm housekeeper, one lather and one electrician. The interprovincial movement was to Port Arthur and included the despatch of 17 bushmen, 2 sawmill labourers, 2 mine workers, one painter and one chef. Workers taking advantage of the Employment Service reduced rate in Saskatchewan during May were 3 in number, 2 of whom, a bushman and a sawmill worker, travelled from Prince Alberta to situations within the same zone, while one,

*78 placements effected by offices since closed.

a hotel clerk, was shipped from Regina outside the province to Edmonton. The labour movement in Alberta during May involved the issue of 176 reduced transportation rate certificates to provincial centres. All of these were granted at the Edmonton office, which was instrumental in the despatch of 91 transportation company employees, 23 fish company employees, 15 labourers, 12 mine workers, 11 oil refinery workers, 6 highway construction workers, 4 cooks, 4 farm hands, one farm domestic, 3 sawmill workers, 2 bushmen, 2 waitresses and one blacksmith to employment at various points within the Edmonton zone and of one carpenter to Lethbridge. At British Columbia centres during May, 8 persons secured certificates for transportation to situations within the province, the Vancouver office transferring 3 mine workers and one truck driver to Kamloops, 2 sawmill workers to Penticton and one farm hand to a point within the Vancouver zone. In addition, the Penticton zone received one farm hand from New Westminster.

Of the 757 workers who benefited by the Employment Service reduced transportation rate during May, 585 travelled by the Canadian National Railways, 169 by the Canadian Pacific Railway, one by the Temiskaming and Northern Ontario Railway, one by the Northern Alberta Railway and one by the Pacific Great Eastern Railway.

(4) Building Permits Issued in Canada During May, 1938

The value of the building permits issued by 58 cities during May, 1938, was higher by 34·8 per cent than in April, 1938, and was also greater by 21·4 per cent than in May, 1937, being in fact higher than in that month in any other year since 1931. According to statements tabulated by the Dominion Bureau of Statistics the authorizations amounted to $6,576,296, as compared with $4,879,867 in the preceding month, and $5,416,299 in May of last year.

The following table gives the value of the building authorized by 58 cities in May and in the first five months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first five months of the same years are also given (1926=100).

Year	Value of permits issued in May	Value of permits issued in first five months	Indexes of value of permits issued in first five months (1926=100)	Average indexes of wholesale prices of building materials in first five months (1926 average=100)
	$	$		
1938	6,576,296	19,220,788	32·0	90·9
1937	5,416,299	22,050,984	36·7	94·6
1936	4,836,358	13,666,195	22·8	86·3
1935	4,728,340	19,535,656	32·5	81·7
1934	3,019,761	7,999,917	13·3	83·0
1933	2,065,372	6,726,695	11·2	75·2
1932	5,488,845	19,312,720	32·1	78·8
1931	12,115,291	50,356,550	83·9	83·6
1930	20,321,160	66,792,498	111·2	95·5
1929	24,185,738	96,792,675	161·2	99·4
1928	27,515,522	79,285,027	132·0	95·8
1927	20,138,657	62,479,480	104·1	96·1
1926	18,504,296	60,042,369	100·0	101·3
1925	15,520,435	50,983,833	84·9	103·1
1924	14,807,589	46,544,689	77·5	111·3
1923	18,937,638	57,946,608	96·5	111·1
1922	19,527,061	54,040,922	90·0	107·9
1921	14,460,878	41,530,750	69·2	134·4
1920	13,082,015	47,640,916	79·3	144·7

The value of the building authorized in the first five months of the present year was $19,220,788; this was lower than the aggregate of $22,050,984 reported in the period January-May, 1937, but was higher than in those months of 1936. The cumulative total for the same period in each of the last seven years has been very much lower than in earlier years of the record. The wholesale prices of building materials have in recent months averaged lower than in the corresponding period of 1937; although they were higher than in the first five months in any of the years, 1931-1936, they continued below the average for the years since 1920.

Some 50 cities furnished detailed statistics for May, 1938, showing that they had issued some 660 permits for dwellings valued at approximately $2,250,000, and for more than 3,000 other buildings, estimated to cost over $3,800,000. In addition, there was one engineering project in Port Arthur valued at $230,000. In April, authority was given for the erection of about 550 dwellings and 2,500 other buildings, valued at approximately $1,800,000 and $3,000,000, respectively.

Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario and British Columbia recorded increases in the value of the building represented by the permits issued during May as compared with the preceding month. Ontario and British Columbia showed the greatest gains of $1,086,521, or 66·2 per cent and $966,303, or 116·7 per cent, respectively. The total in each of the Prairie Provinces was lower in May, 1938, than in April; the largest decline in this comparison was that of $776,017, or 76·9 per cent, in Alberta.

As compared with May, 1937, New Brunswick, Quebec, Ontario, Alberta and British Columbia registered increases, of which that of $1,126,314, or 168·7 per cent, in British Columbia was most noteworthy. The greatest decline, of $129,313, or 76·1 per cent, was in Saskatchewan.

Of the four largest cities, Montreal, Toronto and Vancouver showed gains as compared with last month, and also over the same month of last year; Winnipeg, on the other hand, recorded decreases in both comparisons.

Of the other centres, Moncton, Saint John, Quebec, Shawinigan Falls, Three Rivers, Brantford, Chatham, Hamilton, Kitchener, London, Port Arthur, St. Thomas, Sarnia, York and East York Townships, Windsor, Riverside, Brandon, St. Boniface, Lethbridge and Victoria showed increases in the value of the building authorized as compared with either the preceding month or the same month of 1937.

As already mentioned, the aggregate for the first five months of 1938 was lower than in the same period in 1937, and was also slightly less than in 1935 or 1932, but exceeded the total for the months, January-May, in 1936, 1934 and 1933. The average index numbers of wholesale prices of building materials, while lower than in 1937, were higher than in preceding years since 1930, but were below the average for the eighteen years, 1920-1937.

The accompanying table gives the value of the building permits issued by 58 cities during April and May, 1938, and May, 1937. The 35 cities for which records are available since 1910 are marked thus, "x."

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF JUNE, 1938

Reports of the Superintendents of the Employment Service

THE employment situation at the end of June was reported by the superintendents of the Employment Service to be as follows:—

All farm crops in the Maritime Provinces were progressing favourably and produce offered at the markets was plentiful and of fine quality. Strawberries were exceptionally good and were ripening rapidly. Lobster fishing was about finished for the season, but salmon fishing was very heavy. Catches of halibut, mackerel, haddock and cod, likewise, were fair. Sawing and pulpwood cutting was active and mill work, also, was being carried on, although in some localities the winter's cut was about completed. River driving was under way on the Saint John river. Coal mines in the New Glasgow area operated from one to five days per week, while those in Cape Breton and vicinity worked three to five days per week and no idleness was reported by the iron and steel companies. Manufacturing plants were working steadily and canning factories were preparing for a particularly busy season. All buildings in the course of construction were progressing favourably and road work was brisk. Transportation, both freight and passenger, by rail, bus and water was increasing in volume with vacation time at hand. Trade was fair, but collections were slow. Experienced domestic help in the Women's Division also was very scarce.

Agricultural work in the province of Quebec was progressing under favourable weather conditions and some additional hands were hired for haying. Logging operations had been much reduced, Matane only reporting men actively engaged in pulpwood cutting. Mining was slacker except at Sherbrooke, where activities were normal. Manufacturing centres reported as follows: Bagotville, slack; Chicoutimi, aluminum factories working steadily, but a 20 per cent decrease in employees at paper mills; Hull, all plants operating at full capacity; La Tuque, Val d'Or and Rouyn, sash and door establishments very busy; Matane, paper mills active; Montreal, paper industry working at only 55 per cent of normal capacity, metal industries no change, boots and shoes fair, clothing slacker; Sherbrooke, metals, textiles and clothing employing fewer people, silks and woollens normal; Three Rivers, plants running below the usual standard, with reduced staffs. Building construction showed improvement throughout the province and casual work, likewise, was more plentiful. Highway construction and maintenance continued. Transportation by water, rail and motor was also active. Trade was more prosperous, although collections in smaller centres were somewhat difficult. A shortage of experienced applicants for domestic service was reported in the Women's Division, housemaids, waitresses and cooks being particularly in demand.

There was a decided shortage of capable farm hands throughout Ontario. The strawberry crop was practically harvested, but calls were being received for cherry pickers and men for haying, wages for experienced farm help ranging from $20 to $35 per month and for boys, $12 to $17. In logging, the majority of river drives were nearly completed and some men had been released, but other seasonal employment, such as pulp cutting and peeling, was in full swing, especially in the North Bay and Port Arthur zones. Little demand was reported for sawmill help, with the exception of an occasional order for skilled labour. Mining was fairly active, although few additional workers were being hired. Manufacturing showed variation in volume; fruit canneries had re-engaged some of their former seasonal employees and electrical supply companies, shoes, textiles and manufacturers of foodstuffs were fairly busy, but curtailment was more pronounced in many other industries and reduced operations more widespread than for some time past. The temporary closing down of auto plants had affected a large number of hands for an indefinite period, but it was expected that these factories would re-open shortly. Conditions in the building line were generally active and anticipated projects were getting underway as the season advanced, thus affording work for both skilled and unskilled labour. Increased placement of men on highway construction also was in evidence. Navigation was very quiet at Fort William and Sarnia and employment for railway employees at Niagara Falls and Fort Erie further declined. In the Women's Section the demand for experienced domestics for household, hotel and restaurant services exceeded the supply available; few requests, however, were registered for women in the industrial and clerical divisions.

There was only a fair call for farm help in the Prairie Provinces. In Alberta, crop conditions appeared favourable, but in Manitoba and Saskatchewan rain was needed. Logging was quiet and dangerous fires were raging in some parts of the bush country, although very little damage as yet had been done to

marketable timber. Except for the usual summer development work, there was no activity in mining. Manufacturing was slack, with no calls for additional help. Building construction showed some improvement and highway construction continued. A few extra railway gangs had been hired, but a large number of men had been temporarily laid off at the C.N.R. shops. Trade was fair. A scarcity of help was noticeable in the Women's Division, so that the demand slightly exceeded the supply.

Farming was quiet in British Columbia and a further contraction was noted in logging, with a corresponding reduction in numbers employed. Sawmills were slack and shingle mills were closed, awaiting orders. Mining also showed little activity. Factories in Nelson had increased their staffs. Building construction consisted for the most part of repairs and alterations. A number of young men had been placed in the forestry training camps and applications were still being received for this course. Drydocks and shipyards at Prince Rupert and Victoria were busy, while a little more activity than usual was noted on the waterfronts at Prince Rupert and Vancouver. Trade was slightly better, but collections were slow. An increase in the Women's Division was recorded in orders for domestics for summer hotels and restaurants, with a scarcity of help prevailing, but casual work for women was considerably less.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, June, 1938, summarized the employment situation as follows:—

Employment showed a slight decline between April 4 and May 16. This was mainly accounted for by temporary stoppages in the coal mining and cotton industries; there was also a decline in agriculture, the linen, iron and steel, tinplate and motor vehicle industries, and in certain branches of the engineering industry. On the other hand, employment improved in building, public works contracting, hosiery manufacture, stove, grate, etc. manufacture, bread, biscuit, etc. making, the distributive trades, and hotel, boarding house, and shipping services.

It is estimated that at May 16, 1938, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,375,000. This was 15,000 less than at April 4, 1938. On a comparable basis there was a decrease of about 148,000 as compared with May 24, 1937.

Among persons, aged 16-64, insured under the general scheme of unemployment insurance (including the special schemes for the banking and insurance industries), the percentage unemployed in Great Britain and Northern Ireland at May 16, 1938, was 13·0, compared with 12·9 at April 4, 1938. For persons aged 16-64 insured under the agricultural scheme the percentages were 6·6 at May 16, 1938, and 5·7 at April 4, 1938. For both schemes combined the percentage unemployed at May 16, 1938, was 12·7 as compared with 12·5 at April 4, 1938. On a comparable basis, there was an increase at May 16, 1938, as compared with May 24, 1937, of about 2·7 in the percentage unemployed among persons within the general scheme, and of about 3·8 among persons within the agricultural scheme. For the two schemes combined there was an increase of about 2·8 between these dates.

At May 16, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,314,118 wholly unemployed, 397,529 temporarily stopped, and 67,158 normally in casual employment, making a total of 1,778,805; this was 31,041 more than at April 4, 1938. This increase was mainly accounted for by temporary stoppages in the coal mining and cotton industries and, further, included 10,236 boys and girls, owing mainly to the registration of juveniles who reached the school-leaving age at the end of the Easter term. On a comparable basis there was an increase of about 382,000 as compared with May 24, 1937, in the total number of persons on the registers.

The total of 1,778,805 persons on the registers at May 16, 1938, included 1,020,450 persons with claims admitted for insurance benefit, 541,451 with applications authorized for unemployment allowances, 53,405 persons with applications for insurance benefit or unemployment allowances under consideration, and 163,499 other persons, of whom 40,837 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at May 16, 1938, was 1,868,760 as compared with 1,842,115 at April 4, 1938. On a comparable basis there was an increase at May 16, 1938, of about 405,000 as compared with May 24, 1937.

United States

In a press release dated June 23, Charles V. McLaughlin, Acting Secretary of Labor, United States Department of Labor, announced that industrial employment declined in May, due largely to further curtailment of forces in factories, mines and railroads, and seasonal reductions in retail and wholesale trade.

The following paragraphs taken from the official press release indicate the employment situation in the United States was as follows:

About 300,000 workers were laid off between April and May in private industry and regular governmental employment. There is usually an increase of 200,000 in non-agricultural employment as a whole at this time of year. These estimates do not make allowance for workers on W.P.A. and other State and Federal emergency projects.

In manufacturing, a greater-than-seasonal reduction of 2·6 per cent in employment affected more than 170,000 wage earners. Weekly factory pay-rolls were reduced by 1·8 per cent, representing a cut of about $2,700,000 in weekly wage disbursements. Since May, 1937, when operations were at a high level, there has been a decline of nearly one-fourth in factory employment as a whole, and of more than one-third in factory pay-rolls.

The decline in manufacturing employment from April to May was quite general. Sixty-six of the 89 manufacturing industries that regularly report to the Bureau of Labour Statistics reduced their working forces, many of them because of seasonal slackening in activity.

Among the non-durable goods industries, manufacturers of wearing apparel, cotton goods and shoes reported large cuts in factory forces. Employment increased in food and tobacco manufacturing. The heavy industries reported continued curtailment, particularly in the manufacture of automobiles, steel and machinery. Employment was better sustained in the manufacture of building materials and in shipbuilding than in most other heavy industries.

As compared with May of 1937, the non-durable goods industries show an employment decline of 17 per cent and the durable goods industries a decline of 32 per cent.

Other basic industries in which working forces were reduced in May include Class 1 railroads, which laid off 8,000 men, reducing their forces for the tenth consecutive month; bituminous mines, which laid off 17,500 workers in a greater-than-seasonal reduction of operations; anthracite mines, and metal mines. There was a sharp decline in number of employees in retail and wholesale trade, due in part to seasonal reductions following expansion for the Easter trade. It is estimated that nearly 175,000 workers in retail stores and 22,000 in wholesale firms were laid off during the month.

The principal increases in employment were in building construction, and in quarries, where gains were somewhat smaller than usual. Public construction activities, including road work and building, increased substantially. There was a small increase in forces of telephone and telegraph, and electric light and power companies, and of certain service industries, notably laundries.

All parts of the country reported reduced employment, with the principal exceptions of certain New England States, in which increases accompanied expanded activity in cotton and woolen mills. Several of the larger industrial States, including Pennsylvania, New York, Michigan, Illinois and Ohio, reported employment reductions ranging from 3 to 5 per cent, principally in the heavy industries, in the manufacture of clothing, coal mining, and in retail and wholesale trade.

The continued decrease in industrial employment in May was accompanied by marked expansion in the number of persons working on most of the programs financed wholly or partially from Federal funds. Approximately 3,129,000 persons were at work in May on projects operated by the Works Progress Administration, including work projects of the National Youth Administration and Student Aid, an increase of 56,000 from April and 387,000 from May, 1937. Pay-roll disbursements in May, amounting to $142,300,000, were $5,956,000 larger than in the preceding month and $23.169.000 larger than a year ago. The largest relative increase from April occurred on Federal projects under The Works Program.

Home Improvement Loans

The Department of Finance announced recently that of the total Home Improvement Loans reported by the lending institutions to May 31, 1938, the number made in cities and towns of Canada with population of 5,000 and upward was 29,831, and their total amount $12,174,084.48.

In cities of 40,000 and over there were 16,525 loans amounting to $6,489,697.75; in cities of 20,000 to 40,000 there were 3,344 loans amounting to $1,299,081.74; in cities and towns 10,000 to 20,000, 4,566 loans amounting to $2,078,347.71; and in towns 5,000 to 10,000 there were 5,396 loans totalling $2,306,957.28.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefore the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher wages shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922, as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last-named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in case of emergency as may be approved by the Minister."

The new Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for over time and as to the proper classification of any work for the purpose of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where

the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wage officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada unless the Minister of the Department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada.

GROUP "A" CONTRACTS

(1) Works of Construction, Remodelling, Repair or Demolition

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payement of higher rates in any instance where such higher rates are fixed by provincial legislation."

Department of Fisheries

Construction of a fish hatchery establishment at Charlo Falls, Restigouche Co., N.B. Name of contractors, J. & D. A. Harquail Co., Ltd., Campbellton, N.B. Date of contract, June 27, 1938. Amount of contract, $24,000. A fair wages schedule was included contract as follows:—

	Per hour
Brick and hollow tile layers	$0 70
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 35
Carpenters	0 50
Concrete mixer operator—(gas. or electric)	0 40
Driver	0 30
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Electricians	0 55
Labourers	0 30
Lathers, metal	0 50
Lathers, wood	0 45
Painters	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 35
Plumbers and steamfitters	0 55
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 35
Roofers, asbestos shingles	0 50
Sheet metal workers	0 55
Watchman	0 25

Department of National Defence

Clearing and grubbing certain areas at Barrett Point and Frederick Point, Prince Rupert, B.C. Name of contractors, G. W. Nickerson Co., Ltd., Prince Rupert, B.C. Date of contract, June 3, 1938. Amount of

contract, approximately $15,000. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 50
Blacksmiths	0 75
Blacksmiths' helpers	0 50
Dragline operators (steam)	1 12½
Dragline firemen	0 74½
Dragline oilers	0 60
Driver, team and wagon	1 00
Drivers	0 45
Labourers	0 45
Motor truck driver	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
Tractor operators (gas.)	0 75
Watchman	0 45

Completion of Married Quarters No. 12 at the R.C.A.F. Station, Rockcliffe, Ont. Name of contractor, Mr. William Daoust, Eastview, Ont. Date of contract, June 24, 1938. Amount of contract, approximately $4,903. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenter	$0 85
Electricians	0 75
Labourers	0 45
Motor truck driver	0 50
Motor truck driver and truck:	
1 to 2 tons	1 45
Painters and glaziers	0 65
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 40

Grading of runways at the Royal Canadian Air Force Station, Dartmouth, N.S. Name of contractors, Acadia Construction Co., Ltd., Halifax, N.S. Date of contract, June 22, 1938. Amount of contract, approximately $240,000. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 45
Blacksmiths	0 70
Blacksmiths' helpers	0 45
Dragline operators	0 85
Dragline firemen	0 55
Dragline oilers	0 50
Driver, team and wagon	0 75
Drivers	0 40
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Road grader operators: horse drawn	0 45
Road grader operators: including team	0 80
Road grader operators: gas	0 50
Steam shovel operator	0 85
Steam shovel firemen	0 55
Steam shovel cranemen	0 65
Steam shovel oilers	0 50
Tractor operators—gas	0 50
Team and scraper	0 75
Team and plough	0 75
Watchman	0 35

Installation of an electric power distribution system at the Joint Service Magazines, Esquimalt, B.C. Name of contractors, Murphy Electric Co., Ltd., Victoria, B.C. Date of contract, June 24, 1938. Amount of contract, $9,850. A fair wages schedule was included in the contract as follows:—

	Per hour
Cable splicers	$1 09½
Carpenters	0 70
Cement finishers	0 60
Drivers, team and wagon	0 85
Drivers	0 45
Electricians	0 75
Labourers	0 45
Linemen	0 97
Linemen's helpers	0 70
Cement and concrete mixer operators:	
Steam	0 70
Gas. or electric	0 55
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
Watchman	0 45

Construction of a new Stores Building at No. 1 Aircraft Depot, Victoria Island, Ottawa, Ont. Name of contractors, Hull Construction Company, Hull, P.Q. Date of contract, June 25, 1938. Amount of contract, $59,840. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 70
Blacksmith	0 70
Brick and hollow title layers	0 90
Brick and hollow tile layers' helpers (mixing and tempering mortor)	0 50
Carpenters	0 85
Cement and concrete mixer operators:	
Steam	0 70
Gas. or electric	0 55
Compressor operator—gas. or electric	0 55
Cement finishers	0 60
Drivers, horse and cart	0 60
Driver, team and wagon	0 80
Drivers	0 45
Engineers, operating steam:	
Single or double drum	0 70
Three or more drums	0 80
Electricians (inside wiremen):	
Up to and including July 31, 1938	0 75
On and after August 1, 1938	0 80
Firemen—stationary	0 50
Engineers on steel erection	0 80
Hoist operators—gas. or electric	0 55
Labourers	0 45
Lathers, metal	0 70

	Per hour
Lathers, wood	0 65
Machinists	0 70
Motor truck driver	0 50
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plasterers:	
Up to and including July 31, 1938	0 80
On and after August 1, 1938	0 85
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Roofers felt and gravel	0 50
Rodmen—reinforced steel	0 55
Sheet metal workers	0 82
Shovel operators	0 90
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Structural steel workers	0 80
Tile setters—ornamental	0 90
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Welders on steel erection	0 80
Watchman	0 40

Construction of a public building at Minto, N.B. Name of contractor, Mr. J. Samuel Roy, Moncton, N.B. Date of contract, May 30, 1938. Amount of contract, $15,500 and unit prices for any additional work. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 70
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 35
Cement and concrete mixer operator:	
Steam	0 55
Gasoline or electric	0 40
Cement finishers	0 50
Carpenters and joiners	0 50
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Driver	0 30
Engineers on steel erection	0 75
Electricians (inside wiremen)	0 55
Lathers, metal	0 50
Labourers	0 30
Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
Ornamental iron workers	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 35
Painters and glaziers	0 50
Plumbers and steamfitters	0 55
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 35
Roofers, felt and gravel	0 35
Stonemasons	0 70
Stonemasons' helpers (mixing and tempering mortar)	0 35
Stonecutters (granite, sandstone, limestone)	0 60
Structural steel workers	0 75
Sheet metal workers	0 55
Watchman	0 25

Construction of a public building at North Hatley, P.Q. Name of contractors, J. A. Verret, Ltd., Sherbrooke, P.Q. Date of contract, June 20, 1938. Amount of contract, $8,348 and unit prices for any additional work. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 70
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 35
Cement and concrete mixer operator:	
Steam	0 55
Gasoline or electric	0 40
Cement finishers	0 50
Carpenters and joiners	0 50
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Driver	0 30
Electricians (inside wiremen)	0 55
Lathers, metal	0 50
Labourers	0 30
Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
Ornamental iron workers	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 35
Painters and glaziers	0 50
Plumbers and steamfitters	0 55
Roofers, felt and gravel	0 35
Stonemasons	0 70
Stonemasons' helpers (mixing and tempering mortar)	0 35
Stonecutters	0 60
Structural steel workers	0 75
Sheet metal workers	0 55
Watchman	0 25

Reconstruction of mooring clusters in Elevator Slip at Sarnia, Ont. Name of contractor, Mr. David G. Ross, Kincardine, Ont. Date of contract, May 30, 1938. Amount of contract, approximately $22,090.56. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Carpenters	0 70
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators: gasoline or electric	0 50
Engineers, operating steam:	
Single or double drum	0 65
Three or more drums	0 75
Fireman, stationary	0 45
Locomotive crane operators: steam, gasoline or electric	0 70
Labourers	0 40
Pile driver engineers	0 65
Pile driver firemen	0 45
Watchman	0 35

Reconstruction of breakwater at Little Anse, Richmond Co., N.S. Name of contractor, Mr. Joseph C. Gaudet, Comeauville, N.S. Date of contract, June 3, 1938. Amount of

contract, approximately $31,300. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 50
Blacksmith's helper	0 35
Boatman (Rowboat)	0 30
Driver, horse and cart	0 45
Driver	0 30
Hoist operator—gasoline	0 40
Labourers	0 30
Motor truck drivers	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
Timbermen (using interchangeably such tools as axe, adze, hammer, cross-cut saw)	0 37½

Construction of repairs to the wharf and an extension at Shoal Bay, Comox-Alberni District, B.C. Name of contractors, W. Stewart Construction Co., Ltd., Vancouver, B.C., and Ranser Burnstead, Vancouver, B.C. Date of contract, June 6, 1938. Amount of contract, approximately $7,354.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Boomman	$1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45
Pile driver foreman	1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Watchman	0 40

Demolition of buildings at Quebec, P.Q. Name of contractors, A. Deslauriers & Fils, Ltee., Quebec, P.Q. Date of contract, May 23, 1938. Amount of contract, $4,000. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 60
Drivers, team and wagon	0 65

NOTE.—Only one helper to be employed to each journeyman. No more than one apprentice to be employed to each five journeymen.

Major reconditioning of Fleet VII Landplane. Name of contractor, Fleet Aircraft Ltd., Fort Erie, Ont. Date of contract, June 14, 1938. Amount of contract, $3,201.29. The preceding fair wages schedule was also included in this contract.

Necessary conversion parts to modify two Vancouver Serval twin engine boat seaplanes to Wright J6 R975E power. Name of contractors Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, June 15, 1938. Amount of contract, $2,376. The preceding fair wages schedule was included in the contract.

Major reconditioning of Fleet model 7 Landplane 197. Name of contractors, Fleet Aircraft Ltd., Fort Erie, Ont. Date of contract, June 1, 1938. Amount of contract, $3,104.21. The preceding fair wages schedule was also included in this contract.

Supply and installation of various equipment in four Noorduyn Norseman aircraft. Name of contractors, Noorduyn Aircraft Ltd., St. Laurent, P.Q. Date of contract, June 21, 1938. Amount of contract, $1,080. The preceding fair wages schedule was also included in this contract.

The Co-operative Union of Canada has just issued a pamphlet entitled *The Organization of a Consumers Competitive,* by George Keen, General Secretary The Co-operative Union of Canada. Copies of the booklet may be obtained for ten cents from the Co-operative Union of Canada, Brantford, Ontario.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Textiles and Clothing

Montreal, P.Q.—The Montreal Dress Manufacturers' Guild and the International Ladies' Garment Workers' Union and Local No. 205 (Dress Cutters).

Agreement to be in effect from February 19, 1938, to March 15, 1941, and thereafter from year to year, subject to notice.

The agreement applies to the manufacture of ladies' misses' and children's dresses and dress ladies', misses' and children's dresses and dress ladies' and children's wearing apparel, blouses and odd and separate skirts, but not including the ladies' coat and suit industry.

The employers recognize the union as the representative of the members of the union and will maintain a union shop in the cutting department, employing none but cutters, choppers and apprentices who are union members. Employees of a cutting department to elect a shop chairman.

Hours: 8 per day, 4 on Saturday, or 9 per day from Monday to Thursday, 8 on Friday and no work Saturday, in either case a 44 hour week.

Overtime: not more than two hours overtime may be worked in any day and eight hours overtime permitted each week during the first four working days thereof; the first four of such eight hours may be paid at regular wage rates and all other overtime at the rate of time and one half.

Wages: all skilled cutters to be given an increase of $1.50 per week on March 1, 1938, and a further increase of $1 per week on January 15, 1940: all semi-skilled cutters to be paid an increase of $2 per week on March 1, 1938, and a further increase of $1.50 per week January 15, 1940. Minimum weekly wage rates from March 1, 1938, to January 15, 1940: skilled cutters $31.50, semi-skilled cutters $22; minimum weekly wage rates from January 15, 1940, to expiration of the agreement: skilled cutters, $32.50, semi-skilled cutters, $23.50.

One apprentice allowed to any shop employing seven or more skilled and semi-skilled cutters.

All apprentices employed at the time the agreement came into force and receiving $15 per week or more were to receive an increase of $2 per week from March 1, 1938 and additional increases of $2 per week each six months until graduated into the semi-skilled cutter class. New apprentices employed, to start at $7 per week, with increases each six months for three years, after which they will be paid the rate for semi-skilled cutters.

Provision is made for the settlement of disputes by arbitration, and no strikes or lockouts to occur while the agreement is in force.

Montreal, P.Q.—The Montreal Dress Manufacturers' Guild and the International Ladies' Garment Workers' Union, Local 262 (Dressmakers other than Cutters).

Agreement to be in effect from March 10, 1938, to March 15, 1941, and thereafter from year to year, subject to notice.

The terms of the agreement are similar to those summarized above for dress cutters, with the exception of the wage scale.

Minimum hourly wages: operators 36½ cents, drapers 34 cents, sample makers 36½ cents, finishers 28½ cents, pressers (male) 54½ cents, pressers (female) 36½ cents, pressers (assistant) 25 cents, examiners 27½ cents, general hands 25 cents. No piece work prices may be fixed which do not yield a rate of pay equal to the above minimum. The union may give notice 30 days before January 15, 1940, requesting a general increase in wages, when an arbitrator will be chosen, whose decision will be final and binding.

The number of apprentices in any shop shall not exceed 15 per cent of the number of employees, apprenticeship to be completed in two years. Apprentices to be paid from $7 per week during first six months to $11 during fourth six months.

Transportation and Public Utilities: Water Transportation

Montreal, Quebec.—Certain Steamship Companies and the Steamship Checkers and Coopers Employed by Them.

Agreement to be in effect from May 12, 1938, to December 31, 1938, and thereafter from year to year, subject to notice.

Employers may use their regular weekly or monthly paid employees for any checking and coopering work to be done on the wharves, such employees not to be governed by this agreement.

Preference of employment in each company to be given employees who have been employed by a company during previous successive seasons.

Hours: no work during meal periods (5 a.m. to 7 a.m., noon to 1 p.m., 6 p.m. to 7 p.m. and 11 p.m. to midnight) nor on Sundays and three holidays, if it can be reasonably avoided by the employers, and any work done during these periods and on Sundays and the three holidays, to be paid at double time.

When work on the ship has to be discontinued because of bad weather, employees to be paid one hour at the prevailing rate in addition to time already worked. Employees called to work mails, express or baggage on Sundays or the three holidays to be paid from the hour at which they are called to report and do so report with a minimum of one hour at the pre-

vailing rate. In all other cases, employees put to work either day or night to receive the full working period for call.

Wages per hour: checkers 64 cents for day work and 74 cents for night work; coopers 63 cents for day work and 73 cents for night work. (These are increases of 10 cents per hour over last year's rates.) Checkers employed temporarily as head checkers at least 5 cents per hour additional. Checkers employed in office work or in storage or as warehouseman to be paid 5 cents per hour over prevailing rate.

An employee disciplined and who considers himself unfairly treated to be entitled to submit his case to his employer, and later if he wishes, to the Shipping Federation through the checkers' committee.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Building Trades, St. Hyacinthe.
Building Trades, Hull.
Longshoremen, Sorel (amendment).
Longshoremen (Inland and Coastal Navigation), Montreal.
Dairy Employees, Quebec.
Shoe Repairers, Sherbrooke.
Garage and Service Station Employees, Montreal (amendment).
Tavern Employees, Quebec (amendment).
Barbers and hairdressers, Three Rivers (amendment).
Hairdressers, Sherbrooke.
Barbers, Farnham, etc. (amendment).
Barbers and hairdressers, Valleyfield.
Barbers and hairdressers, Rouyn and Noranda.

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are noted in the article on page 802 of this issue:

ONTARIO

Carpenters, Cornwall.
Carpenters, Timmins.
Barbers, Arnprior and Renfrew.
Barbers, Prescott, Morrisburg, etc.
Barbers, Brockville.
Barbers, St. Mary's.
Barbers, Petrolia and Forest.
Barbers, Sarnia.
Barbers, Windsor.

SASKATCHEWAN

Barbers, Yorkton.
Barbers, Melville.
Barbers, Regina.
Barbers, Moose Jaw.
Beauty Culture, Moose Jaw.
Barbers, Prince Albert.
Barbers, Saskatoon.

ALBERTA

Electric Welding and Oxy-acetylene gas welding, Edmonton.

Labour Legislation in the United States for Women

The Women's Bureau of United States Department of Labour has just issued a report entitled *State Labor Laws for Women.* The report which has been printed is in sections as follows: (I) Summary; (II) Hours; (III) Home Work; (IV) Prohibited Occupations, and Seats; (V) Minimum Wage (laws and orders).

In an introduction to the summary of the report it is stated that only four states—Alabama, Florida, Iowa, and West Virginia—have no law of any sort regulating the working hours of women. Indiana has but one limitation of hours—that prohibiting the employment of women at night in manufacturing. The remaining 43 States, the District of Columbia, and Puerto Rico have definitely forbidden the employment of women for more than a certain number of hours a day or week or have penalized all employment beyond certain specified hours by providing that it must be paid for at an increased rate. In some States, however, the number of industries or occupations coming under the law is so small as to affect only a small proportion of all working women in the State. A comparison of the laws will show that generally the States that have the shortest working day and week are also the States that regulate the greatest number of industries or occupations.

No state has regulated each industry or occupation by the passage of all types of hour laws. States that regulate daily hours sometimes fail to limit the number of weekly hours, to provide for one day of rest in seven, meal periods or rest periods, or to prohibit night work. Few States have all types of laws. In California, Delaware, Kansas, Massachusetts, New Jersey, New York, Pennsylvania, and Wisconsin there are regulations of these various kinds covering manufacturing establishments.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May issue of the LABOUR GAZETTE, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published, and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette*. Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting building trades at St. Hyacinthe and Hull, dairy employees at Quebec, longshoremen (inland navigation) at Montreal, shoe repairers at Sherbrooke, hairdressers at Sherbrooke and barbers and hairdressers at Valleyfield; the amendment by Orders in Council of agreements affecting longshoremen at Sorel, garage employees at Montreal, barbers and hairdressers, Three Rivers, Eastern Townships, Missisquoi County, Rouyn and Noranda; the correction of Orders in Council affecting shoe repairers in the Eastern Townships and tavern employees at Quebec. Requests for the extension of new agreements affecting longshoremen at Sorel and barbers and hairdressers at St. Hyacinthe were published in the June 4 issue of the *Quebec Official Gazette,* and requests for the amendment of the Order in Council for barbers and hairdressers at Hull in the June 4 issue and for bakers in Hull in the June 11 issue. In addition, Orders in Council were published in the June 4 issue of the *Quebec Official Gazette* approving the constitution and by-laws of certain joint committees and of the requiring of competency certificates in certain trades, as noted below.

Construction: Buildings and Structures

BUILDING TRADES, ST. HYACINTHE.—An Order in Council, approved June 3 and published in the *Quebec Official Gazette,* June 4, makes obligatory the terms of an agreement between certain contractors and le Syndicat National

Catholique des Métiers de la Construction de St. Hyacinthe (the National Catholic Union of Building Trades of St. Hyacinthe).

The Order in Council is to be in effect from June 4, 1938, to June 3, 1939, and shall be renewed automatically unless either party gives notice of change 30 days before the expiration date.

The territorial jurisdiction consists of the counties of St. Hyacinthe and all building contracts of $5,000 or more in the county of Bagot. and is divided into two zones: zone I the city of St. Hyacinthe, the municipalities of la Providence, St. Joseph, Village St. Antoine, the parish of Notre Dame, north and south shores; zone II all other municipalities in the county of St. Hyacinthe and also all building contracts of $5,000 or over in the county of Bagot.

Hours: 8 per day, a 48 hour week.

MINIMUM HOURLY WAGE RATES

Trades	Wage per hour Zone I	Zone II
Bricklayer, plasterers and masons:		
Contractors (personal services)	$0 70	$0 60
Journeymen	0 65*	0 55*
Electricians:		
Contractors (personal services)	0 65	0 55
Journeymen	0 45	0 35
Journeymen charged with the building and the maintenance of lines: (per month $100.00)	0 50	0 50
Plumbers and steamfitters:		
Contractors (personal services)	0 65	0 55
Journeymen	0 45	0 35
Tinsmith-roofers (any composition):		
Contractors (personal services)	0 60	0 50
Journeymen	0 46	0 30
Carpenters and joiners:		
Contractors (personal services)	0 55	0 45
Journeymen	0 50*	0 40*
Painters, paper hangers and glaziers:		
Contractors (personal services)	0 55	0 45
Journeymen	0 50*	0 40*
Lathers—metal	0 45	0 35
Lathers—wood	0 45	0 30
Marble setters	0 40	0 30
Cement finishers	0 50	0 40
Mixer operators	0 40	0 30
Hod carriers	0 40	0 30
Labourers (non-qualified workers)	0 35	0 25
Ornamental iron workers:		
Erectors	0 40	0 30
Helpers	0 35	0 25
Tile setters	0 40	0 30
Terrazzo setters	0 40	0 30
Stationary enginemen	0 45	0 35

* Bona fide contractors, licensed and recognized as such, may, with the authorization of the joint committee pay 5 cents per hour less to journeymen carpenters, 10 cents per hour less to journeymen bricklayers, masons, plasterers and painters.

These rates are, in Zone I, for some trades an increase of 5 or 10 cents per hour over the previous rates and for other trades unchanged, in Zone II decreases in most cases.

Journeymen who are handicapped may work for 5 cents per hour less than the above rates, but the proportion of such journeymen working for such lower rates may not exceed one in ten journeymen or fraction thereof on any job.

Not more than one apprentice for each five journeymen or fraction thereof.

Minimum hourly wage for apprentices in all above trades (labourers excepted): first year 15 cents, second year 20 cents, third year 25 cents.

The board of examiners appointed by the joint committee to give the certificates of competency to journeymen and apprentices.

Contracts signed before this Order in Council came into effect were to be governed by the previous Order in Council.

Maintenance men permanently employed may work 55 hours per week and must be paid the following minimum wage rates: in zone I, $18 per week for tradesmen and $15 for labourers; in zone II, $15 for tradesmen and $12 for labourers. The employer may deduct $2 per month per room and 20 cents per meal for maintenance employees rooming or boarding in the establishment.

BUILDING TRADES, HULL.—An Order in Council, approved June 3, and published in the *Quebec Official Gazette*, June 4, makes binding the terms of an agreement between certain general contractors and le Conseil des Métiers de la Construction du district d'Ottawa, Inc. (the Building Trades Council of the district of Ottawa, Inc.).

The Order in Council is to be in effect from May 1, 1938, to April 30, 1939, and thereafter from year to year unless either the majority of the contractors parties to the agreement or the building trades council give notice of change.

The territorial jurisdiction comprises the counties of Hull, Gatineau, Pontiac and Papineau, which is divided into two zones: zone I, the city of Hull and within 10 miles of its limits and also work on any contracts of more than $40,000, in the rest of the district; zone II is the rest of the territorial jurisdiction (except contracts over $40,000 which are in zone I).

Hours: 8 per day, 4 on Saturdays, a 44 hour week for skilled workmen and a 48 hour week for labourers.

Overtime: time and one-half until midnight; thereafter and all work on Sundays, church holy days and three other holidays, double time.

MINIMUM HOURLY WAGE RATES

Trades	Wage per hour Zone I	Zone II
Bricklayers	$1 00	$0 80
Masons	1 00	0 80

Contractors (including individual contractors, a family business or a corporation or association) who do not employ skilled tradesmen but who do the work themselves must be paid at least 25 per cent over the regular minimum wage rates.

Maintenance repair work done in buildings by journeymen painters, carpenters, joiners and plasterers and not requiring more than one 8 hour day is exempted from the provisions of this Order in Council.

Only one apprentice allowed to every ten journeymen for most of the trades, except plumbers, electricans, ornamental iron and bronze workers and structural steel workers; one apprentice to each four journeymen in the ornamental iron and bronze trade and one to each seven journeymen in the structural steel trade.

The period of apprenticeship for most trades is 4 years, but for cement finishers and wood lathers it is 3 years, and for ornamental iron workers 2 years. Wages for apprentices based on percentages of the journeymen's minimum wage, from 30 per cent of journeymen's rate for first year in those trades with an apprenticeship of four years, from 45 per cent for first year for those with a three-year apprenticeship and 50 per cent for first year for those with a two-year apprenticeship, to 75 per cent of journeymen's rate for last year of apprenticeship.

Maintenance men, permanently employed in churches, colleges, convents, hospitals, etc., or in public or office buildings or dwellings, hotels, manufacturing establishments, or stores, may work 48 hours per week and must be paid: in zone I, a minimum of $22 for journeymen and $17 for labourers; in zone II, a minimum of $20 for journeymen and $15 for labourers. Any overtime work is to be paid at hourly rate specified for the particular trade, except those maintenance men whose yearly salary is $1,560 or over who need not be paid overtime pay for emergency calls.

The agreement is to be administered by the joint committee of the building trades of Montreal. The contracting parties may, however, after giving 30 days' notice in the *Quebec Official Gazette*, replace this arrangement by forming a joint committee of their own.

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN, SOREL.—An Order in Council, approved June 16, and published in the *Quebec Official Gazette*, June 18, amends the previous Order in Council for these workers (LABOUR GAZETTE, August, 1937, page 922) by providing that the agreement be administered by the joint committee of the building trades of Sorel.

LONGSHOREMEN (INLAND AND COASTAL NAVIGATION), MONTREAL.—An Order in Council, approved June 3, and published in the *Quebec Official Gazette*, June 4, makes obligatory the terms of an agreement between certain steamship companies and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

The Order in Council is to be in effect from April 15, 1938, for the whole navigation season of 1938, and shall be renewed automatically for succeeding navigation seasons, subject to notice by either party.

The terms of this agreement are similar to those of the agreement previously in effect between steamship companies and l'Union des Travailleurs du Port de Montréal, Inc. (the Labourers' Union of the Port of Montreal, Incorporated), which was summarized in the LABOUR GAZETTE, June, 1937, page 695.

The jurisdiction includes the loading and unloading of ships (except the handling of grain) engaged in inland and coastal navigation in the harbour of Montreal.

Hourly wages for longshoremen: for work between 7 a.m. and 7 p.m, 49 cents per hour; for work between 7 p.m. and 7 a.m., 51 cents. (Last year's rates were 45 cents for day hours, 46 cents for evening hours and 48 cents for night hours.) Foremen to be paid 5 cents per hour extra. Hourly wages for water boys, 35 cents.

If required to work through meal hour and afterwards, time and one-half to be paid for meal hour and until relieved. Time and one-half for work on Sundays and on five specified holidays.

Longshoremen reporting for duty at specified hours will wait for orders for 15 minutes each time without pay, but must be paid full wage rate for any further waiting time.

Trade: Retail

DAIRY EMPLOYEES, QUEBEC CITY.—An Order in Council approved June 16, and published in the *Quebec Official Gazette*, June 18, makes obligatory the terms of an agreement between certain dairy companies and le Syndicat National Catholique du Lait (The National Catholic Union of Dairy Employees).

The Order in Council is to be in effect from June 18, 1938, to March 1, 1939, and thereafter from year to year, subject to notice.

The territorial jurisdiction includes the cities of Quebec and Levis and within 10 miles of their limits and also employers outside this territory who sell all or part of their products within this territory. Farmers selling their products, personally or through one or more employees, are not, however, governed by this Order in Council.

Hours: in manufacturing establishments, 57 per week between October 1 and May 1, and 60 hours between May 1 and October 1; in delivery work, 65 hours per week. On Sundays or holy days of obligation, no work in the manufacturing establishment, and no packing of ice cream in cabinets or otherwise in customers' establishments, except in emergency cases. When

a holiday is immediately before or after Sunday, one of the two days to be a working day. No milk delivery after 1 p.m. on Sunday. The joint committee may, in emergency and special cases, permit longer hours on delivery. Employees of small dairies which do not have more than two employees may work 70 hours per week.

Overtime: time and one-fifth.

Minimum weekly wages: foreman $25, testers $18, ice cream and butter makers $18, labourers $15, shippers $18, salesmen on the delivery of milk, ice cream or any other dairy products $17, helper on delivery except those delivering ice cream $8, helper on delivery of ice cream $12, deliveryman $16; employees of small dairies (those with not more than two employees) $15 for deliveryman, $8 for helpers; artisan, that is a man working for himself who buys milk or milk products to resell them, and who furnishes his own vehicle or horse, must be paid at least $20 per week for first three months and $25 thereafter.

Employers furnishing room and board to an employee may deduct $1 per week per room and 20 cents per meal, but the employee is under no obligation to accept.

Uniforms required to be furnished by the employer.

Salesmen are not responsible for losses due to credits authorized by the employer.

Service: Custom and Repair

SHOE REPAIRERS, SHERBROOKE.—An Order in Council, approved June 3, and published in the *Quebec Official Gazette,* June 4, with correction to it published in the June 11 issue, makes obligatory the terms of an agreement between l'Association des Maîtres-Cordonniers des Cantons de l'Est (the Association of Master Shoemakers of the Eastern Townships) and le Conseil Central des Syndicats Catholiques et Nationaux de Sherbrooke, Inc. (the Central Council of National Catholic Unions of Sherbrooke, Inc.).

The Order in Council is to be in effect from June 4, 1938, to June 3, 1939, and thereafter from year to year subject to notice and the territorial jurisdiction comprises the city of Sherbrooke.

Working hours will be divided as follows: from Monday to Thursday inclusive, from 7 a.m. to 6.30 p.m.; Friday and Saturday, 7 a.m. to 11 p.m.

Minimum weekly wage rates: experienced workmen (those who have completed three years of apprenticeship) $15 for class A, $12 for class B and $10 for class C; apprentices from $2 per week for first six months to $8 during third year.

A schedule of prices which must be charged customers for each operation is included in the agreement.

Service: Custom and Repair

GARAGE AND SERVICE STATION EMPLOYEES, MONTREAL.—An Order in Council, approved June 16 and published in the *Quebec Official Gazette,* June 18, amends the previous Order in Council for these workers (LABOUR GAZETTE, June, page 697) by adding to the parties to the agreement the Montreal Automobile Trade Association, Ltd., and the Automobile Service Association, Inc., to the party of the first part and the Montreal National Labour Council and l'Union International des Machinistes, local 631 (the International Union of Machinists, local 631) to the party of the second part.

Service: Business and Personal

TAVERN EMPLOYEES, QUEBEC.—A correction to the original Order in Council was published in the *Quebec Official Gazette,* June 18, which does not affect the summary of the Order in Council as given in the LABOUR GAZETTE, June, page 698.

BARBERS AND HAIRDRESSERS, THREE RIVERS AND DISTRICT.—An Order in Council, approved May 27, and published in the *Quebec Official Gazette,* June 4, cancels the previous Order in Council which was summarized in the LABOUR GAZETTE, June, page 698 and amends the previous Orders in Council for this industry (LABOUR GAZETTE, October, 1937, page 1158 and February, 1938, page 215) as follows:

The territorial jurisdiction comprises the city of Three Rivers and the towns of Cap-de-la-Madeleine, Louiseville, Shawinigan, Grand'Mère and La Tuque.

Minimum wages for male barbers and hairdressers: $15 per week plus 50 per cent of receipts in excess of $22 made by the employee during the week, or $20 per week without percentage. (This is an increase, as the former rate was $15 plus 50 per cent of receipts in excess of $25.) Minimum wages for female hairdressers, $14 per week (an increase of $2 per week). Male barbers and hairdressers and female hairdressers, working less than five days a week to be paid at the rate of $20 per week for male barbers and hairdressers and $14 for female hairdressers; if working five days or more in the week, the full week's wages to be paid.

Increases were also made in certain of the prices charged for the different operations.

HAIRDRESSERS, SHERBROOKE, LENNOXVILLE AND MAGOG.—An Order in Council, approved June 3, and published in the *Quebec Official Gazette* June 4, with correction in the issue of June 18, makes obligatory the terms of an agreement between les Syndicats des Maîtres Coiffeurs du district de St. François (the Union of Master Hairdressers of the district of St. Francis) and le Syndicat des Employés-Coiffeurs du district de St. François (the Union of Employed Hairdressers of the district of St. Francis.)

The Order in Council is to be in effect from May 16, 1938, to May 15, 1939, and thereafter from year to year subject to notice.

The territorial jurisdiction comprises the city of Sherbrooke and the towns of Lennoxville and Magog.

Hours: in all cases opening at 8 a.m.; closing hours vary in Sherbrooke and Lennoxville, 7 p.m. from Monday to Thursday, inclusive, 9 p.m. on Friday and 10 p.m. on Saturday; in Magog 6 p.m. Monday and Thursday, 8 p.m. Tuesday and Wednesday, 10 p.m. Friday and 11 p.m. Saturday.

Minimum wages for men's and ladies' hairdressers, $13 per week plus 70 per cent of receipts over $20 taken in by the employee; extra employees $2 per day plus 70 per cent of receipts over $3. A schedule of prices to be charged customers for each operation is included. Handicapped workers may refer their case to the joint committee who may set a lower rate.

Not more than one apprentice allowed in any one barber shop. Apprentices must serve three years and at the same time take a course in hygiene.

Wages for apprentices from $5 per week for second six months to $9 during third year.

BARBERS AT FARNHAM, COWANSVILLE, BEDFORD AND SWEETSBURG.—An Order in Council, approved June 3, and published in the *Quebec Official Gazette,* June 4 amends the previous Order in Council for this trade (LABOUR GAZETTE, June, page 698) by making one change in the schedule of prices to be charged to customers.

BARBERS AND HAIRDRESSERS, VALLEYFIELD.—An Order in Council, approved June 3 and published in the *Quebec Official Gazette,* June 4, makes obligatory the terms of an agreement between le Syndicat des Maîtres-Barbiers et Coiffeurs de Salaberry de Valleyfield (The Union of Master Barbers and Hairdressers of Salaberry de Valleyfield) and le Syndicat des Employés-Barbiers et Coiffeurs de Salaberry de Valleyfield (the Union of Employed Barbers and Hairdressers of Salaberry de Valleyfield).

The Order in Council is to be in effect from June 4, 1938, to June 3, 1940, and until a new agreement comes into effect.

The territorial jurisdiction includes the town of Salaberry de Valleyfield and within five miles of it. Ladies hairdressing parlours are not included except for haircuts or any other service which might be performed in a barbershop.

Hours: 60 per week. Shops to open at 8 a.m. and to be closed at noon on Mondays, at 8 p.m., on Tuesday, Wednesday and Thursday, 10 p.m. on Friday and 11 p.m. on Saturday.

Minimum wage rates for barbers and male hairdressers $15 per week; extra employees 60 per cent of receipts made by the employee. For any barbers or hairdressers (male or female) who work by the job, a schedule of wages which must be paid to the employee for each operation is given in the agreement.

A handicapped worker may have his case referred to the joint committee which may set a lower wage rate for him.

Not more than one apprentice allowed for each shop. Wages for apprentices, from $6 per week during second six months to $12 for sixth six months.

BARBERS AND HAIRDRESSERS, ROUYN AND NORANDA.—An Order in Council, approved June 16, and published in the *Quebec Official Gazette,* June 18, amends the previous Orders in Council for these trades (LABOUR GAZETTE, November, 1935, page 1063 and June, 1938, page 699) as follows:

The Order in Council will remain in effect until October 5, 1941, and shall be renewed automatically until a new Order in Council is passed.

Wages: hairdressers (male or female) who are extra employees or employed on weekends or before a holiday to be paid $2.50 per day plus 50 per cent of receipts of $7 and more.

Apprentice hairdressers (male or female) to be paid $6 per week for second three months to $12.50 after two years.

Joint Committees

The constitution and by-laws of the Joint committees set up under the following agreements were approved by Orders in Council and published in the June 4 issue of the *Quebec Official Gazette*

Building Trades, Quebec,
Building Trades, Joliette,
Building Trades, Sherbrooke,
Building Trades, Hull (amendment),
Tavern Employees, Quebec.

Certificate of Competency

The certificate of competency was made obligatory by Order in Council as noted in the *Quebec Official Gazette,* June 4, for the following trades:

Building Trades, St. Hyacinthe.

Some of the results of recent research on the control of or prevention of silicosis are given in an information circular recently published by the Bureau of Mines, United States Department of the Interior (The situation in regard to progress in silicosis prevention in Canada was reviewed in the LABOUR GAZETTE for July, 1937, page 713).

In summarizing the background of the problem in the United States the following observations is made by Mr. D. Harrington, Chief of the Health and Safety Branch, Bureau of Mines:

"Research in connection with occupational diseases, including silicosis or, more definitely, pneumoconiosis, has been prosecuted much more actively in North American countries during the past 5 or 10 years than in any other known period. This applies particularly to the United States, owing largely to the fact that in recent years compensation for ill health presumed to be caused by industrial work of certain kinds is being paid to a far greater extent in this country than previously. . . . . "

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers or employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, and June, 1937, page 640; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507.

Ontario

Construction: Buildings and Structures

CARPENTERS, CORNWALL.—An Order in Council, dated May 28 and published in *The Ontario Gazette*, June 4, makes binding the terms of a schedule of wages and hours for carpenters in the town of Cornwall and adjacent area, from June 14, 1938, to February 1, 1939.

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1937, page 1274. The minimum wage rate is unchanged at 65 cents per hour and a 44-hour week.

CARPENTERS, TIMMINS.—An Order in Council, dated May 28 and published in *The Ontario Gazette*, June 4, makes binding the terms of a schedule of wages and hours for carpenters in the town of Timmins and neighbouring townships, from June 14, 1938, to April 1, 1939.

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1937, page 1390, with these exceptions:

Hours are reduced from 10 to 9 per day for the first five days of the week, and from a 55 to a 50-hour week.

Minimum hourly wage rate is increased from 67 to 70 cents.

Service: Personal and Domestic

BARBERS, ARNPRIOR AND RENFREW.—An Order in Council, dated May 10 and published in *The Ontario Gazette*, May 21, makes binding the terms of a schedule governing the barbering trade in the towns of Arnprior and Renfrew and within one mile of them and the village of Braeside, from May 31, 1938, "during pleasure."

The regular working period is the hours during which barber shops are permitted to be open under municipal by-laws, with no work on Sundays, on eight specified holidays, Wednesdays after 12.30 p.m., except the weeks in which a holiday occurs.

Minimum wage rates: those employed full time on a straight salary basis, $18 per week; those employed full time on a commission basis or a salary plus commission, $12.50 per week plus 60 per cent of the proceeds in excess of $19 from the work of the employee; those employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturday, $7.50 per week plus 60 per cent of proceeds in excess of $12.50 from the work of the employee; those employed on Saturday or the day before a holiday and on the previous evening only, $5 per week plus 60 per cent of the proceeds in excess of $7.50 from the work of the employee; those employed Saturday or the day before a holiday, $4 per day or part thereof plus 60 per cent of the proceeds in excess of $6 from the work of the employee; those working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof plus 60 per cent of the proceeds in excess of $4.

No deduction from wages may be made for materials supplied, laundry service or operating expenses of any kind. A scale of prices for each operation is included in the schedule.

BARBERS, PRESCOTT, CARDINAL, IROQUOIS AND MORRISBURG.—An Order in Council, dated May 10 and published in *The Ontario Gazette*, May

21, makes binding the terms of a schedule of wages and hours for barbers in the town of Prescott and the villages of Cardinal, Iroquois and Morrisburg from May 31, 1938, "during pleasure."

The terms of this schedule are similar to those summarized above for the towns of Arnprior and Renfrew, with the same wage and commission rates.

BARBERS, BROCKVILLE.—An Order in Council, dated May 10 and published in *The Ontario Gazette*, May 21, makes binding the terms of a schedule of wages and hours for barbers in the town of Brockville and within one mile of it, from May 31, 1938, "during pleasure."

The terms of this schedule are similar to that summarized above for the towns of Arnprior and Renfrew, with the same wage and commission rates.

BARBERS, ST. MARY'S.—An Order in Council, dated May 10 and published in *The Ontario Gazette*, May 21, makes binding the terms of a schedule of wages and hours for barbers in the town of St. Mary's and within one mile of it, from May 31, 1938, "during pleasure."

This schedule is similar to that summarized above for barbers at Arnprior and Renfrew, with the exception of the wage scale:—

Minimum wage rates: those employed full time on a straight salary basis, $18 per week; those employed full time on a commission basis or a salary plus commission, $13 per week plus 65 per cent of the proceeds in excess of $20 from the work of the employee; those employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturday, $7.50 per week plus 50 per cent of proceeds in excess of $12.50 from the work of the employee; those employed on Saturday or the day before a holiday and on the previous evening only, $5 per week plus 50 per cent of the proceeds in excess of $7.50 from the work of the employee; those employed Saturday or the day before a holiday, $3.50 per day or part thereof plus 65 per cent of the proceeds in excess of $5.50 from the work of the employee; those working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof plus 65 per cent of the proceeds in excess of $4.

BARBERS, PETROLIA AND FOREST.—An Order in Council, dated May 10 and published in *The Ontario Gazette*, May 21, makes binding the terms of a schedule of wages and hours for barbers in the towns of Petrolia and Forest, from May 31, 1938, "during pleasure."

This schedule is similar to that summarized above for barbers at Arnprior and Renfrew with these exceptions:—

Minimum wages for those employed full time on a commission or a salary plus commission basis, $13 per week plus 60 per cent of proceeds in excess of $19 from the work of the employee; those employed only for Saturday or the day before a holiday, $3.50 per day or part thereof, plus 60 per cent of the proceeds in excess of $4 from the work of the employee.

BARBERS, SARNIA.—An Order in Council, dated May 10 and published in *The Ontario Gazette*, May 21, makes binding the terms of a schedule of wages and hours for barbers in the city of Sarnia and the village of Point Edward and adjacent area, from May 31, 1938, "during pleasure."

This schedule is similar to that summarized above for barbers at Arnprior and Renfrew, with the exception of the wage scale:—

Minimum wage rates for barbers: those employed full time on a straight salary basis, $22 per week, those employed full time on a commission basis or a salary plus commission, $15 per week plus 65 per cent of the proceeds in excess of $22 from the work of the employee; those employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturday, $7.50 per week plus 65 per cent of proceeds in excess of $12.50 from the work of the employee; those employed on Saturday or the day before a holiday and on the previous evening only, $5 per week plus 65 per cent of the proceeds in excess of $7.50 from the work of the employee; those employed Saturday or the day before a holiday, $4 per day or part thereof plus 65 per cent of the proceeds in excess of $6 from the work of the employee; those working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof plus 65 per cent of the proceeds in excess of $4.

BARBERS, WINDSOR.—An Order in Council, dated May 10 and published in *The Ontario Gazette*, May 21, makes binding the terms of a schedule of wages and hours for barbers in the city of Windsor, from May 31, 1938, "during pleasure."

This schedule is similar to that summarized above for barbers at Arnprior and Renfrew, with the exception of the wage scale:—

Minimum wage rates for barbers: those employed full time on a straight salary basis, $20 per week; those employed full time on a commission basis or a salary plus commission, $15 per week plus 50 per cent of the proceeds in excess of $22 from the work of the employee; those employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturday, $10 per week plus 50 per cent of proceeds in excess of $15 from the work of the employee; those employed on Saturday or the day before a holiday and on the previous evening only, $7 per week plus 50 per cent of the proceeds in excess of $10 from the work of the employee; those employed Saturday or the day before a holiday, $5 per day or part thereof plus 50 per cent of the proceeds in excess of $7 from the work of the employee; those working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof plus 50 per cent of the proceeds in excess of $4.

Saskatchewan

Service: Personal and Domestic

BARBERS, YORKTON.—An Order in Council, approved June 17, and published in *The Saskatchewan Gazette,* June 30, makes binding the terms of a schedule of wages and hours in the barbering industry in the city of Yorkton and within five miles of it.

The Order in Council is to be in effect from July 10, 1938, "during pleasure."

Hours: the regular working period for all employers and employees is the hours during which barber shops are permitted to be open under the municipal by-laws. The shops shall not open before 8 a.m., nor remain open after 6 p.m. on any day except Saturday when they may remain open until 11 p.m., or the day before a holiday when they may remain open until 9 p.m. No work on Sundays or on eight specified holidays.

Overtime: for all hours in excess of 54 hours in the week, 30 cents per hour or 60 per cent of proceeds taken in by the employee, whichever is greater.

Wages: barbers given full time employment, $15 per week of 54 hours; those given part time or casual employment, 30 cents per hour or 60 per cent of proceeds taken in by the employee, whichever is greater, but in no case shall the hours of employment be less than three consecutive hours.

A schedule of minimum prices which must be charged customers for each operation in the trade is included.

BARBERS, MELVILLE.—An Order in Council, approved June 17, and published in *The Saskatchewan Gazette,* June 30, makes binding the terms of a schedule of wages and hours in the barbering trade in the town of Melville and within five miles of it.

The Order in Council is to be in effect from July 10, 1938, "during pleasure."

The terms of the schedule are similar to those summarized above for barbers at Yorkton except:

Barber shops may be open till 11 p.m. on the days before a holiday. The number of holidays is seven in the year.

Minimum wages are $15 per week of 60 hours, with overtime pay for all work over 60 hours in the week.

BARBERS, REGINA.—Orders in Council, approved May 20, and published in *The Saskatchewan Gazette,* May 31, cancel the previous Order in Council for this trade (LABOUR GAZETTE, September, 1937, page 1037) and make binding a new schedule for the barbering trade in the City of Regina and within five miles of it.

The Order in Council to be in effect from June 10, 1938, "during pleasure."

Hours: the regular working period for all employers and employees shall be the hours during which barber shops are permitted to be open under municipal by-laws, but barber shops and barber schools shall not be open before 8 a.m. nor remain open after 6 p.m. on any day except Saturday or the day before a holiday, when they may be open until 8 p.m. No work on Sundays, on eight specified holidays, nor on the afternoon of Wednesdays except in those weeks in which a holiday occurs.

Minimum Wages: for those given full time employment, $16 per week of 56 hours or 60 per cent of the proceeds taken in by the employee, whichever is greater; for those given part time or casual employment, 30 cents per hour or 60 per cent of proceeds, whichever is greater, but in no case shall hours of employment be less than three consecutive hours; for any instructor employed in a barber school, $18 per week.

Schedules of minimum prices which must be charged customers for each operation in a barber shop and in a barber school are included.

BARBERS, MOOSE JAW.—Orders in Council, approved May 20, and published in *The Saskatchewan Gazette,* May 31, cancel the previous Order in Council for this trade (LABOUR GAZETTE, September, 1937, page 1037) and makes binding a new schedule for the barbering trade in the city of Moose Jaw and within five miles of it.

The Order in Council to be in effect from June 10, 1938, "during pleasure."

Hours: the regular working period for all employers and employees shall be the hours during which barber shops are permitted to be open under municipal by-laws, but barber shops may not be open before 8 a.m. nor remain open after 6 p.m. on any day except Saturday or the day immediately before a holiday when they may remain open until 9 p.m. No work on Sundays nor on eight specified holidays.

Minimum wage rates: for those given full time employment, $15.70 per week of 57 hours or $13 per week of 48 hours, plus 30 cents per hour for all hours in excess thereof or 60 per cent of the proceeds taken in by the employee, whichever is greater; for those given part time or casual employment, 30 cents per hour or 60 per cent of proceeds taken in by the employee, whichever is greater, provided that in no case may hours of employment be less than three consecutive hours.

A schedule of minimum prices which must be charged customers for each operation is also included.

BEAUTY CULTURE, MOOSE JAW.—Orders in Council, approved May 20, and published in *The Saskatchewan Gazette,* May 31, cancel the previous Order in Council for this trade (LABOUR GAZETTE, November, 1937, page 1277) and make binding the terms of a new schedule for this trade in the city of Moose Jaw and within five miles of it.

The Order in Council to be in effect from June 10, 1938, "during pleasure".

Hours: beauty parlours not to open before 8 a.m., nor remain open after 6 p.m. on any day except Saturday when they may remain open until 9 p.m. No work Sundays, on nine specified

holidays nor on Wednesday after 12 noon except on Wednesday of a week in which a holiday occurs.

Minimum wages: for experienced "beauticians" (that is those who have been employed in the industry under tuition for 18 months or more) who are given full time employment, $13 per week of 45 hours, plus 30 cents per hour in excess thereof or 50 per cent of the proceeds taken in by the employee, whichever is greater; for experienced "beauticians" given part time or casual employment, 30 cents per hour or 50 per cent of proceeds taken in by the employee, whichever is greater, provided that in no case may the hours of employment be less than three consecutive hours; for any person approved by the advisory board, other than an experienced "beautician," who is given full time or part time employment, 25 cents per hour or 50 per cent of the proceeds taken in by the employee, whichever is greater, provided that in no case may the hours of employment be less than three consecutive hours.

A schedule of minimum prices which must be charged for each operation is included.

BARBERS, PRINCE ALBERT.—An Order in Council approved May 20, and published in *The Saskatchewan Gazette,* May 31, makes binding the terms of a schedule of wages and hours for barbers in the city of Prince Albert and within five miles of it.

The Order in Council to be in effect from June 10, 1938, "during pleasure."

The terms are similar to those of the schedule for barbers at Moose Jaw, as summarized above, with this exception:

Minimum wages for those given full time employment, $14.50 per week of 52 hours or $13 per week of 48 hours, plus 30 cents per hour for all hours in excess thereof or 60 per cent of proceeds from the work of the employee, whichever is greater.

BARBERS, SASKATOON.—An Order in Council, approved May 20, and published in *The Saskatchewan Gazette,* May 31, makes binding the terms of a schedule of wages and hours for barbers in the city of Saskatoon and within five miles of it.

The Order in Council is to be in effect from June 10, 1938, "during pleasure".

Hours: the regular working period for all employers and employees in the industry are those during which barber shops are permitted to be open by municipal by-law, but barber shops, may not be open before 8 a.m. nor barber schools before 9 a.m., and neither may be open after 6 p.m. on any day except Saturday or the day before a holiday when they may remain open until 8 p.m. No work on Sundays, on eight specified holidays, nor on Wednesdays after noon except Wednesdays of a week in which a holiday occurs.

Minimum wages: for those given full time employment, $13 per week of 48 hours plus 30 cents per hour for all hours in excess thereof or 60 per cent of the proceeds taken in by the employee, whichever is greater; for any person who is given part time or casual employment, 30 cents per hour or 60 per cent of proceeds taken in the employee, whichever is greater, provided that in no case may the hours of employment be less than three consecutive hours; for instructors in a barber school, $18 per week.

Schedules of minimum prices which must be charged customers for each operation in a barber shop and in a barber school are included.

Alberta

Manufacturing: Metal Products

ELECTRIC WELDING AND OXY-ACETYLENE GAS WELDING, EDMONTON.—An Order in Council, dated May 30, and published in *The Alberta Gazette,* June 15, makes binding the terms of a schedule of wages and hours governing all electric arc welding, oxy-acetylene gas welding, cutting or burning (other than automobile fender or body repair work) performed by any welder or burner, carried on by any welding shop, welding contractor, sub-contractor, or any other person, firm or corporation who employs a man or men to perform electric arc welding, oxy-acetylene gas welding, cutting or burning in the city of Edmonton and within a radius of 10 miles of the main post office.

The Order in Council to be in effect from June 25, 1938, "during pleasure."

Hours: 9 per day, 4 on Saturdays, a 49 hour week.

Overtime: time and one-half for first six hours, double time thereafter; double time for work on Sundays and six specified holidays.

Minimum wages for electric and/or oxy-acetylene gas welders and cutters: holders of first class (Alberta) proficiency certificates 70 cents per hour; holders of second class (Alberta) proficiency certificate 60 cents per hour; holders of third class (Alberta) proficiency certificate 45 cents per hour.

At least one holder of a first class certificate must be employed by each employer in the industry.

One apprentice allowed each bona fide welding contractor or welding shop for each three welders employed, but where less than three welders employed, one apprentice is allowed.

Wages for apprentices to be at least 25 per cent of rate for first class welder in first year, 35 per cent in second year and 45 per cent in third year of apprenticeship.

The International Labour Office has published a report entitled *Problems of Industry in the East* by Harold Butler, Director of the International Labour Office.

The report is based upon the personal impressions of social and economic conditions gathered by Mr. Butler during a journey of three months in Middle Asia in the Winter of 1937-38. The report is divided into four parts with a preface and introduction. One part of the report deals with social-economic conditions in India; another with conditions in French India, Ceylon and Malaya and the third section refers to the Netherlands Indies. The final section sets forth Mr. Butler's conclusions as a result of his visit to the East.

PRICES, RETAIL AND WHOLESALE IN CANADA, JUNE, 1938

Cost of living, prices of staple articles and index numbers

THE movement in prices during the month was slight. In retail prices the cost of a weekly family budget of staple foods, fuel and lighting, and rent was somewhat higher in June than in May, a slight decrease in the cost of fuel being more than offset by an advance in food and in rent. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics was lower for the last week in June than at the end of May due mainly to declines in the prices of grain, flour and raw sugar.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.56 at the beginning of June as compared with $8.50 for May; $8.52 for June, 1937; $7.79 for June, 1936; $6.67 for March, 1933 (the low point in recent years); $11.10 for June, 1930; $10.18 for June, 1922; $16.92 for June, 1920 (the post war peak); and $7.49 for June, 1914. The increase in the month under review as compared with the previous month was due to higher cost of meats, eggs, and potatoes which more than offset declines in the cost of butter, milk and flour. Including the cost of fuel and rent with that of foods the total budget cost $17.43 at the beginning of June as compared with $17.36 for May. Fuel was slightly lower due to lower prices for United States anthracite coal in some cities. Rent averaged higher in several localities. Comparative figures for the cost of the budget on certain previous dates are: $17.20 for June, 1927; $16.33 for June, 1936; $15.41 for June 1933 (the low point during recent years); $20.58 for June, 1922; $26.92 for July, 1920 (the post war peak); and $14.27 for June, 1914.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of 1926 as 100 recorded a small decline during the week ended July 1 following a period of stability since the middle of May. The figures are 79·9 for the week ended July 1, the lowest point recorded since the end of 1936; 80·4 for the week ended June 24; 80·2 for that ended June 17; and 80·3 during each of the preceding four weeks. The latest figures available on a monthly basis are for May when the index number was 80·3 as compared with 84·6 for June, 1937; 72·3 for June, 1936; 63·5 for February, 1933 (the low point in recent years); 93·4 for June, 1929; 97·8 for June, 1922; 164·3 for May, 1920 (the post war peak); and 64·4 for June, 1914. In the classification according to chief component materials, the Vegetable Products group was considerably lower the decline being due mainly to lower prices for grains, flour and raw sugar. The index of the Non-Ferrous Metals group rose from 66·7 about the end of May to 69·5 at the beginning of July there being increases in the prices of copper, lead, zinc and tin. Other groups showed comparatively little change.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of June of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The price of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rate for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR

(Continued on page 814)

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended July 1, 1938, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 806*)

GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18¾%; Clothing, 18¾%; Sundries, 20%.

in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

Meat prices continued upward in the average. Beef prices were little changed in the Maritime Provinces, but were higher in most other localities. Sirloin steak averaged 28·5 cents per pound in June as compared with 26·9 cents in May and rib roast 21 cents per pound in June as compared with 20 cents in May. Mutton roast was up from 24·9 cents per pound in May to 25·8 cents in June and fresh pork roast from 24·3 cents per pound to 24·8 cents. Boiled pork ham was 1 cent per pound higher at an average of 58 cents per pound. The price of eggs averaged higher in most localities, the Dominion average for fresh grades being up 2 cents per dozen to 27·9 cents. Milk was fractionally lower, seasonal decreases being reported from several cities, mostly in the province of Quebec. Creamery butter declined from an average price of 33·3 cents per pound in May to 31·4 cents in June. The price in June, 1937, was 28·5 cents per pound. Flour was fractionally lower, averaging 4·2 cents per pound, as compared with 4·3 cents in May and 4·5 cents in June, 1937. The price of onions has been gradually upward since the beginning of the year, averaging 7 cents per pound in June and 5·2 cents in January. Potatoes averaged 93 cents per ninety pounds as compared with 87 cents in May and $1.53 in June, 1937. United States anthracite coal again averaged slightly lower at $14.18 per ton, the price in May being $14.38. Coke was down from $12.20 per ton in May to $12.02 in June. Rent was slightly higher, there being increases in several cities.

Following are the prices per ton reported for Welsh coal, "cobbles" and "French nut": Halifax, $15.50; Charlottetown, $14; Moncton, $16; Saint John, $15 and $14; Quebec, $13.50; Three Rivers, $15 and $14; Sherbrooke, $14.75; St. Hyacinthe, $14.50; Thetford Mines, $16.75; Montreal, $14.25 and $14.50; Ottawa, $16; Kingston, $15; Belleville, $15.50; Peterborough, $16; Oshawa, $15; Toronto, $15; St. Catharines, $15; Hamilton, $14.50 and $14; Brantford, $16.25; Galt, $16; St. Thomas, $16; Cobalt, $19; Timmins, $18.50; Port Arthur, $17.25; Winnipeg, $20.

"Industrial Psychology in Canada" is the title of an article appearing in the summer issue of *Occupational Psychology* published by the National Institute of Industrial Psychology, Aldwych House, London, England.

The article, written by Professor W. D. Tait, of the Department of Psychology, McGill University, and Dr. N. W. Morton, also of Montreal, describes the developments in industrial psychology in Canada during the past few years.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly, give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries. The following notes afford information as to recent changes according to groups of commodities in several of these countries.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number on the base 1930=100, was 102·0 for May as compared with 103·1 for April, a decrease of 1·1 per cent for the month. Food prices were practically unchanged but industrial materials and manufactures declined 1·6 per cent during the period. The decline in May continued the almost unbroken fall in prices since July, 1937. Compared with the same month last year the May index showed a decline of 7·9 per cent.

The *Statist* index number on the base 1867-1877=100, was 91·4 at the end of May as compared with 93·5 at the end of April, a decrease of 2·2 per cent for the month. The index of the price of foodstuffs declined 1·1 per cent while the "all materials" index declined 3·1 per cent. As compared with the general index for May, 1937, which stood at 106·2, this month's index showed a decline of 13·9 per cent.

COST OF LIVING.—The Ministry of Labour's index number on the base, July, 1914=100 was 155 at the first of June as compared with 156 at the first of May. The index for food prices was 138 as compared with 139 at the first of May, the decrease being chiefly the result of reductions in milk prices, and also the result of a fall in bread and flour prices in some localities, all of which more than offset a rise in prices of potatoes, butter, eggs and tea (following the recent increase in the tea duty).

France

WHOLESALE PRICES.—The General Statistical Office index number on the base 1914=100, was 643 for May as compared with 619 for April, an increase of 3·9 per cent for the month. The index of food prices increased 4·7 per cent during the same period while the index of prices of industrial materials increased 3·2 per cent. The index based on gold currency, 1914=100, showed a decrease of 5·2 per cent.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office on the base 1913=100, was 105·4 for May as compared with 105·6 for April. The prices of agricultural products increased 0·1 per cent; industrial raw materials and semi-manufactured goods decreased 0·5 per cent and there was also a decrease of 0·1 per cent in prices of manufactured goods.

COST OF LIVING.—The official index number on the base 1913-1914=100 was 125·9 for May as compared with 125·6 for April. Both food and clothing prices increased 0·5 per cent while the indexes for rent and sundries were unchanged. There was a decrease of 1·4 per cent in the cost of heat and lighting materials.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 100 for March as compared with 103 for February. The index of prices of all foods was 97 as compared with 102 for the previous month while the index for non-foods was 102 as compared with 103 in February.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933 to June 1934=100, was 105 for April, recording a decline of 1·9 per cent from the figure for March. The index for the food group was 112, having declined 2·6 per cent from the March figure. From November, 1937, to March, 1938, the cost of living index was stationary at 107.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number on the base 1926=100. was 78·7 for April as compared with 79·7 for March, a decrease of 1·3 per cent for the month. The April index, continuing a decline which began last August, was 10·6 per cent lower than the index for the same month in 1937. Of the ten major groups which make up this index, nine recorded decreases during April, the greatest decline being one of 2·7 per cent in farm products.

COST OF LIVING.—The index number of the Industrial Conference Board on the base 1923=100 was 86·5 for May as compared with 86·8 for April. All groups making up the index contributed to the decline except the Sundries group which was unchanged.

(a) Average for year. (b) First of month. (c) 15th of month. (d) End of month. (e) New series. (g) Until end of 1927, "Dr. Lorenz." (h) Prior to 1929, the number of commodities was 236, from January 1926 to December 1933, 502, and since January, 1934, the number is 567.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Winnipeg Bylaw Closing Dance Halls on Sunday Declared Valid

A Winnipeg by-law requiring dance halls to remain closed on Sunday was held valid by the Manitoba Court of Appeal on March 14, 1938, in upholding the conviction of the licensee of a dance hall for violation of the by-law. The appeal was a stated case on the question of the correctness of the magistrate's decision that the by-law was not legislation under the head of "criminal law" and so within the exclusive legislative jurisdiction of the Dominion Parliament under the British North America Act.

The Winnipeg Charter gives the city power to make by-laws "for preventing persons carrying on their ordinary trades, callings or occupations on Sunday and the violation of the Sabbath Day," and also "for regulating and licensing all theatres. . . public halls and places of public meetings, including. . . . music and dance halls. . . "

Several judgments dealing with Sunday legislation and laws providing for the licensing of certain businesses were referred to and it was held that while a law merely to require the observance of Sunday was "criminal law," yet since the by-law was a local regulation fixing closing hours for other days as well as on Sunday and the city undoubtedly had power to license and regulate businesses within its borders, such municipal regulation could not be considered "criminal law" in the sense that that subject was reserved to the Dominion Parliament. *Rex v. Bachynski,* 1938, 2 D.L.R. 703.

Injunction Restraining Toronto Fur Workers' Union from Picketing Dissolved

A motion to continue an interim injunction restraining picketing by Toronto locals of the International Fur Workers' Union was refused and the injunction dissolved with costs to the defendants by Mr. Justice Roach of the High Court of Justice of Ontario on June 3 on the ground that the plaintiff, president of the company bearing his name, had not made a full disclosure of the facts to the Court when the interim injunction was granted by Mr. Justice McTague on May 11.

Mr. Justice Roach pointed out that the law requires any party asking for an injunction to bring before the Court "all facts material to the determination of his right to that injunction; and it is no excuse for him to say that he was not aware of the importance of any facts which he has omitted to bring forward. It is quite clear that every fact must be stated, or even if there is evidence enough to sustain the injunction, it will be dissolved."

The plaintiff was a member of the Toronto Independent Furriers' Association which on April 16, 1936, entered into a collective agreement with the local unions of the International Fur Workers' Union. The agreement provides that "no contracting or sub-contracting or piece work shall be permitted inside or outside the factory except in emergency when the Unions' consent will be obtained. No employee shall be permitted to do home work in any case whatsoever." It was also stipulated that there "shall be no strike, lockout or stoppage of work pending the negotiation or settlement or arbitration of any dispute during the continuance of the agreement. The parties agree to appoint a permanent conciliation committee to be composed of two members of the association and two members of the union....and all controversial questions shall be referred to it....."

It appears from the evidence that the plaintiff had leased premises to his brother-in-law under such conditions that the union believed the lease to be merely a subterfuge to circumvent the subcontracting and home work clauses of the agreement. In the opinion of the Court, it was not necessary to determine this point until the trial of the action but it was held that there was sufficient evidence to justify the defendants in believing that it was a subterfuge.

The contention of the plaintiff was that there was no dispute between him and his workmen but that the difficulty arose out of a dispute between two factions of the union, one affiliated with the American Federation of Labour and the other with the Committee for Industrial Organization. The Court found that on the question of home work and subcontracting, there was in fact a dispute. Further, the plaintiff had concealed, on the application for the interim injunction, the fact that the defendants had tried to have the dispute dealt with under the arbitration clause in the collective agreement and shortly after the picketing began the plaintiff agreed to submit the matter to arbitration under the agreement and the pickets were withdrawn. Subsequently, the plaintiff refused to submit to arbitration. In the opinion of the Court, the plaintiff, under these circumstances, had no right to a restraining order. Whether or not one would be granted on a fresh application was not for this Court to determine. *Herman vs. Klig et al,* (1938) Ontario Weekly Notes, 270.

Damages Awarded Quebec Workman who was refused Membership in Union

Judgment was given for the plaintiff in an action brought in the Superior Court of Quebec for $500 damages against the defendant trade union for delaying to re-instate the plaintiff as a member of the union so that he was unable to obtain employment for some three months. The plaintiff was awarded $195 with interest and costs by Mr. Justice Gibsone.
